THE DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM

STATE OF HAWAII

Quarterly Statistical & Economic Report

1st Quarter 2005

This *Quarterly Statistical and Economic Report* has been prepared by the staff of the Research and Economic Analysis Division of the State Department of Business, Economic Development & Tourism (DBEDT). The report provides concise statistical information and analyses on Labor, Income and Prices, Taxes, Tourism, Construction, and other indicators, as well as an overview of the State of Hawaii and the four counties.

Technical notes and source descriptions have been kept to a minimum. However, the staff of the Research and Economic Analysis Division would be happy to respond to any inquiries of a technical nature that readers may have (586-2466). The quarterly information contained in this report reflects data received by the Research Division on or before February 23, 2005.

On-line availability of *Quarterly Statistical and Economic Report*

Since 1988, the Hawaii Department of Business, Economic Development & Tourism has had the *State of Hawaii Data Book* available on-line to anyone with a personal computer and a modem. Since 1997, the *Quarterly Statistical and Economic Report*, *State of Hawaii Data Book* and other DBEDT publications and information have been made available over the Internet at <http://www2.hawaii.gov/dbedt/>.

Printing of the *QSER* was discontinued in March 2000. The full version and a *QSER Executive Summary* will be available on-line at <http://www2.hawaii.gov/dbedt/latest>.

For further information about available data and sources, users should call the Research and Economic Analysis Division Library at (808) 586-2424.

This report has been catalogued as follows:

STATE OF THE ECONOMY

The fourth quarter of 2004 was another strong quarter for the Hawaii economy. Employment and jobs grew at above-average rates. Investment in construction and real estate provided strong support for associated activities and consumer demand. Average daily visitor census for the year reached a new all-time peak and federal spending remained high. A positive view of Hawaii's economic strength is supported by optimistic projections for the U.S. economy and moderate expectations for Japan.

Hawaii's total civilian employment stood at 614,650 in the fourth quarter of 2004, a 2.5 percent increase over the final quarter of 2003. The number of wage and salary jobs was up 19,550 to 602,700 for 3.4 percent increase for the fourth quarter of 2004. This is the highest rate of quarterly job growth in Hawaii since 1991. Jobs for the quarter were up most notably in Retail Trade; Food Services; and Transportation, Warehousing, and Utilities, each with an increase of at least 2,000 jobs.

Nominal personal income rose 6.2 percent in the third quarter of 2004, the period for which the most recent data are available. Ranked by rate of growth, the greatest increase was seen in Supplements to Wages and Salaries (9.7 percent) followed by Proprietors' Income (7.0 percent), Wage and Salary Disbursements (6.6 percent), Personal Current Transfer Receipts (4.5 percent), and Dividends, Interest, and Rent (3.4 percent). Contributions for Government Social Insurance, which is subtracted from personal income, also increased, 8.0 percent. There were year-to-year quarterly increases in earnings for all categories except for farm earnings.

Tax revenues distributed to the State general fund increased 9.8 percent for the fourth quarter of 2004 compared to the fourth quarter of 2003. Revenues from the general excise and use tax increased by 10.3 percent, net individual income tax collections increased 5.1 percent, and net corporate income taxes increased \$11.5 million, recovering from a -\$260,000 in the fourth quarter of 2003. Transient Accommodations Tax (TAT) revenues increased 4.0 percent.

The total number of visitors arriving by air was up 7.0 percent in the fourth quarter of 2004, an increase of 112,000 visitors compared with the fourth quarter of 2003. For the entire year of 2004, visitors arriving by air increased 8.3 percent or 528,000 more arrivals. The overall quarterly increase in arrivals resulted from a substantial 9.3 percent increase in domestic arrivals and a smaller 2.6 percent increase in international arrivals.

Indicators of the status of Hawaii's construction industry remained positive in the fourth quarter of 2004 with signals for the future pointing toward more growth. Both construction jobs and real estate demand continued to increase while the value of private building authorizations reached a new fourth quarter high, up 37.3 percent for the fourth quarter of 2003.

Hawaii bankruptcy filings decreased by 25.6 percent in the third quarter of 2004. This was the eleventh consecutive quarter of decline for Hawaii bankruptcies.

OUTLOOK FOR THE ECONOMY

DBEDT's quarterly forecast for Hawaii's economy continues to anticipate solid growth for tourism, personal income, and wage and salary employment for 2005. Honolulu consumer prices are expected to increase moderately in 2005 as they did in 2004. Projections of economic growth for the mainland U.S., Hawaii's primary market, are reasonably strong, while Japan is projected to grow, but at a slower pace.

Several indicators support an optimistic near-term forecast for Hawaii, the most notable of which may be the current level of private building permit authorizations. Current permit levels averaging over \$200 million per month should mean a robust construction sector for the foreseeable future. Coupled with a vibrant visitor sector and increased federal government spending, all the pieces seem to be in place for healthy employment and earnings.

The future condition of Hawaii's economy is linked to the state of the mainland U.S. and Japan economies. The February 2005 *Blue Chip Economic Consensus Forecast* projects real GDP growth in 2005 of 3.6 percent for the U.S. and 1.6 percent for Japan. Growth in 2006 is expected to be 3.4 percent for the U.S. and 2.2 percent for Japan. There is uncertainty about the state of the Japanese economy with some sources predicting growth and others indicating an existing recession. The expectation for U.S. consumer price inflation is about 2.5 percent in 2005 and 2.3 percent for 2006.

Based on current conditions, visitor days in 2005 are expected to increase 3.5 percent, up

from the 2.4 percent forecast of the previous forecast. Visitor expenditures are forecast to increase 4.4 percent and visitor arrivals are expected to increase 3.4 percent in 2005. In 2006, visitor days, visitor arrivals, and visitor expenditures are predicted to increase 2.8 percent, 2.1 percent, and 5.0 percent, respectively, followed by moderate increases in 2007 and 2008.

