

United States and States

R1704. Percent of Children Under 18 Years Below Poverty Level in the Past 12 Months (For Whom Poverty Status is Determined)

Universe: Children under 18 years for whom poverty status is determined

Data Set: 2009 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Rank	State	Percent	Margin of Error
1	Mississippi	31.0	+/-1.3
2	District of Columbia	29.4	+/-4.1
3	Arkansas	27.2	+/-1.3
4	Kentucky	25.6	+/-1.2
5	New Mexico	25.3	+/-2.0
6	Alabama	24.7	+/-0.9
7	South Carolina	24.4	+/-1.0
7	Texas	24.4	+/-0.5
9	Louisiana	24.2	+/-1.1
10	Tennessee	23.9	+/-0.9
11	West Virginia	23.6	+/-1.4
12	Arizona	23.4	+/-1.0
13	Michigan	22.5	+/-0.7
13	North Carolina	22.5	+/-0.7
15	Georgia	22.3	+/-0.8
16	Oklahoma	22.2	+/-1.1
17	Ohio	21.9	+/-0.6
18	Montana	21.4	+/-2.3
19	Florida	21.3	+/-0.6
20	Missouri	20.7	+/-0.9
	United States	20.0	+/-0.2
21	Indiana	20.0	+/-0.8
21	New York	20.0	+/-0.5
23	California	19.9	+/-0.3
24	Oregon	19.2	+/-1.1
25	Illinois	18.9	+/-0.7
26	South Dakota	18.5	+/-2.2
27	Idaho	18.1	+/-1.5
28	Kansas	17.6	+/-1.3
28	Nevada	17.6	+/-1.6
30	Colorado	17.4	+/-1.0
31	Maine	17.1	+/-1.6
31	Pennsylvania	17.1	+/-0.5
33	Rhode Island	16.9	+/-1.8
34	Wisconsin	16.7	+/-0.8
35	Delaware	16.5	+/-2.6
36	Washington	16.2	+/-0.9
37	Iowa	15.7	+/-1.1
38	Nebraska	15.2	+/-1.2
39	Minnesota	14.1	+/-0.7
40	Virginia	13.9	+/-0.8
41	Hawaii	13.8	+/-1.5
42	New Jersey	13.5	+/-0.7
43	Vermont	13.3	+/-1.9
44	Massachusetts	13.1	+/-0.7
45	North Dakota	13.0	+/-1.7
46	Alaska	12.8	+/-1.8
47	Wyoming	12.6	+/-2.4
48	Utah	12.2	+/-1.0
49	Connecticut	12.1	+/-1.0
50	Maryland	11.6	+/-0.8

Rank ↓	State ↓	Percent	Margin of Error
51	New Hampshire	10.8	+/-1.6
	Puerto Rico	57.1	+/-1.0

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

·While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

·Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
