R1202 | PERCENT OF WOMEN 15 YEARS AND OVER WHO WERE NEVER MARRIED - United States -- States; and Puerto Rico
Universe: Females 15 years and over
2013 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

To view this table with statistical significance, select With Statistical Significance in the Action menu.
A # next to a geography indicates when an estimate is not statistically significant from the estimate for the selected geography.
The ## indicates the selected geography.

Rank	Geographical Area	Percent	Margin of Error
	United States	30.0	+/-0.1
1	District of Columbia	55.6	+/-1.2
2	New York	35.5	+/-0.2
3	Massachusetts	33.7	+/-0.4
4	California	33.2	+/-0.2
5	Maryland	33.1	+/-0.4
6	Rhode Island	33.0	+/-0.9
7	Illinois	31.8	+/-0.3
8	Louisiana	31.7	+/-0.5
9	New Mexico	31.6	+/-0.7
10	New Jersey	31.3	+/-0.3
11	Delaware	31.1	+/-0.9
11	Georgia	31.1	+/-0.3
13	Connecticut	30.9	+/-0.5
14	Pennsylvania	30.8	+/-0.2
15	Mississippi	30.5	+/-0.6
16	Alaska	30.2	+/-1.1
17	Michigan	30.0	+/-0.3
18	Arizona	29.5	+/-0.4
19	South Carolina	29.4	+/-0.4
20	Texas	29.1	+/-0.2
21	Ohio	29.0	+/-0.3
21	Virginia	29.0	+/-0.3
21	Wisconsin	29.0	+/-0.4
24	Hawaii	28.9	+/-0.9
25	Nevada	28.8	+/-0.6
25	North Carolina	28.8	+/-0.3
27	Vermont	28.7	+/-1.1
28	Minnesota	28.3	+/-0.3
29	Florida	27.9	+/-0.3
30	Alabama	27.5	+/-0.4
30	Colorado	27.5	+/-0.4
30	Indiana	27.5	+/-0.4

Rank	Geographical Area	Percent	Margin of Error
30	Missouri	27.5	+/-0.4
30	North Dakota	27.5	+/-1.0
35	Washington	27.2	+/-0.4
36	Nebraska	26.8	+/-0.6
36	Oregon	26.8	+/-0.5
38	New Hampshire	26.7	+/-0.9
39	Tennessee	26.6	+/-0.4
39	Utah	26.6	+/-0.5
41	South Dakota	26.5	+/-1.0
42	Iowa	25.9	+/-0.5
43	Kansas	25.5	+/-0.5
44	Maine	25.4	+/-0.7
44	Montana	25.4	+/-0.9
46	Arkansas	24.6	+/-0.6
46	Oklahoma	24.6	+/-0.4
48	Kentucky	24.5	+/-0.4
49	West Virginia	24.4	+/-0.7
50	Wyoming	23.3	+/-1.5
51	Idaho	22.3	+/-0.7
	Puerto Rico	35.0	+/-0.5

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
