HENRI D. REY
TAHITI
(SOCIETY ISLANDS)

7th Jan. 1941

My Dear Mr. Wilson

Smoking your nice cigarettes while writing these few lines. we have not had any American cigarettes for sometimes and as Louise said to you candy are also scarce. In general we are without many things, this war is affecting us very much.

The Benicia got in here the 4th Jan. and we heard plenty of the good time the Tahitians have had in Honolulu. We really ough to have a direct connection, let us hope that the Matson will make it and permanently in the futur.

I am glad that Louise have reached Long beach safely, as she was always afraid that something may happen to her in connection with the immigration autority.

As you say your new position as a Director of the Territorial Department of Social security is giving you chance or apportunity to do more good to the poor people of Hawaii. Yes! work for helping is the only instrument for prosperity. U.S. has proven.

Have posted few days ago a letter for our friend Mr. Hills also a little package containing new process bananas, this is one of my patented articles. I dont know if this will appealed

to you, however last it you may like it.

I have noted your trip to the main-land and very please that the result of it was that what we all heard of, the nominating of President Roosevelt for the third term. We all hope if not sure that his present nomination will open the way to a better world to live in.

My wife and family joining me for thanking you for the box of present you have sent us.

Wishing you more enjoyable time in your new position.

Sa maitai oe

January 11th, 1941.

My dearest Johnnie: —

You were sweet to invite us - and send those pictures. And also - the coffee which was wonderful! Kona, I guess eh? It certainly has a different flavor than these blends we get up here - and Norman being so crazy about coffee as you know - loved it. We wanted everyone to taste it — and yet we didn't want to waste it on them. A bit selfish I'd say. Just like the 'bike'. We only gave one to a person. We'd fill them up on something else.

Am so glad you went up to see mama. I got a letter from her the other day - and she was really awfully glad to see you.

It was so much fun seeing you Johnnie - and you were sweet to give us so much of your time - and letting us go to the Convention so many times. I got a big kick out of it.

Just finished a letter to mama asking her if it was possible to get my birth certificate. Could you help her out on that - or speed her up a bit. She might not realize that I am a bit panicy - after a friend of mine just died - and his wife had the worst time trying to get her money. She was born in a very small town

in Missouri - and the only proof she had was from an old family bible - otherwise she would have had to wait for several years. It made me think - that I'd better get busy. Didn't you say one night here - that they didn't start keeping the records until 1912 or something? That puts me in a hell of a mess doesn't it - my year being 1898 I think. Nov. 1st. The other may not be well enough to exert herself in any way - so if you can help her out any in this little affair - would you Johnnie please? and know that I'll appreciate it just heaps - knowing especially - that you are probably the busiest man in Honolulu.

Oh lee - X mas has come and gone.

Dr. Walter

We had Norman for home for 15 days then he left to go back for the Rose Bowl game at Pasadena. You know of course that Stanford won! Oh, we were so thrilled, especially that we let Norman cut his vacation short to see it. Oh, I hate to have him go so far. It really kills me - but I guess this is one time when mothers can't be selfish. The next time we see he when he gets married. I just shouldn't love my family as much as I do I guess. I'd be a lot better off.

How is your wife, Johnnie. I didn't know her awfully well - but I remember that she was very very sweet. Give her our love. and keep lots for you. and thanks a million for being so sweet to us - and we all hope that you'll be home to come back before long. Oh w better

yet - that we can make a trip home. Yes, I'd love that - but as Mormons believers is - we are afraid to take the chance - and I don't feel that I should go alone - he works so hard - and he's the one who needs a vacation - not me. And yet - I'd like to see mama before it is too late. It's rather a hard decision to make

You see - I started to close before but seemed to go right on - and I feel that I could go on indefinitely - but its mamas birthday today - and I want to get an air mail off right away - so I'll bring this to an end - hoping to hear from you again if you have a minute

Lots + lots of love —

always - Bea

Honolulu. T. H.

Dear friend.

Aloha, Aloha & Aloha. I am wondering how you and the family are enjoying the sunny Hawaii?

We often get the news & music of Hawaii over the air from Royal Hawaiian Hotel & Hawaii calls and cool time. I recall the grand time we all had during the national democratic convention and thereafter across the continent.

I thank you very much for the snapshot which you sent me, since then I have sent them to my parents and they too have enjoyed very much.

that it will be splendid to extend the Hawaiian aloha by passing out the lei like the ones you brought over, to the guests coming in to see our shows.

Could you, as you have stated and help us by sending over 1500 lei free from the Hawaiian Tourist Bureau before Feb. 14

I wish to thank you in advance for this kind favor. I shall pay for the express charge if there is the Rone.

Our winter weather is here with temperature around 7 above zero and snow on the ground.

We are rather worried with the flu epidemic around here — all the hospitals are filled with victims — Ohio state University is closed on account of epidemic.

Where will you be next summer? I may pay a visit to Hawaii and take colored

The movies of our trip to California came out good; you & JB. were very good subjects in the picture. I wish to thank you very kindly for all the grand receptions you extended me in Southerness. Now I am back to hard work and plenty to do until next vacation, ~~next~~ July for two or three months, which depends on to where I go.

Iwalani Smith is very popular and carries on the Hawaiian hospitality very well.

She is a good entertainer and her graceful hula ~~captivates~~ the Haole with charms.

Feb. 14 & 15 at the International House we are giving Hawaiian program on the International night with all the other nations.

The Hawaiian group is taking part in a big way and put on two big shows in the main Ball room.

We feel during the two nights of activities

HERBERT HOOVER

RECEIVED
JAN 30 1941
Ans'd
TERR. DEPT. OF SOCIAL SECURITY

Dear Mr. Wilson:

As a resident on the Stanford campus and as a trustee of Stanford University I have had contact with many of the problems of the University and its students. Over the years there has been much improvement but the costs are greater for the University and for the student. The problem of those boys and girls of outstanding ability who can no longer afford to come to Stanford is often before me. We need leaders, and those who struggle learn how to lead.

We Stanford men and women have cause for deep satisfaction in the opportunities that were ours at Stanford. I entered the University just fifty years ago this fall with the first four-year class. The generosity of Senator and Mrs. Stanford enabled the University to give me and my classmates our education as an outright gift. Since that opening day some forty thousand students have matriculated at Stanford. For each of these, the donors to Stanford have provided the major portion of the cost of their University training.

The average expenditure made by the University on behalf of each one of its students in the past forty-nine years is $1,800.

Steadily the proportion of the educational costs borne by student fees has increased from virtually nothing in my day to almost one-half today. And, as we look forward into Stanford's next half century, nothing appears more certain than that out of the present world conditions will emerge higher educational costs for the University and for its students to share. Outstanding boys and girls of meager finances will need help.

I know of no manner that money can be given to do more good than by direct aid to such boys and girls. Therefore I have proposed that on the occasion of Stanford's Fiftieth Birthday we alumni establish the Stanford Re-investment Fund. My proposal was favorably received and it was suggested that I submit the idea to others and get their opinion and advice -- hence this letter of inquiry.

Participation in the Stanford Re-investment Fund would be obtained either by restoring to Stanford the average cost to the University of our education ($1,800), or by agreeing to do so (a) by a single gift; (b) giving notes for annual payments divided in such installments as the donor may decide; (c) by provision in wills of this amount of which the University is to be notified; (d) the University to take out a "20 year endowment" insurance policy in favor of the University upon which the premium is to be paid by the donor through the University -- the cost would depend upon age, being $90.77 maximum per annum at 30 years of age, and $112.59 maximum per annum at 50 years of age; (e) those who have already made gifts to the University to be credited with the amount of their gifts -- although I believe many of these would undertake the new burden. Re-investors gifts to Stanford would be used for direct aid to Stanford students, either for current use or for endowment of scholarships as determined by the Board of Trustees to be the more urgent requirement.

This gift would constitute a part in the Stanford Fiftieth Birthday gift program and as the gift for the year in the Stanford Fund Annual Appeal.

What do you think of the plan? Would a substantial number join? Particularly, can you suggest a better name? It does not seem to me that Stanford Re-investment Fund is an ideal choice.

One objection has been voiced. In Stanford alumni, as in all other groups, there is a wide diversity of ability to contribute. Some can now contribute but small amounts; others can do, and are doing, much more. It is suggested that alumni of means might consider that by one gift of $1,800 they would close the door on further participation.

I do not think this objection valid as most of those of financial ability would probably desire to continue their support in accordance with their means, thus supplementing the gifts of those whose finances do not permit them to participate fully.

I shall appreciate hearing from you.

Sincerely,

Herbert Hoover

BOSTON

February 11 1941

Dear Johnny

The advertiser of Jan 29 has it that you have 55 women making sugar cane hats. I remember talking about this week you and wonder how I could get a few to see how they would go here in the East. Wont you drop me a line & let me know about it.

We have had a long hard winter but the days are getting longer and after this month the worst of it will be over. I imagine things are booming in the Islands with all the defense program

most businesses here are running full, but everyone has extra fingers crossed as to how much Uncle Sam will take away in taxes.

Iona & I have kept well and escaped the flu which so many people have had. Iona is still very anxious to finish the book about her father if it is even possible to get back the papers from Miss Hobbs which seems doubtful

Both my boys are now on the Gov payroll in the Navy which is all to the good.

Aloha to Jeannie & yourself

Dear Friends John & Jennie

Things have been happening to me so I just could'nt get set to answer your letter - I want to thank you for the pictures, they were good, very thoughtful of you,

The whole family is with us for a couple of months and there is a lot of excitement around here, guess I am to old to be bothered with children, I like them when they dont cry,

Eleanor keeps saying she is going to write to you but its so easy to put it off untill tomarrow.

