

United States and States

R2301. Percent of People 16 to 64 Years Who Are in the Labor Force (Including Armed Forces): 2007

Universe: Population 16 to 64 years

Data Set: 2007 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Rank	State	Percent	Margin of Error
1	Nebraska	81.3	+/-0.5
2	Minnesota	81.2	+/-0.3
3	North Dakota	81.0	+/-0.8
4	Iowa	80.7	+/-0.4
5	South Dakota	80.5	+/-0.9
5	Wyoming	80.5	+/-1.2
7	Vermont	79.8	+/-0.9
8	New Hampshire	79.6	+/-0.6
9	Wisconsin	79.5	+/-0.3
10	Kansas	78.8	+/-0.4
11	Connecticut	78.2	+/-0.4
12	Colorado	77.9	+/-0.4
13	Maryland	77.5	+/-0.3
14	Massachusetts	77.4	+/-0.3
15	Utah	77.0	+/-0.5
16	Alaska	76.9	+/-0.8
17	Maine	76.7	+/-0.6
18	Hawaii	76.2	+/-0.6
18	Rhode Island	76.2	+/-0.8
20	Idaho	76.0	+/-0.6
21	Illinois	75.9	+/-0.2
22	Nevada	75.8	+/-0.5
23	Montana	75.7	+/-0.8
23	New Jersey	75.7	+/-0.3
23	Virginia	75.7	+/-0.3
26	Missouri	75.6	+/-0.4
27	Indiana	75.3	+/-0.3
27	Ohio	75.3	+/-0.2
29	Washington	75.2	+/-0.3
30	Delaware	75.1	+/-1.0
31	District of Columbia	74.9	+/-0.9
31	Oregon	74.9	+/-0.5
33	Pennsylvania	74.4	+/-0.3
	United States	74.3	+/-0.1
34	North Carolina	74.3	+/-0.3
35	Florida	73.9	+/-0.2
36	Georgia	73.3	+/-0.3
37	Michigan	73.1	+/-0.3
38	Oklahoma	72.9	+/-0.4
38	Tennessee	72.9	+/-0.3
40	Texas	72.7	+/-0.2
41	New York	72.6	+/-0.2
42	Arizona	72.5	+/-0.4
42	California	72.5	+/-0.2
44	South Carolina	72.1	+/-0.5

Rank	State	Percent	Margin of Error
45	New Mexico	71.1	+/-0.7
46	Arkansas	70.9	+/-0.6
47	Kentucky	70.7	+/-0.4
48	Alabama	69.9	+/-0.4
49	Louisiana	69.5	+/-0.5
50	Mississippi	68.6	+/-0.6
51	West Virginia	65.7	+/-0.7
	Puerto Rico	54.2	+/-0.5

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available. Selected migration, earnings, and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See [Errata Note #44](#) for details.

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.