The U.S. Bureau of Economic Analysis's estimate of Hawaii's nominal (current dollar) personal income growth was 6.2 percent for the third quarter of 2004 over the same period of 2003. This increase, along with the recent upward trend in Hawaii's personal income, contributed to the current 2005 nominal forecast of 6.0 percent, up from a 5.8 percent forecast last quarter. For 2006, we project a slightly slower 5.6 percent growth rate. Real personal income growth rates for 2005 and 2006 are forecast to be 2.7 percent and 2.6 after deflating the nominal projections by the forecast Honolulu CPI.

The 2005 DBEDT forecast for total wage and salary jobs growth has been increased from 1.5 percent to 1.8 percent due to the effects of continuing strength in the visitor and construction sectors. Job growth in 2006 is now projected to be 1.3 percent.

Hawaii's projected inflation rates for 2005 and 2006 are 3.2 percent and 2.9 percent. The housing and energy price pressures felt during 2004 are projected to continue in the near future.

COUNTY ECONOMIC CONDITIONS

Based on employment and jobs, all four Hawaii counties had positive growth during the fourth quarter of 2004. They all expanded at higher-than-usual rates, but with somewhat different sectoral patterns. The counties were also all positive in growth in visitors days and arrivals, and only Kauai showed a dip in hotel occupancy rate. Changes in general excise and individual income tax collections varied widely by county.

Maui County had the highest rates of employment job growth of any of the counties during the fourth quarter of 2004 compared with the fourth quarter of 2003. Maui's businesses created 2,750 more jobs than the last quarter of 2003 or 4.2 percent more. Retail Trade, Agriculture, and Accommodation led all other sectors with jobs increases of 550, 550, and 400 jobs respectively.

Kauai County had an overall gain of 1,100 jobs or a 3.9 percent increase. Retail Trade led the other sectors in job gains for the quarter with an increase of 250. Accommodation and Professional and Business Services each contributed 200 additional jobs during the fourth quarter.

Hawaii County added 2,300 jobs for a 3.8 percent growth rate during the fourth quarter of 2004. The biggest gains were in Retail Trade with an increase of 600 jobs, Accommodation which was up 450 jobs, and Food Service and Drinking Places added 350 jobs.

The City and County of Honolulu, in the fourth quarter of 2004, picked up 13,400 wage and salary jobs or 3.1 percent from a year earlier. The largest private sector increases in jobs were in Retail Trade (2,400 jobs); Transportation, Warehousing, and Utilities (1,750 jobs); and Health Care and Social Assistance (1,500 jobs). The public sector also contributed 1,600 new jobs led by 1,400 new hires by State government.

Visitor days by air in the fourth quarter were up 10.0 percent in Hawaii County, 4.4 percent on Oahu, 3.6 percent in Maui County, and 2.9 percent on Kauai. Hotel occupancy rates were up in all counties except Kauai. The largest increase was 2.7 percentage points (to 71.7 percent) on Maui. The City and County of Honolulu had the highest occupancy rate at 77.6 percent.

General excise and use tax revenue growth was up strongly on Oahu and Kauai, but down on Maui and the Big Island during the fourth quarter. The City and County of Honolulu had the largest rate of growth at 13.8 percent and GET from Hawaii County was down 15.6 percent. It should be noted, however, that the GET is reported by company headquarters and may not reflect economic activity in the county. Individual income tax collections were up in all counties except Hawaii County. Individual income tax collections were up 24.5 percent on Kauai.

A. LABOR FORCE AND JOBS

Hawaii's total civilian employment stood at 614,650 in the fourth quarter of 2004, a 2.5 percent increase over the final quarter of 2003 (Table A-2). For the year 2004, civilian employment increased 2.9 percent. Total labor force increased 1.3 percent in the fourth quarter of 2004 over the fourth quarter of 2003 to 634,450 and, for the year 2004, labor force increased 1.9 percent to an average of 630,150 (Table 1). Since employment increased more than labor force, unemployment and the unemployment rate went down. The average unemployment rate of 3.4 percent for 2004 was well below the 4.3 percent rate in 2003.

During the fourth quarter of 2004, total wage and salary jobs increased by 3.4 percent or 19,550 jobs from the fourth quarter of 2003 (Table A-5). This is the highest rate of quarterly job growth in Hawaii since 1991. For the year 2004, the annual average number of wage and salary jobs was 589,200, up 2.6 percent over the 2003 annual average.

Virtually all private sector industries showed positive job growth both for the fourth quarter of 2004 and for 2004 as a whole. Seven private sector industries had increases of more than a thousand jobs between the fourth quarters of 2003 and 2004. Retail Trade lead the other sectors with an extraordinary increase of 3,800 jobs or 5.7 percent (Table A-10) followed by

Food Service and Drinking Places (2,400 jobs or 4.6 percent, Table A-19), Transportation, Warehousing, and Utilities (2,000 jobs or 7.4 percent, Table A-11), Accommodation (1,800 jobs or 4.9 percent, Table A-18), Health Care and Social Assistance (1,800 jobs or 3.4 percent, Table A-16), Natural Resources, Mining and Construction (1,500 jobs or 5.3 percent, Table A-7), and Information (1,050 jobs or 10.6 percent, Table A-12). No sectors lost jobs, but Other Services had no growth (Table A-20).

Based on the annual average jobs for the year 2004, the sector that gained the most jobs was Retail Trade with an increase of 2,450 jobs over 2003 followed by Food Service and Drinking Places with 1,900 more jobs than the average for 2003.

Overall, in the government sectors, the number of jobs increased 1.7 percent for the fourth quarter of 2004 (Table 1). Federal government jobs rose 0.3 percent over the fourth quarter 2003 level (Table A-21), while State government jobs increased by 2.5 percent (Table A-22) and local government jobs increased by 0.6 percent (Table A-23). For all of 2004, Federal government jobs were up 0.6 percent, State jobs were up 1.3 percent, and Local Government jobs increased 1.2 percent.

