

S1301: Fertility
 Data Set: 2006 American Community Survey
 Survey: 2006 American Community Survey
 Geographic Area: Hawai

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Subject	Total	Margin of Error	Women with births in the past 12 months				Percent of women who had a birth in the past 12 months who were unmarried	Margin of Error
			Number	Margin of Error	Rate per 1,000 women	Margin of Error		
Women 15 to 50 years	313,915	+/-1,832	16,882	+/-1,967	54	+/-6	34.0%	+/-6.5
15 to 19 years	38,465	+/-1,302	784	+/-542	20	+/-14	92.2%	+/-13.8
20 to 34 years	126,352	+/-1,420	11,658	+/-1,714	92	+/-13	34.8%	+/-8.2
35 to 50 years	149,098	+/-1,859	4,440	+/-891	30	+/-6	21.8%	+/-9.4
RACE AND HISPANIC OR LATINO ORIGIN								
One race	N	N	N	N	N	N	N	N
White	82,021	+/-1,403	3,301	+/-866	40	+/-11	23.2%	+/-11.8
Black or African American	7,431	+/-942	441	+/-341	59	+/-44	43.8%	+/-42.6
American Indian and Alaska Native	N	N	N	N	N	N	N	N
Asian	120,353	+/-3,490	6,029	+/-1,048	50	+/-9	23.3%	+/-7.9
Native Hawaiian and Other Pacific Islander	29,705	+/-1,933	1,672	+/-544	56	+/-18	49.6%	+/-20.3
Some other race	3,863	+/-928	532	+/-410	138	+/-95	25.9%	+/-32.6
Two or more races	69,415	+/-4,188	4,810	+/-1,303	69	+/-18	48.2%	+/-12.7
Hispanic or Latino origin (of any race)	26,037	+/-633	2,792	+/-1,029	107	+/-40	48.6%	+/-19.2
White alone, not Hispanic or Latino	75,938	+/-863	3,130	+/-809	41	+/-11	23.9%	+/-12.3
CITIZENSHIP STATUS								
Native	250,250	+/-4,250	13,167	+/-1,852	53	+/-7	38.8%	+/-7.8
Foreign born	63,665	+/-4,047	3,715	+/-802	58	+/-12	17.1%	+/-10.7

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

·Foreign born excludes people born outside the United States to a parent who is a U.S. citizen.

·While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
