

R2201 | PERCENT OF HOUSEHOLDS THAT RECEIVE FOOD STAMPS/SNAP - United States -- States; and Puerto Rico
 Universe: Households
 2012 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

To view this table with statistical significance, select With Statistical Significance in the Action menu.
 An # next to a geography indicates when an estimate is not statistically significant from the estimate for the selected geography.
 The ## indicates the selected geography.

Rank	Geographical Area	Percent	Margin of Error
	United States	13.6	+/-0.1
1	Oregon	20.1	+/-0.5
2	Mississippi	19.4	+/-0.6
3	Kentucky	18.2	+/-0.5
4	Maine	17.8	+/-0.7
4	Michigan	17.8	+/-0.3
6	Tennessee	17.7	+/-0.4
7	Louisiana	17.6	+/-0.5
8	Alabama	16.8	+/-0.4
9	Georgia	16.5	+/-0.3
9	New Mexico	16.5	+/-0.6
11	South Carolina	16.3	+/-0.4
12	Ohio	15.7	+/-0.2
12	West Virginia	15.7	+/-0.6
14	Arkansas	15.5	+/-0.4
14	New York	15.5	+/-0.2
16	District of Columbia	15.4	+/-0.9
16	Rhode Island	15.4	+/-0.8
18	North Carolina	15.3	+/-0.3
19	Florida	15.2	+/-0.2
20	Washington	15.1	+/-0.3
21	Missouri	14.7	+/-0.3
21	Vermont	14.7	+/-0.9
23	Arizona	14.5	+/-0.3
24	Texas	14.3	+/-0.2
25	Delaware	14.2	+/-0.9
25	Oklahoma	14.2	+/-0.3
27	Idaho	13.8	+/-0.8
28	Wisconsin	13.3	+/-0.3
29	Pennsylvania	13.1	+/-0.2
30	Illinois	12.9	+/-0.2
30	Massachusetts	12.9	+/-0.3
32	Indiana	12.8	+/-0.3

Rank	Geographical Area	Percent	Margin of Error
33	Nevada	12.6	+/-0.6
34	Iowa	12.4	+/-0.5
35	Connecticut	12.0	+/-0.4
36	Montana	11.9	+/-0.7
37	Alaska	11.4	+/-0.9
38	Hawaii	11.3	+/-0.7
39	Maryland	11.1	+/-0.3
40	South Dakota	10.4	+/-0.7
41	Kansas	9.9	+/-0.4
42	Utah	9.8	+/-0.5
43	Virginia	9.7	+/-0.3
44	Colorado	9.3	+/-0.4
44	Nebraska	9.3	+/-0.5
44	New Jersey	9.3	+/-0.2
47	Minnesota	9.2	+/-0.2
48	California	9.1	+/-0.1
49	New Hampshire	8.3	+/-0.7
50	North Dakota	7.7	+/-0.7
51	Wyoming	7.0	+/-0.8
	Puerto Rico	38.0	+/-0.6

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-1' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+1' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