Oliver still tells folks how superior Kona coffee is to the standard brands, so you will know it was appreciated,

Eastern Air Lines is having a big season, and they almost worked me to death, I was on the night

shift for two months ~~to go be~~ with one night to go before changing to day work, but never done the last shift. had a heart attact. just a mild one. got worn out trying to get bye with too little sleep and no regular meals, was in bed a few days and off the job (with pay) for two weeks. now I am on days. no more night work, Air craft inspection is a very trying job. a lot of responsibility. so many vital gadgets to check,

Of course I can take my S.S. pension any time but it would just about buy my gasoline & hair cuts. sure I have hair, but am geting less gray hair every year.

See bye your pictures you still hang on to yours.

Mike is having a lot of hugs and kisses from our grand-children but we are not used to having so many around and when they go home we will relax.

You never saw this city, and you are missing a big show. nothing like it any place on earth. cant discribe it. guess its the bigest show on earth. gambeling wide open. two horse tracks, 4 dog tracks, midget auto races, Spanish Hi Li. night clubs bye the hundreds, everything open all night, thousands on the beaches. its eat - drink and sober up. we that live here the year around are glad to see the season close, but its geting to be quite a summer resort, for its just like good old Hawaii in summer time. cool breeze, warm sun, just enough rain to keep things green and clean. Hope some time you can stop over with us,

Now I am going to sign off, hope to hear from you soon.

To you and Jenni

My dear Johnny
Aloha Kaua a nui :-
Your letter reached me yesterday but I could not get to the Post office as I was not feeling so good. had a cold and the day was cold.

I am sorry Johnny that I made such a mistake when I wrote you I believe I said all Taxes was paid except the 1940
But still I might have thought it but did not write.
But it seems to me I had written it could be deducted out of the sale price.
and when I got your letter and the itemised deduction which included Tax
I took it for Granted that was all there was to it.
But I could see my mistake now.
I should have made this

Money Order to the Tax
Collector and save you
the trouble.
In case it gets there
late I hope the little
extra will cover it.
I am writing at P.O.
and not so good.
Nui ke Anu o nei
Better today.
Aloha a nui loa to
Kini we all think
of her and you to Johnny.

April 3rd 1941

Mr + Mrs Wilson

Dear Friends

Just to say "Hello", + let you know that you are all in our minds all the time.

We had a very nice trip back perfect weather all the way, + arrived safely home after 14 days. There was a storm here a week before our arrival, so strong they said, if it lasted, be terrific damage; + they were worried about us, at sea thinking we surely be in it.

Its just about 3 months we been without letters from the outside world, + it seems like eternity to wait; Wasn't you surprise to see the Benacia turning up so soon? No sooner she was cleaned up + in order when these parties came + hired her. To tell you the truth, I didn't like the bargain as our own Capt. Hansen was not to go, they preferred their own, but the mate + engineer were the old boys. Now we hear, they arrived battered, met several storms; when will they get back? God alone knows. Our chickens are doing all right, one of the roosters died

the vetenarie, says its diptheria, we have, more we had lots of trouble before we were allowed to land the wire netting for their house.

Wardine regulations are very strict here. Jack Waterhouse wrote to my husband, that the second parties of the "Benecia" had some little troubles there also. I hear that a Matson boat is suppose to come next month or June. The girls are so sad, they have no ~~ab~~, pep or ambition, always thinking of Honolulu.

We had the visit last week of 2 cruisers & 4 destroyers, for 2 days. it was a treat to see those boats, they never seen that kind before. I'm thinking, I may send you that picture of your grandfather Wilson, of the Duff, by the Matson boat.

Drop us a line when you can & let us know how you both are; Charley says if we live long enough, we may see Honolulu a gain. With our best wishes to you both

Sincerely W. A. Brown

RECEIVED
APR 15 1941
Ans'd
TERR. DEPT. OF SOCIAL SECURITY

Mr. John H. Wilson
P. O. Box 2744
Honolulu, Hawaii

Dear Sir:

We have the pleasure of advising you that at a meeting of this Board held yesterday, April 10th, your application dated November 15, 1940, for re-registration as a Professional Engineer was given due consideration and granted for the Civil and Structural Branches. This re-registration was granted without recourse to a written examination as has been the Board's policy in cases where original registration was granted by exemption from examinations. Our records indicate that your appointment as Honolulu Postmaster was made in 1934 and that your former registration did not expire until April 30, 1935. These facts are accepted by the Board as prima facie evidence of your non-practice in the Territory in the capacity of a professional engineer since the expiration of your original registration.

In compliance with the above action of the Board, Certificate No. 174 (your original registration number) has been issued in your name as a Professional Engineer and is enclosed. This certificate is good until April 30, 1942, when it may be renewed upon payment of the regularly prescribed renewal fee.

In addition to this there will soon be issued to you (in accordance with Section 7039) an embossed certificate on which will be indicated that you are a Registered Professional Engineer having especially qualified in the Civil and Structural Engineering Branches. This certificate is for purpose of display if your practice falls within the purview of the law as outlined in the 6th paragraph of Section 7037 and will supplant the certificate issued you on Oct. 12, 1933, which was limited to the Civil Engineering branch only.

Every registered person is urged to display his certificate unless there is some very special reason for not doing so.

Yours very truly,

Wm. C. Furer, Secretary

WCF:DCO
Encl.

Honolulu, Hawaii.
April 15th.1941.

My dear Ed:-

Your letter of the 11th.ultimo received a few days ago and as usual glad to hear from you. Before proceeding any further, I wish you will convey to Lorna my apology for not answering her letter which was received last November.

She made inquires about the hats and also wished to contact some of the curio dealers who dealt in the coacoanut shell belt buckels etc. I made inquires and after sometime I learned that none of the curio sellers made these belts themselves,but, were made on order by any of the following persons or concerns:-

Bertram Fern, 3204 Duval St. Honolulu
John A. Oya & Co., 2021-Republican St Honolulu
Clarence W. Kinney, 1365-Liliha St. "

I gave these people Lorn's address and suggested that they contact her direct. Whether they have or not I have never returned to check. I found them all very busy as they were filling Christmas orders at the time, but, promised to write and send her samples and prices of what they made. They are the ones who supply the local curio stores with calabashes, wooden platers, cocoa-nut shell buttons, buckles etc.

Soon after receipt of Lorna's letter I was loaded with additional duties and responsibilities. As Director of the Departemnt of Social Security in the Territory I became also Director of the Departemnt of Surplus Commodities for Hawaii and my first duty was to build an organization to distribute surplus foods to the needy throughout the Territory. This of course compelled me to be away on the islands most of December and January.

The first shipment of foods arrived in Febuary and I had to be ready to receive it. Build and rent warehouses, arrange for cold storage and route deliveries besides the selecting of personnel and the breaking in of the new organization. We are now just receiving the second shipment, which consists of flour, beans, lard, bacon, cereals, potatoes, and raisins. The total number of recipients is close on 20,000 including children and I am quite ceratin they are very appreciative. I have seen people kneel and say their prayers before accepting the foods. This is a great government we have who cares for its poor considering what is going on elsewhere.

Now, re-sugar cane hats. I started a weaving school in Febuary last year with one teacher and by December 31 she trained 55 women of all ages, ranging from young girls of 20 to women of 45 to 50. The school is free and open to anyone desiring to learn to weave.

My object is to give some women an oppotunity to earn a living and get off of relief. My funds are limited, but, with the legislature now in

M000554

session I am in hopes of receiving increased appropriations so that this branch of my work can be conducted on a larger scale.

The next problem in this work is securing the material. This material is the tassel of the sugar cane and since the sugar cane tassels only during the months of October and November the collecting and gathering of same can only be done during these months, and not anybody are able to do the collecting or gathering of the material in the cane fields. The plantations has no objection to the collecting of the cane tassels just prior to harvesting.

Last year we ran short of material in the school so was obliged to use substitutes, such as the lauhala and cocoanut leaves, but, this is not quite so good.

The Stetson Hat Company of Philadelphia had a representative call on me and when informed that we could not at this time produce enough to meet local demands he simply dropped the idea.

We have now about 75 trained weavers and their entire output is disposed of as fast as it is produced, hence I have not written Lorna on this matter and given her prices.

Until 500 or more women are trained to weave I can see no future for exporting any quantity because a woman can only weave a hat in two to three days per hat, depending upon the style of weave and width of braid.

The cost of material does not cost much over 15 cents per hat, but, until we get properly organized to do a big job and again, there is no sense laying up a lot of capital in material if there are not enough weavers on hand to use it.

The cost of the hats today are about as follows:-

The weaver receives $2.50 to $3.00 per hat for weaving the braid which is about 10 fathoms long and from 5/8 inches to 7/8 inches in width.

The braid is then taken to a hatter who charges one dollar for sewing and blocking and an additional fifty cents for a sweat band and 25 cents to 50 cents for a ribbon, therefore the total cost comes to about as follows:-

	Coarse weave	Fine weave
Weaving	$2.50	$3.00
Sewing and blocking	1.00	1.00
Sweat Band	.35	.50
Ribbon	.25	.50
Total	$4.10	$5.00

I have not seen Miss Hobbs for some time. She wrote to me from Hilo last week making inquiry if I had learned anything new about the book. She is anxious to see it printed also. I intend to speak to Charlie Hite the next time I see him and see if I can get any new information out of him. If you recollect he said when you were here, that everything was in the hands of the Trustees of the Lauka Estate and that they would handle the matter.

