Unmarried partner	3,316	+/-1,094
HOUSEHOLDS BY TYPE		
Total households	59,062	+/-2,421
Family households (families)	47,235	+/-2,181
With own children under 18 years	23,710	+/-2,228
Married-couple families	37,617	+/-2,252
With own children under 18 years	19,408	+/-2,240
Male householder, no wife present	2,930	+/-845
With own children under 18 years	1,232	+/-605
Female householder, no husband present	6,688	+/-1,448
With own children under 18 years	3,070	+/-1,106
Nonfamily households	11,827	+/-1,629
Householder living alone	8,972	+/-1,551
65 years and over	1,436	+/-516
Households with one or more people under 18 years	27,755	+/-2,184
Households with one or more people 65 years and over	12,995	+/-1,492

General Demographic Characteristics: 2005	Estimate	Margin of Error
Average household size	3.34	+/-0.12
Average family size	3.70	+/-0.12

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

- The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.
- For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, [Overview of Race and Hispanic Origin](#), issued March 2001. (pdf format)

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
8. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
9. An '(X)' means that the estimate is not applicable or not available.
