

DBEDT
THE DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM
S T A T E O F H A W A I I

*Quarterly
Statistical &
Economic
Report*

March 2001

This *Quarterly Statistical and Economic Report* has been prepared by the staff of the Research and Economic Analysis Division of the State Department of Business, Economic Development & Tourism (DBEDT). The report provides concise statistical information and analyses on Employment, Income and Prices, Taxes, Tourism, and Construction, as well as an overview of the State of Hawaii and the four counties.

Director, Dr. Seiji F. Naya, heads the department. This report was prepared under the direction of the division administrator, Dr. Pearl Imada Iboshi.

Technical notes and source descriptions have been kept to a minimum. However, the staff of the Research and Economic Analysis Division would be happy to respond to any inquiries of a technical nature that readers may have (586-2466). The quarterly information contained in this report reflects data received by the Research Division on or before March 19, 2001.

On-line availability of *Quarterly Statistical and Economic Report*

Since 1988, the Hawaii Department of Business, Economic Development & Tourism has had the *State of Hawaii Data Book* available on-line to anyone with a personal computer and a modem. Since 1997, the *Quarterly Statistical and Economic Report*, *State of Hawaii Data Book* and other DBEDT publications and information have been made available over the Internet at <http://www.hawaii.gov/dbedt/index.html>.

Beginning in March 2000, the printing of the entire *QSER* has been discontinued. The full version will be available on-line at <http://www.hawaii.gov/dbedt/qser.html> and a *QSER Executive Summary* at <http://www.hawaii.gov/dbedt/latest.html> and is available on request by fax or e-mail.

For further information about available data and sources, users should call the Research and Economic Analysis Division's Business Resource Center at (808) 586-2424.

This report has been catalogued as follows:

Hawaii. Dept. of Business, Economic Development and Tourism. Research and Economic Analysis Division.

Quarterly statistical and economic report-State of Hawaii. Honolulu: 1975-

STATE OF THE ECONOMY

Hawaii's economy generally performed well in the fourth quarter of 2000, finishing the strongest year since the early 1990s. Evidence of strength especially came from labor markets, personal income, and tax revenue.

The civilian labor force grew by 0.6 percent in the fourth quarter compared to the fourth quarter of 1999 (Table 1). Growth in the labor force is notable because the unemployment rate fell by one full percentage point over the same period. Indeed, the *number* of unemployed dropped by more than 20 percent in the fourth quarter and by 23.2 percent for 2000 as a whole. This suggests that people who entered the labor markets were generally successful in finding employment.

As corroboration, the number of non-agricultural wage and salary jobs grew by 3.0 percent from the fourth quarter of 1999 to the fourth quarter of 2000. For the year, these jobs expanded by 3.1 percent. As indicated in Section A, Labor Force and Jobs, these were the fastest rates of growth seen since 1990.

Adjusting for industry size, most of the increase in non-agricultural wage and salary jobs came in services, up 5.1 percent in the fourth quarter and 4.9 percent for 2000 as a whole. The largest contributor to services jobs was business services, up 7.6 percent in the fourth quarter and by 10.4 percent for the year.

Retail trade and construction jobs were the next-largest contributors to non-agricultural job growth. Retail trade jobs expanded by 3.1 percent from the fourth quarter of 1999 to the fourth quarter of 2000. Construction jobs were up 8.1 percent over

that period. For the year as a whole, retail trade jobs expanded by 3.0 percent and construction jobs grew by 8.5 percent.

Personal income grew 4.7 percent from the third quarter of 1999 to the third quarter of 2000 according to data released by the U.S. Bureau of Economic Analysis (BEA) on January 24, 2001 (Table B-1). For the year through the third quarter, personal income rose 4.6 percent. Prices have remained stable, growing by only 1.7 percent according to the U.S. Bureau of Labor Statistics' Honolulu Consumer Price Index (Table B-9). Thus, real personal income has grown by about 2.9 percent in 2000.

The relative strength in economic activity was also reflected in tax revenue collections. General fund tax revenues grew by 8.3 percent in the fourth quarter from the same period in 1999 (Table 1). For the calendar year 2000, general fund revenues were up 8.0 percent. The largest contributor to State tax revenue growth was general excise and use tax revenue, which grew by 13.5 percent in the fourth quarter and by 10.8 percent for the year.

Tourism numbers were not as strong in the fourth quarter as for the earlier part of the year. The number of visitor arrivals rose 2.2 percent in the fourth quarter and 3.5 percent for 2000 as a whole. Visitor arrivals on domestic flights rose a scant 0.8 percent in the fourth quarter. But arrivals on international flights increased 4.7 percent. This reversed the pattern of the first three quarters: for 2000 overall, domestic-flight arrivals grew by 4.6 percent while arrivals on international flights grew 1.6 percent. Hotel occupancy rates for both the fourth quarter and the year were up almost 4 percentage points.

