

DBEDT
THE DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM
STATE OF HAWAII

*QUARTERLY
STATISTICAL
& ECONOMIC
REPORT*

December 2000

This *Quarterly Statistical and Economic Report* has been prepared by the staff of the Research and Economic Analysis Division of the State Department of Business, Economic Development & Tourism (DBEDT). The report provides concise statistical information and analyses on Employment, Income and Prices, Taxes, Tourism, and Construction, as well as an overview of the State of Hawaii and the four counties.

Director, Dr. Seiji F. Naya, heads the department. This report was prepared under the direction of the division administrator, Dr. Pearl Imada Iboshi.

Technical notes and source descriptions have been kept to a minimum. However, the staff of the Research and Economic Analysis Division would be happy to respond to any inquiries of a technical nature that readers may have (586-2466). The quarterly information contained in this report reflects data received by the Research Division on or before December 22, 2000.

On-line availability of *Quarterly Statistical and Economic Report*

Since 1988, the Hawaii Department of Business, Economic Development & Tourism has had the *State of Hawaii Data Book* available on-line to anyone with a personal computer and a modem. Since 1997, the *Quarterly Statistical and Economic Report*, *State of Hawaii Data Book* and other DBEDT publications and information have been made available over the Internet at <http://www.hawaii.gov/dbedt/index.html>.

Beginning in March 2000, the printing of the entire QSER has been discontinued. The full version will be available on-line at <http://www.hawaii.gov/dbedt/qser.html> and an QSER Executive Summary at <http://www.hawaii.gov/dbedt/latest.html> and is available on request by fax or e-mail.

For further information about available data and sources, users should call the Research and Economic Analysis Division's Business Resource Center at (808) 586-2424.

This report has been catalogued as follows:

Hawaii. Dept. of Business, Economic Development and Tourism. Research and Economic Analysis Division.

Quarterly statistical and economic report-State of Hawaii. Honolulu: 1975-

STATE OF THE ECONOMY

While Hawaii's economy kept expanding in the third quarter of 2000, the growth moderated somewhat from the first half of the year. The pace of employment and job growth cooled. Tax revenue increases slightly slowed. And visitor growth dampened. On the other hand, personal income growth (through the second quarter) remained strong and the number of bankruptcy filings dropped sharply.

Civilian employment grew by 1.9 percent from the third quarter of 1999 through the third quarter of 2000 (Table 1). Similarly, non-agricultural wage and salary jobs increased by 1.7 percent over the period. For the year through September employment was up 2.8 percent while jobs had increased by 1.9 percent. Thus, the third quarter's growth was somewhat slower than in the first half of the year.

Unemployment continued to fall. The number of unemployed fell by 20.9 percent in the third quarter compared to the third quarter of 1999. As a result, the unemployment rate fell by 1.2 percentage points over the period to 4.4 percent. For the year through September the unemployment rate averaged 4.5 percent—down from 5.8 percent over the same period in 1999.

Adjusting for the number of jobs in industries, most of the non-agricultural wage and salary job growth came from the 2.1 percent increase in services in the third quarter. Construction jobs grew a strong 9.6 percent from the third quarter of 1999 through the third quarter of 2000, making the second-largest contribution to job growth. Other important contributors to growth included hotels (4.1 percent) and retail trade (1.3 percent). The only sector to experience job losses in the third quarter (and for the

year-to-date) was finance, insurance, and real estate—down 1.7 percent.

Public sector job growth fell below the average in the third quarter (1.0 percent). For the year through September, government jobs have increased at about the same pace as the economy in general.

According to the U.S. Bureau of Economic Analysis, Hawaii's personal income grew about 4.1 percent comparing the first two quarters of 1999 to those of 2000 (Table B-2). Growth came from both the wage and salary component and from stronger-than-average growth in proprietors' income.

State general fund tax revenues grew by 5.2 percent in the calendar third quarter relative to the third quarter of 1999 (Table 1). While slower than in the first half of the year, general fund tax revenues were still up 7.8 percent in the first three-quarters. Much of the growth was due to relatively strong receipts from the general excise and use tax.

Growth in both the number of visitor arrivals and the average daily census slowed in the third quarter. The number of arrivals expanded 1.7 percent (Table D-2), while the average daily census grew by 1.1 percent (Table D-8). Both measures grew at faster rates in the first half of the year. Even so, third-quarter hotel occupancy rates were more than 3 percentage points higher than in the third quarter of 1999 (Table D-11).

Finally, the number of bankruptcy filings plummeted by 25 percent in the third quarter (Table F-1). This was the fastest rate of decline since bankruptcy filings started falling a year and a half ago.

Figure 1. Annual Growth in Personal Income

[percentage change from the same period in previous year]

Source: Table B-2. Personal Income.

