

United States and States

R2304. Percent of Married-Couple Families With Both Husband and Wife in the Labor Force: 2007

Universe: Married-couple families

Data Set: 2007 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Rank	State	Percent	Margin of Error
1	North Dakota	64.2	+/-1.5
2	South Dakota	64.1	+/-1.4
3	Vermont	62.9	+/-1.4
4	Minnesota	62.7	+/-0.6
5	Nebraska	62.1	+/-0.8
6	Iowa	61.5	+/-0.6
7	Wyoming	61.3	+/-2.2
8	Wisconsin	60.5	+/-0.5
9	Kansas	59.8	+/-0.7
10	New Hampshire	59.7	+/-1.3
11	Alaska	59.4	+/-2.0
12	Maryland	59.3	+/-0.7
13	Massachusetts	58.7	+/-0.6
14	District of Columbia	58.3	+/-2.8
15	Connecticut	58.0	+/-0.9
16	Maine	57.4	+/-1.0
17	Rhode Island	57.3	+/-1.6
18	Colorado	57.2	+/-0.7
19	Virginia	56.2	+/-0.5
20	Indiana	55.8	+/-0.6
21	Missouri	55.4	+/-0.6
22	Illinois	55.3	+/-0.5
22	New Jersey	55.3	+/-0.6
24	Ohio	55.1	+/-0.5
25	Georgia	54.7	+/-0.6
26	Pennsylvania	54.3	+/-0.4
27	Delaware	53.9	+/-2.0
27	Hawaii	53.9	+/-1.3
29	North Carolina	53.5	+/-0.6
	United States	53.4	+/-0.1
30	Utah	53.4	+/-1.0
31	Washington	53.3	+/-0.6
32	Montana	53.1	+/-1.3
33	Idaho	52.8	+/-1.3
34	Michigan	52.5	+/-0.4
34	Nevada	52.5	+/-1.0
36	New York	52.4	+/-0.4
37	Oregon	52.3	+/-0.9
38	Oklahoma	51.8	+/-0.7
39	South Carolina	51.5	+/-0.8
40	Tennessee	51.4	+/-0.6
41	California	51.1	+/-0.4
41	Texas	51.1	+/-0.4
43	Kentucky	50.4	+/-0.8
44	Arkansas	49.9	+/-1.0

Rank	State	Percent	Margin of Error
45	Mississippi	49.7	+/-1.1
46	Alabama	49.1	+/-0.7
47	Louisiana	48.5	+/-0.8
48	Florida	47.6	+/-0.4
49	New Mexico	47.5	+/-1.3
50	Arizona	46.1	+/-0.7
51	West Virginia	43.4	+/-1.0
	Puerto Rico	32.8	+/-0.9

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available. Selected migration, earnings, and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See [Errata Note #44](#) for details.

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.