Figure 1. Annual Growth in Personal Income

[percentage change from the same period in previous year]

Source: Table B-2. Personal Income.

OUTLOOK OF THE ECONOMY

Slower economic growth on the Mainland, and on-going uncertainty about Japan's economy, raises concerns for economic prospects in Hawaii. Our current forecast calls for real growth of 2.8 percent this year.

The U.S. economy grew by 3.4 percent in the fourth quarter 2000 compared to the fourth quarter of 1999. While a relatively strong pace, this was significantly slower than the first three quarters of the year when the economy grew at rates in excess of 5 percent. The most recent poll of forecasts taken by *The Economist* magazine reports growth expectations of 1.6 percent in 2001 and 3.4 percent in 2002.

California's nominal personal income grew by 9.4 percent from the first three quarters of 1999 to the same period in 2000. The UCLA Anderson Forecast in December 2000 expected nominal growth of 11.3 percent for the year. Consumer prices have risen by about 4.5 percent in California, implying that real personal income growth in 2000 was about 4.9 percent. The December UCLA Anderson Forecast expects real growth of California personal income to be 3.0 percent in 2001 and 2.3 percent in 2002.

Preliminary data indicate that the Japanese economy grew by 1.9 percent from the fourth quarter of 1999 to the fourth quarter of 2000. If this figure holds up, this will have been the fastest year-over-year growth in a quarter since the first quarter of 1997. Even so, *The Economist* poll of forecasters expects Japan to grow by only 1.1 percent in 2001 and by 1.7 percent in 2002.

The Japanese yen is now trading at around 125 per dollar. This is approximately 12% lower than in 2000. A weaker yen makes Hawaii goods and services more expensive for Japanese visitors.

As a result of these considerations, DBEDT's forecast for economic growth in the next few years remains moderate. The table on the following page reports our forecast of visitor arrival growth this year of 2.9 percent and 2.6 percent in 2002. We expect similar growth rates for real personal income: 2.7 percent in 2001 and 2.6 percent in 2002. Nominal (unadjusted for inflation) visitor expenditures should grow by 6.0 percent this year and by 5.0 percent next year. This reflects increases of about 3 percent in the number of visitor days and 3 percent in spending per person per day.

COUNTY ECONOMIC CONDITIONS

By many of the labor measures Hawaii County enjoyed the strongest economic performance in the fourth quarter of 2000. However, all of the increase in visitor arrivals occurred in Honolulu County. Even so, hotel occupancy rates were up sharply in all four counties.

Civilian employment grew the fastest in Hawaii County (2.1 percent, Table 3) and Maui County (2.0 percent, Table 4) in the fourth quarter of 2000 compared to the year-earlier period. For the year, all of the Neighbor Island counties experienced civilian employment growth of at least 3.0 percent. The City & County of Honolulu's civilian employment growth was 1.5 percent in the fourth quarter and 1.3 percent for 2000 as a whole (Table 2).

The unemployment rate fell in all counties from the fourth quarter of 1999 to the fourth quarter of 2000. For the year, each county saw its unemployment rate drop by at least 1.2 percentage points.

Hawaii County enjoyed the fastest growth in non-agricultural wage and salary jobs in the fourth quarter: 4.1 percent. For the year, jobs increased 4.8 percent in Hawaii County. Fourth-quarter job growth was 3.1 percent in Maui County, 2.9 percent in the City & County of Honolulu, and 2.8 percent in Kauai County. For the year, jobs grew by at least 4 percent in all of the Neighbor Island counties; in the City & County of Honolulu these jobs grew by 2.7 percent for the year.

Adjusting for industry size, most of the fourth-quarter Hawaii County job growth came in services (7.0 percent), led by the 16.7 percent increase in business services (Table 3). While contract construction jobs grew by 8.5 percent, more jobs were created in the

larger retail trade sector with its 3.0 percent growth.

Maui County non-agricultural wage and salary job growth came mainly from retail trade in the fourth quarter (Table 4). Retail trade jobs grew by 7.1 percent from the fourth quarter of 1999. Services jobs also grew strongly at 3.4 percent, led by hotels jobs (5.9 percent) and business services jobs (9.3 percent). Construction jobs actually fell by 2.0 percent in Maui County in the fourth quarter, but for the year construction jobs were up more than 10 percent.

When adjusted for industry size, business services led job growth in the City & County of Honolulu in the fourth quarter (Table 2). Business services grew by 7.3 percent from the fourth quarter of 1999 and by 8.5 percent for 2000 as a whole. The next largest contributors to the City & County of Honolulu jobs came from retail trade (2.1 percent) and construction (9.8 percent).