OUTLOOK OF THE ECONOMY

While the outlook for Hawaii's economy remains positive, signs of cooling on the Mainland and Japan's still-weak recovery suggest somewhat slower future growth than was anticipated in the first half of the year. DBEDT has therefore adjusted its projections downward from the June and September forecasts.

Signs of slowing economic growth on the Mainland have been gathering. Third-quarter real gross domestic product (GDP) grew at an annualized rate of 2.4 percent from the second quarter. This was down from growth of 5.6 percent in the second quarter and 4.8 percent in the first quarter. For the year to date, GDP is still 5.5 percent higher than the same period last year, and *Blue Chip Economic Indicators* (a consensus of approximately 50 forecasters) expects growth to finish at 5.2 percent for 2000.

On the other hand, *Blue Chip* forecasts 3.4 percent growth for 2001, which is down from its September and October forecasts of 3.5 percent.

Likewise, the *UCLA Anderson Forecast* expects California's growth to peak this year and slow in 2001. *Anderson* sees rapid 8.3 percent real personal income growth in California for 2000, slowing to 3.0 percent in 2001 and 2.3 percent in 2002. Nonfarm employment in California should grow by 3.6 percent this year and by 1.9 percent in 2001.

The November 2000 *Blue Chip* forecasts for Japan and other Asian economies are essentially unchanged from earlier months. Japan is expected to grow by 1.7 percent in 2000 and by 2.0 percent in 2001. South Korea will grow by 8.7

percent in 2000 and by 6.3 percent in 2001. Taiwan (6.6 percent in 2000, 6.1 percent in 2001) and China (7.8 percent in 2000, 7.4 percent in 2001) were similarly unchanged.

The Japanese yen has hovered between 105 and 110 per dollar for most of the year. The November 2000 *Consensus Forecasts-USA* expects 106.5 yen per dollar in February 2001, rising to 104.2 per dollar in November 2001. A higher-valued yen is usually good for Hawaii because our exports become less expensive for Japanese visitors.

These indicators of external influence on Hawaii suggest some moderation in our previous forecast (see the accompanying table). We now expect the number of visitor arrivals to increase by 4.2 percent in 2000 and by 3.7 percent in 2001 (down from the September 2000 forecast of 4.8 percent and 3.9 percent, respectively). Real personal income is likely to grow by 2.8 percent in 2000 and 2001 (compared to 3.5 percent and 3.0 percent, respectively). Wage and salary jobs should grow by 2.0 percent in 2000 and by 1.8 percent in 2001 (compared to 2.1 percent and 1.9 percent, respectively).

With this issue of the *QSER*, DBEDT has begun to publish a forecast of visitor expenditures. Readers will note that while visitor expenditures declined in 1998 and 1999, we expect expenditures to increase by 9.2 percent in 2000 and by 8.7 percent in 2001. This is based on growth in the number of visitor days (up 3.4 percent through October) and indications of relatively strong growth in spending per person per day in the first half of 2000.

COUNTY ECONOMIC CONDITIONS

The trend of relatively fast economic growth of the Neighbor Islands persisted in the third quarter. Employment and wage and salary jobs grew at higher rates than in the City & County of Honolulu. However Honolulu's third-quarter visitor arrivals increased much faster than elsewhere.

Perhaps the starkest third-quarter evidence of Neighbor Islands strength lay in civilian labor force data. While the labor force on the Neighbor Islands grew from 1.3 percent in Hawaii County to 3.8 percent in Kauai County, there was zero growth in the labor force in the City & County of Honolulu (Tables 2 through 5).

Civilian employment and non-agricultural wage and salary jobs grew fastest on Kauai in the third quarter (4.3 percent and 3.0 percent, respectively). Maui and Hawaii counties had the next highest growth in these two measures. In the City & County of Honolulu civilian employment expanded by 1.0 percent and non-agricultural wage and salary jobs grew by 0.4 percent. With the exception of Kauai and Maui, these third-quarter growth rates trailed those posted in the first half of the year. In Kauai and Maui counties, non-agricultural job growth accelerated in the third quarter.

For much of the year, construction led the job growth in Maui and Hawaii counties. While this continued in the third quarter, the pace of construction jobs slowed relative to the first half of the year. Construction jobs increased 12.0 percent in Maui County and by 9.4 percent in Hawaii County. Both counties enjoyed even faster growth for the year through September.

Interestingly, Kauai and Honolulu counties reversed this trend. Construction

jobs in Kauai County jumped by 20.0 percent in the third quarter of 2000 compared to the year-earlier quarter. The City & County of Honolulu saw construction jobs rise by 8.7 percent. In both counties this pace was faster than the average increase in construction jobs during the first half of the year.