B. INCOME AND PRICES

Personal income continued to grow at a strongly positive rate during the third quarter of 2004 (the period for which the latest data are available from the Bureau of Economic Analysis) measured over the third quarter of 2003. Ranked by rate of growth, the greatest increase was seen in Supplements to Wages and Salaries followed by Proprietors' Income, Wage and Salary Disbursements, Personal Current Transfer Receipts, and Dividends, Interest, and Rent. Contributions for Government Social Insurance, which is subtracted from personal income, also increased. There were year-to-year quarterly increases in earnings for all categories except for farm earnings (Table B-1).

Nominal personal income, not adjusted for inflation, rose \$2.4 billion or 6.2 percent in the third quarter of 2004 compared to the third quarter of 2003 (Table B-1 or B-2). Wage and salary disbursements grew by about \$1.5 billion or 6.6 percent in the third quarter of 2004 (Table B-3). Wages and salaries accounted for about 58 percent of personal income.

Supplements to Wages and Salaries, consisting of employer payments to retirement plans, private group health insurance plans, private workers compensation plans, and other such benefits, increased by \$571 million or 9.7 percent in the third quarter of 2004 compared to 2003 (Table B-4).

Personal Current Transfer Receipts, consisting largely of retirement and medical payments, grew by \$219 million or 4.5 percent for the quarter (Table

B-7). Dividends, Interest, and Rent rose by \$214 million or 3.4 percent in the third quarter of 2004 (Table B-6).

Proprietors' Income, the income most closely related to entrepreneurial activity, grew by \$186 million or 7.0 percent in the third quarter of 2004 compared to the third quarter of 2003 (Table B-5).

Contributions to Government Social Insurance, payments subtracted from personal income, increased \$258 million or 8.0 percent (Table B-8).

Earnings increased across almost all private sector industries between the third quarter of 2003 and the third quarter of 2004. In dollar terms, the largest increases came in Accommodation and Food Services followed by Health Care and Social Assistance, Retail Trade, and Transportation and Warehousing (Table B-1). Earnings increased by 7.6 percent in the public sector, half of which or \$362 million was accounted for by the federal military component.

Hawaii's inflation rate increased 3.3 percent in the second half of 2004 matching the 3.3 percent increase for the first half of the year (Table B-9). This 3.3 percent annual rate was higher than the 3.0 percent inflation experienced on the Mainland during 2004. The Honolulu increase was produced by the Housing component increasing 4.6 percent and Transportation, mostly fuels, increasing 3.9 percent.

C. TAX REVENUES

State general fund tax revenues increased 9.8 percent in the fourth quarter of 2004 over the fourth quarter of 2003, as a result of strong increases in collections of the General Excise and Use Tax (GET), Individual Income Tax, and Corporate Income Taxes. Transient Accommodations Tax (TAT) revenues were also up for the quarter.¹

The increase in these, and most other State taxes and fees, raised tax revenues distributed to the State general fund to \$885 million for the fourth quarter of 2004 (Tables C-1 and C-2), an increase of about \$79 million over the year-earlier quarter. For the calendar year 2004, distributions to the general fund summed to \$ 3.6 billion, 13.7 percent more than distributions in 2003.

During the fourth quarter of 2004, GET revenues were up 10.3 percent over the fourth quarter of 2003 (Tables C-1 and C-3). (When interpreting these tax figures in conjunction with other quarterly data in this report, it should be kept in mind that the tax data represent collections during the quarter. The transactions on which the taxes were paid did not necessarily take place during the quarter.) GET revenues increased 9.4 percent during calendar 2004 to almost \$2.0 billion.

Net individual income tax revenue is the sum of four components. The overall increase in the fourth quarter of 2004 was the result of an increase in the largest category of collections and a decrease in refunds. Withholding Tax on Wages was up by 9.4 percent or \$25.0 million (Table C-7), while refunds decreased by 6.4 percent or \$2.1 million which served to increase total collections (Table C-8). Declaration of Estimated Taxes decreased 18.3 percent or \$8.2 million (Table C-5) and Payment with Returns decreased by 19.6 percent or \$3.7 million (Table C-6).

Net corporate income tax revenue increased by \$11.5 million in the fourth quarter of 2004 compared to the year-earlier quarter (Table C-9). On an annual basis, net corporate income tax revenues increased by an unprecedented \$70.0 million. The quarterly increase in corporate taxes was the result of improvements in all three categories. Declaration of Estimated Taxes increased 14.8 percent (Table C-10), Payment with Returns increased 22.9 percent (Table C-11) and Refunds dropped by 50.6 percent (Table C-12).

TAT revenue was up by 4.0 percent or \$1.5 million in the fourth quarter of 2004 (Table C-13). During 2004, TAT increased \$19.2 million or 11.3 percent.

D. TOURISM

During the fourth quarter of 2004, both the total number of visitor arrivals and the average daily visitor census were up from the fourth quarter of 2003. Hotel occupancy rates also improved for the quarter. Domestic and international visitor arrivals increased during the quarter, but international daily visitor census declined reflecting a decrease in length of stay by the average international visitor compared with the fourth quarter of last year.

The total number of visitors arriving by air was up 7.0 percent in the fourth quarter of 2004 from the fourth quarter of 2003 (Tables D-1 and D-2). This is an increase of 112,000 visitors compared with the fourth quarter of 2003. For the entire year of 2004, visitors arriving by air increased 8.3 percent or 528,000 more arrivals.

The overall quarterly increase in arrivals resulted from a substantial increase in domestic arrivals and a smaller increase in international arrivals. Arrivals on domestic flights were up 9.3 percent, while the number of travelers on international flights increased by 2.6 percent, comparing the fourth quarter of 2004 to that in 2003 (Tables D-3 and D-4). For the year 2004, international visitors increased at the greater rate topping the increase in domestic arrivals 9.8 percent to 7.6 percent.

Comparing the different major market areas, the U.S. West market produced 55,600 more visitors or 9.0 percent more than the fourth quarter 2003 in the fourth quarter 2004 (Table D-5). Arrivals from the U.S. East also contributed strongly to growth,

increasing 8.1 percent or 30,700 visitors (Table D-6). The Japan market declined over the last quarter of 2003, but only slightly at -0.4 percent or -1,700 visitors (Table D-7).