Retail trade jobs posted the largest increase in Kauai County in the fourth quarter (5.9 percent, Table 5). For the year, Kauai's retail trade jobs increased by 6.1 percent. Services jobs, led by hotels, was the second-largest contributor to Kauai jobs.

All counties enjoyed a fourth-quarter increase in hotel occupancy rates of at least 3.0 percentage points. Hawaii County saw a 6.0 percentage point jump in occupancy rates. Even so, total visitor arrivals dropped in all the Neighbor Island counties for both the fourth quarter and the year. The City & County of Honolulu enjoyed 3.3 percent growth in visitor arrivals during the fourth quarter and 4.8 percent growth for 2000.

A. LABOR FORCE AND JOBS

To judge by the labor market, Hawaii's economy performed strongly in the fourth quarter of 2000. By a number of measures the year 2000 labor market was the strongest Hawaii has seen since the early 1990s.

Civilian employment grew by 1.6 percent in the fourth quarter of 2000 compared to the fourth quarter of 1999 (Table A-2). For the year, civilian employment expanded by 1.8 percent. This was the fastest rate of growth since 1996.

The number of unemployed fell by more than 20 percent in the fourth quarter (Table A-3). Indeed, in each quarter of 2000 the number of people unemployed dropped by more than 20 percent. For the year 2000, unemployment fell by 23.2 percent from 1999.

The unemployment rate (the number of unemployed divided by the civilian labor force) was down to 3.8 percent in the fourth quarter (Table A-4). Hawaii has not seen a fourth-quarter unemployment rate this low since 1991. For the year, the unemployment rate averaged 4.3 percent—down to the level last seen in 1993.

Non-agricultural wage and salary jobs expanded by a healthy 3.0 percent in the fourth quarter of 2000 compared to the year-earlier quarter (Table A-5). Growth for the year was even stronger at 3.1 percent. Both rates are higher than anything seen since 1990.

Industries with the largest fourth-quarter job increases (from the fourth quarter of 1999) included construction (8.1 percent, Table A-6), services (5.1 percent, Table A-

14), hotels (4.5 percent, Table A-15), transportation (4.2 percent, Table A-8), and retail trade (3.1 percent, Table A-11). In each case, these rates of fourth-quarter growth were the largest seen in ten years.

Manufacturing job growth has been particularly interesting. Manufacturing jobs grew by 2.4 percent in the fourth quarter from the year-earlier period (Table A-7). For the year, manufacturing jobs were up by 3.9 percent. With the slight increase in 1999, this represented a dramatic turnaround from the long-term decline in manufacturing jobs Hawaii has seen since the mid-1970s. Most of the manufacturing job growth came in non-durables and in printing and publishing in particular.

This reversal of long-term job loss has also occurred in agriculture. While agriculture wage and salary jobs fell by 8.4 percent in the fourth quarter (Table A-19), they were up 1.9 percent for the year. This was the third year of annual growth in agriculture jobs, reversing a long-term decline since the 1970s similar to that of manufacturing.

Jobs in the public sector also grew in 2000. The largest percentage increase came in federal government jobs, with growth of 2.1 percent over 1999 (Table A-16). Much of this growth was related to the Census. State government jobs grew by 1.8 percent in the fourth quarter and by 1.7 percent for 2000 over 1999 (Table A-17). Local government jobs expanded by 0.9 percent in the fourth quarter and by a small 0.3 percent for the year (Table A-18).

B. INCOME AND PRICES

Personal income grew rapidly in the third quarter of 2000 (the latest data available). The growth was driven by a rapid expansion of wage and salary income. But proprietors' income; dividends, interest, and rent; and transfer payments also showed healthy gains.

Hawaii's personal income increased by 4.7 percent from the third quarter of 1999 through the third quarter of 2000 (Table B-2). The U.S. Bureau of Economic Analysis (BEA) also revised upward its estimate of 2000 second-quarter growth to 4.9 percent from the year-earlier. This means that Hawaii's growth rate in the first three quarters of 2000 was the highest seen since 1993.

Growth in wage and salary income was by far the strongest contributor to this growth. Wages and salaries grew by 5.4 percent in the third quarter of 2000 compared to the third quarter of 1999 (Table B-3). This followed even stronger growth of 5.7 percent in the second quarter. Hawaii has not seen rates of growth at this level since 1992. It reflects both increases in the number of jobs and in wage rates.

The downward trend in other labor income seems to have reversed. Other labor income consists of employer payments to retirement plans, private group health insurance plans, private workers compensation plans, and so on. Other labor income has declined steadily since the first quarter of 1997 (Table B-4). The decline ended in the second quarter of 2000, and other

labor income expanded again, by 2.6 percent, in the third quarter (relative to the third quarter of 1999).

