

CENSUS DATA HIGHLIGHTS

Hawaii State Data Center, December 3, 2015

HIGHLIGHTS OF THE 2010-2014 AMERICAN COMMUNITY SURVEY 5-YEAR DATA FOR HAWAII

The U.S. Census Bureau released its 2010-2014 American Community Survey (ACS) 5-year estimates on December 3, 2015. The estimates are based on the annual American Community Survey conducted by the Census Bureau which include social, economic, and detailed housing characteristics of Hawaii's population.

The Census Bureau releases 5-year data for all census geographic areas down to the block group level. Almost 9% of Hawaii's population was surveyed between this 2010 to 2014 period.

Some interesting additions to the ACS 5-year dataset series are tables for the foreign-born populations by sex and detailed age categories; usual hours worked per week by weeks worked for the population 65 years and over by sex; full-time, year-round work status by age for the population 16 years and over; and health insurance coverage estimates by school enrollment status for young adults aged 19 to 25.

This data release is also the first time that ACS users are able to look at trends using non-overlapping time periods, especially for small areas. These time periods are 2005-2009 and 2010-2014. Caution must be taken, though, that the area boundaries did not change over the two time periods. One example of an area that may be compared is the Mililani Town census-designated place (CDP). The population in the Mililani Town area grew by 2% during this time interval. The percentage of the population who were elderly increased from about 11% in the earlier time period to 15% in the later one. At the same time, the median household income (adjusted for inflation) decreased by 5%. Please note that this data does not include people in the separate area called Mililani Mauka CDP.

Through the use of the census tract data, information by islands may be obtained from the ACS 5-year estimates.

Selected small area rankings

The following analyses are based upon the ranking of the 317 census tracts in Hawaii which had population. The numbers presented below are averages over the 2010-2014 time period.

Here are some highlights for Hawaii. Tables included in these highlights display only the 20 top ranking census tracts. For the complete list and for the margin of errors, see the accompanying EXCEL data file.

- **Resident population.** Three census tracts had 10,000 people or more – Hawaiian Paradise Park (census tract 210.05), Ewa Villages (census tract 86.17) and Kapolei Golf Course (census tract 86.06). Nine additional census tracts had 9,000 people or more. (Table 1)

- **Median household income.** Waialae Iki (census tract 4.02) had the highest median household income which was \$163,636. All 48 census tracts that had median household incomes of \$100,000 or more were located on the Island of Oahu. (Table 2)
- **Median family income.** Round Top-Tantalus (census tract 32) had the highest median family income at \$183,958. There were 74 census tracts with median family incomes of \$100,000 or more. Most of these tracts were located on the Island of Oahu. Three of these areas were on the Island of Maui. (Table 3)
- **Percent persons below poverty level.** Linapuni Street (census tract 62.02) on the Island of Oahu had the highest percentage of people below the poverty rate at 68.7%. Of the 17 census tracts with percent of persons below the poverty level equaling to or greater than 30%, 10 were located on the Island of Oahu, 6 were on the Island of Hawaii, and one was on the Island of Maui. (Table 4)
- **Percent families below poverty level.** Linapuni Street (census tract 62.02) also had the highest percent of families below the poverty level at 58.2%. There were 8 census tracts with family poverty rates equal to or greater than 30%. Two census tracts were located on the Island of Hawaii and the rest were on the Island of Oahu. (Table 5)
- **Percent civilian unemployed.** Civic Center (census tract 39) had the highest percent of civilian unemployed at 26.4%, followed by Halawa Valley (census tract 75.02) at 22.6%. Of the 5 census tracts with civilian unemployment rates of 20% or above, one was on the Island of Hawaii and the rest were on the Island of Oahu. (Table 6)
- **Percent high school degree or higher.** All 7 census tracts where 100% of their population 25 years and over had a high school degree or higher were located on Oahu. (Table 7)
- **Percent bachelor's degree or higher.** The top 5 census tracts with 70% or more of their population 25 years or over holding a bachelor's degree or higher were also all located on the Island of Oahu. (Table 8)
- **Percent foreign-born.** Palama (census tract 55) on the Island of Oahu was the most significant census tract for foreign-born population with 60.5% of its population were born in other countries. This area was followed by Umi Street (census tract 60) with a foreign-born population of 58.5% and Chinatown (census tract 52) with a foreign-born population of 55.3%. A majority of the top census tracts with foreign-born populations of 50% or more were located in the urban Honolulu area. It should be noted that although Hanauma Bay (census tract 9800) topped the listing, the total population in that area was less than 10 people. (Table 9)
- **Percent persons who speak a language other than English.** Mayor Wright Housing (census tract 54) was the most significant census tract in regard to the percentage of people who spoke a language other than English at home with 68.4%. This area was followed by Linapuni Street (census tract 62.02) with 68.3% of the people in this area who spoke a language other than English at home, then Umi Street (census tract 60) with a figure of 68.2%. Not surprisingly, 9 of these top 10 census tracts matched those found at the top of the percent foreign-born population listing. It should again be noted that although Hanauma Bay (census tract 9800) topped the listing, the total population in that area was less than 10 people. (Table 10)
- **Owner-occupied home value.** Eleven census tracts in Hawaii had owner-occupied homes with values averaging a million dollars or more. Many of these areas were in East Oahu - Portlock (census tract 1.14), Waialae Iki (census tract 4.02), Waialae-Kahala (census tract 5), and Diamond Head (census tract 6). Neighbor island areas were also on the top of the list included Ha'ena-Hanalei (census tract 401.04) on the Island of Kauai and Wailea (census tract 303.03) and Honokowai (census tract 315.03) on the Island of Maui. (Table 11)