Notwithstanding, the growth and the up to dateness of the new and modern Honolulu, I much prefer the old Honolulu and for the same reason I reckon, you much prefer Papeete to the noise and racket in a modern city. Some day I expect to visit Tahitit and I cannot postpone this trip much longer as I am getting along in years.

My father and Grandfather were both born in Papeete not very far from Point Venus. I understand my Great Grandfather, Charles Wilson conducted a school and church for the English Mission of London not very far from Point Venus. He was one of the first band of missionaries that arrived in Tahiti some time during the year 1792.

Louise was telling me the difficulty she had with the American Consul in Papeete. She also said, he was under the influence of liquor most of the day while on duty. If this is true, the State Department in Washington should know it for the good of the service. I am personally acquainted with the Secretary of State, Cordul Hull. We have known each other for a period of at least 25 years.

If you feel the Consular service in Tahiti is not what it should be and much room for improvement, I wish you would write me your experienec with that office and those of some of your friends, and I'll see what can be done.

The Matson Company are advertising another excursion to Tahiti this coming summer via New Zealand. I would take one of these trips if there was a chance of getting back to San Francisco or Honolulu within a reasonable time. I would like to make a trip to the Tuamotos before returning and I was just wondering about how much time it would take to go to the outside islands and return to Papeete. Have they a regular line of schooners plying between the islands operating on a regular schedule or just an occasional visit do they make?

I am pleased to learn that Louise is having no difficulty in standing the cold, however, that is true to form. I have always heard from old timers and have also learned from personal experience that a person from the tropics can take the first winter okay, but, look out for the next winter.

Please keep me posted as to your whereabouts as I may be called to Washington at most anytime. I made two trips last year and one the year before.

Hoping this letter will find you both in the best of health, and wishing you our best wishes and aloha, we are,

Yours Sincerely,

Honolulu, Hawaii.
April 28th.1941.

My dear Agnes:-

I am in receipt of your several letters and as usual always glad to hear from you. Since returning last September I have been kept unusually busy, hence I have not been able to make replies as promptly, as I should.

I have had a new duty loaded upon me, that is the distribution of Surplus Commodities for the U.S. Department of Agriculture. Consequently, I have been away from Honolulu a great deal, as I had to build an organization on each island to handle the surplus food. We made our first distribution in Febuary and will continue as long as the farmers will produce more food than the regular markets can absorbe.

After getting the Surplus Commodity Organization organized and the food delivered to all the needy in Hawaii, the local legislature convenes then I had to remain close by and keep them informed as to the needs of my department and at the same time keep everything moving. It was like running a three ring circus.

You wrote me some time ago about old Hawaiian fables and folklore. The only publication that I know of that is anyway reliable is a set of books gotten out by the Bishop Museum. You may find it in the Los Angeles library and if not, try and locate Pro. Bryan. The last I heard of him he was at the head of the Los Angeles Museum, he may have a set of these books as he was at Bishop's Museum for many years, leaving there to accept the position with the Los Angeles Museum.

The name of the books I refer to is, "Memoirs of teh Bernice Muahi Bishop Museum of Poynesian Ethnoly and Natural History." This includes the Fornander Collection of Hawaiian Antiquities and Folk Lore.

Now as for the curios for a shop to be opened in Hollywood or elsewhere. This is quite an undertaking and needs much study and much money.

Hawaiian curios cannot be gotten from one source without paying a very high price, as all the local dealers have quite a time to secure goods for their shops. Tapa, shells, and most of the lauhala mats come from Tahiti and Samoa. The Aloha shirts are handled by Los Angeles Jews who have located in Honolulu. The umekes, puniu's and all wood crafts are handled or made by small shops where not more than four or five people are employed and consequently wants cash for all sales.

I have under my control about 60 women who do nothing else but make hats out of coconut leaves and quake the sugar cane tassel, and we cannot meet the local demand. To mmk fill an order which I have for a New York firm I would have to employ 500 to 600 girls. All I have been able to

teach in my school of weaving has been the 60 women who are now e rning as much as $20. per week who were formerly on relief. I am endeavoring to have 500 able to weave by next December, then I will be able to ship hats out of the Territory, otherwise, we sell all we can make right here in Honolulu. By the way, I promised you a hat. I have bee waiting for the hot days to come before shipping it to you as I know straw hats are not in season until late spring.

I am enclosing a sketch of a hat, so fill in the measurements as to height of crown, width of brim and give me your ideas of shape or would you wish the regular Hawaiian type for women. Wide brim and low crown.

Getting back to the shop. The lauhala slippers isenot a new idea. A japanese has a slipper factory where he makes the Japanese sandles or slippers if you wish to call it that, who uses rubber taken from old auto tires for soles and lauhala inner soles with lauhala toe holders.

There has been such a heavy tourist business here for the past 18 months that every lauhala mat or purse weaver is busy like my hat weavers and from what I learn from some of my friends who are in the rettil business in Honolulu tell me that they have a very difficult time to get a supply to meet there demands. Hence they have Tahiti and Samoa connections, however, I will contact one of these importers and see what he has to say about your proposition, and will let you know by next mail.

A clipper is suppose to leave tomorrow so will try and get this letter in that mail.

Lena Machado is back. She gave two concerts and the Civic Auditorium was packed, standing room only. Kini and I attended or rather tried to attend, but, when we were informed at the box office that there were no seats we went to a movie instead. She is talking about returning to S.F. where she claims she has an offer.

I see Ione occasionally but only long enough to say hello. I hope this letter will find you in the usual good health, and with our very best wishes and aloha, I am,

Me kealoha piha,

POP

Honolulu, Hawaii.
May 1st.1941.

My dear Agnes:-

Since writing to you the other day I have learned from the wife that the purses are bought from the weavers in the rough and the finishing, that is, the lining and the zipper are made by the stores themselves or they have someone do it for them. She suggested that I write to Molokai to some of my friends there and secure from them their prices for the purses in the rough only and that you and your friend could and probably prefer to do the lining yourselves. Probably you could develop some new ideas yourselves. With that in mind I have written to my friends on Molokai and hope to receive from them in a very short time prices and samples, which I will forward on to upon receipt.

The local product of purses are lined with both tappa and the Tahitian or Samoan cloths.

I have a second cousin residing at Long Beach who is a native of Papeete, Tahiti. Her name is Mrs. Louise Pe mann and she resides at 941-E. Seaside Blvd. Her mother was a first cousin to my father and she was born in Tahiti and is part French and Tahitian. Speaks French fluently. I would suggest that you call on her and get acquainted with her, but, do not say anything about opening a store in Hollywood. You may show her your purse and ask her if she can get or import the tappa from Tahiti and to get prices. From last accounts there is no transportation servive with Tahiti these days, but, I understand the Matson Company are running one or two of their steamers for the summer only.

I am leaving here for Hilo Tuesday and will be gone about 10 to 14 days and during that time I intend to visit Kona, Hawaii and will also visit Maui and Molokai before returning. During my visit, I will be on the lookout for anything that I think you could use.

Upon calling upon my cousin you might inform her that I wrote to you to visit her. She has only been in Long Beach since last December and must be very lonesome. Although she is with her husband, I am sure she would be glad to meet someone from Hawaii, especially you. She has grown children still in Tahiti and may be returning soon, so it would be a good idea to contact her as soon as possible.

With love and best wishes from Wini and myself,

O wau no

Your Pop.

MRS. EDWARD BOWDITCH WATSON
MISHAUM POINT
SOUTH DARTMOUTH, MASS.

May 6th, 1941

Dear Johnnie:

I knew you were very busy with politics and when Caie died, I thought you might be taking over his job. Even though a letter from you is always welcome in this family we felt that you probably had a lot on your mind besides having enough on your hands.

Thanks for the addresses. No, I haven't heard from any of the people whose names you listed. How interesting your work has been in connection with the development of the native industries. I hope, some day, that I can help with this work and particularly that part of it which can tie it up to the fashion centres here in the east, or rather, the U. S. I gather that you have done that already from what you wrote of the Stetson Hat Company.

At the prices you give --- that is, the cost price, what do you sell the hats for at retail? I'd love to have one made for me and would prefer the coarse woven braid. My head size is 22½ inches, and I like to have a 1 inch wide ribbon for a sweat band instead of a leather one. The ribbon is softer and also, not so hot. Shall I send you a check for $4.10 plus the profit you should make for your department? Edward's head size is 7 & 1/8th. Why don't you make his of the fine braid. We'd much rather have the hats made up at home so when we wear them we can say: "These were made in Hawaii!" If you have any braid on hand, I'd like to have about 3 bundles --- that is, enough for 3 hats. I'm having a sale of Hawaiian things here at Mishaum on June 30th or the week before --- before we turn our house over to our tenants --- and if I had some of the braid, I would like to show it along with my hat. Will you also send me some of the tassel too so that I can show people the cane tassel and what the hats are made from. People are always interested to see the raw material from which the finished product is made.

I am writing to Bertram Fern and Clarence W. Kinney to send me cocoanut buttons and buckles. for my sale. But you might give them a ring and ask them if they wouldn't send me a collection for my sale. I don't care about the calabashes or wooden platters. The calabashes are not appreciated here and the wooden platters are so expensive that people won't pay the price when the demands for war relief are so great. Cocoanut buttons, buckles, belts (if these are made strong). I had some belts sent to me once from the Homes Commission from Maui or Molokai, I can't remember, and I found that the metal used for the buckle hooks were made of tin and was glued on to the cocoanut fish or whatever the buckle design was. And when used around here (less than a fortnight) the tin became unglued to the fish. Rather unsatisfactory they were; and the string braiding used between the fishes were rather slazie --- not firm enough. I am not decrying the braiding. I think it is all right, but needs to be firm and of an attractive design; and certainly the buckle fastenings must be of durable material. All in all, they were cheap looking and certainly wore that way. You can't get away with that sort of stuff when here one can get good stuff for little money. I have just bought two

New Bedford Exchange
2-2979

Mrs. Edward Bowditch Watson
Mishaum Point
South Dartmouth, Mass.

