

DBEDT
THE DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM
STATE OF HAWAII

*QUARTERLY
STATISTICAL
& ECONOMIC
REPORT*

March 2000

This *Quarterly Statistical and Economic Report* has been prepared by the staff of the Research and Economic Analysis Division of the State Department of Business, Economic Development & Tourism (DBEDT). The report provides concise statistical information and analyses on Employment, Income and Prices, Taxes, Tourism, and Construction, as well as an overview of the State of Hawaii and the four counties.

Director, Dr. Seiji F. Naya, heads the department. This report was prepared under the direction of the division administrator, Dr. Pearl Imada Iboshi.

Technical notes and source descriptions have been kept to a minimum. However, the staff of the Research and Economic Analysis Division would be happy to respond to any inquiries of a technical nature that readers may have (586-2466). The quarterly information contained in this report reflects data received by the Research Division on or before March 13, 2000.

On-line availability of *Quarterly Statistical and Economic Report*

Since 1988, the Hawaii Department of Business, Economic Development & Tourism has had the *State of Hawaii Data Book* available on-line to anyone with a personal computer and a modem. Since 1997, the *Quarterly Statistical and Economic Report*, *State of Hawaii Data Book* and other DBEDT publications and information have been made available over the Internet at <http://www.hawaii.gov/dbedt/index.html>.

Beginning in March 2000, the printing of the entire QSER has been discontinued. The full version will be available on-line <http://www.hawaii.gov/dbedt/qser.html> and QSER Executive Summary at <http://www.hawaii.gov/dbedt/latest.html> or a subscription is available on request by fax or e-mail.

For further information about available data and sources, users should call the Research and Economic Analysis Division's Business Resource Center at (808) 586-2424.

This report has been catalogued as follows:

Hawaii. Dept. of Business, Economic Development and Tourism. Research and Economic Analysis Division.

Quarterly statistical and economic report-State of Hawaii. Honolulu: 1975-

Quarterly.

Beginning March 2000 the printed report is an executive summary and the complete report is available electronically at www.hawaii.gov/dbedt/qser.html

STATE OF THE ECONOMY

Economic activity in Hawaii expanded in the fourth quarter. Employment and the number of jobs rose while unemployment continued to fall. Personal income increased at relatively rapid pace in the third quarter (the latest data available). The average daily visitor census (a combination of arrivals and lengths of stay) rose and bankruptcy filings continued to fall. General fund tax revenues declined in the fourth quarter, but this was largely due to technical factors and the temporary effects from recent individual income tax cuts.

Civilian employment increased by 0.9 percent from the fourth quarter of 1998 to the fourth quarter of 1999 (Table 1). Interestingly, the number of non-agricultural wage and salary jobs also increased by 0.6 percent over the period. For the last several years, these two measures of the labor market have moved in opposite directions, with employment rising and jobs falling. The movement of wage and salary job growth into positive territory is another signal of reviving economic activity.

Confirming this, the number of unemployed fell by almost 15 percent in the fourth quarter, and the unemployment rate dropped by nearly a full percentage point to 4.9 percent. For 1999 overall, the unemployment rate fell by 0.7 percentage points to 5.5 percent.

Most of the growth in nonagricultural wage and salary jobs in the fourth quarter came in services (1.6 percent). Adjusting for size, state government jobs were the next-largest source of gain (2.6 percent), followed by retail trade (0.3 percent) and manufacturing (0.6 percent). Agricultural wage and salary jobs also jumped by a remarkable 8.4 percent over the period.

Interestingly, the largest decline in jobs did not come from construction in the fourth quarter. Adjusting for industry size, finance, insurance, and real estate experienced the largest job decline (-2.5 percent), followed by the federal government (-1.3 percent), and transportation, communications, and utilities (-0.7 percent).

Personal income grew by a strong 3.9 percent in the third quarter compared to the third quarter of 1998 (Table B-1). Third quarter data are the latest available from the U.S. Bureau of Economic Analysis. The growth was well distributed across wages and salaries (3.7 percent), proprietors' income (6.8 percent), and dividends, interest, and rent (3.3 percent).