Proprietors' income continued to grow at a relatively fast pace in the third quarter. This measure of "entrepreneurial activity" expanded by 5.8 percent in the third quarter, following very strong growth of 7.7 percent in the first half of 2000 compared to the first half of 1999 (Table B-5). Proprietors' income has grown faster than total personal income since 1996.

The dividends, interest, and rent component of personal income expanded by 3.2 percent in third quarter (Table B-6). Adjusting for component size, dividends, interest, and rent was the second-strongest contributor to the third quarter's personal income increase.

Transfer payments also increased by a relatively sharp 4.9 percent in the third quarter. Retirement and medical payments constitute about 70 percent of transfer payments.

Inflation remained surprisingly tame in the second half of 2000. The Honolulu CPI grew by 1.7 percent from the second half of 1999 to the second half of 2000 (Table B-9). Much of the increase came from a 19 percent increase in energy prices (not shown). Excluding energy, Honolulu prices would have risen by less than 1 percent over the period.

C. TAX REVENUES

As reflected in tax revenue, Hawaii's economy revived last year. The strong increase in general fund tax revenue was led by double-digit increases in the general excise tax revenues. Transient accommodations tax revenue also grew sharply, reflecting strength in the visitor industry.

State general fund tax revenue increased by 8.3 percent in the fourth quarter of 2000 over the same period in 1999 (Table C-2). For the calendar year, general fund revenue was up by 8.0 percent. This was the fastest rate of growth since 1989.

Most of the revenue growth came from the general excise and use tax (GET). GET revenue grew by 13.5 percent from the fourth quarter of 1999 through the fourth quarter of 2000 (Table C-3). For calendar year 2000, GET revenue was up 10.8 percent. Hawaii has not seen this kind of increase in the broad-based GET revenue stream since 1990.

The second-largest source of general fund revenue, the individual income tax, grew at a more moderate pace. Net individual income tax revenue (payments less refunds) expanded by 3.0 percent in the fourth quarter of 2000 compared to the year-earlier quarter (Table C-4). These revenues grew by 2.5 percent for the calendar year 2000. This moderate growth was expected as the income tax rate cuts, which started to be phased in in 1999, are scheduled to continue through 2002.

Declarations of estimated individual income taxes grew by only 3.9 percent in the fourth quarter but by 10.7 percent for the year (Table C-5). This category was dominated by the large increase in the first quarter of 2000. The struggling performance of financial markets since the first quarter may be reflected in slowdown of estimated tax revenue.

On the other hand, income tax withholding on wages grew by 4.1 percent in the fourth quarter and by 3.5 percent for the year (Table C-7). Growth in withholding was strong for the last three quarters of 2000, perhaps reflecting both increases in the number of jobs and in wage rates.

Net corporate income tax revenue in 2000 returned to levels unseen since 1991. For the year, net corporate income tax revenue was \$67.8 million, 41.8 percent higher than in 1999 (Table C-9). Corporate income tax revenue is notoriously volatile, so it is difficult to draw conclusions about economic activity from quarterly fluctuations.

Transient Accommodations Tax (TAT) revenue rose by 15.6 percent in the fourth quarter of 2000 compared to the year-earlier quarter (Table C-13). For calendar year 2000 TAT revenue was up 14.3 percent. This reflected relatively strong activity in the visitor sector as the TAT rate increases of 1999 should now be incorporated into the data.

D. TOURISM

The visitor industry finished 2000 with some weakness in the domestic market but compensating strength from the international market. Arrivals grew faster than the average daily visitor census indicating shorter lengths of stay. Yet hotel occupancy rates remained relatively high.

The number of visitor arrivals to Hawaii (by air) grew 2.2 percent from the fourth quarter of 1999 to the fourth quarter of 2000 (Table D-2). For the year, visitor arrivals were up 3.5 percent. This was the fastest rate of growth for the year since 1994.

Yet the number of arrivals on domestic flights grew by an anemic 0.8 percent in the fourth quarter (Table D-3). For the year, domestic-flight arrivals rose 4.6 percent, largely thanks to exceptional growth in the second quarter of 2000.

Most of the weak domestic performance in the fourth quarter came from the U.S. West market. Arrivals from U.S. West (predominantly California) rose only 0.1 percent from the fourth quarter of 1999 to the fourth quarter 2000 (Table D-5). By contrast, the number of U.S. East arrivals grew 4.5 percent in the quarter (Table D-5). In both cases, the year-over-year growth was strong—5.0 percent for U.S. West arrivals and 9.6 percent for U.S. East arrivals.

The temporal pattern for international and Japanese arrivals was different: strong fourth-quarter growth but relatively modest growth for the year. The number of arrivals on international flights expanded by 4.5 percent in the fourth quarter but by only 1.6 percent for the year (Table D-4). Japanese visitor arrivals make up the bulk of

international-flight visitors. Japanese arrivals grew by 9.4 percent in the fourth quarter and by 1.7 percent for 2000 as a whole (Table D-7). Both international and Japanese arrivals remain below their peak levels in 1996 and 1997.

