**Report on Internal Control over Financial Reporting and on
Compliance and Other Matters Based on an Audit of Financial Statements
Performed in Accordance with *Government Auditing Standards***

The Auditor
State of Hawaii:

We have audited the financial statements of the Airports Division, Department of Transportation, State of Hawaii (an enterprise fund of the State of Hawaii) (the Airports Division), as of and for the year ended June 30, 2007, and have issued our report thereon dated December 26, 2007. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control over Financial Reporting

In planning and performing our audit, we considered the Airports Division's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing an opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Airports Division's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Airports Division's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with U.S. generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Airports Division's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of the Auditor, State of Hawaii, management of the Airports Division, and the Federal Aviation Administration, U.S. Department of Transportation, and is not intended to be and should not be used by anyone other than these specified parties.

Report on Compliance with Requirements Applicable to the Passenger Facility Charge Program and on Internal Control over Compliance in Accordance with the Passenger Facility Charge Audit Guide for Public Agencies

The Auditor
State of Hawaii:

Compliance and Other Matters

We have audited the compliance of the Airports Division, Department of Transportation, State of Hawaii (an enterprise fund of the State of Hawaii) (the Airports Division), with the types of compliance requirements described in the Passenger Facility Charge Audit Guide for Public Agencies (the Audit Guide) that are applicable to its passenger facility charge program for the year ended June 30, 2007. Compliance with the requirements of laws and regulations applicable to its passenger facility charge program is the responsibility of the Airports Division's management. Our responsibility is to express an opinion on the Airports Division's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the Audit Guide. Those standards and the Audit Guide require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on the passenger facility charge program occurred. An audit includes examining, on a test basis, evidence about the Airports Division's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the Airports Division's compliance with those requirements.

In our opinion, the Airports Division complied, in all material respects, with the requirements referred to above that are applicable to its passenger facility charge program for the year ended June 30, 2007.

Internal Control over Compliance

The management of the Airports Division is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws and regulations applicable to the passenger facility charge program. In planning and performing our audit, we considered the Airports Division's internal control over compliance with the requirements that could have a direct and material effect on the passenger facility charge program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Airports Division's internal control over compliance.

A control deficiency in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of the passenger facility charge program on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer the passenger facility charge program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of the passenger facility charge program that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of the passenger facility charge program will not be prevented or detected by the entity's internal control.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the entity's internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

Schedule of Passenger Facility Charges

We have audited the basic financial statements of the Airports Division as of and for the year ended June 30, 2007, and have issued our report thereon dated December 26, 2007. Our audit was performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying schedule of passenger facility charges is presented for purposes of additional analysis as required by the Audit Guide and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

This report is intended solely for the information and use of the Auditor, State of Hawaii, management of the Airports Division, and the Federal Aviation Administration, U.S. Department of Transportation, and is not intended to be and should not be used by anyone other than these specified parties.