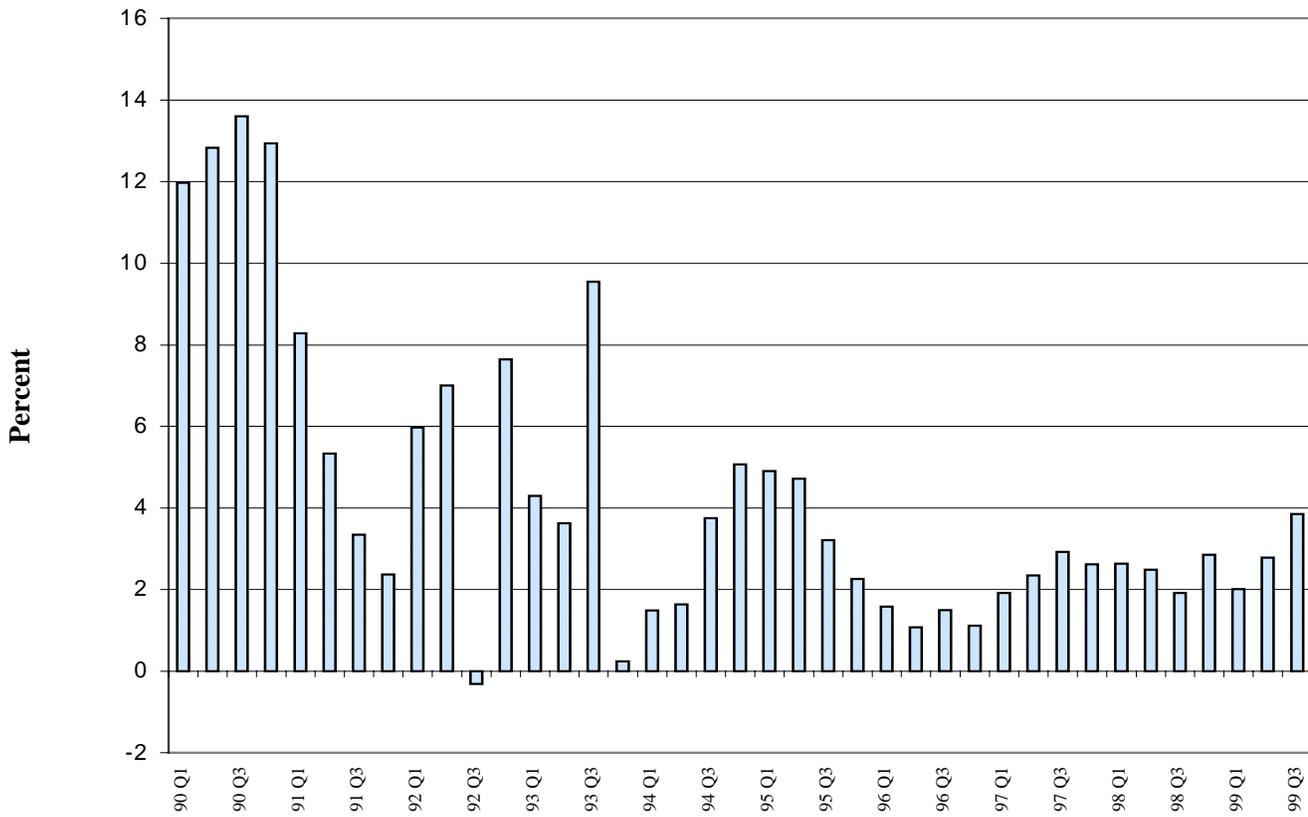

General fund tax revenue fell by 1.4 percent in the fourth quarter of 1999 (Table 1). The fourth quarter decline was mainly due to a technical "weekend effect" in which tax revenues for December 1999 (which ended on a Friday holiday) were pushed into January 2000. For 1999 as a whole, revenues were down by 1.7 percent, which primarily reflected the phase-in of lower personal income tax rates that began in January 1999.

The number of visitor arrivals increased by 2.4 percent in the fourth quarter, entirely due to strong westbound growth. Because average length of stay also increased, the average daily visitor census rose by 3.2 percent over the period (Table D-1).

Finally, the number of bankruptcy filings fell by 18.9 percent in the fourth quarter, marking the third consecutive quarter of lower bankruptcy filings.

OUTLOOK OF THE ECONOMY

The outlook for Hawaii's economy has improved since last quarter. Economic growth for the U.S. as a whole was stronger than expected in 1999, and the outlook remains good. While the Japanese economy has slowed recently, expectations of positive growth continue for 2000 and 2001. DBEDT has therefore raised its forecast for Hawaii's economy in the next several years.

The U.S. economy performed more strongly than expected in the fourth quarter of 1999, rising by 4.5 percent from the fourth quarter of 1998 to the fourth quarter of 1999. The Blue Chip Economic Indicators (as of March 10, 2000), a consensus of about 50 forecasters, expects real economic growth of 4.1 percent in 2000 and of 3.1 percent in 2001. The 2000 forecast represents an increase of almost one full percentage point from the Blue Chip forecast reported in the December issue of the *QSER*.

The Blue Chip forecasters expect U.S. consumer price inflation to move up slightly to 2.6 percent in 2000 from the 2.2 percent level of 1999. The 2.6 percent consumer inflation forecast also applies to 2001. The forecasters expect that unemployment will drop to 4.0 percent in 2000 and rise slightly to 4.2 percent in 2001.

The UCLA Anderson forecast for California's economy (an important influence on Hawaii) is for 4.7 percent real personal income growth in 2000 and 3.8 percent growth in 2001. As with the Blue Chip forecast for the U.S. as a whole, the Anderson forecast

for 2000 is up sharply from the previous quarter.

Japan has recently announced that fourth-quarter growth in real gross domestic product fell by 1.4 percent from the third quarter. However the Blue Chip forecasters expect Japan's real economic growth to rise by 0.9 percent for 2000 and 1.9 percent in 2001. In addition, the Blue Chip forecasters expect strong growth in South Korea (7.2 percent in 2000, 6.0 percent in 2001), Taiwan (6.3 percent in both 2000 and 2001), Singapore (5.7 percent in both 2000 and 2001), and Hong Kong (3.8 percent in 2000, 4.3 percent in 2001).

