

United States and States

R2701. Percent without Health Insurance Coverage

Universe: Civilian Noninstitutionalized Population

Data Set: 2009 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE: For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Rank	State	Percent	Margin of Error
1	Texas	23.8	+/-0.2
2	Nevada	21.9	+/-0.7
3	Alaska	21.1	+/-1.1
4	Florida	20.9	+/-0.2
5	New Mexico	19.7	+/-0.6
6	Georgia	19.1	+/-0.3
7	Oklahoma	18.7	+/-0.5
8	Montana	18.2	+/-0.8
9	California	18.0	+/-0.2
10	Mississippi	17.9	+/-0.6
11	Idaho	17.4	+/-0.6
11	Louisiana	17.4	+/-0.5
13	Arizona	17.3	+/-0.4
14	Arkansas	17.0	+/-0.5
14	Oregon	17.0	+/-0.5
16	South Carolina	16.8	+/-0.4
17	North Carolina	16.1	+/-0.3
18	Colorado	15.8	+/-0.4
19	Wyoming	15.2	+/-1.2
	United States	15.1	+/-0.1
20	Utah	14.6	+/-0.6
21	Kentucky	14.5	+/-0.4
22	Indiana	14.3	+/-0.4
22	Tennessee	14.3	+/-0.3
24	West Virginia	14.2	+/-0.6
25	Alabama	13.8	+/-0.4
26	Washington	13.4	+/-0.3
27	Illinois	13.3	+/-0.2
28	Kansas	13.2	+/-0.4
28	Missouri	13.2	+/-0.3
30	South Dakota	13.1	+/-0.7
31	New Jersey	12.6	+/-0.2
32	Michigan	12.2	+/-0.2
32	Ohio	12.2	+/-0.2
34	Nebraska	11.9	+/-0.5
34	Virginia	11.9	+/-0.3
36	New York	11.4	+/-0.2
37	Rhode Island	11.3	+/-0.7
38	Maryland	11.1	+/-0.3
39	Maine	10.5	+/-0.5
40	Delaware	10.2	+/-0.7
40	New Hampshire	10.2	+/-0.6
42	Pennsylvania	9.9	+/-0.2
43	North Dakota	9.7	+/-0.6
44	Wisconsin	9.4	+/-0.2
45	Minnesota	9.1	+/-0.3
46	Connecticut	8.8	+/-0.4
47	Iowa	8.6	+/-0.3
47	Vermont	8.6	+/-0.6
49	District of Columbia	7.0	+/-0.7
49	Hawaii	7.0	+/-0.5
51	Massachusetts	4.2	+/-0.2

Rank 	State 	Percent	Margin of Error
	Puerto Rico	8.4	+/-0.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

- Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added in 2009 -- please see http://www.census.gov/hhes/www/hlthins/publications/coverage_edits_final.pdf for more details.
- While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.
- Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
