

## United States and States

### R0502. Percent of People Born in Europe

Universe: Foreign-born population

Data Set: 2009 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE: For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Rank	State	Percent	Margin of Error
1	Vermont	38.7	+/-5.6
2	Montana	33.1	+/-6.5
3	Connecticut	28.1	+/-1.2
4	Ohio	27.7	+/-1.3
5	Pennsylvania	26.4	+/-1.1
6	Massachusetts	25.9	+/-0.9
7	New Hampshire	25.7	+/-2.8
8	Michigan	25.0	+/-1.2
9	Maine	24.9	+/-3.4
10	Missouri	23.6	+/-1.8
10	Rhode Island	23.6	+/-2.3
12	South Dakota	23.2	+/-8.7
13	Illinois	22.7	+/-0.7
14	Wisconsin	20.3	+/-1.7
15	New York	19.2	+/-0.4
16	Washington	18.4	+/-1.0
17	New Jersey	18.1	+/-0.5
18	Kentucky	18.0	+/-2.5
19	Idaho	17.1	+/-2.5
20	District of Columbia	16.9	+/-2.6
21	South Carolina	16.6	+/-1.6
22	West Virginia	16.5	+/-4.2
23	Indiana	16.4	+/-1.7
23	Oregon	16.4	+/-1.3
25	North Dakota	16.1	+/-4.2
26	Iowa	15.2	+/-2.1
27	Delaware	14.6	+/-2.8
28	Colorado	13.5	+/-0.9
29	Alaska	13.3	+/-2.3
30	Wyoming	13.2	+/-4.4
31	Minnesota	12.9	+/-1.2
	<b>United States</b>	12.7	+/-0.1
32	Alabama	12.5	+/-1.4
32	Mississippi	12.5	+/-2.7
34	Maryland	12.2	+/-0.7
35	Tennessee	12.0	+/-1.3
36	North Carolina	11.7	+/-0.7
36	Virginia	11.7	+/-0.7
38	Utah	11.1	+/-1.3
39	Louisiana	10.7	+/-1.4
40	Florida	10.5	+/-0.3
41	Georgia	10.0	+/-0.7
42	Arkansas	9.6	+/-1.7
43	Arizona	8.9	+/-0.6
44	Kansas	8.8	+/-1.3
45	Nevada	8.7	+/-0.9
46	New Mexico	7.9	+/-1.0
46	Oklahoma	7.9	+/-0.9
48	California	6.7	+/-0.2
49	Nebraska	5.9	+/-1.1
50	Hawaii	5.5	+/-0.9
51	Texas	4.6	+/-0.2

Rank 	State 	Percent	Margin of Error
	Puerto Rico	3.8	+/-1.0

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

·U.S. citizens born in Europe are excluded.

·While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

·Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