Some prefer the average daily visitor census, or the number of visitor days, as a measure of visitor industry activity. These measures reflect changes in both the number of arrivals and average lengths of stay. The visitor census increased by 0.8 in the fourth quarter and by 3.1 percent for 2000 as a whole (Table D-8). This pattern largely reflected domestic census growth rates (Table D-9). The census of visitors arriving on international flights was somewhat stronger in the fourth quarter, up 1.2 percent (Table D-10). But for the year as a whole, the international visitor census fell by 1.6 percent. This reflected a decline in average length of stay among these visitors.

In spite of the mixed arrival numbers, hotel occupancy rates averaged a relatively strong 72.8 percent in the fourth quarter (Table D-11). This was the highest fourth-quarter rate since 1995. For the year, occupancy rates averaged 76.0 percent, a rate unseen since 1994.

Readers interested in reviewing visitor data on a monthly basis can find them at <http://www.hawaii.gov/dbedt/monthly/index.html>.

In February 2001, DBEDT released an issue of *Hawaii's Economy* devoted to tourism issues. The issue contains a discussion of recent changes in visitor data and can be found at <http://www.hawaii.gov/dbedt/he2-01/index.html>.

E. CONSTRUCTION

Construction activity in Hawaii slowed somewhat in the fourth quarter of 2000 relative to the rapid pace earlier in the year. Even so, measures of construction activity for 2000 were close to those of 1999, which was the best year since early 1990s. Part of the difference is due to Kauai November 2000 data including residential permits only, thus the fourth quarter and annual data do not reflect total permit activity.

The value of private building permits rose by 11.9 percent in the fourth quarter of 2000 compared to the fourth quarter of 1999 (Table E-1). This followed growth in excess of 20 percent in the second and third quarters of the year. For the year 2000, private permit values grew by 14.6 percent. Excluding 1999's rapid 25.2 percent pace, this was the fastest annual growth since 1989.

Adjusting for size, most of the growth in private permit values came from additions and alterations in the fourth quarter. This category grew by 15.1 percent from the fourth quarter of 1999 to the fourth quarter of 2000. Residential permit authorizations was the second-largest contributor to total permit value growth, rising 8.4 percent in the fourth quarter. While commercial and industrial permits grew by 17.6 percent in the fourth quarter, this component was only one-fourth the size of residential permits and therefore contributed less than the other components to total permit value growth.

The increase in building permits has been translating into actual construction. The contracting tax base grew by 27.2 percent from the fourth quarter of 1999 to

the fourth quarter of 2000 (Table E-1). For the year 2000, the contracting base grew by 20.8 percent, the highest annual increase since 1990.

The number of single family housing units rose by 2.8 percent in the fourth quarter, sharply lower than the 30+ percent pace earlier in the year (Table E-2). On the other hand, multi-family units authorized accelerated by 28.1 percent in the quarter (Table E-3). The multi-family unit increase was primarily due to activity on Oahu.

Building permit values increased across all counties in the fourth quarter. Adjusting for size, most of the growth came from the 12.7 percent increase in permit values in Honolulu County (Table E-6). Much of Honolulu permit growth came from housing and renovation permits. Maui and Hawaii counties were the next largest contributors, with increases of 15.8 percent and 8.0 percent, respectively. Permits for Kamehameha Schools on the Big Island were particularly significant. While Kauai County values are the smallest, permits increased 12.9 percent from the fourth quarter of 1999 to the fourth quarter of 2000.

State capital improvement project (CIP) expenditures slowed to a 4.0 percent pace in fourth quarter (Table E-11). For the year CIP spending moved up by 2.4 percent. Fourth quarter CIP spending focused on classrooms at UH-Hilo, library construction at UH-Manoa, and campus development for Maui and Windward community colleges.

F. OTHER INDICATORS

Bankruptcy filings continued to fall in the fourth quarter of 2000. Both Chapter 7 and Chapter 13 filings declined, but Chapter 11 filings rose.

The total number of bankruptcy filings dropped by 9.8 percent in the fourth quarter compared to the fourth quarter of 1999 (Table F-1). For the year, total bankruptcy filings were down 16.3 percent. Bankruptcies have now declined for each of the last seven quarters.

Most of the decline came in Chapter 7 filings, which involve the liquidation of assets and the discharge of some debt. The number of Chapter 7 filings fell by 10.0 percent from the fourth quarter of 1999 to the fourth quarter of 2000. For the year, Chapter 7 filings were down 17.8 percent.

