USCENSUSBUREAU

11/07

American Community Survey

- A survey developed by the Census Bureau to provide demographic, economic, and housing data of America's communities every year.
- The ACS will replace the long form in 2010.
- The ACS is conducted using mailed questionnaires, telephone interviews, and visits from Census field representatives.
- Questions similar to the Census 2000 long form, over 60 questions on the survey.
- Full implementation beginning in 2005 with 3 million addresses in sample (250,000 per month).

USCENSUSBUREAU

2

American Community Survey

- The ACS is a large, continuous demographic survey
- The ACS produces annual and multi-year estimates of the characteristics of the population and housing
- Produces characteristics, not a population count
- Key component of the decennial census program

U S C E N S U S B U R E A U

3

American Community Survey Sample

- Questionnaires mailed to about 1 in 480 addresses each month throughout the U.S. and Puerto Rico.
- 1 in 40 addresses per year (2.5% of the population).
- Average of 500-600 addresses per month per congressional district.
- Total of 3 million addresses each year, or 250,000 per month.
- Inclusion of population in group quarters beginning in 2006.

U S C E N S U S B U R E A U

4

American Community Survey

- First year of data collection for full sample in 2005.
- Data for calendar year 2006 released beginning in August 2007.
- Annual data for geographic areas over 65,000 population.
- 3 year averages for geographic areas 20,000 to 65,000.
- 5 year averages for geographic areas under 20,000.

USCENSUSBUREAU

5

Release Schedule for ACS Data

Type of Data	Population Size of Area	Data For The Previous Year Released In The Summer Of:							
		2003	2004	2005	2006	2007	2008	2009	2010+
Annual estimates	250,000+								
Annual estimates	65,000+								
3-year averages	20,000+								
5-year averages	Census Tract and Block Group								

ACS Timeline

- ACS Data collection (e.g. 2006) is closed out just after the beginning of a calendar year (e.g. 2007)
- Single-year and multi-year data products start to become available in the summer of the same year.
- For example 2006 ACS estimates are released in 2007
- Data products continue to be released for several months
- The cycle repeats EVERY year

USCENSUSBUREAU

7

2006 American Community Survey

- Data available on website.
- Data for geographic areas over 65,000 population
- 2005 data are limited to household population and excludes the population living in group quarters--college dormitories, military barracks, nursing homes, prisons and other institutions.
- 2006 data for total population—household population and group quarters

USCENSUSBUREAU

8

2006 American Community Survey Release

August 28, 2007

- **Income, earnings, and poverty**

September 12, 2007

- **Social, economic, and housing characteristics**
- **ACS demographic and housing estimates**
- **Public Use Microdata Sample**

September 27, 2007

- **Group quarters and other selected Population profiles, and workplace tables**

U S C E N S U S B U R E A U

9

ACS Data Products

- **Provide updated demographic, social, economic, and housing characteristics every year for many geographic areas**
- **Will continue to meet the user needs of traditional decennial census long form data**
- **Will provide data annually rather than at one point in time or every few years**

U S C E N S U S B U R E A U

Topics For Which the ACS Collects Information

Place of Birth	Citizenship	Year of Entry
School Enrollment	Language Spoken at Home	Educational Attainment
Disability Status	Labor Force Status	Place of Work
Occupation	Industry	Journey to Work Patterns
Income; Sources of Income	Race; Hispanic Origin	Ancestry, Tribal Affiliation
Tenure	Monthly Rent	Year Structure Built
Plumbing; Kitchen Facilities	Heating Fuel, Fuel Costs	Year Moved into Residence
Telephone Service, Mortgage	Taxes, Insurance, Utilities	Vehicles Available
Units in Structure	Veteran Status	Income

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Interpreting the Data: Factors to Consider

- Universe and residence rules
- Time Periods
- Reference Periods

2006 ACS Universe

- Total resident population of the United State and Puerto Rico
- Household population in 2005 and prior ACS years
- Group Quarters population added to sample in 2006

Residence Rules

- The American Community Survey uses a “two- month” rule
- Decennial census based upon the concept of “usual residence”

ACS Residence Rules

- Resident of a housing unit if a person
 - Lives there year round
 - Lives there more than 2 months but not year round
 - Is living there now with no other place to live
 - Is away now for 2 months or less

- Not a resident of a housing unit if a person
 - Lives there 2 months or less with another residence
 - Is away now for more than 2 months

USCENSUSBUREAU

17

ACS Produces Period Estimates

- Describes the characteristics of an area over a specific period of time

- Contrasts with point-in-time estimates that describe the characteristics of an area on a specific date

USCENSUSBUREAU

18

Reference Periods

- ACS uses the interview date as the single reference point, or as the end of a reference period, for all data collection.