Visitor-related jobs grew fastest in Maui and Kauai counties in the third quarter. In Maui County, retail trade jobs increased 1.8 percent while hotel jobs grew by 8.7 percent. In Kauai County, retail trade jobs were up 2.3 percent and hotel jobs expanded by 4.1 percent. In contrast, retail trade jobs grew more slowly in Hawaii and Honolulu counties (0.4 percent and 0.2 percent, respectively). Hotel jobs grew a healthy 2.5 percent in the City & County of Honolulu County, but Hawaii County saw a slight decline of 0.8 percent in these jobs.

In spite of relatively strong Neighbor Islands growth, the City & County of Honolulu experienced the largest third-quarter increase in visitor arrivals. Total arrivals jumped 12.0 percent in the City & County of Honolulu from the third quarter of 1999 through the third quarter of 2000. Maui County saw an increase of 8.2 percent, while Kauai County and Hawaii County followed with growth of 4.2 percent and 2.9 percent, respectively.

In all counties, hotel occupancy rates were significantly above those of 1999. Maui County led the way with an average occupancy rate of 82.3 percent, up 6.1 percentage points above 1999's rate. Honolulu and Kauai counties tied at 77.2 percent, and Hawaii County enjoyed a strong 73.8 percent rate. Hawaii County had the largest increase—8.2 percentage points over 1999.

A. LABOR FORCE AND JOBS

While the labor market continued to expand in the third quarter, evidence of cooling began to emerge. Both civilian employment and non-agricultural wage and salary jobs grew—but at slower rates than in the first quarters of the year. Unemployment remained steady. Construction and retail job growth was down from the second quarter, but growth in services and hotels increased.

The civilian labor force grew by 0.6 percent from the third quarter of 1999 to the third quarter of 2000 (Table A-1). This followed 1.7 percent annual growth in the first half of the year. If the pace continues through the end of the year, the labor force will have grown by more than 1 percent for the first time since 1996.

Civilian employment and non-agricultural wage and salary jobs both increased in the third quarter but more slowly than in the first half. Civilian employment grew 1.9 percent from the third quarter of 1999 to the third quarter of 2000 (Table A-2). Non-agricultural wage and salary jobs grew by 1.7 percent over the same period (Table A-5). While the growth has slowed slightly, both measures of the labor market are on pace for the best year since 1991.

The number of unemployed continued the fall that began in late 1997. The number of unemployed declined 20.9 percent in the third quarter compared to the same period in 1999 (Table A-3). This was sufficient to keep the unemployment rate steady at 4.4 percent in the third quarter (Table A-4).

Construction jobs grew by 9.6 percent in the third quarter relative to the year-earlier quarter (Table A-6). This continued the very strong pace of the first half of the year in sharp contrast to the declines endured for most of the 1990s.

Other industries showing job growth in third quarter included manufacturing (1.2 percent, Table A-7), transportation (1.5 percent, Table A-8), retail trade (1.3 percent, Table A-11), wholesale trade (2.4 percent, Table A-12), and agriculture (3.7 percent, Table A-19).

Jobs fell between the third quarter of 1999 and the third quarter of 2000 in utilities (-3.0 percent, Table A-10) and finance, insurance, and real estate (-1.7 percent, Table A-13).

Wage and salary job growth in hotels and services flew in the face of the cooling trend. Hotel jobs jumped by 4.1 percent in the third quarter from the year-earlier period (Table A-15). This was the highest rate of growth since the third quarter of 1991. Services jobs grew by 2.1 percent over the period, well above the average pace of the previous six quarters (Table A-14).

Job growth in the three segments of the public sector was slightly lower than the civilian average. Federal government jobs increased by 1.6 percent in the third quarter (Table A-16). State government jobs grew by 1.1 percent (Table A-17). There was a small decrease of 0.3 percent in local government jobs (Table A-18).

B. INCOME AND PRICES

Personal income in the second quarter of 2000 continued the relatively rapid rate of growth experienced in the first quarter. Led by strength in wages and salaries, all of the major personal income components contributed to the rise.

On October 25, 2000, the U.S. Bureau of Economic Analysis (BEA) released second-quarter state personal income estimates together with revisions back to 1997. These quarterly estimates followed a revision of annual estimates for 1997-1999 released in September.

The revisions dramatically lowered the estimated personal income growth in 1999—from 3.6 percent (over 1998) down to 2.6 percent. These changes reflected an annual revision of National Income and Product Account data as well as newly-available state data. Several other states experienced larger revisions (both up and down) than Hawaii.

In light of these downward revisions, the 4.1 percent growth in Hawaii's personal income from the second quarter of 1999 to the second quarter of 2000 is notable (Table B-2). This followed growth of 4.0 percent in the first quarter relative to the first quarter of 1999. Personal income has not grown at these rates since 1993.

Most of the growth came in wages and salaries, which makes up 56 percent of personal income. Table B-3 shows that wages and salaries grew by 4.2 percent in the second quarter—the same rate of growth as in the first quarter (both relative to the year-earlier quarters).

