

United States -- States; and Puerto Rico

GCT1501. Percent of People 25 Years and Over Who Have Completed High School (Includes Equivalency): 2007

Universe: Population 25 years and over

Data Set: 2007 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Geographic area	Percent	Margin of Error
United States	84.5	+/-0.1
Alabama	80.4	+/-0.4
Alaska	90.5	+/-0.7
Arizona	83.5	+/-0.3
Arkansas	81.1	+/-0.4
California	80.2	+/-0.2
Colorado	88.9	+/-0.3
Connecticut	88.0	+/-0.3
Delaware	87.4	+/-0.7
District of Columbia	85.7	+/-0.9
Florida	84.9	+/-0.2
Georgia	82.9	+/-0.3
Hawaii	89.4	+/-0.5
Idaho	88.4	+/-0.6
Illinois	85.7	+/-0.2
Indiana	85.8	+/-0.3
Iowa	89.6	+/-0.3
Kansas	89.1	+/-0.4
Kentucky	80.1	+/-0.4
Louisiana	79.9	+/-0.4
Maine	89.4	+/-0.5
Maryland	87.4	+/-0.3
Massachusetts	88.4	+/-0.3
Michigan	87.4	+/-0.2
Minnesota	91.0	+/-0.2
Mississippi	78.5	+/-0.5
Missouri	85.6	+/-0.3
Montana	90.0	+/-0.6
Nebraska	89.6	+/-0.5
Nevada	83.7	+/-0.5
New Hampshire	90.5	+/-0.6
New Jersey	87.0	+/-0.3
New Mexico	82.3	+/-0.6
New York	84.1	+/-0.2
North Carolina	83.0	+/-0.3
North Dakota	89.0	+/-0.6
Ohio	87.1	+/-0.2
Oklahoma	84.8	+/-0.4
Oregon	88.0	+/-0.4
Pennsylvania	86.8	+/-0.2
Rhode Island	83.0	+/-0.9

Geographic area	Percent	Margin of Error
South Carolina	82.1	+/-0.4
South Dakota	88.2	+/-0.7
Tennessee	81.4	+/-0.3
Texas	79.1	+/-0.2
Utah	90.2	+/-0.4
Vermont	90.3	+/-0.7
Virginia	85.9	+/-0.3
Washington	89.3	+/-0.3
West Virginia	81.2	+/-0.5
Wisconsin	89.0	+/-0.2
Wyoming	91.2	+/-0.9
Puerto Rico	66.4	+/-0.5

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available. Selected migration, earnings, and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See [Errata Note #44](#) for details.
