Census Reporter

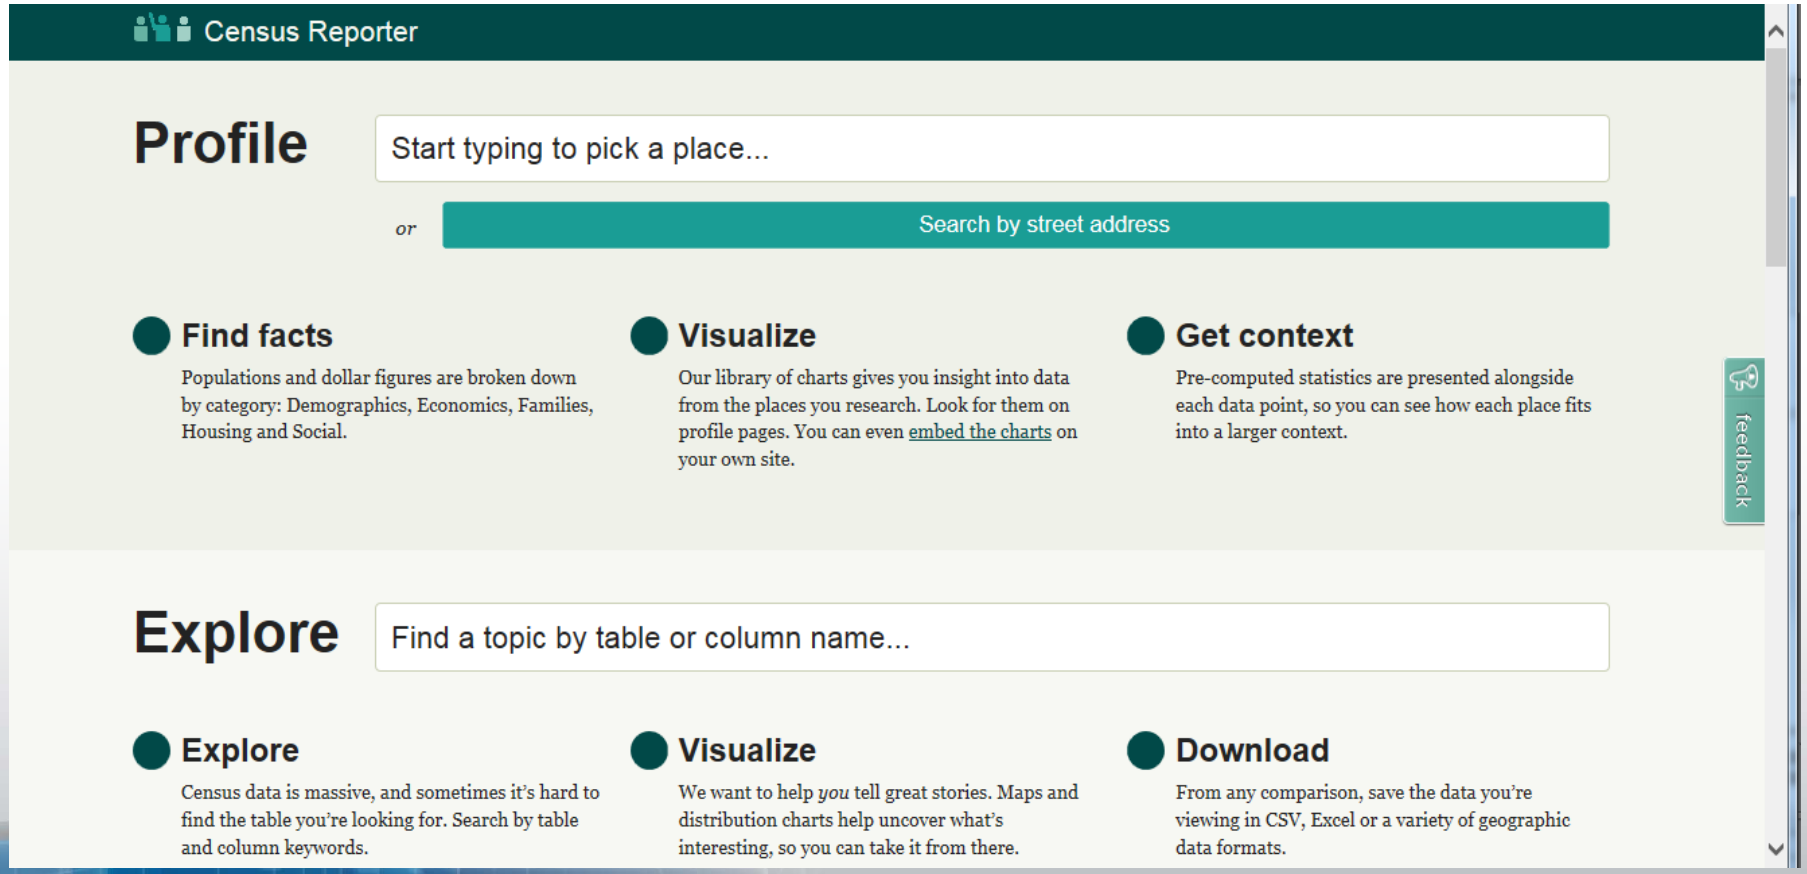
Census Reporter is a Knight News Challenge-funded project to make it easier for journalists to write stories using information from the U.S. Census bureau.

http://censusreporter.org



About Census Reporter

The United States Census Bureau provides a massive amount of data about the American people, covering topics from demographics to poverty rates to educational attainment, and at geographical levels ranging from the entire country down to city blocks. As a product of the federal government, the data is free to use. But for working journalists—especially those who don't have experience with the particulars of Census data—navigating these datasets on deadline can be a challenge.

