

S2401: Occupation by Sex and Median Earnings in the Past 12 Months for the Civilian Employed Population  
 Data Set: 2006 American Community Survey  
 Survey: 2006 American Community Survey  
 Geographic Area: Hawaii

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Subject	Total	Margin of Error	Male	Margin of Error	Female	Margin of Error	Median earnings (dollars)	Margin of Error	Median earnings (dollars) for male	Margin of Error	Median earnings (dollars) for female	Margin of Error
<b>Civilian employed population 16 years and over</b>	<b>610,394</b>	<b>+/-7,146</b>	<b>52.0%</b>	<b>+/-0.5</b>	<b>48.0%</b>	<b>+/-0.5</b>	<b>31,756</b>	<b>+/-467</b>	<b>37,044</b>	<b>+/-823</b>	<b>27,400</b>	<b>+/-711</b>
Management, professional, and related occupations:	201,797	+/-6,801	47.7%	+/-1.6	52.3%	+/-1.6	45,772	+/-1,066	52,387	+/-2,315	40,830	+/-751

Sales and office occupations:	163,846	+/-6,770	34.5%	+/-2.0	65.5%	+/-2.0	27,250	+/-698	33,158	+/-2,827	25,619	+/-676
Sales and related occupations	73,005	+/-4,527	43.2%	+/-3.1	56.8%	+/-3.1	25,652	+/-1,344	34,746	+/-3,600	20,439	+/-1,366
Office and administrative support occupations	90,841	+/-5,280	27.5%	+/-2.4	72.5%	+/-2.4	28,380	+/-964	31,708	+/-3,422	27,351	+/-814
Farming, fishing, and forestry occupations	6,243	+/-1,363	63.1%	+/-7.5	36.9%	+/-7.5	19,749	+/-2,525	22,322	+/-5,704	17,545	+/-6,700

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