~~belts~~

belts made by the blind in Brooklyn. The weave is very fine and the figures on ~~the~~ one belt is of sailors and the other of privates. The top edge has a blue strip and the bottom edge the red and the middle ground is all white against which the figures are placed very close together. The navy figures are in blue of course, and the army ones in khaki color. Very nice work and the retail price is $2.75. The buckles are anchors for the navy belt and stirrups for the army or whatever the infantry insignia is.

We have moved to Mishaum after having been with Edward's brother and wife for the winter. Since their two sons and our two sons have all gone into service, we decided that we would join forces for the winter. We are happy to be down here again. It is lovely and so quiet and peaceful. Edward goes up by train or motors up now and again when I decide to go to Boston. We have rented our house again to the same family for the past four years, and have no definite plans yet for the summer. But, we shall pull out of here on July 6th.

I am sending Jennie and you a~~n~~ photograph of myself taken on March 23rd, the day Lawrence Judd gave a talk in Milton at the Milton Club to benefit Milton's Second Rolling Kitchen for England. I sent the Star-Bulletin a letter about it which you will probably see one of these days. With the picture goes a great deal of aloha to you and Jennie. Me kuu aloha a pumehana always.

Lorna

P. S. Edward wants to know when you are going to move up to Pelekunu, and he also adds that ~~he says~~ since he's got 2 sons defending the Atlantic he is not so sure that the Pacific Ocean is as safe as the Atlantic.

HENRI D. REY
TAHITI
(SOCIETY ISLANDS)

6 June 1941

My Dear Mr Wilson

Your letter dated May 29th duly received thank you very much for writing and much more for what you have sent us, you are really spoiling us, the Childrens were tickled to death when they heard from me that Mr. Wilson have sent more Candies.

Have heard none from our friend Mr. Hills but hope to hear on the next boat as I have ask him something.

About the bamboo material. They are selling here from 2 to 3 francs, sometime little more for each sheet, they usally sell by bundle of two sheets. The price differ according to the quality.

For the small white also yellow shells. They are selling from 12 to 20 francs the string of about yard and half long.

We felt very desapointed when the "Benicia" came in, that the boy whom we gave the package for Mrs. Wilson did not deliver it, instead have giving for his friend in S. Francisco through him he could'nt find your address. however we can'nt worry over that.

The next occasion we will mail it.

Closing with Taora oe

Honolulu, Hawaii.
June 5th.1941.

My dear Agnes:-

Your hat should be finished next Saturday too late for this weeks boat so will send it next week. You did not say how you wanted it trimmed, so will send it and let you do your own trimming.

I will also send you a few purses in the rough and enough tapa to line them. There are many grades of purses costing all the way from forty cents each to a dollar each depending upon quality fo lauhala and workmanship. I learned a lot about purses and weaving on my recent trip to the other islands and I have got about 50 women interested in weaving purses alone.

I think you can make more money by sticking to one or two articles and specialize on them. I can send you a hundred or so of these purses in the rough and you can line them and sew the zippers on. You can buy the zippers much cheaper in Los Angeles than you can here. They cost fort cents each here, but, since Sears, Roebuck opened their new store the price now is nineteen cents each for a 12 inch zipper.

I would suggest that after you have fixed your samples take them to Bullocks or some other big store and tell them you can furnish them at the rate of 100 a week if they want that many.

I can buy some tapa here that is imported from Samoa at $2 per sheet and there is about 21 square feet in a sheet, so you will have to figure your time plus the cost of the purse, tappa and zipper and the freight on same from here to Los Angeles.

If you think it would be better to have them sewed here and finished here before shipping, I will have to do some experimenting first before I could quote on a price.

Mrs. Ellen Kahanu, Manager of the Craftshop for the Blind, an employee in my department is sailing on the Lurline this week, for San Francisco, Portland, Seattle, back to San Francisco then to Los Angeles where she will be for at least 4 to 6 days prior to sailing for Honolulu on the steamer leaving Los Angeles about July 10 or 11. I am giving her your address and it would be to your interest to meet her. She is familiar with the products of our shop and also we intend to expand after July first, hence her visit to the cities stated above.

Mrs. Kahanu was a Miss Stewart. Daughter of Harry K. Stewart, now deceased. He served under me while I was Mayor as Building Inspector. He was an achitect by profession. Mrs. Stewart, mother to Ellen is a sister to Andrew Poepoe one of the Singing Boys in New York City. Mrs. Nora Markham, Mrs. Jennie Gilliland and Mrs. Boyd are all sisters to Harry and aunts of Ellen. You now have her pedigree. I am sure you will like her for she has plenty of common sense.

Aloha and best wishes
Pop.

Honolulu, Hawaii.
June 10th.1941.

My dear Lorna:-

I will be mailing your hats next week. Ed's hat is finished, but I am holding it up until yours is finished. Jennie did not like the one I had ordered for you so I ordered that one to be sold and another be made for you. This will be ready for mailing by first mail next week.

Mrs. Mabel Sanderlin, my secretary, left here last Friday to visit her mother who resides at 57-Damon Ave., Walnsn Highlands, Boston. She has with her three or four rolls of straw sufficient to make four hats. I have requested her to call on Ed at his office and show you the straws. You may make your selection or you can have the four hats if you can dispose of them after we finish with our experiments .

I am buying a sewing machine for straw hats from the Wilcox Gibbs Sewing Machine Co in New York City and Mrs. Sandelin is to use these straws in their experiments. I want to be certain that the machine they are offering can do the work claimed. She will not call on the machine people until after her visit with her mother. The hats can be made up to the size and shape you desire and I am writing to Mrs. Sandelin to thsi effect.

The tassel which you asked for can not be gotten at this season of the year as the sugar cane only tassels during the months of October, November and December. This is another reason I cannot accept large orders for hats. The material for hats has to be gathered during tassel season, and this I did last tassel sea on with my own personal funds which is very limited. Since the experiment is a success, I finally got the 1941 legislature give me sufficient funds to expend during the next two years, hence the purchase of the sewing machine.

I have started another industry which is going over really better than the hats, as there are more people able to weave available in this particular line of weaving. I have all the old gals including some young ones who are not afraid of loosing the polish on their finger nails, making purses out of lauhala. Kona and Puna on the island of Hawaii and the entire lee side of Molokai are our big lauhala districts and we have more poor Hawaiians living in these districts than in any of the other districts.

I now have them making purses in the rough, that is, just the lauhala portion. After it reaches Honolulu, I sell them to the curio dealers for fifty cents to one dollar each, depending on size and style of weave. These same purses after lined with tapa and a zipper put on sell for $3. to $5 each in our local stores. I will send you a couple of samples out of the next lot I receive and I will be glad to receive any comments you may wish to offer.

We received your photograph and we both agree that it is an excellent picture of you. Inordering your hat I had it made like the one I saw in the picture. Jennie did not think it looked enough Hawaiian so another had to be

ordered meeting her specifications. Mrs Sandelin is wearing a hat made to her own fancy, but of course this style is not Hawaiian.

I have not had time to work on the belts yet, but, will endeavor to contact Fern and the other people later. I am more interested in finding employment for people on a big scale.

There is room for at least 500 women in the weaving of hats and to date I have only trained less than a hundred. In the weaving of purses I believe there is room for the employment of at least 500 women in this line alone. I have so far located about 150 women on Hawaii and Molokai alone who are able and willing to weave at the prices stated above.

Tell Ed I would move to Palekunu today if I had company. I have been trying to induce Jennie to move back if only for a few weeks during the summer months. One could go there on a surf board today and for the next four or five weeks. The weather is so calm and the sky clear.

I hope Mrs. Sandelin will call on Ed. I did not know where you would be, whether in Milton or somewhere else, hence, I thought it would be best for her to contact Ed first. She will not arrive in Boston much before the 16th or 17th as she probably will spend one or two days in San Francisco before starting for Boston.

Jennir joins me in wishing you both our best wishes and aloha,

O wau no,

Me kealoha pumehana

Honolulu, T.H.
July 16th.1941.

My dear Lorna:-

I finally got your hat finished and in the mail. I hope you will like it. Jennie took it to the hatter and saw that it was made the way she thought would be more becoming to you than the one I had made at first.

I hope Edwards hat reached him in good condition.

The lauhala purses is all the go in Honolulu today. My relief group are turning out no less than 300 purses each week and we have no difficulty in finding a market. I will have a set of samples made up and sent to you. It is rather late to try to dispose them in Boston at this time of the year, but, orders can be taken for delivery when desired.

I know more about lining purses than I did when I wrote you last. I had an idea you could do as well as we could in the lining, but, I have changed my mind about that. I have another group here in Honolulu who does the lining.

The purses are made in the lauhala districts such as in the Kona's Puna and Molokai and the lining is done here in Honolulu.

I will also have a lot of hat straw ready for delivery after January as the sugar cane will not begin to tassel until late in October, when we will collect same on a large scale. By November 15th we should have enough sugar cane straw, pua ko, on hand so that the weavers can start weaving.

Mrs. Sandelin is leaving Boston for Honolulu on or about the 25th. If there is anything you wish to say to her regarding hats or the pursses you had better contact her before she leaves. She is visiting some of the shops in Boston where hats are sewed and blocked and she may have some information that may be of use to you.