Census Reporter's goal is to make it easier for journalists to write stories using Census data. Our focus is on the American Community Survey; we want to help people understand what the survey covers and help them quickly find data from places they care about. Census Reporter received funding from the Knight News Challenge, and primary development took place from March 2013 through June 2014.

The Census Reporter website includes three primary types of pages: geographical profiles, which provide an overview of data indicators from a particular place; data comparisons, which use tabular, map and distribution formats to show information from a table across a group of geographies; and topical overviews, which document the concepts and tables the ACS uses to cover specific subject areas.

Profile pages

Geographical profile pages provide an overview of important Census data indicators for a particular place. We've divided these data points into five categories: Demographics, Economics, Families, Housing and Social. Each category includes a mix of figures and charts that help you understand what life is like in a community. Profiles also include comparative data, so you can consider statistics from a city, for example, in the context of the metro area and state they're in.

The Census Reporter website generates profile pages for geographies at the national and state levels all the way down to census tracts. If your browser supports geolocation, you can use your current location to easily profile any of the geographies that you're currently in.

Concepts and Tables Provided for Employment

Employment

While the ACS is not always the best source for employment data, it provides interesting information for small geographies that other sources don’t cover.

Should I use American Community Survey data for this?

The ACS is only one Census product offering employment data, and may not always be the best for your purposes. Another source of data about the labor force is the Current Population Survey, or CPS. The CPS is the official source of employment statistics that make for monthly news pegs (the "jobs numbers"). Simplistically, the CPS is better for timely data (it's reported monthly), is better for change over time (data has been collected for much longer than the ACS) and is a survey directly targeted at information about employment; meanwhile, the ACS data can be found for smaller geographies, and is more readily comparable to non-employment statistics.

The Census Bureau also partners with the U.S. states to produce the Longitudinal Employer–Household Dynamics (LEHD) data. Compared to the ACS, this data provides more direct information on changes in the workforce (hiring, quits and layoffs), and can also give insight into commuting flows.

- For a general introduction to using the CPS for journalism, watch this presentation by New York Times reporter Rob Gebeloff.
- For a general introduction to using the LEHD data for journalism, watch this presentation by USA Today reporter Paul Overberg.
- For a detailed explanation of the differences between the two surveys, see this Census Bureau report.

Overview

The Census Bureau asks a number of questions about whether individuals are employed, and if they are not unemployed or retired, about their occupation and industry. Census Reporter collects these together under the tag 'employment'. There are also questions about where geographically people are employed, how they get to work, how long it takes to get to work, and similar questions, which Census Reporter collects under the tag 'commute'.

Employment Status

When talking about employment status, the Census Bureau divides the population 16 years and older into two categories: *in the labor force* or *not in the labor force*. People who have never worked or who are retired are not in the labor force. People who are not currently working but have recently and would like to work are considered in the labor force, but unemployed. People who are actively working are described as either in the civilian labor force or in the armed forces. This is probably easier understood when shown as a set of nested lists:

- Total:
  - In labor force:

Sample survey questions on this topic

42 **For whom did this person work?**

If now on active duty in the Armed Forces, mark (X) this box → ☐ *and print the branch of the Armed Forces.*

Name of company, business, or other employer

43 **What kind of business or industry was this?**
Describe the activity at the location where employed. (For example: hospital, newspaper publishing, mail order house, auto engine manufacturing, bank)

44 **Is this mainly** – *Mark (X) ONE box.*

Select B23006 Educational Attainment by Employment Status for the Population 25 to 64 Years

There are dozens more tables which crosstabulate employment status with other characteristics, such as education, poverty status, disability status, veteran status and more.

In the table below, some table names have been simplified. Employment status is always only for the population 16 years and over. Questions about work status and hours worked are for the last 12 months. References to the respondent's "own children" are for children under 18 years.

Code	Title
B23001†	Sex by Age by Employment Status
B23002*	Sex by Age by Employment Status (racial iterations)
B23003	Presence of Own Children by Age of Own Children by Employment Status for Females 20 to 64 Years
B23004‡	Work Status by Age by Employment Status for the Civilian Population 65 Years and Over
B23006	Educational Attainment by Employment Status for the Population 25 to 64 Years
B23007‡	Presence of Own Children by Family Type by Employment Status
B23008‡	Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents
B23009	Presence of Own Children by Family Type by Number of Workers in Family
B23010	Presence of Own Children in Married-couple Families by Work Experience of Householder and Spouse
B23013	Median Age by Sex for Workers 16 to 64 Years
B23018	Aggregate Usual Hours Worked by Sex for Workers 16 to 64 Years
B23020	Mean Usual Hours Worked for Workers 16 to 64 Years
B23022‡	Sex by Work Status by Usual Hours Worked Per Week by Weeks Worked for the Population 16 to 64 Years
B23023‡	Sex by Disability Status by Work Status by Usual Hours Worked Per Week by Weeks Worked for the Population 16 to 64 Years
B23024	Poverty Status by Disability Status by Employment Status for the Population 20 to 64 Years
B23025	Employment Status

†Also available in racial iterations.

‡Table also available in "collapsed" version: change "B" to "C" for table code.

*No basic table is offered–only racial iteration tables.
