Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Margin of error based on 90% confidence interval.

Source: U.S. Census Bureau's American Community Survey 2012-2016 American Community Survey 5-year estimates; compiled by the Hawaii State Department of Business, Economic Development & Tourism.

Table 9.-- POPULATION WITH A HIGH SCHOOL DIPLOMA OR HIGHER STATE OF HAWAII, BY CENSUS TRACTS: 2012-2016

[In percent. Persons 25 years and over. Average characteristic of an area over the entire 5-year time period. Data is based on a survey]

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Census tract 75.02 (Halawa Valley) and census tract 9814 (Nimitz-Airport Commercial) have too few occupied housing units to provide a reliable estimate. They are not included in this listing.

2/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Margin of error based on 90% confidence interval.

Census tracts with a population estimate of zero are not shown in the table. These include census tracts 9800, 9803, 9806 9807, 9808, 9810, 9812, and 9813 in Honolulu County. It also includes census tract 9800 in Maui County. Census tract 412 in Kauai County (Niihau and Kaula) was listed as having no population, but it was probably due to nonresponse to the survey.

An '-' entry indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

1/ Margin of error based on 90% confidence interval.