At this writing the yen-dollar exchange rate stands at 105.6 yen per dollar, up 13 percent from March 1999. A stronger yen tends to boost Hawaii's economy because it makes Hawaii goods and services less expensive for Japanese visitors. The Blue Chip forecasters expect the yen to average 105 per dollar for 2000.

As a result of these indications, DBEDT has raised its economic forecast for 2000 and beyond. The following table contains the forecast. The number of visitor arrivals should increase by 2.3 percent this year, rising to 2.5 percent in 2001 and 2002. Inflation-adjusted personal income should follow the same pattern. The number of wage and salary jobs is expected to increase by 1.0 percent in 2000 and to rise to 1.1 percent in 2001 and 2002.

COUNTY ECONOMIC CONDITIONS

As in the last several quarters, the Neighbor Island economies seemed to perform the best in the fourth quarter—particularly Maui and Kauai counties. However, growth has also picked up in the City & County of Honolulu.

All four counties enjoyed growth in wage and salary jobs from the fourth quarter of 1998 to the fourth quarter of 1999. In terms of percent change, the largest growth came in Maui County (3.0 percent, Table 4), followed by Kauai County (1.2 percent, Table 5), Hawaii County (0.7 percent, Table 3), and the City & County of Honolulu (0.2 percent, Table 2).

Likewise, all of the counties experienced significant declines in their unemployment rates. Indeed, except for the City & County of Honolulu, the unemployment rate drops exceeded one percentage point. Honolulu's unemployment rate of 4.4 percent in the fourth quarter was down 0.7 percentage points from the same period in 1998.

To provide some perspective, the last time the unemployment rate was as low as the fourth quarter's 4.4 percent for the City & County of Honolulu was the first quarter of 1995. In Hawaii County, a rate as low as 7.1 percent was last seen in the fourth quarter of 1992. In Maui County, at 5.0 percent, the rate has not been lower since the fourth quarter of 1993. And in Kauai County, at 7.0 percent, the unemployment rate was last lower in the first quarter of 1992.

Adjusting for the size of industries in each county, the sources of wage and salary job growth differed in the fourth quarter. In

Honolulu County, virtually all of the private sector growth came in services (1.9 percent). The leading private sectors in Hawaii County were construction (9.1 percent) and finance, insurance, and real estate (5.3 percent). Most of Maui County's job growth came in construction (40.0 percent), and the bulk of Kauai County's job growth occurred in retail trade (5.4 percent). With the exception of the City & County of Honolulu, there was also a significant job growth contribution from agriculture in each county.

In the public sector, all the counties experienced an increase in government jobs. In most cases, this largely came from a rise in state jobs. However, Kauai County also experienced a significant contribution from federal government positions.

The number of visitor arrivals rose in both Honolulu and Kauai counties. The City & County of Honolulu's 3.2 percent growth in the fourth quarter came from a 9.7 percent increase in westbound arrivals that offset a 3.5 percent decline in eastbound arrivals. Kauai County experienced a similar pattern with 5.3 percent growth westbound offsetting a decline of 5.7 percent eastbound, resulting in a total increase of 4.0 percent (the number of westbound visitors to Kauai is significantly higher than the number of eastbound visitors).

The number of visitor arrivals was down in both Hawaii County and Maui County. Hawaii County's drop was mirrored by a fall in hotel occupancy rates. However, Maui County experienced an increase in hotel occupancy rates, suggesting that the preliminary visitor arrivals numbers for Maui may be revised upward.

A. LABOR FORCE AND JOBS

Labor market conditions improved in the fourth quarter of 1999. The unemployment rate fell below 5.0 percent, and wage and salary jobs increased. Most of the job gains were in retail trade, services, government, and agriculture.

The unemployment rate fell to 4.9 percent in the fourth quarter of 1999 (Table A-4). This was the first time since the fourth quarter of 1993 that the unemployment rate fell below 5.0 percent. The decrease reflected a large 14.8 percent drop in the number of unemployed in the quarter (Table A-3). The number of unemployed has been falling in Hawaii since the fourth quarter of 1997.

The other side of unemployment--civilian employment--rose by 0.9 percent from the fourth quarter of 1998 to the fourth quarter of 1999 (Table A-2). For 1999 as a whole, civilian employment was up 1.2 percent from 1998. By this measure, the number of persons employed in Hawaii (566,300) has never been higher.

Yet there are other measures that have not grown as much. The number of non-agricultural wage and salary jobs grew by 0.6 percent in the fourth quarter of 1999 over the year-earlier quarter (Table A-5). This was the fastest quarterly rate of growth since the second quarter of 1992. Non-agricultural wage and salary jobs also grew by 0.1 percent for all of 1999. Excluding 1997 (when growth was also 0.1 percent), this was the first year of positive job growth since 1992.

Most of the increase in private non-agricultural jobs in the fourth quarter came from a few sources: manufacturing (0.6

percent, Table A-7), retail trade (0.3 percent, Table A-11), and services (1.6 percent, Table A-14).

