

Median Age at First Marriage for Womer
 Universe: Female population
 Data Set: 2008 American Community Survey 1-Year Estimate
 Survey: American Community Survey
 Geographic Area: United States and State

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Rank	State	Median	Margin of Error (+/-)
1	District of Columbia	29.7	0.9
2	Connecticut	28.2	0.4
2	Massachusetts	28.2	0.4
4	New York	28.1	0.3
5	Rhode Island	27.8	1
6	New Jersey	27.6	0.3
7	Maryland	27.3	0.5
8	Vermont	27.1	1.2
9	Hawaii	26.8	1.1
9	Illinois	26.8	0.3
9	Pennsylvania	26.8	0.2
12	California	26.7	0.2
12	South Carolina	26.7	0.5
14	Michigan	26.6	0.2
15	Maine	26.5	0.5
15	New Hampshire	26.5	0.5
17	Florida	26.4	0.3
18	Delaware	26.3	0.6
18	Ohio	26.3	0.2
	United States	26.2	0.1
20	New Mexico	26.2	0.7
20	North Carolina	26.2	0.3
22	Wisconsin	26.1	0.2
23	Arizona	26	0.3
23	Minnesota	26	0.2
23	Mississippi	26	0.4
23	Virginia	26	0.3
27	Georgia	25.9	0.2
27	Oregon	25.9	0.3
29	Indiana	25.8	0.2
30	Nevada	25.7	0.4
30	Washington	25.7	0.2
32	Colorado	25.6	0.2
32	Louisiana	25.6	0.3
32	Missouri	25.6	0.2
35	Alaska	25.5	0.9
35	Iowa	25.5	0.2
35	Montana	25.5	0.6
38	North Dakota	25.4	0.5
38	South Dakota	25.4	0.5

40	Nebraska	25.3	0.3
40	Texas	25.3	0.2
42	Alabama	25.2	0.3
43	Kentucky	25	0.2
43	Tennessee	25	0.2
45	Kansas	24.9	0.3
46	West Virginia	24.6	0.5
47	Wyoming	24.5	1.1
48	Oklahoma	24.4	0.3
49	Arkansas	24.3	0.4
50	Idaho	23.5	0.8
50	Utah	23.5	0.5
	Puerto Rico	27.1	0.6

Source: U.S. Census Bureau, 2008 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

-While the 2008 American Community Survey (ACS) data generally reflect the November 2007 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2008 Puerto Rico Community Survey (PRCS) data generally reflect the November 20 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

-Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