Other labor income (which consists of employer contributions to privately-

administered pension plans, premiums for group health and life insurance, supplemental unemployment insurance, and so on) grew by 0.3 percent from the second quarter of 1999 to the second quarter of 2000 (Table B-4). The small increase was significant because it reversed a 13-quarter declining trend. The increase may signal that “high-quality” jobs are again being added to the economy.

Second-quarter proprietors' income continued the rapid pace set in the first quarter. From the second quarter of 1999 through the second quarter of 2000, proprietors' income grew 7.5 percent (Table B-5). This followed 7.9 percent growth in the first quarter. Proprietors' income has not grown this rapidly on a sustained basis since 1992. The growth suggests strength in Hawaii's small business sector.

Dividends, interest, and rent grew by 3.6 percent in the second quarter of 2000 from the year-earlier quarter (Table B-6). In spite of stock market troubles this year, this component is growing faster than in 1999.

Transfer payments expanded by 5.1 percent from the second quarter of 1999 to the second quarter of 2000 (Table B-7). This followed 4.0 percent growth in the first quarter and suggests that transfer payments will grow faster in 2000 than in any year since 1995. Transfer payments consist largely of Social Security and medical payments.

The Honolulu Consumer Price Index increased by 1.9 percent in the first half of the year (Table B-9). This suggests that real personal income has been growing at approximately 2.2 percent in the first half of 2000 compared to the first half of 1999.

Data on U.S. CPI are released monthly and Honolulu CPI, twice a year in February and August for the half (H) year previous.
NA Not available.

1/ New indexes as of January 1998. Base period is December 1997. The former "Entertainment" index has been discontinued.

2/ On September 28, 2000 Bureau of Labor Statistics announced an error in the portions of the January-August, 2000 CPI. While there was a change in the U.S. All items and a slight correction to one component of Honolulu's CPI-U Housing, the Honolulu indexes presented here are unchanged. For the U.S. see <<http://stats.bls.gov/cpirev01.htm>>. For Honolulu, see <<http://stats.bls.gov/ro9news.htm>>

C. TAX REVENUES

General Fund tax revenues continued to expand at a healthy pace in the third quarter. Most of the growth came from general excise and use tax receipts. Net individual income tax receipts also grew, but corporate income tax revenues declined.

General Fund tax revenues grew by 5.2 percent from the third quarter of 1999 to the third quarter of 2000 (Table C-2). This followed very strong growth in the first half of the year. At this pace, General Fund tax revenues will come in at 7.8 percent above last year, which would be the largest calendar year-over-year increase since 1989.

Just over half of General Fund tax revenues come from the general excise and use tax (GET). GET revenues expanded by 7.6 percent in the third quarter of 2000 compared to the year-earlier quarter (Table C-3). GET revenue growth has driven the increases in the General Fund all year. These revenues are also on a pace unseen since 1990.

Net individual income tax revenues grew 2.9 percent from the third quarter of 1999 to the third quarter of 2000 (Table C-4). For the calendar year through September, net individual income tax revenues were up 2.4 percent over the same period in 1999. Individual income tax rates were lowered in

1999, and will decline again in 2001. Thus, the growth in 2000 is not influenced by a change in rates.

Individual income tax refunds jumped by 23.9 percent in the third quarter from the third quarter of 1999 (Table C-8). This followed nearly 12.0 percent growth in the second quarter. The increase in refunds reflects a smaller difference between tax rates and withholding rates associated with the income tax rate reductions of 1999.

Net corporate income tax revenue dropped by almost 30 percent in the third quarter (Table C-9). However, corporate income tax revenues are notoriously volatile. For the calendar year through September, corporate income tax revenue was up 34.4 percent.

Transient accommodations tax (TAT) revenue grew by 2.9 percent from the third quarter of 1999 through the third quarter of 2000 (Table C-13). This followed relatively strong growth in the first half of the year. While some of the large increase in the first quarter may have reflected remaining effects of the TAT rate increase in 1999, this should not have influenced the revenue in the second and third quarters.

Table C-1. GENERAL FUND TAX REVENUES AND MAJOR COMPONENTS

Year	General Excise and Use Tax	Net Individual Income Tax 1/	Net Corporate Income Tax 2/	Tax Revenues Distributed to State General Fund

D. TOURISM

The pace of visitor activity cooled in the third quarter. Both visitor arrivals and the average visitor census expanded modestly. As in the past, there was relative strength from those arriving on domestic flights rather than international flights. U.S. East arrivals grew much faster than U.S. West arrivals, while the number of Japanese visitors declined. Even so, hotel occupancy rates remained high.

The number of total visitor arrivals (by air) grew by 1.7 percent for the third quarter of 1999 to the third quarter of 2000 (Table D-2). This followed very strong growth of 8.3 percent in the second quarter (year-over-year). For the year through September, visitor arrivals were up 3.9 percent.