Chapter 11 filings jumped by 66.7 percent in the fourth quarter, but this

represented a rise from 6 filings in the fourth quarter of 1999 to 10 filings in the fourth quarter of 2000. Chapter 11 filings involve the structuring of repayment plans for companies. For the year 2000, Chapter 11 filings increased by 1, from 29 to 30.

Chapter 13 filings declined by 11.6 percent in the fourth quarter. Chapter 13 bankruptcy allows debtors to workout repayment arrangements with creditors. For the year, Chapter 13 filings fell 3.6 percent.

The decline in Hawaii bankruptcy filings corresponds with declines for the nation as a whole. U.S. bankruptcy filings fell 2.7 percent from the fourth quarter of 1999 through the fourth quarter 2000. Quarterly U.S. bankruptcy statistics can be found

at http://www.uscourts.gov/Press_Releases/press_02232001.pdf

III. TERMS AND DEFINITIONS

Agriculture Wage and Salary Jobs – Full- and part-time jobs for which payment was made by the employer in the survey week containing the 12th of the month. Includes farm jobs and machinery operators. Closely related management and services jobs are included for sugar and pineapple but are excluded for other types of agriculture.

Average Daily Visitor Census- By Air – Average number of visitors present daily in the state. Figures are computed monthly by the Research & Economic Analysis Division, DBEDT based on arrival and departure dates from ground and in-flight surveys.

Average Length of Stay- By Air – Number of days visitors are in the State including the day of arrival and of departure.

Bankruptcy Filings –

Chapter 7 – Is available to both individuals and business debtors. Its purpose is to achieve a fair distribution to creditors of whatever non-exempt property the debtor has and to give the individual debtor a fresh start through the discharge in bankruptcy.

Chapter 11 – Is available for both consumer and business debtors. Its purpose is to rehabilitate a business as a going concern or reorganize an individual's finances through a court-approved reorganization plan.

Chapter 12 – Is designed to give special debt relief to a family farmer with regular income from farming.

Chapter 13 – Is available for an individual with regular income whose debts do not exceed specific amounts, typically used to budget some of the debtor's future earnings under a plan through which creditors are paid in whole or in part.

Additional information may be found at the American Bankruptcy Institute "Bankruptcy Chapters" website <http://www.abiworld.org/media/chapters.html>

Civilian Employment – Persons 16 years of age or older who, during the survey week containing the 12th of the month, were either at work for pay or profit, or worked without pay for 15 hours or more on a family farm or business, or were with a job but not at work. Both permanent and temporary employees and those who are working either full- or part-time are included.

Civilian Labor Force – Total of employed and unemployed persons, excluding those in the armed forces and 16 years of age or under. U.S. Census

Bureau does surveys for the U.S. Bureau of Labor Statistics.

Civilian Unemployment – Persons 16 years of age or older who (1) did not work at all during the survey week but were actively seeking work and were available for work; or (2) did not work at all, were available for work, and were waiting to be called back from layoff or were waiting to report to a new wage or salary job within 30 days.

Consumer Price Index: Honolulu or U.S. – Measure of the average change in prices over time for a fixed market basket of goods and services. It is compiled by the U.S. Bureau of Labor Statistics. The index measures changes from a reference date, i.e., 1982-84, which is designated as 100.0. For example, a Honolulu CPI-U (where U refers to All Urban Consumers), All Items, of 171.5 as the annual average for 1998 indicates the average prices of that group's basket was 71.5 percent higher than the weighted average of those same goods and services in 1982-84. Data are published monthly for the U.S. and semi-annually for Honolulu. As of January 1998, BLS changed the reference basket based on 1982-84 consumer expenditures to a 1993-95 basket, but the base remains 1982-84 = 100.0. The BLS Internet site has more information about the CPI at <http://stats.bls.gov/cpihome.htm>.

Condominium Sales and Resales: Consists of sales of new condominium and townhomes and resales that are entered in the Multiple Listing Service. It does not include apartments.

Contract Construction Jobs – Jobs held by any person engaged in construction, repairing, erecting, or improving buildings or structures of any type or description, and any installations therein. Such construction includes not only residential and non-residential building projects, both private and public, but also highway and road construction, street and sidewalk construction, repair, excavations, bridges, docks, and other heavy construction projects.

Contracting Tax Base – The total receipts of businesses engaged in contracting to erect, construct, repair, or improve buildings or structures of any kind or description, or to make any installation therein. Attributed to any business engaging in the practice of architecture, engineering, land surveying, landscape architecture, and the practice of pest control or fumigation.

