Findings

THERE WERE NO MATERIAL WEAKNESSES in internal controls over financial reporting that were required to be reported under *Government Auditing Standards*. However, the auditors identified one significant deficiency in internal control over financial reporting. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. The deficiency is described on pages 56-58 of the report.

THERE WERE NO FINDINGS that were considered material weaknesses in internal control over compliance in accordance with the *Uniform Guidance*. However, the auditors identified three significant deficiencies in internal control over compliance. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. The deficiencies are described on pages 59-64 of the report.
