Selected Social Characteristics in the United States: 2005

Data Set: 2005 American Community Survey

Survey: 2005 American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Selected Social Characteristics in the United States: 2005	Estimate	Margin of Error
SCHOOL ENROLLMENT		
Population 3 years and over enrolled in school	223,009	+/-4,471

Widowed	39,490	+/-2,480
Divorced	39,097	+/-3,006
FERTILITY		
Number of women 15 to 50 years old who had a birth in the past 12 months	11,499	+/-1,517
Unmarried women (widowed, divorced, and never married)	3,376	+/-881
Per 1,000 unmarried women	33	+/-9
Per 1,000 women 15 to 50 years old	55	+/-7
Per 1,000 women 15 to 19 years old	16	+/-10
Per 1,000 women 20 to 34 years old	100	+/-17
Per 1,000 women 35 to 50 years old	29	+/-7
GRANDPARENTS		
Number of grandparents living with own grandchildren under 18 years in households	40,993	+/-3,265
Responsible for grandchildren	9,396	+/-1,599
Years responsible for grandchildren		

Selected Social Characteristics in the United States: 2005	Estimate	Margin of Error
Less than 1 year	2,085	+/-629
1 or 2 years	1,450	+/-639
3 or 4 years	1,237	+/-501
5 or more years	4,624	+/-1,217
Characteristics of grandparents responsible for own grandchildren under 18 years		
Who are female	57.0%	+/-5.3
Who are married	72.6%	+/-9.1
VETERAN STATUS		
Civilian population 18 years and over	643,709	+/-2,432
Civilian veterans	89,381	+/-3,708
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION		
Population 5 years and over	786,232	+/-2,468
With a disability	96,071	+/-5,603
Population 5 to 15 years		
With a disability	4,491	+/-1,074
Population 16 to 64 years		
With a disability	49,108	+/-4,043
Population 65 years and over		
With a disability	42,472	+/-2,898
RESIDENCE 1 YEAR AGO		
Population 1 year and over	859,158	+/-1,648

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

- Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).
- The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the [ACS Subject Definitions](#) for Disability.
- Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '***' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '*****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

8. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
9. An '(X)' means that the estimate is not applicable or not available.