The total average daily visitor census was up 9,000 visitors per day or a 5.7 percent increase in the fourth quarter of 2004 (Table D-8). This total increase was produced by an 8.3 percent increase in domestic visitors' daily census, those arriving on flights from U.S. Mainland airports, moderated by a 2.2 percent decrease for the international visitors' daily census (Tables D-9 and D-10). For all of 2004, international visitor census was up 5.0 percent while the average daily census of domestic visitors was up 7.0 percent.

Airline capacity to Hawaii, as measured by the number of available seats flown, increased 10.9 percent in the fourth quarter of 2004 (Table D-11). This increase came from a 10.7 percent increase in domestic capacity and an 11.5 percent increase in international capacity.

Hotel occupancy rates rose 2.1 percentage points from 71.3 percent in the fourth quarter of 2003 to 73.4 percent in the fourth quarter of 2004 (Table D-11).

Readers interested in reviewing visitor statistics on a monthly basis can find them at:

E. CONSTRUCTION

Indicators of the status of Hawaii's construction industry remained positive in the fourth quarter of 2004 with signals for the future pointing toward more growth. Both construction jobs and real estate demand continued to grow in the fourth quarter of 2004 compared with the same quarter in 2003, while the value of private building authorizations reached a new fourth quarter high.

Wage and salary jobs in the construction industry increased statewide in the fourth quarter. Construction jobs were up 5.3 percent to 30,050 from the fourth quarter of 2003 to the fourth quarter of 2004 (Table 1, Table A-7). (The Natural Resources, Mining and Construction jobs category published by the Department of Labor and Industrial Relations is currently 99 percent construction jobs and one percent mining jobs.) Construction jobs grew in all four counties. City and County of Honolulu construction jobs increased 5.3 percent (Table 2), Hawaii County increased 4.6 percent (Table 3), Maui County construction jobs were up 6.8 percent (Table 4), and Kauai County construction jobs were up 7.4 percent (Table 5).

Median sale prices for both single family and condominium resales in Honolulu continued to increase in the fourth quarter of 2004 over the fourth quarter of 2003. The single-family median value was up 22.8 percent to \$490,000 (Table E-9) and the median Honolulu condominium price was up 21.5 percent to \$220,000 (Table E-10). The number of single-family units resold increased by 8.6 percent (Table E-11) while the number of condominium unit resales was up 10.3 percent (Table E-12).

Newly-added tables for Maui show that median sale prices for single family resales on Maui increased again in the fourth

quarter of 2004 over the fourth quarter of 2003. The single-family median value was up 11.0 percent to \$566,000 (Table E-13). Maui condominium prices were also up, increasing to \$370,000, a 41.3 percent rise (Table E-14). The number of single-family units resold declined by -11.3 percent (Table E-15) and the number of condominium unit resales also declined – by -24.9 percent (Table E-16).

Total private building authorizations were up 37.3 percent for the fourth quarter of 2004 from a year earlier (Tables E-1 and E-8). The number of single-family unit authorizations was down 7.8 percent (Table E-4), but multi-family units authorized were up 769.9 percent (Table E-5). Honolulu's total private authorizations were up 28.3 percent from the fourth quarter of 2003, Hawaii County authorizations increased 69.5 percent, Maui permits rose 34.8 percent, and Kauai County residential permits were down 21.5 percent (Table E-8). (Beginning with the first quarter of 2003, Kauai County permit value data are for residential only.)

Government contracts awarded declined 9.4 percent from the fourth quarter of 2003 to the fourth quarter of 2004 (Table E-1). State Government Capital Improvement Project expenditures (CIP) were down for the third quarter by 15.3 percent over the third quarter of 2003 (Table E -12). Almost half of the CIP expenditure was from General Obligation bond funds, but large shares were Federal and Special funds.

The Honolulu Construction Cost Index for Single Family Residences rose by 7.2 percent in the fourth quarter of 2004, over the fourth quarter of 2003 (Table E-6), while the comparable index for high-rise buildings also rose by 7.2 percent (Table E-7).

F. OTHER INDICATORS

The total number of Hawaii bankruptcy filings declined in the third quarter of 2004 over the third quarter of 2003. This makes the eleventh straight quarter in which total Hawaii bankruptcies decreased.

The total number of bankruptcy filings decreased by 25.6 percent in the third quarter 2004 compared to the third quarter of 2003 (Table F-1). Total bankruptcies decreased from 919 to 684.

Chapter 7 filings, the largest category, are down from the previous first quarter by 22.8 percent. Chapter 7 filings are intended to liquidate assets and discharge debt to provide the debtor with a fresh start. Individuals are allowed to keep certain exempt property while the remaining property is sold to pay creditors.

Chapter 11 filings declined from 8 filings to 1 filing or an 87.5 percent decrease. Chapter 11 filings involve the structuring of repayment plans for companies.

Chapter 13 filings decreased 40.5 percent in the third quarter of 2004 over the third quarter of 2003. Chapter 13 bankruptcy allows debtors to work out repayment arrangements with creditors.

U.S. bankruptcy filings also declined in the third quarter of 2004. This is the fourth straight decline in national bankruptcies after a period of increases. Total U.S. bankruptcies were down 4.0 percent for the third quarter of 2004 compared with the third quarter 2003. Quarterly U.S. bankruptcy statistics can be found at: http://www.uscourts.gov/Press_Releases/.

III. TERMS AND DEFINITIONS

Accommodation Jobs – This industry provides lodging or short-term accommodations for travelers, vacationers, and others. Some provide lodging only; while others provide meals, laundry, and recreational facilities, as well as lodging. There are three industry groups: (1) traveler accommodation includes establishments that primarily provide traditional types of lodging services. This group includes hotels, motels, and bed and breakfast inns. (2) recreational accommodation includes establishments that operate lodging facilities primarily designed to accommodate outdoor enthusiasts. Included are travel trailer campsites, recreation vehicle parks, and outdoor adventure retreats; and (3) rooming and boarding houses includes establishments providing temporary or longer-term accommodations that for the period of occupancy may serve as a principal residence. Board (i.e., meals) may be provided but is not essential.