The number of jobs fell in other industries. Construction jobs declined by 1.0 percent from the fourth quarter of 1998 to the fourth quarter of 1999 (Table A-6). But this was the lowest rate of decline since the third quarter of 1993. For 1999 as a whole, construction jobs were down 4.0 percent, again the lowest drop since 1993.

Hotel jobs were unchanged in the fourth quarter (Table A-15). Hotel jobs had been falling steadily since the third quarter of 1997 and the onset of the Asian crisis. For the year as a whole, hotel jobs were down 1.2 percent.

Agricultural wage and salary jobs grew by 8.4 percent, from 7,700 to 8,350 between the fourth quarter of 1998 and the fourth quarter of 1999 (Table A-19). For the year as a whole, agricultural jobs were up 2.0 percent. The number of these jobs has been falling for decades with the decline of sugar and pineapple production. The fact that agricultural wage and salary jobs have risen in each of the past two years may indicate that a floor has been reached and that diversified agriculture has found its level in the economy.

In the public sector, federal government jobs fell by 1.3 percent in the fourth quarter and by 0.8 percent in 1999 as a whole (Table A-16). State government jobs grew by 2.6 percent in the fourth quarter, and by 1.3 percent in 1999 (Table A-17). Local government jobs declined--by 0.6 percent in the fourth quarter and by 1.2 percent for the year (Table A-18).

B. INCOME AND PRICES

Personal income jumped up sharply in the third quarter of 1999 (the latest data available). Most of the increase was due to a rise in wages and salaries, but proprietors' income also rose dramatically. On the other hand, inflation also picked up in the second half of the year, moderating the growth in real personal income.

In late January 2000, the U.S. Bureau of Economic Analysis reported that Hawaii personal income rose by 3.9 percent from the third quarter of 1998 to the third quarter of 1999 (Table B-2). While this is a preliminary estimate that may later be revised, this was the fastest rate of growth since the second quarter of 1995.

Wages and salaries, the largest component of personal income, accounted for most of the increase. Wages and salaries expanded by 3.7 percent in the third quarter of 1999 relative to the year-earlier quarter (Table B-3). This was the fastest rate of growth for this component since the fourth quarter of 1992.

Other labor income grew for the first time since the fourth quarter of 1994—up 1.2 percent from the third quarter of 1998 to the third quarter of 1999 (Table B-4). Other labor income consists of employer contributions to privately-provided benefits such as pensions, profit-sharing, group health and life insurance, and so on.

The personal income component with the most dramatic increase was proprietors' income. This measure of self-employed income grew by 6.8 percent in the third

quarter from the year-earlier period (Table B-5). Proprietors' income has been growing relatively strongly since the end of 1997. This rise is consistent with other indications that the number of self-employed workers in Hawaii has increased in recent years.

The dividends, interest, and rent component also rose by a strong 3.3 percent over the period. This was the fastest rate of growth since the third quarter of 1996.

Measured by non-farm earnings, most of the personal income growth from the third quarter of 1998 to the third quarter of 1999 came from the private sector (Table B-1). The leaders in private earnings were services (5.2 percent), retail trade (4.1 percent), and finance, insurance, and real estate (4.2 percent). Construction earnings fell by 3.0 percent over the period, and earnings in the transportation and utilities industry declined by 2.0 percent.

Public sector earnings grew by 5.8 percent over the period. Federal civilian earnings were up by 5.0 percent while military earnings were flat. Earnings to the state and local government sector grew by a sharp 9.6 percent, but this largely reflected a one-time payment of retroactive wage increases from state arbitration awards.

The Honolulu Consumer Price Index jumped by 1.6 percent from the second half of 1998 to the second half of 1999. This was the largest increase in prices since the first half of 1996. The price increase suggests that the real increase in third quarter personal income was on the order of 2.3 percent.

C. TAX REVENUES

Tax revenues indicate that Hawaii's economy sank in the fourth quarter. However, technical factors explain much of the decline. For 1999 as a whole, general fund tax revenues fell primarily because of reductions in individual income tax rates that began in January.

General fund tax revenues slipped by 1.4 percent from the fourth quarter of 1998 to the fourth quarter of 1999 (Table C-2). For the year as a whole, general fund revenues were down 1.7 percent.

The decline in general fund revenues in the fourth quarter was largely due to technical factors. Most of the fourth-quarter decline occurred in December. And the Department of Taxation attributed most of December's decline to a "weekend effect." Because December 1999 ended on a Friday holiday, a large amount of tax receipts was pushed into January. In confirmation of this analysis, January 2000 figures indicated a sharp, 21.1 percent increase in general fund revenues over January 1999.

The 1.3 percent fourth-quarter decline in general excise and use tax revenues—the largest source of general fund revenues—also reflected the weekend effect (Table C-3). For the year as a whole, general excise revenues rose by 1.3 percent, the strongest growth since 1996.

Most of the decline in general fund revenues in 1999 was due to a reduction in individual income tax rates. These rates are being lowered over four years starting in 1999. As a result, net individual income tax rates fell by 3.5 percent from the fourth

quarter of 1998 to the fourth quarter of 1999 (Table C-4). They fell by 3.6 percent for 1999 as a whole.

