S2409 | CLASS OF WORKER BY SEX AND MEDIAN EARNINGS IN THE PAST 12 MONTHS (IN 2010 INFLATION-ADJUSTED DOLLARS) FOR THE FULL-TIME, YEAR-ROUND CIVILIAN EMPLOYED POPULATION 16 YEARS AND OVER

2010 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns.

Subject	Hawaii					
	Total		Male		Female	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Full-time, year-round civilian employed population 16 years and over	440,818	+/-8,484	54.2%	+/-0.9	45.8%	+/-0.9
Private for-profit wage and salary workers	269,704	+/-8,491	56.3%	+/-1.2	43.7%	+/-1.2
Employee of private company workers	253,429	+/-8,164	55.6%	+/-1.2	44.4%	+/-1.2
Self-employed in own incorporated business workers	16,275	+/-2,147	66.6%	+/-7.2	33.4%	+/-7.2
Private not-for-profit wage and salary workers	33,138	+/-3,043	41.8%	+/-4.5	58.2%	+/-4.5
Local government workers	22,301	+/-2,546	62.7%	+/-5.3	37.3%	+/-5.3
State government workers	49,985	+/-3,813	37.8%	+/-3.2	62.2%	+/-3.2
Federal government workers	39,708	+/-4,367	62.7%	+/-4.1	37.3%	+/-4.1
Self-employed in own not incorporated business workers and unpaid family workers	25,982	+/-2,880	59.1%	+/-5.3	40.9%	+/-5.3
PERCENT IMPUTED						
Class of worker	6.2%	(X)	(X)	(X)	(X)	(X)

Subject	Hawaii					
	Median earnings (dollars)		Median earnings (dollars) for male		Median earnings (dollars) for female	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Full-time, year-round civilian employed population 16 years and over	40,713	+/-575	46,068	+/-1,306	36,180	+/-653
Private for-profit wage and salary workers	36,575	+/-796	41,388	+/-994	32,143	+/-736
Employee of private company workers	36,157	+/-812	41,111	+/-981	31,898	+/-590
Self-employed in own incorporated business workers	51,261	+/-2,419	51,844	+/-7,694	48,827	+/-11,192
Private not-for-profit wage and salary workers	41,983	+/-2,437	48,018	+/-6,307	40,351	+/-3,007
Local government workers	47,651	+/-2,291	50,220	+/-1,646	41,688	+/-1,661
State government workers	46,961	+/-1,422	51,559	+/-1,056	43,074	+/-2,757
Federal government workers	52,464	+/-3,972	61,892	+/-3,738	46,165	+/-1,571
Self-employed in own not incorporated business workers and unpaid family workers	35,261	+/-6,197	37,233	+/-3,656	27,003	+/-6,646
PERCENT IMPUTED						
Class of worker	(X)	(X)	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The Class of Worker status "unpaid family workers" may have earnings. Earnings reflect any earnings from all jobs held during the 12 months prior to the ACS interview. The Class of Worker status reflects the job or business held the week prior to the ACS interview, or the last job held by the respondent.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
