## ***About This Report***

This report, *Filipino Population by County, Island and Census Tract in the State of Hawaii: 2010*, was produced by the Hawaii State Data Center which is part of the Hawaii State Department of Business, Economic Development & Tourism (DBEDT) . The data included here were obtained from the U.S. Census Bureau, 2010 Census Summary File 1. The thematic maps were produced by the Hawaii State Office of Planning's GIS Program.

The category of "race alone" consisted of individuals who chose only that one race. "Race alone or in combination" referred to the number of responses in which an individual chose either that one race or that same race in combination with another race or races. For example, if an individual chose the race groups of both Filipino and Chinese, that individual's response would be counted in both the Filipino "race alone or in combination" column as well as the Chinese "race alone or in combination" column. For the Filipino group, this count represented all persons saying they were, for example, either a full or part "Filipino". It should be noted that "race alone or in combination" figures refer to number of "responses" and not individuals, so their sum would exceed the total population.

The small areas used in this report were based on the U.S. Census Bureau's geographic level of census tracts. In 2010, there were 321 census tracts in our state which contained population. Populations in the census tracts ranged from 1 to 11,012 people.

The following tables and maps show the distribution of "race alone" and "race alone or in combination" populations. The tables and maps show the actual number as well as the percentage of the total population that number represents in each geographic area. Data on the number of people in a racial group are useful, especially when searching for large numbers of that specific group. The percentage of the area's population composed of a certain racial group is a good indicator of population concentration.

Having statistical information locating where clusters of racial groups currently live in Hawaii may be beneficial to businesses as well as to other organizations.

Businesses will be able to make more knowledgeable decisions based on where their target population is located or knowing who their customers are in a specific location. Some crucial questions regarding the area may be answered by knowing its demographic characteristics. For example, a certain type of ethnic food may sell much better in one place versus another. Familiarity of cultural practices and sensitivities might add to the success of a business, too.

Other types of organizations may use this data in deciding where they should open an office or how to best serve the majority of their clientele in a particular area. If an area has a significant number of people in a specific racial group, having people who speak their language on the organization's staff may be helpful. Careful consideration of interactions and customs of families of that racial group may also add to the effectiveness of their staff in delivering services.

It should be noted, though, that other factors influence the needs and characteristics of racial groups. For example, was the person born here or did they come from another country? If they are from another country, when did they migrate here? This report provides some basic data. Researchers who are interested in more in-depth analyses of detailed race groups by small areas will be able to use additional census data being released by the Census Bureau's American Community Survey.

The present report is a part of the 2010 Census racial group report series being released by DBEDT.

Statewide, there were 197,497 people in the Filipino “race alone” group. The Filipinos were the 2nd largest “race alone” group in Hawaii and comprised 15 percent of our resident population in 2010.

In our State of Hawaii, there were 342,095 people in the Filipino “race alone or in combination” group. This group was the 2nd largest “race alone or in combination” group and made up about 25 percent of Hawaii’s population.

9	87.02	Oahu	St. Joseph School	5,593	3,288
10	89.24	Oahu	Royal Kunia	7,623	3,157

Census tracts with the largest Filipino “race alone” population were concentrated in the Central and Ewa regions of Oahu. Specifically, the top areas included Leeward Community College, Manager’s Drive, St. Joseph School and Royal Kunia in Central Oahu. It also included Ewa Villages in the Ewa region of the island. There were two census tracts among the top ten which were on the neighbor islands. They were Southeast Kahului on Maui and Puhi-Hanama’ulu on Kauai. The urban Honolulu census tracts of Umi Street and Kamanaiki Street completed this top ten listing, ranking at #4 and #8 respectively.

10	68.02	Oahu	Aliamanu	6,842	51.3

Census tracts with the highest percentage of the Filipino “race alone” group were located in many of the same areas as the actual number. Unlike the actual number listing, however, the percentage listing contained more census tracts in urban Honolulu such as Umi Street, Kalihi Waena and Gulick Avenue-Likelike which were the top three census tracts. It also differed because this percentage listing did not include any neighbor island areas.

A large number of people who belonged to the Filipino “race alone or in combination” group were located in Oahu’s Central and Ewa census tracts which included Leeward Community College, Manager’s Drive, Ewa Villages, Ewa Beach, Campbell High School, and Royal Kunia. Two neighbor island census tracts held positions in this listing. They were Puhi-Hanama’ulu (#4) on Kauai and Southeast Kahului (#5) on Maui. Two census tracts in urban Honolulu, Umi Street and Aliamanu, completed the top listing.

10	64.02	Oahu	Kamanaiki Street	6,387	64.7

For census tracts with the highest percentage of the Filipino “race alone or in combination” group, a little less than half were in urban Honolulu while the remainder were located in Central Oahu.