Declarations of estimated individual income taxes fell by 14.3 percent in the fourth quarter (Table C-5). But these were also subject to the December weekend effect. For the year as a whole, declarations of estimated taxes rose 1.4 percent, following strong growth in the previous three years. The general increase in estimated tax payments may reflect increases in self-employment income that is also reflected in labor and personal income data.

Net corporate income tax receipts jumped by more than 100 percent in the fourth quarter but fell by 4.8 percent for 1999 overall (Table C-9). As these figures suggest, much of the fourth-quarter movement in corporate tax revenue may have been driven by end-of-year accounting effects. Nevertheless, the rise in declarations of estimated corporate income tax in the fourth quarter also suggest improvements in the economic activity (Table C-10).

The transient accommodations tax (TAT) rate increased from 6 percent to 7.25 percent and the tax base increased to include time-share units on January 1, 1999. This explained most of the 25.5 percent increase in TAT revenues from the fourth quarter of 1998 to the fourth quarter of 1999 (Table C-13). Some of the increase also reflected improvement in the visitor industry following the difficulties of 1998 from the Asian economic crisis. For the 1999 as a whole, TAT revenues rose by 21.8 percent over 1998.

D. TOURISM

The average daily visitor census and the number of visitor arrivals both rose in the fourth quarter, so that tourism indicators finished 1999 with solid growth over 1998. While the eastbound market continued to decline, strength in the westbound census and arrivals numbers offset the eastbound weakness.

Average daily visitor census expanded by 3.2 percent from the fourth quarter of 1998 to the fourth quarter of 1999 (Table D-5). At 162,800, the average daily census in the fourth quarter of 1999 was the highest fourth-quarter Hawaii has ever seen. For the year as a whole, the visitor census was up by 2.1 percent over 1998.

Either the visitor census or the number of visitor days is considered a better indicator of Hawaii's tourism strength than the number of arrivals. The visitor census and visitor days reflect both arrivals and lengths of stay and thereby have a closer relationship to actual visitor expenditures than just arrivals alone.

Yet the number of arrivals also increased in the fourth quarter by 2.4 percent over the same period in 1998 (Table D-2). For the year, arrivals were up by 1.6 percent.

Strength in the westbound market was clearly the source of growth in both the fourth quarter and 1999 as a whole. The average westbound visitor census was up 7.1 percent in the fourth quarter and by 5.5 percent in 1999 relative to 1998 (Table D-5). The number of westbound visitor arrivals grew by 6.2 percent in the fourth quarter and by 6.1

percent for 1999 as a whole (Table D-3). Fourth-quarter westbound arrivals topped 1 million for the second year in a row--matching levels that have not been seen since the fourth quarters of 1986-1992.

The eastbound market continued to show residual negative effects from the Asian crisis generally and from the struggling Japanese economy in particular. The eastbound average daily census was down 10.3 percent from the fourth quarter of 1998 to the fourth quarter of 1999. For 1999 as a whole, the eastbound census fell 8.3 percent (Table D-5). Eastbound visitor arrivals fell 4.4 percent in the fourth quarter and 5.9 percent for 1999 overall (Table D-4). The rate of eastbound arrival decline has slowed recently, but the drop in 1999 was slightly larger than the drop in 1998.

Average length of stay fell slightly in the fourth quarter. The westbound length of stay fell to 10.52 days, and the eastbound length of stay dropped to 5.65 days (Table D-6). For 1999 as a whole, lengths of stay fell for both westbound and eastbound but the overall length of stay increased by 0.5 percent. This was due to a shift in the composition from eastbound visitors to westbound visitors who stay longer.

The strength from westbound markets was also reflected in somewhat higher occupancy rates. In the fourth quarter of 1999, the hotel occupancy rate was 68.9 percent, up almost a full percentage point from the fourth quarter of 1998 (Table D-7). For the year as a whole, the occupancy rate rose 0.6 percentage points to 72.1 percent.

E. CONSTRUCTION

Construction indicators continued to rise in the fourth quarter. The growth in building-permit values accelerated in the quarter, leaving the 1998-to-1999 increase above 30 percent. Most of the fourth quarter growth occurred in Honolulu and Hawaii Counties. Housing prices also advanced in the quarter, but the number of transactions slowed.

The value of building permits, a measure of future construction activity, increased by nearly 70 percent in the fourth quarter of 1999 compared to the year-earlier quarter (Table E-1). For 1999 overall, building permit values expanded by 32.6 percent. Most of the fourth-quarter growth came in additions and alterations and residential. However, over the year, commercial and industrial activity also showed a healthy increase.

Authorizations have not yet translated into construction activity. The contracting tax base, a measure of recently-completed construction, declined by a slight 0.8 percent in the fourth quarter. For the year as a whole, the tax base was up by 0.7 percent.

The *number* (as opposed to the value) of authorizations also grew sharply in the fourth quarter. The number of single family home authorizations increased by 25.6 percent over the fourth quarter of 1998 (Table E-2). For the year, the number of authorizations was up 12.9 percent—the largest percent increase since 1987.

The number of multi-family units rose even faster. Multi-family unit permits increased by almost five-fold in the fourth quarter (Table E-3). Some of this growth was due to the very low number of authorizations in the fourth quarter of 1998 -

combined with a high number in 1999. But for the year as a whole, multi-family unit authorizations grew by 135.3 percent—the largest increase since 1985.