Dividends, Interest, and Rent – U.S. Bureau of Economic Analysis presents the State Personal Income estimates of these components together. It consists of income received by individuals and on behalf of individuals by private and government employee retirement plans and by quasi-individuals, including non-profit institutions and private trust funds administered by fiduciaries. Personal dividend income is payments in cash or other assets by corporations in the U.S. or abroad to noncorporate stockholders who are Hawaii residents. Personal interest income is the interest income (monetary and imputed) from all sources that is received by individuals, by private and government employee retirement plans, by nonprofit institutions, and by estates and trusts. Rental income of persons with capital consumption adjustment is the net current-production income of persons from the rental of real property except for the income of persons primarily engaged in the real estate business; the imputed net rental income received by owner-occupants of farm-dwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources. The estimates include BEA adjustments for uninsured losses to real estate caused by disasters, such as hurricanes (e.g. Iniki in 1992) and floods. See [Personal Income](#).

Earnings – This BEA aggregate is the sum of three components of personal income: wages and salary disbursements, other labor income, and proprietors' income. BEA presents earnings because it can be used in analyses of regional economies as a proxy for the income generated from participation in current production. See [Personal Income](#).

Federal Government Jobs – Includes those in the civilian agencies, i.e. Department of Defense, Agriculture, United States Postal Service and the various armed services exchange systems.

General Excise (Gross Income) Tax – Tax charged to businesses on gross sales or gross income. The tax rate is 0.5 percent on wholesaling and intermediary services, blind vendors, producing, manufacturing, sugar processing and pineapple canning; all other activities (retailing, business and professional services, contracting, theater, amusement, radio, interest, commissions, rentals) are taxed at 4.0 percent, except insurance commissions to general agents, subagents and solicitors, who are taxed at 0.15 percent.

General Excise and Use Tax Base – The value of all goods and services sold, including the value of tangible personal property imported into Hawaii for

own use or consumption. One of the most comprehensive measures of business activity in the state.

General Fund Tax Revenues – Receipts of the general excise and use tax, and net individual and corporate income taxes. The general government fund used to account for all financial resources except those required to be accounted for in another fund, such as the highway, airport or capital improvement fund.

Honolulu Construction Cost Indexes: High-Rise or Single Family – As compiled, by First Hawaiian Bank, and currently by DBEDT, these indexes measure changes in contractors' costs for building materials and labor.

Hotel Jobs – Jobs in hotels, rooming houses, camps, and other lodging places.

Hotel Occupancy Rate – The percentage of occupied rooms in a hotel. Hotel occupancy rates depend not only on the number of visitors and their length of stay, but also on the hotel room inventory, e.g., a large increase in new hotel units results in a drop in occupancy rates, until such time as visitor traffic builds up enough to fill them. Rates are obtained from a sample survey conducted on a monthly basis.

Initial Agent Claims – Notices of unemployment filed against another state by its workers who have moved to Hawaii.

Initial Liable Claims – Notices of unemployment filed against Hawaii by Hawaii workers who have moved to another state.

Local Government Jobs – Includes those in the county governments.

Manufacturing Jobs – Jobs in manufacturing industries, or those activities by any person or establishment that buys materials, performs work on such materials, and changes such materials into a finished or semi-finished product. Includes compounding, canning, preserving, packing, printing, publishing, mailing, processing, refining, or preparing for sale, profit, or commercial use, either directly or through the activity of others, in whole or in part, any article, substance, or commodity such as textiles, apparel, printing, publishing, food processing, and durable goods

Net Earnings – BEA also calculates this measure as Earnings less Personal Contributions for Social Insurance. Net earnings is used in the presentation of State and local area personal income as the sum of net

earnings, transfer payments, and personal dividend income, personal interest income, and rental income of persons. It can be used as a proxy for income before taxes. See [Personal Income](#).

Net Individual or Corporation Income Tax Revenue –

For individuals, it is calculated as declaration of estimated taxes plus payments with returns plus withholding tax on wages less refunds. Net corporate income tax revenue is calculated as declarations of estimated taxes plus payments with returns less refunds.

Non-Agriculture Wage and Salary Jobs –

Derived monthly from a sample survey of employers reporting the number of persons who received pay for any part of the pay period containing the 12th of the month. Includes all full- and part-time non-agricultural workers, permanent and temporary workers, and workers on paid sick leave and paid vacation.

Other Goods and Services –

Honolulu Consumer Price Index component detail. Prior to the CPI 1998 Revision, it measured the change in average prices of tobacco products, personal care goods and services, and personal and educational expenditures. Beginning with January 1998 data, this category includes tobacco, personal care, and miscellaneous goods and services. Other components, for example, schoolbooks and tuition, moved to the new “Education and Communication” and recreational reading to “Recreation”. BLS’ *Monthly Labor Review* (December 1996), and BLS’ Internet site have more information about the CPI at <http://stats.bls.gov/cpihome.htm>.