I just learned that the Fern boys have closed up their shop and have accepted work at Pearl Harbor where they find it more lucrative.

We are enjoying the best of health and hope this latter finds you both enjoying good health,

O mauano,

Me kealoha pumehana,

JHW

TELEPHONE CAPITAL 5310

WALTER T. TSUKAMOTO
ATTORNEY AT LAW
TWELVE TWENTY-EIGHT FOURTH STREET
SACRAMENTO, CALIFORNIA

August 21st, 1941

Hon. John H. Wilson
Director of Social Security
Honolulu, T. H.

Dear Mr. Wilson:

I have been intending for months to write to you - in fact ever since we missed connections last August when I was traveling the Eastern States and you were in Chicago - and to explain why I was not able to visit you in Hawaii on my contemplated trip there.

At the time I obtained my passport last year I fully expected to visit Hawaii, but the progress of the war - I am a captain in the Judge Advocate General's Department, U.S. Army Reserves - and the possibility that I might be called to active service made me change my plans and instead of a trip to your lovely island, I substituted one for the eastern states, and also Canada.

I had particularly hoped to visit the Islands because of my interest in politics and am still hoping that when all this turmoil is settled that I shall be able get my wish, and visit you and Mrs. Wilson at home.

Several weeks ago I received a cable from a Mr. Sunao Hironaka of Honolulu wherein reference was made that they were friends of yours. I was successful in helping this man's younger brother from some difficulty at the time, and for your further reference am enclosing a copy of my letter to him.

Trusting you and Mrs. Wilson are enjoying the very best of health and with warmest personal wishes in which my parents and family join me, I am

Sincerely,

Walter Tsukamoto

STANFORD UNIVERSITY
OFFICE OF THE PRESIDENT

RECEIVED
SEP 3 - 1941
Ans'd
STANFORD UNIVERSITY, CALIFORNIA
TERR. DEPT. OF PUBLIC WELARE
OFFICE OF THE DIRECTOR

Dear Members of the Stanford Family:

As President of the University, it is my pleasure and privilege to invite you to the second phase of the Stanford Fiftieth Birthday Celebration.

Dr. Robert E. Swain and his committee have arranged an attractive program commencing Wednesday, October First, and concluding with the services in the Memorial Church on Sunday, October Fifth. There will be dramatic productions, pageants, football game, banquet, receptions, luncheons, reunions, dinners, Stanford panels, timely topic panels, and to me a most important revival of the inner quadrangle promenade of Stanford's early years.

I am enclosing the Committee's statement of the program which gives details and forms for reservations. I hope that you can and will attend.

For the Stanford Library we are keeping all details of this celebration year in order that the future may know of this memorable occasion. For this purpose I will very much appreciate your sending to me a letter -- your message to Stanford on her Fiftieth Birthday -- which we can include in the permanent records. Any theme of your choosing is good -- if one does not readily occur to you, then I suggest that you write of what Stanford has meant to you and the future that you see for Stanford's next fifty years.

Please let me hear from you.

Faithfully yours,

Ray Lyman Wilbur

President

END

October 2, 1941.

Mr. Ray Lyman Wilbur, President,
Stanford University,
California.

Dear Ray:

It is one of the greatest regrets of my life that I will be unable to be with you during the Stanford 50th Birthday Celebration, and to live over again those happy days we spent in the days of the founding, half a century ago.

I had fully intended to go to California to attend this memorable event, but unfortunately this trip has been rendered impossible by the fact that I must remain in Hawaii during the current Special Session of the Territorial Legislature. However, inasmuch as my expenses on this trip would have approximated $500, I am sending you a check for that amount, to be added to the Endowment Fund. I am sorry that it is not more, because I feel that I owe to Stanford a debt that I can never repay.

As the years roll on, the memories of those first days "down on the Farm" become ever more green and ever more pleasurable; I have never forgotten them, and certainly I never shall forget them. For our beloved Alma Mater in the next fifty years to come, I envision a larger, greater future in the field of higher education, over and above even the splendid record which it has achieved during its first fifty years of existence.

Please pass on to all of the "pioneers" my deepest personal regards and very best wishes, but keep a goodly portion of them for yourself.

Cordially yours,

Dear Jack:

It was fine to get your good letter on the Fiftieth Birthday celebration. I am sure you would have had an unusually happy time had you been here. Today and tomorrow we have the closing exercises. Last night the number of old grads that turned up at the special exercises in the Quad, with Charlie Field as General Manager, was greater than we ever have had here before. We reenacted the opening exercises and had a fine lot of music, pictures, dancing etc. I will tell all the boys that I meet today that you sent your best wishes.

I am particularly pleased at your continuing feeling for Stanford and to know that you are sending a check for $500. This is a delight indeed.

Faithfully yours,

Ray Lyman Wilbur

TERRITORY OF HAWAII

~~BOARD OF PUBLIC WELFARE~~ DEPARTMENT OF SOCIAL SECURITY

~~HONOLULU H~~

Honolulu, Hawaii
Oct 6th 1941

Mr and Mrs. Chas. Brown,
Papeete, Tahiti.

My dear friends:—

The post office department notified me a few minutes ago that the schooner Florence C. Robinson would be sailing tomorrow morning at 8 and the mail would close this afternoon, so I will attempt to write a few lines and get it in the mail on time.

We received your letter that came by the Matson steamer and certainly enjoyed reading it.

Please let me know if you have received the pictures I took of the Benicia and yourselves while you were here, if not, I will send the next set by schooner or when the Matson steamer goes direct.

Time will not permit me to say all I wish, as the mail is closing this afternoon and do not only wish to catch the mail, but, I want to get a trip of

candy for the girls, which I will mail under-
seperate cover.

With kindest personal regards and best
wishes from Mrs. Wilson and myself,

Jane,

Yours with aloha mir loa

John H. Wilson

P. S.

How are the chickens making out and
when will we see the Benicia again with
your good selves aboard

J. H. W.

N. B.

I have taken the liberty of giving a letter of introduction
to a Mr. Leopold Blackman, who is sailing on the
Florence Robinson as a passenger. He is a
well educated man and has been a resident
of Honolulu for about 30 years. He can tell
you plenty about Hawaii and I'm sure you'll
enjoy his company.

J. H. W.

Dear Jack:

Right according to schedule that draft of yours for $500.00 for our Stanford Fund came through. As I wrote you before we are particularly pleased to get this. While I am sure you would have had a wonderful time if you had been here we are indeed grateful that you put your traveling expenses for the trip you did not make into our hands.

Faithfully yours,

Ray Lyman Wilbur

Mr. Miguel Gonzales, President,
Cia.Comercial de la Baja California, S.A.
Tijuana,
Mexico. ← Baja California,

Dear Sir:-

A lady friend of mine called at "THE BIG CURIO STORE" a few weeks ago and you showed her a comb, which was six inches across and fourteen and a half inch around the top with seven points and seven inches high.

She said the comb was worth $12.50, but, you would accept less for cash. I am interested from the description given me, hence this letter. Will you kindly write me stating your lowest price if you have not already sold it.

I am enclosing the card which you gave her, which I hope would assist in recalling the visitor and identifying the comb I am interested in.

I will remit as soon as I hear from you,

Yours very truly,

John H. Wilson,
Director

Lake Bluff. Ill

Dear Aunt Jennie & John,

We have been thinking of you constantly since last Sunday. I hope & pray you are both safe.

We couldn't believe the news when it came over the radio Sunday.

I guess we who live in the middle west have a feeling of false security. I never thought any thing would happen to any americans.

I know my Dad will feel as I do. You will probaly hear

START

from him too.

I am sorry I didn't answer your letter sooner but I am a terrible correspondent. I don't write to Mom + Dad as often as I should. (So please forgive me.)

Our family is well. Oliver's daughter Janice lives with us now so we really have a crowd. Walcott the oldest boy is 15 and in first year high school. Janice is 14 + in 8th grade. Bart is 5 now + Larry the little fat on is 2½.

Remember we are praying for you + all the people who suffer under this treacherous attack.

Lovingly yours,
Eleanor + Oliver.

B00037

P.S. We all enjoyed the can of coffee last winter. We went down to Dad's & took it with us. We were with them for 3 months.

, Hawaii. January 6th.1942.

My dear Bob:-

Your Christmas Greetings received and please accept our many thanks for your good wishes.

I was in hopes of attending the celebration at Stanford last October, but, the legislature had to have a special session and naturally had to stand by. Bill Soper attended and received from him much information as to all he met.

Re-the clipping you enclosed from the Kansas City Star. That was a well written article and gave you about as true a picture as it was possible to relate.

This leaves the wife and myself enjoying the best of health and I pray you can say the same.

With our very best wishes and aloha, I am,

Yours Sincerely

P. S.

Mr. & Mrs Whitehouse are also enjoying the best of health and both wish to be remembered to you and Mrs McDonnell. All mail is being censored ~~and fearing I may say something I should not which would delay~~ hence, the briefness. I know you'll understand Bob, ~~so will send papers when I find~~ Will write again, when the opportunity offers.

J Hee

Happy New Year Pop:n

Now are you and Huntie I'm permitted to call her as my Huntie & you should be an Uncle then - that's right?

In regard to the purses I suppose it's all out of question or could you still send them & should I want them?

We have had pretty cold weather & do I like it - sure do - the only thing lacking is the snow.

Have been working off an on at the Studio and how nice it would be if it were regularly but this on and off business is no good to me - but that's how it goes with all the Studio work.

START

How are you both?

Please let me know about the Rawhide passes if I never them may or could you send them to me?

I also to you and the Mrs. The Raymonds send greetings

Love

Mildred.