Most of the fourth-quarter increase in building permit values took place in Honolulu and Hawaii Counties (Table E-6). The City & County of Honolulu permits rose by 75.5 percent from the fourth quarter of 1998 to the fourth quarter of 1999. Hawaii County permit-values jumped by 135.5 percent. In both counties, residential projects (both single family and apartments) made up most of the increase.

In the residential market, single family home prices increased by 5.4 percent in the fourth quarter compared to the fourth quarter of 1998 (Table E-7). For 1999, single family home prices were up **1.3** percent. Condominium prices increased by 7.5 percent in the fourth quarter, but just barely increased for the year as a whole (Table E-8). Unadjusted for inflation, both sets of prices are still below the peaks reached in the late 1980s and early 1990s.

While prices edged up in the fourth quarter, the number of transactions slowed. The number of single family home transactions actually fell by 15.4 percent compared to the fourth quarter of 1998 (Table E-9). Still, for the year as a whole single family transactions were up **11.6** percent.

The number of condominium transactions increased by 3.7 percent in the fourth quarter, but this was well off the pace set in the last several years (Table E-10). Even so, for the year, condominium transactions were still up a strong 19.2 percent.

First Hawaiian Bank has discontinued compiling Government Contracts Awarded. Hawaii State Department of Business, Economic Development & Tourism has compiled preliminary estimates beginning with the fourth quarter 1997 based on data in *Building Industry*.

1/ Formerly, this category was "Value of Construction Completed", subject to revision by Hawaii State Department of Taxation.

2/ Includes hotels.

Source: Hawaii State Department of Taxation; F. W. Dodge; county building departments; First Hawaiian Bank; *Building Industry* (various issues) and tabulations by Hawaii State Department of Business, Economic Development & Tourism.

F. OTHER INDICATORS

The number of bankruptcy filings continued to fall in the fourth quarter. Indeed, the rate of decline accelerated. Most of the drop came from Chapter 7 filings. Thus, bankruptcy filings join other indicators in pointing to resurgent economic activity.

The number of bankruptcy filings in the fourth quarter of 1999 fell to 1,240 from 1,529 in the fourth quarter of 1998 (Table F-1). This was nearly a 19 percent decline. For 1999 overall, bankruptcies declined by 6.9 percent from the previous year. This was the first decline in annual filings since 1990.

Virtually all of the decline came from a 21.3 percent drop in Chapter 7 filings. Most bankruptcy filings in Hawaii occur under Chapter 7 which involves the liquidation of certain assets and the discharge of certain debts to give the debtor a "fresh start." For the year as a whole, Chapter 7 filings declined by 7.3 percent.

Chapter 11 filings fell by 25 percent in the fourth quarter of 1999 relative to the year-

earlier quarter. However, the number of such filings is usually small—only six in the fourth quarter of 1999. Chapter 11 usually involves repayment plans by companies.

Chapter 13 filings increased by 7.8 percent in the fourth quarter to 138 from 128 in the fourth quarter of 1998. Chapter 13 is often used by individuals in working out repayment plans with creditors.

The number of Hawaii bankruptcies began falling in the second quarter of 1999. A similar pattern has occurred at the national level. Despite the fact that the Mainland economy has grown strongly over the last few years, Mainland bankruptcy filings were soaring until recently. It was only in the first quarter of 1999 that Mainland filings began to decline. In the fourth quarter of 1999, total U.S. filings fell 9.8 percent from the year-earlier quarter. Readers may find national bankruptcy data for the fourth quarter of 1999 at the following web site: http://www.uscourts.gov/Press_Releases/cy99bk.pdf.

Quarterly data are computed by the Hawaii State Department of Business, Economic Development & Tourism from U.S. Bankruptcy Court for the District of Hawaii monthly data.

Source: U.S. Bankruptcy Court for the District of Hawaii.

III. TERMS AND DEFINITIONS

Agriculture Wage and Salary Jobs – Full- and part-time jobs for which payment was made by the employer in the survey week containing the 12th of the month. Includes farm jobs and machinery operators. Closely related management and services jobs are included for sugar and pineapple but are excluded for other types of agriculture.

Average Daily Visitor Census- By Air – Average number of visitors present daily in the state. Figures are computed monthly by the Research & Economic Analysis Division, DBEDT based on arrival and departure dates from ground and in-flight questionnaires.

Average Length of Stay- By Air – Number of days visitors are in the State including the day of arrival and of departure.

Bankruptcy Filings –

Chapter 7 – Is available to both individuals and business debtors. Its purpose is to achieve a fair distribution to creditors of whatever non-exempt property the debtor has and to give the individual debtor a fresh start through the discharge in bankruptcy.

Chapter 11 – Is available for both consumer and business debtors. Its purpose is to rehabilitate a business as a going concern or reorganize an individual's finances through a court-approved reorganization plan.

Chapter 12 – Is designed to give special debt relief to a family farmer with regular income from farming.

Chapter 13 – Is available for an individual with regular income whose debts do not exceed specific amounts, typically used to budget some of the debtor's future earnings under a plan through which creditors are paid in whole or in part.