Agriculture Wage and Salary Jobs – Full- and part-time jobs for which payment was made by the employer in the survey week containing the 12th of the month. Includes farm jobs and machinery operators. Closely related management and services jobs are included for sugar and pineapple but are excluded for other types of agriculture.

Airline Seat – Total number of available seats from all direct flights to Hawaii, including scheduled and chartered flights.

Arts, Entertainment & Recreation Jobs – This industry includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises (1) establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing; (2) establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest; and (3) establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure-time interests. Excluded from this sector are: (1) establishments that provide both accommodations and recreational facilities, such as hunting and fishing camps and resort and casino hotels; (2) restaurants and night clubs that provide live entertainment in addition to the sale of food and beverages, (3) motion picture theaters, libraries and archives, and publishers of newspapers, magazines, books, periodicals, and computer software; and (4) establishments using transportation equipment

to provide recreational and entertainment services, such as those operating sightseeing buses, dinner cruises, or helicopter rides.

Average Daily Visitor Census- By Air – Average number of visitors present daily in the state. Figures are computed monthly by the Research & Economic Analysis Division, DBEDT based on arrival and departure dates from ground and in-flight surveys.

Average Length of Stay- By Air – Number of days visitors are in the State including the day of arrival and of departure.

Bankruptcy Filings –

Chapter 7 – Is available to both individuals and business debtors. Its purpose is to achieve a fair distribution to creditors of whatever non-exempt property the debtor has and to give the individual debtor a fresh start through the discharge in bankruptcy.

Chapter 11 – Is available for both consumer and business debtors. Its purpose is to rehabilitate a business as a going concern or reorganize an individual's finances through a court-approved reorganization plan.

Chapter 12 – Is designed to give special debt relief to a family farmer with regular income from farming.

Chapter 13 – Is available for an individual with regular income whose debts do not exceed specific amounts, typically used to budget some of the debtor's future earnings under a plan through which creditors are paid in whole or in part.

Additional information may be found at the American Bankruptcy Institute "Bankruptcy Chapters" website <http://www.abiworld.org/media/chapters.html>

Chained (1996) dollar Gross State Product (GSP) series are calculated (using national chain-type implicit price deflators) as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive; that is, state totals usually do not add to regional totals or to U.S. totals, and regional totals usually do not add to U.S. totals.

Civilian Employment – Persons 16 years of age or older who, during the survey week containing the 12th of the month, were either at work for pay or profit, or worked without pay for 15 hours or more on a

family farm or business, or were with a job but not at work. Both permanent and temporary employees and those who are working either full- or part-time are included.

Civilian Labor Force – Total of employed and unemployed persons, excluding those in the armed forces and 16 years of age or under. U.S. Census Bureau does surveys for the U.S. Bureau of Labor Statistics.

Civilian Unemployment – Persons 16 years of age or older who (1) did not work at all during the survey week but were actively seeking work and were available for work; or (2) did not work at all, were available for work, and were waiting to be called back from layoff or were waiting to report to a new wage or salary job within 30 days.

Condominium Resales: Consists of resales of condominium, duplexes and townhomes that are entered in the Multiple Listing Service. It does not include apartments.

Consumer Price Index: Honolulu or U.S. – Measure of the average change in prices over time for a fixed market basket of goods and services. It is compiled by the U.S. Bureau of Labor Statistics. The index measures changes from a reference date, i.e., 1982-84, which is designated as 100.0. For example, a Honolulu CPI-U (where U refers to All Urban Consumers), All Items, of 171.5 as the annual average for 1998 indicates the average prices of that group's basket was 71.5 percent higher than the weighted average of those same goods and services in 1982-84. Data are published monthly for the U.S. and semi-annually for Honolulu. As of January 1998, BLS changed the reference basket based on 1982-84 consumer expenditures to a 1993-95 basket, but the base remains 1982-84 = 100.0. The BLS Internet site has more information about the CPI at <http://www.bls.gov/cpi/home.htm>.

Contracting Tax Base – The total receipts of businesses engaged in contracting to erect, construct, repair, or improve buildings or structures of any kind or description, or to make any installation therein. Attributed to any business engaging in the practice of architecture, engineering, land surveying, landscape architecture, and the practice of pest control or fumigation.

Contributions for government social insurance - New category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts released in December 1999. Replaces 'Personal contributions

for social insurance'. These contributions, which are subtracted in the calculation of personal income, consist of the contributions, or payments, by employees, by the self-employed, and by other individuals who participate in the following government programs: Old-age, survivors, and disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; railroad retirement; veterans life insurance; and temporary disability insurance. These contributions are excluded from personal income by definition, but the components of personal income upon which these contributions are based—mainly wage and salary disbursements and proprietors' income—are presented gross of these contributions.

Dividends, Interest, and Rent – U.S. Bureau of Economic Analysis presents the State Personal Income estimates of these components together. It consists of income received by individuals and on behalf of individuals by private and government employee retirement plans and by quasi-individuals, including non-profit institutions and private trust funds administered by fiduciaries. Personal dividend income is payments in cash or other assets by corporations in the U.S. or abroad to noncorporate stockholders who are Hawaii residents. Personal interest income is the interest income (monetary and imputed) from all sources that is received by individuals, by private and government employee retirement plans, by nonprofit institutions, and by estates and trusts. Rental income of persons with capital consumption adjustment is the net current-production income of persons from the rental of real property except for the income of persons primarily engaged in the real estate business; the imputed net rental income received by owner-occupants of farm-dwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources. The estimates include BEA adjustments for uninsured losses to real estate caused by disasters, such as hurricanes (e.g. Iniki in 1992) and floods. See [Personal Income](#).

Earnings – This BEA aggregate is the sum of three components of personal income: wages and salary disbursements, other labor income, and proprietors' income. BEA presents earnings because it can be used in analyses of regional economies as a proxy for the income generated from participation in current production. See [Personal Income](#).