All of the visitor arrival growth came from passengers arriving on domestic flights. Domestic visitor arrivals grew by 2.7 percent in the third quarter compared to the third quarter of 1999 (Table D-3). The number of visitor arrivals from international flights was unchanged from the third quarter of 1999 (Table D-4).

Looking at visitors by major market area, U.S. West visitor arrivals grew 3.1 percent in the third quarter compared to the year-earlier quarter (Table D-5). For the year through September, U.S. West arrivals were up 6.6 percent over the same period in 1999.

U.S. East arrivals are only about two-thirds those of U.S. West, but they have been growing faster recently (Table D-6). The number of U.S. East arrivals jumped by 12.9 percent in the third quarter following a 13.8

percent increase in the second quarter. At this rate, U.S. East arrivals will grow by 11.2 percent in 2000.

The number of Japanese visitor arrivals fell by 3.3 percent from the third quarter of 1999 through the third quarter of 2000 (Table D-7). With the exception of a 4.9 percent increase in the second quarter 2000, Japanese arrivals have fallen in every quarter since early 1998.

The average daily visitor census expanded by 1.1 percent in the third quarter (Table D-8). The visitor census of visitors arriving on domestic flights increased 4.2 percent, while the census of visitors arriving on international flights fell by 6.6 percent, from the third quarter of 1999 through the third quarter of 2000 (Tables D-9 and D-10).

Hotel occupancy rates jumped by 3.2 percentage points to 78.0 percent in the third quarter from the year-earlier-quarter (Table D-11). This followed an even larger 7.0 percentage point leap in the second quarter.

Readers interested in reviewing visitor data on a monthly basis can find them at <http://www.hawaii.gov/dbedt/monthly/index.html>.

In January 2001, DBEDT will release an issue of *Hawaii's Economy* devoted to tourism issues. This edition will also contain a discussion of recent changes in visitor data, completing presentation of historical data, such as major market area detail introduced in this QSER. *Hawaii's Economy* can be found at <http://www.hawaii.gov/dbedt/hecon.html>.

E. CONSTRUCTION

The strength in construction during the first half of 2000 continued into the third quarter. The value of construction put-in-place maintained its rapid growth, exceeding the growth in the number of construction jobs. Indeed, housing construction cost indices jumped in the third quarter. Growth in building permit values in Hawaii County and in the City & County of Honolulu suggests the trend will continue into 2001. Both prices and the number of housing unit sales rose, though there was some cooling in condominium sales. On top of this, State capital improvement project expenditures grew in the third quarter.

The value of construction put in place, proxied by the contracting general excise tax base, increased by 18.1 percent from the third quarter of 1999 through the third quarter 2000 (Table E-1). This pace followed 18.9 percent growth in the first half of 2000. The large increases in 1999 building permit values have been translating into actual construction activity during 2000.

Table E-1 contains several “not available” symbols for building permits. Because third-quarter Maui County permit data are unavailable, it was not possible to calculate state totals.

The pace of construction activity has begun to put upward pressure on costs. Both the Honolulu Construction Cost Index for single family homes and for multi-family buildings increased by more than 5.5 percent in the third quarter (Tables E-4 and E-5).

This growth was roughly double the pace seen in the first half of the year.

Building permit values were up a sharp 44.4 percent in Hawaii County and grew by 6.6 percent in the City & County of Honolulu from the third quarter of 1999 (Table E-6). Permit values in Kauai County fell slightly by 2.0 percent. The increase in permit values in Hawaii County was largely due to residential and school buildings.

Single family home sales and resales value jumped 20.8 percent from the third quarter of 1999 through the third quarter of 2000 (Table E-7). Average condominium sales and resales value increased 11.4 percent over the period (Table E-8). Both have grown at much stronger rates in 2000 than in many years.

The number (as opposed to the sales and resales value) of single family home sales climbed 13.9 percent in the third quarter (Table E-9). This was substantially faster than in the first half of the year. However condominium sales followed the opposite pattern: Condominium transactions grew 8.1 percent in the third quarter, following nearly 20 percent growth in the first half of the year (Table E-10).

State capital improvement project (CIP) expenditures rose 10.3 percent in the third quarter. This followed a slight drop of 2.6 percent in the first half of the year. Most of the CIP spending went for public school and university construction.

**Table E-1. ESTIMATED VALUE OF COMPLETED CONSTRUCTION,
NEW PRIVATE BUILDING AUTHORIZATIONS, AND
GOVERNMENT CONTRACTS AWARDED**

F. OTHER INDICATORS

Bankruptcy filings plummeted in the third quarter. Both Chapter 7 and Chapter 13 filings fell sharply. Chapter 11 filings increased but remain low.

Total bankruptcy filings fell by 25 percent from the third quarter 1999 to the third quarter 2000 (Table F-1). This was the sixth straight quarter of declines and the largest percentage decrease seen in that period.