Additional information may be found at the American Bankruptcy Institute "Bankruptcy Chapters" website <http://www.abiworld.org/media/chapters.html>

Civilian Employment – Persons 16 years of age or older who, during the survey week containing the 12th of the month, were either at work for pay or profit, or worked without pay for 15 hours or more on a family farm or business, or were with a job but not at work. Both permanent and temporary employees and those who are working either full- or part-time are included.

Civilian Labor Force – Total of employed and unemployed persons, excluding those in the armed forces and 16 years of age or under. U.S. Census Bureau does surveys for the U.S. Bureau of Labor Statistics.

Civilian Unemployment – Persons 16 years of age or older who (1) did not work at all during the survey week but were actively seeking work and were available for work; or (2) did not work at all, were available for work, and were waiting to be called back from layoff or were waiting to report to a new wage or salary job within 30 days.

Consumer Price Index: Honolulu or U.S. – Measure of the average change in prices over time for a fixed market basket of goods and services. It is compiled by the U.S. Bureau of Labor Statistics. The index measures changes from a reference date, i.e., 1982-84, which is designated as 100.0. For example, a Honolulu CPI-U (where U refers to All Urban Consumers), All Items, of 171.5 as the annual average for 1998 indicates the average prices of that group's basket was 71.5 percent higher than the weighted average of those same goods and services in 1982-84. Data are published monthly for the U.S. and semi-annually for Honolulu. As of January 1998, BLS changed the reference basket based on 1982-84 consumer expenditures to a 1993-95 basket, but the base remains 1982-84 = 100.0. The BLS Internet site has more information about the CPI at <http://stats.bls.gov/cpihome.htm>.

Condominium Sales and Resales: Consists of sales of new condominium and townhomes and resales that are entered in the Multiple Listing Service. It does not include apartments.

Contract Construction Jobs – Jobs held by any person engaged in construction, repairing, erecting, or improving buildings or structures of any type or description, and any installations therein. Such construction includes not only residential and non-residential building projects, both private and public, but also highway and road construction, street and sidewalk construction, repair, excavations, bridges, docks, and other heavy construction projects.

Contracting Tax Base – The total receipts of businesses engaged in contracting to erect, construct, repair, or improve buildings or structures of any kind or description, or to make any installation therein. Attributed to any business engaging in the practice of architecture, engineering, land surveying, landscape architecture, and the practice of pest control or fumigation.

Dividends, Interest, and Rent – Personal income received by individuals and on behalf of individuals by

quasi-individuals, including non-profit institutions and private trust funds administered by fiduciaries. Dividends are payments in cash or other assets by corporations in the U.S. or abroad to Hawaii residents. Interest consists of monetary interest, on private and government accounts and bonds, and imputed interest, on pensions and insurance as earned rather than as received. Rent is monetary income as received on real property, royalties, and imputed as value of owner-occupied nonfarm dwellings.

Earnings – Is a subtotal of personal income components: wages and salaries, other labor income, and proprietors' income. It is often used in regional analysis as a proxy for the income generated from participation in current production.

Eastbound Visitors- By Air – Visitors who stayed in Hawaii for at least one night but less than one year with flights from Asia, Australia, and the Pacific.

Federal Government Jobs – Includes those in the civilian agencies, i.e. Department of Defense, Agriculture, United States Postal Service and the various armed services exchange systems.

General Excise (Gross Income) Tax – Tax charged to businesses on gross sales or gross income. The tax rate is 0.5 percent on wholesaling and intermediary services, blind vendors, producing, manufacturing, sugar processing and pineapple canning; all other activities (retailing, business and professional services, contracting, theater, amusement, radio, interest, commissions, rentals) are taxed at 4.0 percent, except insurance commissions to general agents, subagents and solicitors, who are taxed at 0.15 percent.

General Excise and Use Tax Base – The value of all goods and services sold, including the value of tangible personal property imported into Hawaii for own use or consumption.. One of the most comprehensive measures of business activity in the state.

General Fund Tax Revenues – Receipts of the general excise and use tax, and net individual and corporate income taxes. The general government fund used to account for all financial resources except those required to be accounted for in another fund, such as the highway, airport or capital improvement fund.

Honolulu Construction Cost Indexes: High-Rise or Single Family – As compiled by First Hawaiian Bank. These indexes measure changes in contractors' costs for building materials and labor.

Hotel Jobs – Jobs in hotels, rooming houses, camps, and other lodging places.

Hotel Occupancy Rate – The percentage of occupied rooms in a hotel. Hotel occupancy rates depend not only on the number of visitors and their length of stay, but also on the hotel room inventory, e.g., a large increase in new hotel units results in a drop in occupancy rates, until such time as visitor traffic builds up enough to fill them. Rates are obtained from a sample survey conducted on a monthly basis.

Initial Agent Claims – Notices of unemployment filed against another state by its workers who have moved to Hawaii.

Initial Liable Claims – Notices of unemployment filed against Hawaii by Hawaii workers who have moved to another state.

Local Government Jobs – Includes those in the county governments.