Other Labor Income –

This component of BEA Personal income consists of employers’ payments to private and government employee retirement plans, private group health and life insurance plans, privately administered workers’ compensation plans, and supplemental unemployment benefit plans; and of several other minor categories, including judicial fees to jurors and witnesses, compensation of prison inmates, and marriage fees to justices of the peace. See [Personal Income](#).

Personal Contributions for Social Insurance –

This BEA aggregate which is subtracted in the calculation of personal income consists of the contributions, or payments, by employees, by the self-employed, and by other individuals who participate in the following government programs: Old-age, survivors, and disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; railroad retirement; veterans

life insurance; and temporary disability insurance. See [Personal Income](#).

Personal Income –Income received by persons for participation in production, from government and business transfer payments, and from government interest (treated like a transfer payment by the Bureau of Economic Analysis). It is calculated as the sum of wage & salary disbursements, other labor income, proprietors’ income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and transfer payments to persons, less personal contributions for social insurance. For additional information see

<<http://www.bea.doc.gov/bea/regional/spi/index.html>>

Proprietors’ Income – This component of BEA Personal income is the current-production income (including income in kind) of sole proprietorships, partnerships and cooperatives. Corporate directors’ fees and the imputed net rental income of owner-occupants of farm dwellings is included in proprietors’ income but the imputed net rental income of owner-occupants of nonfarm dwellings is included in rental income of persons. Proprietors’ income excludes dividends and monetary interest received by nonfinancial business and rental incomes by persons not primarily engaged in the real estate business; these incomes are included in dividends, net interest, and rental income of persons, respectively. See [Personal Income](#).

Retail Trade Jobs – Jobs in those establishments that are engaged in sales of tangible personal property to the customer for use or consumption and not for resale.

Services Jobs – Jobs in those activities that are engaged in for other persons for a consideration which involve the rendering of a service as distinguished from the sale of tangible property or the production and sale of tangible property. Includes all professional services.

Single Family Sales and Resales: Consists of sales of new homes and resales that are entered in the Multiple Listing Service.

State Government Jobs – Education includes all employees under the Department of Education (DOE) and the University of Hawaii System. This includes public library personnel, substitute teachers who received pay during the pay period including the 12th of the month, and support personnel such as cafeteria workers, classroom cleaners, and school security attendants. Also included are part-time employees in special programs such as the A+ After School.

State Government Jobs – Non-Education - Includes all other executive branch departments (i.e. Agriculture, Transportation, etc.), the legislative and judicial branches, and the Research Corporation of the University of Hawaii (RCUH).

Transfer Payments – As a component of Personal Income, these are payments for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by Federal, State and local governments and by businesses. Government transfer payments to individuals includes retirement and disability insurance payments (mainly medicare and medicaid), income maintenance benefits, unemployment insurance benefits, veterans benefits, and Federal grants and loans to students. Government transfer payments to nonprofit institutions excludes payments by Federal Government for work under research and development contracts. Business transfer payments to persons for personal injury and of corporate gifts to nonprofit institutions. See [Personal Income](#).

Transient Accommodations Tax – Tax levied on resort time-share vacation units and the furnishing of a room, apartment, suite which is customarily occupied by a person or group for fewer than 180 consecutive days by a hotel, apartment, motel, or cooperative apartment, rooming house, or other place in which lodgings are generally furnished to transients. The tax as of January 1, 1999 is imposed at the rate of 7.25 percent and the tax base includes time-share units.

Unallocated General Excise & Use Tax Revenues – General excise and use tax revenues that could not be allocated to specific activities of the general excise & use tax. It also includes collections from penalty and interest, assessments and corrections, delinquent collections, refunds, protested payments, settlements, etc.

Unemployment Rate – Ratio of unemployed persons to the civilian labor force expressed as a percentage.

Use Tax – Excise tax levied on tangible personal property which is imported or purchased from an unlicensed seller for use in the state. The tax is based upon the purchase price or value of the tangible personal property purchased or imported, whichever is applicable. Rates: 0.5 percent, if for resale at retail; 4.0 percent, if for use or consumption.

Visitor Arrivals- By Air, Total – All persons who stayed in Hawaii for a period between one night and one year.

Domestic Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year, arriving on flights from Mainland U.S. A foreign resident arriving in Hawaii on a flight directly from the U.S. Mainland is counted as a domestic visitor.

International Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year arriving on flights from foreign countries. An U.S. resident arriving in Hawaii on a flight directly from a foreign country is counted as an international visitor.

Wages and Salary Disbursements– This component of Personal Income consists of the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; and receipts in kind, or pay-in-kind, such as the meals furnished to the employees of restaurants. It reflects the amount of wages and salaries disbursed, but not necessarily, earned during the year. See [Personal Income](#).

Wholesale Trade Jobs – Jobs in those establishments whose sales of tangible personal property is to licensed persons for resale or incorporation into a product or project, and sales to certain leasing companies.