Dear Mr. Wilson:

Thank you very much for your kind attention and for accomplishing the difficult task of arranging for my loan. I am very sorry about all the inconvinience it has caused you . As regards the ability of my relatives to help, I assure you that I did explore this possibility as well as I could from this distance but achieved no success.

As previously noted, I signed for two hundred dollars ($200) at the Riggs National Bank on 2/11/42 from the Pioneer Civic Association out of which I have paid my tuition. I will be glad to make a regular monthly payment on the loan of about fifty dollars ($50) circumstances permitting, upon my return to work. It might be well for the Association to know that I have an insurance policy of two thousand dollars ($2,000) which will cover my debt should any accident befall me.

The name and address of our Director is, The Rev. Lucien Lauerman, Director, The National Catholic School of Social Service, 2400 Nineteenth St. N.W., Washington, D.C. He has been most kind and appreciative of my situation which I appreciate very much. I know he will be glad to hear from you.

I have written the Matson Co. for passage home and will proceed to San Francisco as soom as school is over. I pray that that the situation will be greatly improved. Am keeping posted as nearly as possible as to what is happenning in Hawaii Nei through our Delegate's office.

Again, mahulu nui loa.

Yours very truly,
Dorothy J. Josie

TERRITORY OF HAWAII
BOARD OF HEALTH
BUREAU OF SANITATION

San. Form No. 1
Oct. 1939

March 2, 19 42

Mrs. A. Anderson

You are hereby ordered to make the following sanitary improvements on your premises located at

3798 Waialoa St.

so that your place may be put in a sanitary condition:

Inspection on this date shows that you are maintaining your premises contrary to Section 10 Par. 2 of the Rules and Regulations of the Board of Health in that you are occupying a Dwelling without having provided an approved sanitary means for the disposal of human waste.

You are hereby ordered to construct a privy vault for the disposal of all human wastes within 15 days from this date or legal action shall be taken against you.

Respectfully yours,

(Signed) W. H. Watanabe

Inspector and Agent Board of Health.

Dear Uncle John:

I received your nice letter a few days ago and wish to thank you sincerely for your thoughtfulness and kindness. Everyone in my family is in the best of health and is gettling along fine.

You say that Aunty Kini was ill and I'm sorry to hear that. How is she now? I do hope she has recovered completely by the time you get this letter. If her opu isn't bothering her too much now and if she wants anything from the Big Island please don't hesitate to write me as I shall always be glad to oblige.

Kenny Boy has grown quite a bit since you saw last and he started walking two weeks ago. At present he just loves to walk and even tries to imitate his sister's tap dancing.

I heard from Daddy sometime during the latter part of last month saying that he arrived in Honolulu. He stated that he was feeling fine and there's nothing to worry about. He sends his regards to you and all his friends. I'm quite sure that by this time he has arrived on the mainland.

I wanted to answer your letter sooner but since I was asked to turn over my celler to the school authorities, I was kept busy for a while cleaning and making ready for the teachers. At present they are holding both morning and afternoon sessions daily. I go to the office every day to take charge of the unfinished business and collections.

By the Jack Ouye of Hakalau is scheduled to be drafted into the army soon and he was worried a bit since he has not as yet been appointed under civil service status. Altho' I understand that he has been assured that no action will be taken until he is discharged from the army by the First Assistant Postmaster-General, we would appreciate if you would do your best in obtaining his appointment.

At this trying time I realize who are our true friends and who were just stringing along for the sake of their own good. Jack Ouye and Richard Imai of Olaa always drop in and encourage me whenever they come into town. I don't need any financial help and I don't think my friend should avoid me. I do appreciate all my true friends who come to talk to me and keep my company when I need their company most.

Dear Mr Wilson:

I haven't heard from you for such a long time, and I have thought of you often, wanting to write also, but somehow the days go, and one just doesn't do everything planned.

Since my trip to the Islands must be postponed indefinitely, I am planning to go East again this year. Our Sorority Convention is to be held in South Bend, Indiana, commencing June 26, so Violette Brittian, Lucille Casey, and myself are going to attend. We are coming home by the way of New Orleans, and although we realize it will be very warm, still we are going to chance it.

Convention was originally scheduled for Ft Wayne, Indiana, but the Chapter there forfeited the opportunity, and for a while it looked as though we would not have a National Convention. Then we received notice that South Bend had come to the front.

I think, perhaps, I told you I had recently taken up the game of Golf. I enjoy it immensely and am a real enthusiast of the game. I used to think it rather silly for intelligent folks to hit a little ball, and then go after it and hit it again all around the course, but now I am probably worse than others I criticized. However, it is a good way to exercize, as well as be out in the sunshine and fresh air.

If you should see the Senator, remember me to him, and tell him my visit has been postponed, but it is still in the "offing".

Do write when you get the opportunity, as I enjoy hearing from you.

With best personal regards, I am

Very truly yours,

Catherine Ferrera

END

[Sept. 1, 1942]

I regret exceedingly that, on the advice of my physician, I must curtail my present activities to the extent of withdrawing from any active participation in politics for an indefinite period.

This entails my resignation, which is being forwarded, from membership on the Democratic National Committee on which I have the honor of being the senior member in point of service, having been chosen originally in 1912, and successively thereafter; and also removes whatever possibility there was of my being a candidate for the Democratic nomination for delegate to congress at the forthcoming primary.

My physician advises me that, because of my recent indisposition, it is imperative that I either renounce entirely all political activities or resign as Director of the Department of Public Welfare, a position in which I have served during the past four years. After considerable thought I have decided that my primary responsibility is to see that the needy, the halt, the sick and the blind unfortunates of the Territory shall continue to be fed and sheltered to the best of my ability and to the highest degree in consonance with the finances of Hawaii.

It has been very difficult for me to reach this decision and to withdraw from the political life of the Territory after having been an active participant for more than forty years, but I consider that the needs of the clients of the Department of Public Welfare should transcend any personal preferences that I might have to continue the political activity which has played so large a part in my adult life.

TERR. DEPT. OF PUBLIC WELARE
OFFICE OF THE DIRECTOR

Dear Jack:

Thank you for your good letter of October 24th, with enclosures, which I was pleased to find here waiting for me upon my return to the campus yesterday from a short eastern trip. I am very much pleased that you took on that job of representing us at the Inauguration of Gregg M. Sinclair as President of the University of Hawaii. I should have liked to be there myself, particularly since Mrs. Wilbur and I have such pleasant memories of our stay in Honolulu.

We both send our greetings and best wishes.

Very sincerely yours,

Ray Lyman Wilbur

Chancellor.

SCOTT CALHOUN
SEATTLE

LAW OFFICES
DEXTER HORTON BUILDING

December 10, 1942.

Hon. John H. Wilson,
Department of Public Welfare,
Honolulu, T. H.

My dear Johnny:

I was very glad to hear from you even though your letter did bring me bad news about the passing of dear old Lou Whitehouse. He was a great guy; even from the time he was a kid. We were like brothers when at Stanford, rooming together in Encona Hall as you will remember, when he was a freshman. I will never forget our being at study in Room 96 one night when you startled us by pulling the "Human Fly" act, climbing up the rough stone wall of the building from the ground and appearing in the flesh at our window when we both thought such a feat all but impossible. Lou and I often used to laugh over it, even years afterward. That was long before the "human fly" became a national stunt act.

A number of years ago Lou wrote me a long letter, with numerous enclosures of snap shots of you, himself and dear old Daddy Marks at about the time he retired from active duty at Stanford. You both hugely enjoyed that visit, and I imagine Daddy Marks did, too.

When you were making a tour of the United States in the Fall of 1895 with the Royal Hawaiian Band, of which Lou appeared to be the advance press agent, he used to write me many funny letters. He had a lot of sob stuff in those writeups, with heights of poetic wording of which Lou was indeed capable when he put his mind and hand to it, always signing them with the Kanaka word meaning "white house". All of their music seemed tuned to memories of the monarchy and a sad lullaby to the deposed queen to whom the musicians all were so loyal.

Until reading the newspaper writeups you sent me I had not realized the extent of Lou's engineering career in the Islands. You and he made a fine start down there in the building of the Pali Road.

Not long ago I received a letter from Mrs. Shaw of Dixon, Ill, in which she referred to the fine reunion she arranged at her home there of the old Stanford men thereabouts, including Herb Hicks. It was not long after that poor old Herb was instantly killed by another car beating the red light when Herb clearly had the right-of-way. He was State Senator from the Rockford district at the time.

Well, Johnny, I certainly appreciated your writing me and sending the newspaper clippings. Lou's brother Herb had already received word of Lou's death as I found from relatives here who had just heard from him although they had not telephoned me, and the first word I received was from your letter.

As it will be about Christmas when you receive this, I will add

a God Bless You for a most Happy Christmas, and everything of the best for the coming year. And let us trust that we will at least get the Japs on the run to such an extent that they will be winding up their little ball of yarn before the year 1944 arrives.

Thanks so much for your optimistic and kind invitation to visit Hawaii before my sight becomes too dim to see what the Islands have to offer. Well, Johnny, when that time comes, if ever, I want to be taken out to the boneyard and shot for an old, broken down, worn out horse!

With every good wish and affectionate regards,

Sincerely yours,

Scott Calhoun

I always listen to the radio "Hawaii Calls" and listen to or seem to, friends down there, although the passing of Charlie Burnett and Lou seems to leave only you and Riley Allen left.

V.S.K. Houston [Queen's + the Hawaii] (1938?)