Educational Services Jobs – This industry comprises establishments that provide instruction and training by specialized establishments, such as schools, colleges, universities, and training centers. These establishments

may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and accommodation services to their students. Educational services are usually delivered by teachers or instructors that explain, tell, demonstrate, supervise, and direct learning, in diverse settings, such as educational institutions, the workplace, or the home through correspondence, television, or other means.

Employer Contributions to Social Insurance - New category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts released in December 1999. Replaces 'Other labor income'. This component of personal income consists of employer contributions for employee pension and insurance funds and of employer contributions for government social insurance. See [Personal Income](#).

Federal Government Jobs – Includes those in the civilian agencies, i.e. Department of Defense, Agriculture, United States Postal Service and the various armed services exchange systems.

Financial Activities Jobs – Establishments primarily engaged in financial transactions, i.e. those transactions involving the creation, liquidation, or change in ownership of financial assets, and/or in facilitating financial transactions. Three principal types of activities are identified: (1) raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities; (2) pooling of risk by underwriting insurance and annuities, (3) providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs. In addition, monetary authorities charged with monetary control are included in this sector. This also includes real estate and the rental and leasing sector which is comprised of establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks. Excluded from this sector are real estate investment trusts (REITS) and establishments primarily engaged in renting or leasing equipment with operators. In many cases, such as the rental of heavy construction equipment, the operator is essential to operate the equipment.

Food Services & Drinking Places Jobs – These industries prepare meals, snacks, and beverages to customer order for immediate on-premises and off-

premises consumption. Some provide food and drink only; while others provide various combinations of seating space, waiter/waitress services and incidental amenities, such as limited entertainment. The industries are grouped based on the type and level of services provided, i.e. full-service restaurants; limited-service eating places; and special food services including caterers and mobile food services. Food services and drink activities at hotels and motels; amusement parks, theaters, casinos, country clubs, and similar recreational facilities; and civic and social organizations are included here only if these services are provided by a separate establishment primarily engaged in providing food and beverage services. Excluded are establishments operating dinner cruises which are classified as scenic and sightseeing transportation because those establishments utilize transportation equipment to provide scenic recreational entertainment.

General Excise (Gross Income) Tax – Tax charged to businesses on gross sales or gross income. The tax rate is 0.5 percent on wholesaling and intermediary services, blind vendors, producing, manufacturing, sugar processing and pineapple canning; all other activities (retailing, business and professional services, contracting, theater, amusement, radio, interest, commissions, rentals) are taxed at 4.0 percent, except insurance commissions to general agents, subagents and solicitors, who are taxed at 0.15 percent.

General Excise and Use Tax Base – The value of all goods and services sold, including the value of tangible personal property imported into Hawaii for own use or consumption. One of the most comprehensive measures of business activity in the state.

General Fund Tax Revenues – Receipts of the general excise and use tax, net individual and corporate income taxes comprise over 85 percent of the General Fund tax receipts. The general government fund used to account for all financial resources except those required to be accounted for in another fund, such as the highway, airport or capital improvement fund.

Gross State Product (GSP) – GSP is the value added in production by the labor and property located in a state. GSP for a state is derived as the sum of the GSP originating in all industries in the state. The estimates of real GSP are derived by applying national implicit price deflators by detailed industry to the current-dollar GSP estimates by detailed industry. Then, in order to capture the differences across states that reflect the relative differences in the mix of goods and

services that the states produce, the same chain-type index formula used in the national accounts is used to calculate the estimates of total real GSP and real GSP by major industry.

Health Care & Social Assistance Jobs – This industry includes establishments that provide both health care and social assistance for individuals. Both are included as it is sometimes difficult to distinguish between the boundaries of these two activities starting with those establishments providing medical care exclusively, continuing with those providing health care and social assistance, and finally finishing with those providing only social assistance. These services are delivered by trained professionals and the industries are defined based on the educational degree held by its practitioners. Excluded are aerobic classes and nonmedical diet and weight reducing centers. Although these can be viewed as health services, these services are not typically delivered by health practitioners.

Honolulu Construction Cost Indexes: High-Rise or Single Family – As compiled, by First Hawaiian Bank, and currently by DBEDT, these indexes measure changes in contractors' costs for building materials and labor. For discussion of Methodology, see [Hawaii's Economy May 2000](http://www.hawaii.gov/dbedt/hecon/he5-00/index.html) at <http://www.hawaii.gov/dbedt/hecon/he5-00/index.html>.

Hotel Occupancy Rate – The percentage of occupied rooms in a hotel. Hotel occupancy rates depend not only on the number of visitors and their length of stay, but also on the hotel room inventory, e.g., a large increase in new hotel units results in a drop in occupancy rates, until such time as visitor traffic builds up enough to fill them. Rates are obtained from a sample survey conducted on a monthly basis.

Hotel Rental Tax Base – is the economic base from which all hotel business activity is taxed. It includes the furnishing of temporary accommodations in a hotel, or other place in which lodgings are regularly furnished to transients for compensation.

Implicit Price Deflator – The implicit price deflator is calculated as the ratio of the current-dollar value to the corresponding chained-dollar value multiplied by 100. Implicit price deflators are weighted averages of the detailed price indexes used to prepare each aggregate and component and are calculated as the ratio of current- to chained-dollar output multiplied by 100.

Information Jobs – Are in establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data. Included are publishing industries, including software publishing, and both traditional publishing and publishing exclusively on the Internet; the motion picture and sound recording industries; the broadcasting industries, including traditional broadcasting and those broadcasting exclusively over the Internet; the telecommunications industries; the industries known as Internet service providers and web search portals, data processing industries, and the information services industries. For the purpose of developing NAICS, it is the transformation of information into a commodity that is produced and distributed by a number of growing industries that is at issue. The Information sector groups three types of establishments: (1) those engaged in producing and distributing information and cultural products; (2) those that provide the means to transmit or distribute these products as well as data or communications; and (3) those that process data. Many of the industries in the NAICS Information sector are engaged in producing products protected by copyright law, or in distributing them (other than distribution by traditional wholesale and retail methods). Examples are traditional publishing industries, software and directory and mailing list publishing industries, and film and sound industries. Broadcasting and telecommunications industries and information providers and processors are also included in the Information sector, because their technologies are so closely linked to other industries in the Information sector.