Manufacturing Jobs – Jobs in manufacturing industries, or those activities by any person or establishment that buys materials, performs work on such materials, and changes such materials into a finished or semi-finished product. Includes compounding, canning, preserving, packing, printing, publishing, mailing, processing, refining, or preparing for sale, profit, or commercial use, either directly or through the activity of others, in whole or in part, any article, substance, or commodity such as textiles, apparel, printing, publishing, food processing, and durable goods

Net Earnings – BEA Personal Income component Earnings less Personal Contributions for Social Insurance. It can be used as a proxy for income before taxes.

Net Individual or Corporation Income Tax Revenue – For individuals, it is calculated as declaration of estimated taxes plus payments with returns plus withholding tax on wages less refunds. Net corporate income tax revenue is calculated as declarations of estimated taxes plus payments with returns less refunds.

Non-Agriculture Wage and Salary Jobs – Derived monthly from a sample survey of employers reporting the number of persons who received pay for any part of the pay period containing the 12th of the month. Includes all full- and part-time non-agricultural workers, permanent and temporary workers, and workers on paid sick leave and paid vacation.

Other Goods and Services – Honolulu Consumer Price Index component detail. Prior to the CPI 1998 Revision, it measured the change in average prices of tobacco products, personal care goods and services, and personal and educational expenditures. Beginning with January 1998 data, this category includes tobacco, personal care, and miscellaneous goods and services. Other components, for example, school-books and tuition, moved to the new “Education and Communication” and recreational reading to “Recreation”. BLS’ *Monthly Labor Review* (December 1996), and BLS’ Internet site have more information about the CPI at <http://stats.bls.gov/cpihome.htm>.

Other Labor Income – Personal income component that consists of employers’ contributions to privately-administered benefit plans, fees paid to corporate directors, and miscellaneous fees.

Personal Contributions for Social Insurance – Personal income earned, if not immediately received, by employees and self-employed who participate in various government programs such as social security, Medicare, retirement, and veterans life insurance programs. Contributions are excluded from Personal Income but are included when received as “Transfer Payments”.

Personal Income – Income received by or on behalf of residents from all sources—participation in production, from government and business transfer payments and from government interest (treated like a transfer payment by the Bureau of Economic Analysis). The major component is wages and salaries.

Proprietors’ Income – Earnings of unincorporated businesses, (proprietorships, partnerships, and producers’ cooperatives), from their current business operations. It includes both farm and non-farm businesses, but excludes capital gains and losses.

Retail Trade Jobs – Jobs in those establishments that are engaged in sales of tangible personal property to the customer for use or consumption and not for resale.

Services Jobs – Jobs in those activities that are engaged in for other persons for a consideration which involve the rendering of a service as distinguished from the sale of tangible property or the production and sale of tangible property. Includes all professional services.

Single Family Sales and Resales: Consists of sales of new homes and resales that are entered in the Multiple Listing Service.

State Government Jobs – Education includes all employees under the Department of Education (DOE) and the University of Hawaii System. This includes public library personnel, substitute teachers who received pay during the pay period including the 12th of the month, and support personnel such as cafeteria workers, classroom cleaners, and school security attendants. Also included are part-time employees in special programs such as the A+ After School Program.

State Government Jobs – Non-Education - Includes all other executive branch departments (i.e. Agriculture, Transportation, etc.), the legislative and judicial branches, and the Research Corporation of the University of Hawaii (RCUH).

Total Visitor Arrivals- By Air – All persons who stayed in Hawaii for a period between one night and one year. Includes westbound arrivals (traveling from North America) and eastbound arrivals (from Asia, Australia, and Oceania).

Transfer Payments – As a component of Personal Income, these are payments for which no current services are performed. They are payments by government and business to individual or nonprofit institutions serving individuals. Examples are social security and government employees’ retirement.

Transient Accommodations Tax – Tax levied on resort time-share vacation units and the furnishing of a room, apartment, suite which is customarily occupied by a person or group for fewer than 180 consecutive days by a hotel, apartment, motel, or cooperative apartment, rooming house, or other place in which lodgings are generally furnished to transients. The tax, as of January 1, 1999, is imposed at the rate of 7.25 percent and the tax base includes time-share units.

Unallocated General Excise & Use Tax Revenues – General excise and use tax revenues that could not be allocated to specific activities of the general excise & use tax. It also includes collections from penalty and interest, assessments and corrections, delinquent collections, refunds, protested payments, settlements, etc.

Unemployment Rate – Ratio of unemployed persons to the civilian labor force expressed as a percentage.

Use Tax – Excise tax levied on tangible personal property which is imported or purchased from an unlicensed seller for use in the state. The tax is based upon the purchase price or value of the tangible personal property purchased or imported, whichever is applicable.

Rates: 0.5 percent, if for resale at retail; 4.0 percent, if for use or consumption.

Wages and Salaries– The major component of Personal Income includes monetary and in-kind compensation for employment services rendered. Examples are commissions, tips, and meals furnished employees.

Westbound Visitors- By Air – Visitors who stayed in Hawaii for a period between one night and one year, who traveled from North America (Mainland U.S. and Canada).

Wholesale Trade Jobs – Jobs in those establishments whose sales of tangible personal property is to licensed persons for resale or incorporation into a product or project, and sales to certain leasing companies.