The Supreme Court of the Territory of Hawaii in its opinion of December 4, 1942, upon appeal from Circuit Judge, First Circuit, #2487, in the matter of Charles M.Hite, Trustee under the will and of the estate of Queen Emma Kaleleonalani, deceased v. The Queen's Hospital etc., stated inter alia as follows: "...Assuming, but not deciding that the statutory power of approval of amendments and the legislative sanctions of amendments heretofore referred to apply to charters granted to eleemosynary corporations, similarly as to those organized for agricultural, commercial and manufacturing purposes, we are of the opinion that the power of amendments of charters of corporations admonistering public charities organized similarly as The Queen's Hospital is governed by the general substantive rules of law concerning public charities, and that the original purposes of the founders of a corporation so organized may not be varied except upon the judicial approval of a court of equity, excercising jurisdiction over charities,if and when such jurisdiction is invoked by the proper party in a proper case." (p.23)

It further stated: "We have made no effort to determine whether the amendments to the Charter of The Queen's Hospital, enumerated and recited in the bill of complaint, did make any substantial changes in the purposes for which it was founded. If so, we express no opinion on the subject. To the extent that they may deviate from the original purposes for which it was organized, they in our opinion, are ultra vires and void. In contemplation of law, the purposes of The Queen's Hospital were the same when Queen Emma died as when declared in the original charter of incorporation, and must remain the same until altered or changed by competent judicial authority." (pp 36,37)

Again:"...to alter or amend the purposes of a public charity necessarily

involves the application of the doctrine of cy pres. Only courts of equity may apply this doctrine to public charities, and this power is not limited to public charities the administration of which has been committed to individual trustees, but also includes corporations administering public charities." (p.40)

And finally: "...In respect to the instructions of the court in answer to question number (5), the decree is also reversed with leave to the petitioner to amend the question so that it be limited and confined to the inquiry whether The Queen's Hospital may by amendment of its charter of incorporation, deviate from the purposes it was originally organized without the approval of the court of equity having jurisdiction over public charities. If and when so amended, the answer will be in the negative." (p.48)

Queen Emma died April 23, 1885.(p.3) At that time the purposes of the Queen's Hospital were the same as when declared in the original charter of incorporation. (p.37)

The only amendment adopted prior to that time, in 1878, referred to bequests made to the corporation and stated that such should constitute a permanent fund the income of which only should be used for the purposes of the Hospital.(p.8)

But in 1909 changes to the charter of incorporation were made which appear definitely to deviate from the original purposes. In 1859, it had been declared, by its charter, to be for the purpose of: "..establishing...a permanent Hospital at Honolulu, with a Dispensary,....for the ....treatment, of indigent,sick,and disabled Hawaiians;as well as such foreigners, and others, who may choose to avail themselves of the same;..." (p.7)

The 1909 amendment changed the statement of purposes to be: "for the treatment of sick and disabled persons...;to maintain wards and apartments for the treatment of pay -patients as well as free wards for the treatment of indigent persons..."(p.9)

The last quoted reference to treatment of indigent persons is accompanied by a proviso in the 1909 amendment, which is not mentioned in the Opinion , namely "that it shall not be obligatory for the said corporation to receive at any hospitals patients suffering from any contagious, infectious or incurable disease;.."

Reference to a Dispensary was also omitted in the 1909 amendment of the charter. (p.9)

A comparison of the above stated purposes , as adopted originally, and as amended in 1909, taking into consideration the language, the punctuation, and above all the actual practice in the admission of patients, which practice was well known in the earlier period, may well be said to indicate wide variation . The elimination of the Dispensary alone may have had an enormous influence upon its use by the Hawaiians, who were trying to adjust themselves to new proceedures.

It is nowheres claimed that the 1909 amendment was passed upon by a court of equity, it being readily admitted, it is believed, that the amendment was submitted to and approved by the Governor after recommendation by the Acting Treasurer of the Territory.

The 1878 amendment referring to bequests, was repealed by similar action, and apparently is no longer effective.

It is interesting to note that the suggestion of the Supreme Court with respect to question number (5) has not been followed up, as far as can be determined by the submission to the Court of an amended question, as was so pointedly stated by the Court.

In the absence of action by the petit oner, and as the question appears to be one of Public interest, may it not be submitted that the matter calls for the intervention in some manner of the Attorney General. It seems hardly fair to have to assume that "an indigent Hawaaiin" could be the only "proper party" to bring a proper suit in the case.

~~Is the Hawaiian just to be pushed around once~~ more?

TERR. DEPT. OF PUBLIC WELARE
OFFICE OF THE DIRECTOR

To Mrs. Johnny H. Wilson
Honolulu
Hawaii

Dear Sir:

May Umeyo Kuwahara has given your name as a reference in connection with an application to leave a relocation center of this Authority for employment, education, or residence elsewhere.

We should appreciate it if you would give us your opinion of this individual with respect to such matters as the extent of Americanization through education and upbringing, general standing and reputation in the community, and occupational abilities. If you have ever employed the applicant, a statement concerning the quality of the work performed for you would be helpful.

An addressed envelope which needs no postage is enclosed for your reply.

Sincerely yours,

D. S. Myer

Director

END

Honolulu, Hawaii. April 10th.1943.

Mr Dillon S, Myer, Director,
War Relocation Authority,
Barr Bldg.
Washington, D.C.

Dear Sir:-

I received your inquiry a few days ago regarding May Umeyo Kuwahara and am pleased to have the privilege of stating what I know regarding her.

I first met her at a Democratic Convention that was being held in Honolulu some eight, ten or twelve years ago. She and her husband Dr. E.M.Kuwahara were regularly elected as delegates from their district on the island of Hawaii on several occasions during this period.

Democratic Territorial Conventions are held in the city of Honolulu every two years and it is on these occasions it has been my privilege to meet and get better acquainted. On several of these visits to Honolulu, I have had her as my guest for days at a time. I have always found here a lovable person, well mannered and a true loyal American citizen.

The Kuwaharas have a fine home in Hilo, Hawaii and they live like any other respectable American, infact, mauch better than a great many. Nothing elaborate, just a nice clean comfortable home. Furnished with all the necessities of an American Home. While they are Americans of Japanese ancestry, yet, one wouldn't know they were of oriental extraction upon entering the home, as they live like Caucasians.

Mrs. Kuwahara is well thought of in the community she lives as being a true, loyal American citizen and for her work with the Red Cross and other benevolent activities within her home district.

I can see no good reason why she should be deprived of her liberty to go where she pleases like any other American.

I hope the above will be sufficient to give her the freedom she is entitled, otherwise, I will be glad to furnish more information upon her loyalty if it is still questioned.

Respectfully Yours

Mrs. John H. Wilson

Mr. John Wilson
City Hall
Honolulu, Hawaii.

Re: Olga Hihilane Mitchell

Dear Mr. Wilson:

I am at present trying to aid Mrs. Mitchell in obtaining information regarding her birth, which information is required by the United States Government. I have tried to obtain a certified copy of her birth certificate from the Board of Health in Honolulu, but they do not seem to have her certificate in their files.

I understand that once several years ago you were asked this same favor and that you replied, but in the interval of time, Mrs. Mitchell has inadvertently lost your previous letter. I believe upon recollection that you can be of aid in that Mrs. Wilson and yourself were present at Mrs. Mitchell's christening.

If you can recall the approximate time and date of her birth in Honolulu, that would be most helpful. I am sure that you understand the purpose of the letter---it can be used as a substitute for an actual birth certificate to be able to show the government, when and where she was born.

Whatever kind of statement you care of make, will you please have it signed before a notary public, in order to give it full legal effect and then mail the same to me. For your convenience I am enclosing a self addressed air mail envelope.

As you probably realize any information will be most valuable and helpful.

Very truly yours,

Allan M. Goldsmith

July 16th.1943.

Mr. A.A.Wilson, Manager,
Wahiawa,Water Company,
Wahiawa, Oahu.

My dear A.A.:-

The poi you brought in has long since disappeared and it is about time I made a report on same.

My wife did the mixing herself and we both had it for dinner that evening. Placed the balance on ice for three days when we sampled it again and finished it on the seventh day.

We both agree that it was of standard quality as to taste and fermentation. Infact, it is much better than most of the poi now sold in the Honolulu market.

As I told you, the oha, which is the small taro or suckers to the main taro, makes the best poi. Poi made from the oha is not commonly practised by commercial dealers although considered A1 as to quality, but, more poi per acre of land can be produced, if the oha and taro was all pulled at the same time and converted into poi.

Hoping the above statement would be of some help to you, I am,

Yours Sincerely,

TERRITORY OF HAWAII
BOARD OF COMMISSIONERS
OF AGRICULTURE AND FORESTRY
~~HONOLULU~~

Kaunakakai, Molokai

August 8, 1943

Mr. C. G. Lennox, President
Board of Agriculture and Forestry

Sir:

Reference is made to your letter of July 26.

As you know, there is only one fish pond West of Kaunakakai. This pond is really a combination of two ponds with small patches of open water joined by lanes of open water. The pond is full of islands and promotories of bull rushes. I can not estimate areas in this pond, but guess at them. The pond lies at the foot of a steep bank which is at the lower end of a long earth slope which is denuded of all soil arresting vegetation. Every heavy rain causes wash into the pond. The presence of rushes indicates fresh water. All ponds from Kapuaokoolau on Eastward have fresh water. I have repeatedly recommended that oyster culture be tried in the East End ponds.

Your own experience on Molokai must have shown you East End roads 12 to 18 inches deep in mud after a rain storm. About one third of this mud finally gets into the ponds. Ten years from now I believe that only ponds numbered 32, 38, 41, 42, 45, 46, 48 49, and 50 will be in operation or even useable.