Initial Agent Claims – Notices of unemployment filed against another state by its workers who have moved to Hawaii.

Initial Liable Claims – Notices of unemployment filed against Hawaii by Hawaii workers who have moved to another state.

Local Government Jobs – Includes those in the county governments.

Manufacturing Jobs – Are in establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified as construction. Included in manufacturing are plants, factories, or mills and characteristically use

power-driven machines and materials-handling equipment. However, establishments that transform materials or substances into new products by hand or in the worker's home and those engaged in selling to the general public products made on the same premises from which they are sold, such as bakeries, candy stores, and custom tailors, may also be included in this sector. Manufacturing establishments may process materials or may contract with other establishments to process their materials for them. Both types of establishments are included in manufacturing. The following activities are considered manufacturing in NAICS: milk or water bottling and pasteurizing; fresh fish packaging; printing and related activities; ready-mixed concrete production; ship repair and renovation; machine shops; and tire retreading. Conversely, there are activities that NAICS classifies as non-manufacturing, i.e. agriculture, forestry, fishing and hunting; the construction of structures and fabricating operations performed at the site of construction by contractors, establishments engaged in breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, customized assembly of computers, etc

NAICS – The North American Industry Classification System (NAICS) has replaced the U.S. Standard Industrial Classification (SIC) system. NAICS was developed jointly by the U.S., Canada, and Mexico to provide new comparability in statistics about business activity across North America. Estimates of Personal Income earnings, wage and salary disbursements, and employment by NAICS subsector are available starting with 2001. For descriptions of NAICS industries, please see <http://www.census.gov/epcd/www/naics.html> at the Census Bureau.

Natural Resources, Mining & Construction Jobs – In Hawaii, 99 percent of the jobs in this category are in Construction and the remaining 1 percent in Mining. Included are those establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. There are two activities: mine operation and mining support activities. The construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g., highways and utility systems), additions, alterations, or maintenance and repairs. Establishments primarily engaged in the preparation of sites for new construction and establishments primarily engaged in subdividing land for sale as building sites also are included in this sector.

Net Earnings – BEA also calculates this measure as Earnings less Personal Contributions for Social Insurance. Net earnings is used in the presentation of State and local area personal income as the sum of net earnings, transfer payments, and personal dividend income, personal interest income, and rental income of persons. It can be used as a proxy for income before taxes. See [Personal Income](#).

Net Individual or Corporation Income Tax Revenue – For individuals, it is calculated as declaration of estimated taxes plus payments with returns plus withholding tax on wages less refunds. Net corporate income tax revenue is calculated as declarations of estimated taxes plus payments with returns less refunds.

Non-Agriculture Wage and Salary Jobs – Derived monthly from a sample survey of employers reporting the number of persons who received pay for any part of the pay period containing the 12th of the month. Includes all full- and part-time non-agricultural workers, permanent and temporary workers, and workers on paid sick leave and paid vacation.

Other Goods and Services – Honolulu Consumer Price Index component detail. Prior to the CPI 1998 Revision, it measured the change in average prices of tobacco products, personal care goods and services, and personal and educational expenditures. Beginning with January 1998 data, this category includes tobacco, personal care, and miscellaneous goods and services. Other components, for example, schoolbooks and tuition, moved to the new “Education and Communication” and recreational reading to “Recreation”. BLS’ *Monthly Labor Review* (December 1996), and BLS’ Internet site have more information about the CPI at <http://www.bls.gov/cpi/>.

Other Labor Income – See [Employer Contributions to Social Insurance](#).

Other Services (except public administration) Jobs – Are in establishments engaged in providing services not specifically provided for elsewhere in the classification system., such as equipment and machinery repairing, promoting or administering religious activities, grantmaking, advocacy, and providing drycleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services. Private households that engage in employing workers on or about the premises in activities primarily concerned with the operation of the household are included in this sector. Excluded from this sector are establishments primarily engaged in

retailing new equipment and also performing repairs and general maintenance on equipment

Personal Contributions for Social Insurance – See [‘Contributions for government social insurance’](#).

Personal current transfer receipts – Modified category as part of the ‘BEA Comprehensive Revision of the National Income & Product Accounts’ released in December 1999. Formerly ‘Transfer Payments’. This component of personal income is payments to persons for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by Federal, state, and local governments and by businesses. Government payments to individuals includes retirement and disability insurance benefits, medical payments (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance benefits, veterans benefits, and Federal grants and loans to students. Government payments to nonprofit institutions excludes payments by the Federal Government for work under research and development contracts. Business payments to persons consists primarily of liability payments for personal injury and of corporate gifts to nonprofit institutions.

Personal Income – Income received by persons for participation in production, from government and business transfer payments, and from government interest. It is calculated as the sum of wage & salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. For additional information see <http://www.bea.doc.gov/bea/regional/spi/>

Professional & Business Services Jobs – Are in establishments that specialize in performing professional, scientific, and technical activities for others and require a high degree of expertise and training. These activities include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services to business and sometimes to households, but excludes establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and recordkeeping, personnel, and

physical distribution and logistics. The management sector comprises establishments that hold the securities of companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or establishments that administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic or organizational planning and decisionmaking role of the company or enterprise. Establishments in this sector perform essential activities that are often undertaken, in-house, by establishments in many sectors of the economy but by consolidating the performance of these activities, economies of scale are achieved. Also included are establishments that perform routine support activities, such as office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services on a contract or fee basis.

Proprietors' Income – This component of BEA Personal income is the current-production income (including income in kind) of sole proprietorships, partnerships and cooperatives. Corporate directors' fees and the imputed net rental income of owner-occupants of farm dwellings is included in proprietors' income but the imputed net rental income of owner-occupants of nonfarm dwellings is included in rental income of persons. Proprietors' income excludes dividends and monetary interest received by nonfinancial business and rental incomes by persons not primarily engaged in the real estate business; these incomes are included in dividends, net interest, and rental income of personas, respectively. See [Personal Income](#).

