

United States and States

R2514. Median Monthly Housing Costs for Renter-Occupied Housing Units (Dollars): 2007

Universe: Renter-occupied housing units

Data Set: 2007 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Rank	State	Median	Margin of Error
1	Hawaii	1,194	+/-26
2	California	1,078	+/-5
3	New Jersey	1,026	+/-8
4	Maryland	1,000	+/-10
5	Nevada	980	+/-13
6	Massachusetts	946	+/-8
7	District of Columbia	934	+/-27
8	Connecticut	931	+/-13
9	Florida	925	+/-5
10	Alaska	918	+/-29
11	Delaware	910	+/-25
12	New York	907	+/-6
13	New Hampshire	892	+/-15
13	Virginia	892	+/-9
15	Rhode Island	830	+/-14
16	Arizona	819	+/-9
17	Washington	816	+/-8
	United States	789	+/-2
18	Colorado	788	+/-9
19	Illinois	783	+/-5
20	Georgia	768	+/-7
21	Vermont	756	+/-21
22	Oregon	743	+/-8
23	Texas	734	+/-4
24	Utah	733	+/-12
25	Minnesota	711	+/-7
26	Pennsylvania	685	+/-5
27	Michigan	683	+/-6
28	North Carolina	678	+/-6
29	Wisconsin	673	+/-6
30	Idaho	654	+/-11
31	Louisiana	651	+/-10
32	Maine	650	+/-16
33	South Carolina	645	+/-9
34	Ohio	643	+/-5
35	Indiana	638	+/-5
36	New Mexico	637	+/-11
37	Wyoming	636	+/-21
38	Tennessee	634	+/-6
39	Kansas	623	+/-8
40	Missouri	618	+/-6
41	Nebraska	614	+/-10
42	Mississippi	609	+/-13
43	Alabama	601	+/-7
44	Oklahoma	588	+/-7

Rank	State	Median	Margin of Error
45	Montana	579	+/-13
46	Arkansas	573	+/-9
47	Iowa	567	+/-8
48	Kentucky	563	+/-6
49	South Dakota	526	+/-20
50	West Virginia	525	+/-11
51	North Dakota	516	+/-11
	Puerto Rico	392	+/-8

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available. Selected migration, earnings, and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See [Errata Note #44](#) for details.

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.
