R2504. Percent of Occupied Housing Units That Were Moved Into in 2005 or Later Universe: Occupied housing units Data Set: 2009 American Community Survey 1-Year Estimates Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Rank 🕹		Percent	Margin of Erro
1	Nevada	54.2	+/-0.
2	Texas	47.9	+/-0.
3	Arizona	47.6	+/-0.
3	District of Columbia	47.6	+/-1.
5	Colorado	47.2	+/-0.
6	Utah	45.8	+/-0
7	Oregon	45.6	+/-0
8	Alaska	45.4	+/-1
8	Idaho	45.4	+/-0
10	Washington	45.2	+/-0
	Oklahoma	44.9	+/-0
12	Georgia	44.5	+/-0
13	Kansas	43.9	+/-0
13	Wyoming	43.9	+/-1
15	Arkansas	43.8	+/-0
15	North Dakota	43.8	+/-0
17	North Carolina	43.0	+/-0
18	Florida	42.6	+/-0
19	Louisiana	42.0	+/-0
20	Tennessee	41.6	+/-0
21	New Mexico	41.5	+/-0
22	California	41.4	+/-0
22	Nebraska	41.4	+/-0
	Hawaii	41.3	+/-1
25	South Carolina	41.2	+/-0
	Missouri	41.1	+/-0
26	Montana	41.1	+/-1
	Virginia	41.1	+/-0
	United States	40.5	+/-0
29	Mississippi	40.2	+/-0
	South Dakota	39.9	+/-1
31	Indiana	39.7	+/-0
31	lowa	39.7	+/-0
	Alabama	39.5	+/-0
	Kentucky	39.0	+/-0
	Illinois	38.8	+/-0
	Wisconsin	38.3	+/-0
	Maryland	38.2	+/-0
	Ohio	37.9	+/-0
	Delaware	37.8	+/-0
	Minnesota	36.8	+/-1
40	Rhode Island	36.7	+/-0
	Massachusetts	36.2	+/-1
	New Hampshire	35.6	+/-0
	Connecticut	35.0	+/-0
	New Jersey	34.6	+/-0
	Michigan	34.5	+/-0
	Maine	33.9	+/-0

	New York	<u> </u>	
		33.4	+/-0
	Pennsylvania		+/-0
51	West Virginia	32.6	+/-0

Percent	Margin of Error
21.5	+/-0.6
	Percent 21.5

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

## Notes:

-While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

-Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

## Explanation of Symbols:

1. An "\*\*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate. or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

 An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate. 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.