There is no such thing as operating water gates in Molokai ponds, very little pua stocking is done. The only operation is catching fish when the spirit moves. A beneficent Providence is expected to keep all ponds going. There is always a market for the pond fish.

Any effective rehabilitation of ponds other than those numbered above will require, in my opinion -

1. Deversion of flood waters from the ponds by means of walls and ditches. Groins formed in the sea by the diverted silt might cause great damage to other beach frontage.

2. Removal of hugh quanitites of mud and disposing of same.

3. Reinforcing of seaward side of walls with additional rock to make a 1 to 1 slope. Unlike the protected Oahu ponds, Molokai ponds face furious storms during the year.

I think it impossible for your committee to arrive at a real

OFFICE OF THE DIRECTOR

Mr. John H. Wilson, Director
Department of Public Welfare
Honolulu, Hawaii

Dear J. H.

I thank you most sincerely for your letter of comment on my taro experiment and am particularly pleased to hear that the quality compared favorably with poi sold in the Honolulu market.

We now have a new crop underway which is looking fine.

I will be in to see you again someday when in Honolulu.

Yours sincerely,

D Williams

September 3rd.1943.

Mr. Alfred Jones,
629-Fern St.
West Palm Beach, Florida.

Aloha kaua a nui loa;-

One of the boys who just returned to Hawaii from Florida just called on me saying you had written me inquiring about your birth certificate and I never answered your letter.

I told him the reason I did not answer your letter is because I never received your letter.

If you are still without your birth certificate or proof of birth in Hawqii, please write me giving the date of your birth and place of birth and also give me the full names of your parents. If you know what church you were baptised in and the approximate date, this would help. There are no records prior to births before the year 1900 hence we have to relie on church records. Otherwise, we have to contact relatives and friends of the family. If you remember the names of some of your mothers friends, if they are still alive I will contact them.

If there is anything else I can do for you, please do not hesitate to call on me. I am sorry your letter never reached me.

Hoping this letter will find you enjoying the best of health and with my very best wishes to your good self and to all old friends who you happen to contact,

O wau no,

Me kealoha piha,

John H. Wilson
Director

Address care of the Dept or

, November 27th.1943.

My dear Esther:-

Christmas will soon be here and it seems that is about the only time that we take time off to say Hello and aloha nui loa to our friends who are seperated by miles of land and sea.

While I was at Mekia's the other day, I saw a picture on the wall of our Jim, Solomon Hiram, Paoakalani, Ben Jones and three haole's who Mekia cannot recall their names. It is such a good picture of the boys I had it copied and am sending you one.

Tell Ben Jones should you see him that I had enough copies made so that I gave one to his daughter Momi, one to Paoakalani and one for myself besides the one I am sending to you by todays mail,which I hope will reach you before Christmas.

Kini is still talking about the New York Fair and the good time she had with you while at Jamaica and is now wishing the war was over, so she can see the farm you have up in New Hampshire.

W are both in as good health as can be expected, considering our age, and hope this letter finds you in your usual good health with all of your moopuna's grown up and now are a help to you.

We have a little farm here and we know how much labor is required to keep it agoing, more particularly these days when labor is as scarce as hen teeth.

With our very best wishes for a Christmas Greetings and our aloha nui loa with a better 1944 than the passing 1943, to you and the whole Shaw family.

O maua no,

Na hoaloha o na la opiopio,

John and Kini

Talk before the Hawaiian Civic Club by John H. Wilson at The Willows.
Honolulu, December 12th.1943.

Mr Chairman, Governor Stainback, Honorable Mayor Petrie other honored guests and friends, Aloha kakou a nui loa:-

We are gathered here this afternoon at this splindid spread, which is a typical Hawaiian luau and is most fitting for an occasion of this kind.

A Hawaiian anniversary such as this would not be considered as being perfect without the decreasing of the pig population by placing one or more in an imu, such as was done here today.

It has been the custom and practise of the club to get together and celebrate the installation of its new officers each year,but, this is a very unusual year. We have not only reached the ¼ centuary mark of our existance, but, we are installing as our next President Mr. Ernest Nalani Heen a younger brother of our first President, the Honorable Wm. H. Heen, who I am more than pleased to see him present with us today. I also see, Mr. Uluihi, ..., ..., and a few others, if my memory is correct were also present at the first installation of officers 25 years ago, and I am very sorry the founder of our organization, Prince Kuhio Kalanianaole was not spared long enough by the Almighty God to enjoy some of the fruits of his ideals.

Our good friend and former Secretary to the Prince Chas Hemenway was slated to be our speaker today, but, due to illness he is unable to be withus, and consequently, it is my honor and privilege to address you.

The Prince and I was born the same year except he was born 9 months earlier. We were much together and closer as youths than we were after we grew up and became men.

He lived mostly with his aunt Queen Kapiolani either at the Palace or at Ulukou, Waikiki, while I was raised at Washington Place or Paoakalani, Waikiki both the homes of Princess Liliuokalani, this was before she became Queen and naturally when Queen Kapiolani visited Princess Liliuokalani Prince Kuhio and his other two brothers, David and Edward would be with her. In that way we became to know each other quite well. At the age of 15bor 16 he attended a military school, St Mathews Hall, at San Mateo, California, and later was sent to England.

He returned from England soon after thefdeath of the King. (Kalakaua). We were the two boys and George Ii Brown was the child that accompanied Queen Liluokalani upon her royal tour of the islands to meet the people and get first hand their needs and desires. Tours of this nature had been the custom of all rulers upon assuming the responsibilities of the Kingdom.

As playmates he and Prince David were hard players, good atheletes adept at any game,but, Prince Edward was not very strong as I remember and died early in life. He probably was 16 or 17 when he died.

At the time of the overthrow I was away at school and consequently did not see much of the Prince Cupid as he was nicked named by the King, until after annexation, when a group of leading Hawaiians got together to discuss the advisability of whether to join one of the major political parties or start an independent party.

Prince David with his followers decided to join the Democratic Party while Sam Parker and his followers favored the Republican Party. Both ran for the Delegateship on their respective tickets, but, were defeated by Robt Wilcox who ran on an Independent ticket and advocated Home Rule.

Prince Kuhio would not oppose his older brother David and infact, had started on a tour of Africa or around the world and it was not until 1902 the second election after annexation did he decide to take part in politics as a Republican.

At this point many Hawaiian families split. Prince David a Democrat his brother Kuhio a Republican. Even in my own family there was a split. My father

became a Republican and I followed Prince David who was the democrat in their family.

It had been a long accepted custom and practice among the Hawaiians to follow their alii, that is, the affairs of state and welfare of the people was the long established function of the Alii and as Kuhio grew older and was aware of the fact that he was the last of the Aliis he decided it was his duty to devise some plan to prepare his people to meet the new conditions that his peole had to fac e.

He started to discuss the problem with leaders among the Hawaiians, paying no attention to politics, or religion, but, persistently working toward a solution and finally organized the Kamehameha Lodge and the Puuhonua I am not certain which he started first,but, he got me interested in the Kamehameha Lodge. Next I think was the organizat on of the Hawaiian Civic Club and his last project was the creation of the Hawaii Homes Commission.

We differed in politics but we were always of the one mind when it came to thebwelfare of the Hawaiians, therefor , in the organization of the Hawaiian Civic Club, he intended that it would serve in his stead or the place of the Alii, as with his passing it would be the end of the Aliis.

He personally saw to it that the Club got underway right and practically hand picked the first President, the Honorable William H. Heen, then Judge of the Circuit Court and he lived long enough thereafter to see the organization get underway at a good start and after 25 years of faithful service in the education and guidance of the Hawaiian in meeting the new order of conditions since the change in government, we are here today to do honor to another Heen, Ernest Nalani Heen, the younger brother of our First Prsident, who I am sure as the President of the Civic Clu b will continue the good work as first outlined by our beloved Prince and by our retiring President Ernest K. Kai.

I thank you.

June 1943 letter

December 28th.1943.

Miss Barbara Carlson,
623-Birch St.
San Francisco, Calif.

Dear Miss Carlson:-

Your letter to Mrs. Wilson has been refered to me for answering and in reply wish to explain that her brother Teddy was to have attended to this matter, hence the reason we did not answer her letter. Infact, we were led to believe Teddy had sent her what she wanted. We are indeed very sorry to learn she is ill and in the hospital. We hope she has fully recovered by now.

It was not compulsory to register the birth of children in Hawaii until after the year 1900 and since Olga was born in 1897, there is no record of her birth with the Bureau of Statistics at the Territorial Board of Health.

Mrs. Wilson wento to the Catholic Church on Fort Street and had the Priest search the records beginning with January 1901 and up to and through December of 1907 and found no record of a baby being baptised by her parents or anyone else.

Olga came to live with us sometime during the year 1906 and remained with us at least two years. It must have been during the fall of 1908 or early of 1909 that her father came and took her away. If she was baptised at all at a Catholic Church it would have been during this period, as my mother in law, Mrs. Wilson's mother and an old friend a Mr. James Hanlan who lived with the Mitchel's were both Catholics and were talking about taking Olga to the Church, but, I do not remember whether they did or not.

Olga's mother was taken very ill about 1906 and soon died,hence the reason the father turned her over to us, as her mother was related to me.

1945
1897
48 yr

Mrs. Lulu Bush , an aunt of Olga's has in her possesion the Mitchel family bible which was given to her by Mr. Mitchel, Olga's father for safe keeping. I have seen it and I note Olga's name appears in it as follows:-

Olga,Hiilani Mitchell, Born in Honolulu December 20,1897. the daughter of Isabelle Rice and Charles James Mitchell.

The above is from memory ir may not be the exact