Most of the drop came in Chapter 7 filings, which involve the liquidation of assets and the discharge of some debt. The number of Chapter 7 filings fell by 25.4 percent over the period. This also reflected acceleration in the rate of decline from previous quarters.

Chapter 11 filings rose from 6 in the third quarter of 1999 to 11 in the third quarter

2000. While this is a large percentage increase, the number is still small. Chapter 11 filings involve the structuring of repayment plans for companies.

Chapter 13 filings fell by 26.5 percent over the period. This was the first drop in Chapter 13 filings since the first quarter of 1999. Chapter 13 bankruptcy allows debtors to workout repayment arrangements with creditors.

The decline in bankruptcy filings in Hawaii has been mirrored by similar declines for the nation as a whole. U.S. bankruptcy filings fell 4.6 percent from the third quarter of 1999 through the third quarter 2000. Quarterly U.S. bankruptcy statistics can be found at

http://www.uscourts.gov/press_10212000.pdf.

III. TERMS AND DEFINITIONS

Agriculture Wage and Salary Jobs – Full- and part-time jobs for which payment was made by the employer in the survey week containing the 12th of the month. Includes farm jobs and machinery operators. Closely related management and services jobs are included for sugar and pineapple but are excluded for other types of agriculture.

Average Daily Visitor Census- By Air – Average number of visitors present daily in the state. Figures are computed monthly by the Research & Economic Analysis Division, DBEDT based on arrival and departure dates from ground and in-flight surveys.

Average Length of Stay- By Air – Number of days visitors are in the State including the day of arrival and of departure.

Bankruptcy Filings –

Chapter 7 – Is available to both individuals and business debtors. Its purpose is to achieve a fair distribution to creditors of whatever non-exempt property the debtor has and to give the individual debtor a fresh start through the discharge in bankruptcy.

Chapter 11 – Is available for both consumer and business debtors. Its purpose is to rehabilitate a business as a going concern or reorganize an individual's finances through a court-approved reorganization plan.

Chapter 12 – Is designed to give special debt relief to a family farmer with regular income from farming.

Chapter 13 – Is available for an individual with regular income whose debts do not exceed specific amounts, typically used to budget some of the debtor's future earnings under a plan through which creditors are paid in whole or in part.

Additional information may be found at the American Bankruptcy Institute "Bankruptcy Chapters" website <http://www.abiworld.org/media/chapters.html>

Civilian Employment – Persons 16 years of age or older who, during the survey week containing the 12th of the month, were either at work for pay or profit, or worked without pay for 15 hours or more on a family farm or business, or were with a job but not at work. Both permanent and temporary employees and those who are working either full- or part-time are included.

Civilian Labor Force – Total of employed and unemployed persons, excluding those in the armed forces and 16 years of age or under. U.S. Census

Bureau does surveys for the U.S. Bureau of Labor Statistics.

Civilian Unemployment – Persons 16 years of age or older who (1) did not work at all during the survey week but were actively seeking work and were available for work; or (2) did not work at all, were available for work, and were waiting to be called back from layoff or were waiting to report to a new wage or salary job within 30 days.

Consumer Price Index: Honolulu or U.S. – Measure of the average change in prices over time for a fixed market basket of goods and services. It is compiled by the U.S. Bureau of Labor Statistics. The index measures changes from a reference date, i.e., 1982-84, which is designated as 100.0. For example, a Honolulu CPI-U (where U refers to All Urban Consumers), All Items, of 171.5 as the annual average for 1998 indicates the average prices of that group's basket was 71.5 percent higher than the weighted average of those same goods and services in 1982-84. Data are published monthly for the U.S. and semi-annually for Honolulu. As of January 1998, BLS changed the reference basket based on 1982-84 consumer expenditures to a 1993-95 basket, but the base remains 1982-84 = 100.0. The BLS Internet site has more information about the CPI at <http://stats.bls.gov/cpihome.htm>.

Condominium Sales and Resales: Consists of sales of new condominium and townhomes and resales that are entered in the Multiple Listing Service. It does not include apartments.

Contract Construction Jobs – Jobs held by any person engaged in construction, repairing, erecting, or improving buildings or structures of any type or description, and any installations therein. Such construction includes not only residential and non-residential building projects, both private and public, but also highway and road construction, street and sidewalk construction, repair, excavations, bridges, docks, and other heavy construction projects.

Contracting Tax Base – The total receipts of businesses engaged in contracting to erect, construct, repair, or improve buildings or structures of any kind or description, or to make any installation therein. Attributed to any business engaging in the practice of architecture, engineering, land surveying, landscape architecture, and the practice of pest control or fumigation.