Questions With No Specific Reference Period

- Most ACS questions do not stipulate a period of time that should be referenced
- Interpretation is yearly average since the data are collected each month and averaged across months

17 Is this house, apartment, or mobile home—

Owned by you or someone in this household with a mortgage or loan?

Owned by you or someone in this household free and clear (without a mortgage or loan)?

Rented for cash rent?

Occupied without payment of cash rent? → SKIP to (18)

Questions With a Specific Reference Period Relative to Interview Date

- Other questions specify a period of time relative to the date of interview
- Interpretation is still a yearly average but covering a slightly different period of time than the calendar year

- 10 a. At any time IN THE LAST 3 MONTHS, has this person attended regular school or college? *Include only nursery or preschool, kindergarten, elementary school, and schooling which leads to a high school diploma or a college degree.*
- No, has not attended in the last 3 months → SKIP to question 11
- Yes, public school, public college
- Yes, private school, private college
- b. What grade or level was this person attending? *Mark (X) ONE box.*
- Nursery school, preschool
- Kindergarten
- Grade 1 to grade 4
- Grade 5 to grade 8
- Grade 9 to grade 12
- College undergraduate years (freshman to senior)
- Graduate or professional school (for example, medical, dental, or law school)

USCENSUSBUREAU

21

Group Quarters

- Two types of group quarters:
 1. Institutional – for example, correctional facilities, nursing homes, and mental hospitals
 2. Non-institutional – for example, college dormitories, military barracks, group homes and shelters
- Group Quarters Population includes all people not living in households
 - This term includes those people residing in group quarters as of the date the ACS was conducted

HOUSEHOLDS AND FAMILIES: In 2006 there were 299,000 households in Honolulu County. The average household size was 2.9 people.

Families made up 70 percent of the households in Honolulu County. This figure includes both married-couple families (53 percent) and other families (17 percent). Nonfamily households made up 30 percent of all households in Honolulu County. Most of the nonfamily households were people living alone, but some were composed of people living in households in which no one was related to the householder.

The Types of Households in Honolulu County, Hawaii in 2006

Type of household	Percent of households
Married-couple families	53%
Other families	17%
People living alone	25%
Other nonfamily households	5%

S0201. Selected Population Profile in the United States

Population Group: Native Hawaiian alone or in any combination

Data Set: 2006 American Community Survey

Survey: 2006 American Community Survey

NOTE: For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Subject	Total population	Margin of Error	Native Hawaiian alone or in any combination	Margin of Error
Total population	1,285,488		262,112	+/-11,788
SEX AND AGE				
Male	50.0%	+/-0.1	50.2%	+/-1.1
Female	50.0%	+/-0.1	49.8%	+/-1.1
Under 5 years				
5 to 17 years	6.8%	+/-0.1	11.1%	+/-0.7
18 to 24 years	16.3%	+/-0.1	24.7%	+/-1.0
25 to 34 years	9.7%	+/-0.1	10.8%	+/-0.9
35 to 44 years	13.7%	+/-0.1	14.7%	+/-1.0
45 to 54 years	14.1%	+/-0.1	12.7%	+/-0.7
55 to 64 years	14.2%	+/-0.1	11.5%	+/-0.9
65 to 74 years	11.2%	+/-0.1	7.8%	+/-0.7
75 years and over	6.6%	+/-0.1	4.3%	+/-0.4
75 years and over	7.3%	+/-0.1	2.8%	+/-0.4
Median age (years)	37.2	+/-0.2	27.0	+/-0.6
18 years and over				
18 years and over	76.9%	+/-0.1	64.2%	+/-1.2
21 years and over	72.8%	+/-0.2	58.6%	+/-1.2

GCT0801. Mean Travel Time to Work of Workers 16 Years and Over Who Did Not Work at Home (Minutes): 2006

