S1902. Mean Income in the Past 12 Months (In 2009 Inflation-Adjusted Dollars)

Data Set: 2009 American Community Survey 1-Year Estimates

Survey: American Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Subject	Total	Margin of Error	Mean income (dollars)	Margin of Error
HOUSEHOLD INCOME			,	
All households	446,136	+/-4,850	79,329	+/-1,481
With earnings	82.8%	+/-0.8	75,359	+/-1,609
With interest, dividends, or net rental income	29.8%	+/-0.9	17,125	+/-1,792
With Social Security income	30.2%	+/-0.8	16,348	+/-402
With Supplemental Security Income (SSI)	3.1%	+/-0.4	8,313	+/-764
With cash public assistance income	3.7%	+/-0.5	5,165	+/-521
With retirement income	21.4%	+/-0.7	22,631	+/-953
FAMILY INCOME BY NUMBER OF WORKE	RS IN FAMI	LY		
All families	310,366	+/-5,604	89,309	+/-1,897
No workers	11.7%	+/-0.8	51,865	+/-4,244
1 worker	29.5%	+/-1.4	69,109	+/-3,771
2 workers, husband and wife worked	32.9%	+/-1.3	102,878	+/-3,356
2 workers, other	9.6%	+/-0.8	80,118	+/-3,489
3 or more workers, husband and wife worked	10.5%	+/-0.8	132,819	+/-4,893
3 or more workers, other	5.8%	+/-0.7	127,567	+/-8,270
PER CAPITA INCOME BY RACE AND HISP	ANIC OR L	ATINO ORIGIN

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

- Selected earnings and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See the ACS User Notes for details.
- ·While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.
- -Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

http://factfinder.census.gov/servlet/STTable?_bm=y&-context=st&-qr_name=ACS_2009_1YR_G00_S19... 9/28/2010

- 2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
- 3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
- 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

 5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

 6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample
- 8. An '(X)' means that the estimate is not applicable or not available.