Dividends, Interest, and Rent – U.S. Bureau of Economic Analysis presents the State Personal Income estimates of these components together. It consists of income received by individuals and on behalf of individuals by private and government employee retirement plans and by quasi-individuals, including non-profit institutions and private trust funds administered by fiduciaries. Personal dividend income is payments in cash or other assets by corporations in the U.S. or abroad to noncorporate stockholders who are Hawaii residents. Personal interest income is the interest income (monetary and imputed) from all sources that is received by individuals, by private and government employee retirement plans, by nonprofit institutions, and by estates and trusts. Rental income of persons with capital consumption adjustment is the net current-production income of persons from the rental of real property except for the income of persons primarily engaged in the real estate business; the imputed net rental income received by owner-occupants of farm-dwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources. The estimates include BEA adjustments for uninsured losses to real estate caused by disasters, such as hurricanes (e.g. Iniki in 1992) and floods. See [Personal Income](#).

Earnings – This BEA aggregate is the sum of three components of personal income: wages and salary disbursements, other labor income, and proprietors' income. BEA presents earnings because it can be used in analyses of regional economies as a proxy for the income generated from participation in current production. See [Personal Income](#).

Federal Government Jobs – Includes those in the civilian agencies, i.e. Department of Defense, Agriculture, United States Postal Service and the various armed services exchange systems.

General Excise (Gross Income) Tax – Tax charged to businesses on gross sales or gross income. The tax rate is 0.5 percent on wholesaling and intermediary services, blind vendors, producing, manufacturing, sugar processing and pineapple canning; all other activities (retailing, business and professional services, contracting, theater, amusement, radio, interest, commissions, rentals) are taxed at 4.0 percent, except insurance commissions to general agents, subagents and solicitors, who are taxed at 0.15 percent.

General Excise and Use Tax Base – The value of all goods and services sold, including the value of tangible personal property imported into Hawaii for

own use or consumption. One of the most comprehensive measures of business activity in the state.

General Fund Tax Revenues – Receipts of the general excise and use tax, and net individual and corporate income taxes. The general government fund used to account for all financial resources except those required to be accounted for in another fund, such as the highway, airport or capital improvement fund.

Honolulu Construction Cost Indexes: High-Rise or Single Family – As compiled, by First Hawaiian Bank, and currently by DBEDT, these indexes measure changes in contractors' costs for building materials and labor.

Hotel Jobs – Jobs in hotels, rooming houses, camps, and other lodging places.

Hotel Occupancy Rate – The percentage of occupied rooms in a hotel. Hotel occupancy rates depend not only on the number of visitors and their length of stay, but also on the hotel room inventory, e.g., a large increase in new hotel units results in a drop in occupancy rates, until such time as visitor traffic builds up enough to fill them. Rates are obtained from a sample survey conducted on a monthly basis.

Initial Agent Claims – Notices of unemployment filed against another state by its workers who have moved to Hawaii.

Initial Liabile Claims – Notices of unemployment filed against Hawaii by Hawaii workers who have moved to another state.

Local Government Jobs – Includes those in the county governments.

Manufacturing Jobs – Jobs in manufacturing industries, or those activities by any person or establishment that buys materials, performs work on such materials, and changes such materials into a finished or semi-finished product. Includes compounding, canning, preserving, packing, printing, publishing, mailing, processing, refining, or preparing for sale, profit, or commercial use, either directly or through the activity of others, in whole or in part, any article, substance, or commodity such as textiles, apparel, printing, publishing, food processing, and durable goods

Net Earnings – BEA also calculates this measure as Earnings less Personal Contributions for Social Insurance. Net earnings is used in the presentation of State and local area personal income as the sum of net

earnings, transfer payments, and personal dividend income, personal interest income, and rental income of persons. It can be used as a proxy for income before taxes. See [Personal Income](#).

Net Individual or Corporation Income Tax Revenue –

For individuals, it is calculated as declaration of estimated taxes plus payments with returns plus withholding tax on wages less refunds. Net corporate income tax revenue is calculated as declarations of estimated taxes plus payments with returns less refunds.

Non-Agriculture Wage and Salary Jobs –

Derived monthly from a sample survey of employers reporting the number of persons who received pay for any part of the pay period containing the 12th of the month. Includes all full- and part-time non-agricultural workers, permanent and temporary workers, and workers on paid sick leave and paid vacation.

Other Goods and Services –

Honolulu Consumer Price Index component detail. Prior to the CPI 1998 Revision, it measured the change in average prices of tobacco products, personal care goods and services, and personal and educational expenditures. Beginning with January 1998 data, this category includes tobacco, personal care, and miscellaneous goods and services. Other components, for example, schoolbooks and tuition, moved to the new “Education and Communication” and recreational reading to “Recreation”. BLS’ *Monthly Labor Review* (December 1996), and BLS’ Internet site have more information about the CPI at <http://stats.bls.gov/cpihome.htm>.