Universe: Workers 16 Years and Over Who Did Not Work at Home

Data Set: 2006 American Community Survey

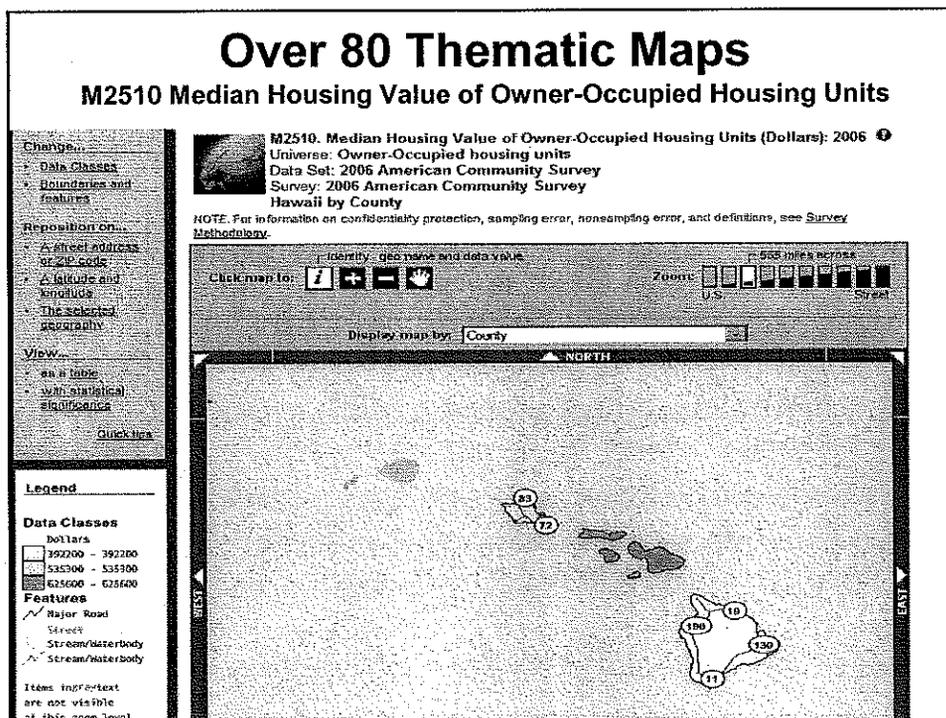

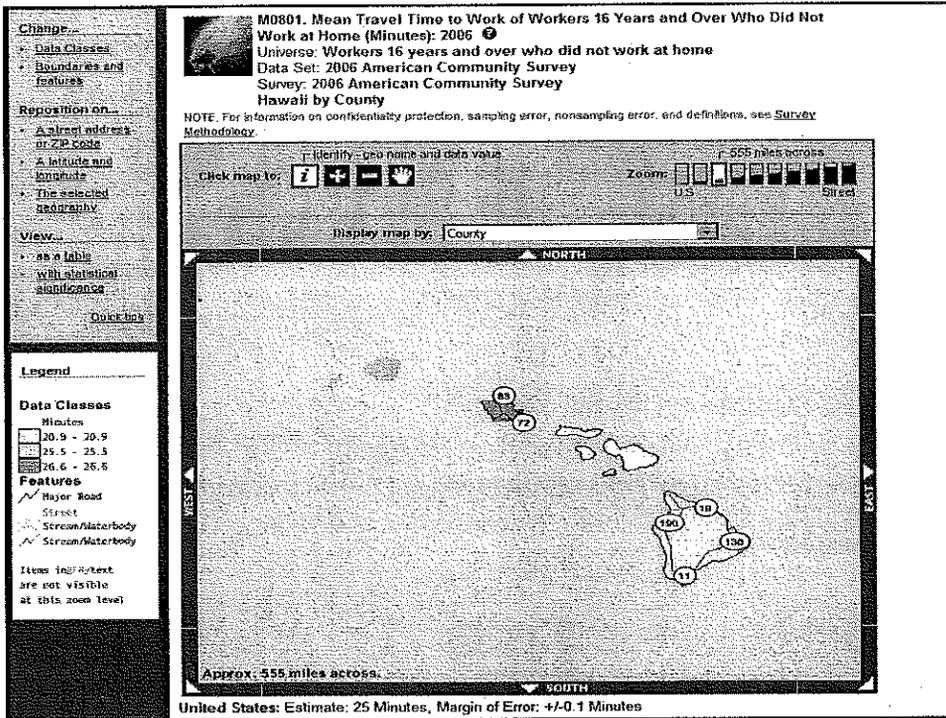

Survey: 2006 American Community Survey

NOTE: For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Geographic area	Average	Margin of Error
Hawaii	25.5	±0.4
COUNTY		
Hawaii County	25.5	±1.4
Honolulu County	26.6	±0.5
Maui County	20.9	±1.3

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Other Products

Special Tabulations

- Done on a reimbursable basis similar to the Special Tabs based on the 2000 Decennial Census
- Disclosure Review Board has different rules for these tables than for the regular data products
- For more information, go to the following URL:
http://www.census.gov/acs/www/Products/spec_tabs/index.htm

Public Use Microdata Sample (PUMS)

- Created each year from the full ACS sample
- Size will be approximately 1% of the total sampling universe
- Recoding and other techniques applied to data to protect confidentiality
- For more information, go to the following URL:
<http://www.census.gov/acs/www/Products/PUMS/index.htm>