Other Labor Income –

This component of BEA Personal income consists of employers’ payments to private and government employee retirement plans, private group health and life insurance plans, privately administered workers’ compensation plans, and supplemental unemployment benefit plans; and of several other minor categories, including judicial fees to jurors and witnesses, compensation of prison inmates, and marriage fees to justices of the peace. See [Personal Income](#).

Personal Contributions for Social Insurance –

This BEA aggregate which is subtracted in the calculation of personal income consists of the contributions, or payments, by employees, by the self-employed, and by other individuals who participate in the following government programs: Old-age, survivors, and disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; railroad retirement; veterans

life insurance; and temporary disability insurance. See [Personal Income](#).

Personal Income –Income received by persons for participation in production, from government and business transfer payments, and from government interest (treated like a transfer payment by the Bureau of Economic Analysis). It is calculated as the sum of wage & salary disbursements, other labor income, proprietors’ income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and transfer payments to persons, less personal contributions for social insurance. For additional information see

<<http://www.bea.doc.gov/bea/regional/spi/index.html>>

Proprietors’ Income –

This component of BEA Personal income is the current-production income (including income in kind) of sole proprietorships, partnerships and cooperatives. Corporate directors’ fees and the imputed net rental income of owner-occupants of farm dwellings is included in proprietors’ income but the imputed net rental income of owner-occupants of nonfarm dwellings is included in rental income of persons. Proprietors’ income excludes dividends and monetary interest received by nonfinancial business and rental incomes by persons not primarily engaged in the real estate business; these incomes are included in dividends, net interest, and rental income of persons, respectively. See [Personal Income](#).

Retail Trade Jobs –

Jobs in those establishments that are engaged in sales of tangible personal property to the customer for use or consumption and not for resale.

Services Jobs –

Jobs in those activities that are engaged in for other persons for a consideration which involve the rendering of a service as distinguished from the sale of tangible property or the production and sale of tangible property. Includes all professional services.

Single Family Sales and Resales:

Consists of sales of new homes and resales that are entered in the Multiple Listing Service.

State Government Jobs – Education

includes all employees under the Department of Education (DOE) and the University of Hawaii System. This includes public library personnel, substitute teachers who received pay during the pay period including the 12th of the month, and support personnel such as cafeteria workers, classroom cleaners, and school security attendants. Also included are part-time employees in

special programs such as the A+ After School Program.

State Government Jobs – Non-Education - Includes all other executive branch departments (i.e. Agriculture, Transportation, etc.), the legislative and judicial branches, and the Research Corporation of the University of Hawaii (RCUH).

Transfer Payments – As a component of Personal Income, these are payments for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by Federal, State and local governments and by businesses. Government transfer payments to individuals includes retirement and disability insurance payments (mainly medicare and medicaid), income maintenance benefits, unemployment insurance benefits, veterans benefits, and Federal grants and loans to students. Government transfer payments to nonprofit institutions excludes payments by Federal Government for work under research and development contracts. Business transfer payments to persons for personal injury and of corporate gifts to nonprofit institutions. See [Personal Income](#).

Transient Accommodations Tax – Tax levied on resort time-share vacation units and the furnishing of a room, apartment, suite which is customarily occupied by a person or group for fewer than 180 consecutive days by a hotel, apartment, motel, or cooperative apartment, rooming house, or other place in which lodgings are generally furnished to transients. The tax as of January 1, 1999 is imposed at the rate of 7.25 percent and the tax base includes time-share units.

Unallocated General Excise & Use Tax Revenues – General excise and use tax revenues that could not be allocated to specific activities of the general excise & use tax. It also includes collections from penalty and interest, assessments and corrections, delinquent collections, refunds, protested payments, settlements, etc.

Unemployment Rate – Ratio of unemployed persons to the civilian labor force expressed as a percentage.

Use Tax – Excise tax levied on tangible personal property which is imported or purchased from an unlicensed seller for use in the state. The tax is based upon the purchase price or value of the tangible personal property purchased or imported, whichever is applicable. Rates: 0.5 percent, if for resale at retail; 4.0 percent, if for use or consumption.

Visitor Arrivals- By Air, Total – All persons who stayed in Hawaii for a period between one night and one year.

Domestic Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year, arriving on flights from Mainland U.S. A foreign resident arriving in Hawaii on a flight directly from the U.S. Mainland is counted as a domestic visitor.

International Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year arriving on flights from foreign countries. An U.S. resident arriving in Hawaii on a flight directly from a foreign country is counted as an international visitor.

Wages and Salary Disbursements– This component of Personal Income consists of the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; and receipts in kind, or pay-in-kind, such as the meals furnished to the employees of restaurants. It reflects the amount of wages and salaries disbursed, but not necessarily, earned during the year. See [Personal Income](#).

Wholesale Trade Jobs – Jobs in those establishments whose sales of tangible personal property is to licensed persons for resale or incorporation into a product or project, and sales to certain leasing companies.