Retail Tax Base – includes the general excise tax base on retailing. Retail sales include sales for consumption or use by the purchaser and not for resale. The general excise tax at the retail level (4%) is sometimes loosely called a sales tax. However, it differs from a typical sales tax in two respects: (1) it is a tax on the gross income of the seller rather than a tax on the purchase price of the buyer; (2) the retail excise tax in Hawaii applies to all retail sales (both goods and services) whereas most Mainland sales taxes exempt some commodities such as food and services.

Retail Trade Jobs – Are in establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The retailing process is the final step in the distribution of merchandise; retailers are, therefore, organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and nonstore

retailers. Store retailers operate fixed point-of-sale locations, located and designed to attract a high volume of walk-in customers where they have extensive displays of merchandise and use mass-media advertising to attract customers from the general public for personal or household consumption, but some also serve business and institutional clients. These include establishments such as office supply stores, computer and software stores, building materials dealers, plumbing supply stores, and electrical supply stores. Catalog showrooms, gasoline services stations, automotive dealers, and mobile home dealers are treated as store retailers. Generally, establishments engaged in retailing merchandise and providing after-sales services are classified in this sector. Nonstore retailers are also organized to serve the general public, but they reach customers and market merchandise with methods, such as the broadcasting of "infomercials," the broadcasting and publishing of direct-response advertising, the publishing of paper and electronic catalogs, door-to-door solicitation, in-home demonstration, selling from portable stalls (street vendors, except food), and distribution through vending machines.

Services Tax Base – includes tax base data on establishments primarily engaged in providing a wide variety of services for individuals, business and government establishments, and other organizations; hotels and other lodging places; establishments providing personal, business, repair, and amusement services; health, legal, engineering, and other professional services; educational institutions; membership organizations and other miscellaneous services.

Single Family Home Resales: Consists of resales of single family homes that are entered in the Multiple Listing Service.

State Government Jobs – Education includes all employees under the Department of Education (DOE) and the University of Hawaii System. This includes public library personnel, substitute teachers who received pay during the pay period including the 12th of the month, and support personnel such as cafeteria workers, classroom cleaners, and school security attendants. Also included are part-time employees in special programs such as the A+ After School.

State Government Jobs – Non-Education - Includes all other executive branch departments (i.e. Agriculture, Transportation, etc.), the legislative and judicial branches, and the Research Corporation of the University of Hawaii (RCUH).

Total Wage and Salary Jobs – includes nonagricultural wage and salary workers and agriculture wage and salary workers. Persons on the payroll of more than one establishment during the pay period are counted in each establishment that reports them.

Transfer Payments – See [Personal current transfer receipts](#).

Transient Accommodations Tax – Tax levied on resort time-share vacation units and the furnishing of a room, apartment, suite which is customarily occupied by a person or group for fewer than 180 consecutive days by a hotel, apartment, motel, or cooperative apartment, rooming house, or other place in which lodgings are generally furnished to transients. The tax as of January 1, 1999 is imposed at the rate of 7.25 percent and the tax base includes time-share units.

Transportation, Warehousing, & Utilities Jobs – Are in industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation - air, rail, water, road, and pipeline. The sector distinguishes subsectors for each mode of transportation, a subsector for warehousing and storage, and a subsector for establishments providing support activities for transportation. In addition, there are subsectors for establishments that provide passenger transportation for scenic and sightseeing purposes, postal services, and courier services. Warehousing establishments in this sector are distinguished from merchant wholesaling in that the warehouse establishments do not sell the goods. Excluded are establishments primarily engaged in providing travel agent services that support transportation and other establishments, such as hotels, businesses, and government agencies. The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Within this sector, the specific activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities. Excluded from this sector are establishments primarily engaged in waste management services that do not use sewer systems or sewage treatment facilities.

Unallocated General Excise & Use Tax Revenues –

General excise and use tax revenues that could not be allocated to specific activities of the general excise & use tax. It also includes collections from penalty and interest, assessments and corrections, delinquent collections, refunds, protested payments, settlements, etc.

Unemployment Rate – Ratio of unemployed persons to the civilian labor force expressed as a percentage.

Use Tax – Excise tax levied on tangible personal property that is imported or purchased from an unlicensed seller for use in the state. The tax is based upon the purchase price or value of the tangible personal property purchased or imported, whichever is applicable. Rates: 0.5 percent, if for resale at retail; 4.0 percent, if for use or consumption.

Visitor Arrivals- By Air, Total – All persons who stayed in Hawaii for a period between one night and one year.

Domestic Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year, arriving on flights from Mainland U.S. A foreign resident arriving in Hawaii on a flight directly from the U.S. Mainland is counted as a domestic visitor.

International Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year arriving on flights from foreign countries. An U.S. resident arriving in Hawaii on a flight directly from a foreign country is counted as an international visitor.

Visitor Days – Measures the number of days visitors stay in the State and are the most comprehensive

measurement of visitations. Visitor days take into account both the number of visitors and their length of stay and is the main indicator used by most of the tourism-related businesses to plan their activities.

Wages and Salary Disbursements– This component of Personal Income consists of the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; and receipts in kind, or pay-in-kind, such as the meals furnished to the employees of restaurants. It reflects the amount of wages and salaries disbursed, but not necessarily, earned during the year. See [Personal Income](#).

Wholesale Trade Jobs – Are in establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise and includes the outputs of agriculture, mining, manufacturing, and certain information industries, such as publishing. It is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of goods for resale, capital or durable nonconsumer goods, and raw and intermediate materials and supplies used in production. Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office that have little or no display of merchandise and do not solicit walk-in traffic. Transactions are often conducted between wholesalers and clients that have long-standing business relationships. There are two main types: merchant wholesalers that sell goods on their own account and business to business electronic markets, agents, and brokers that arrange sales and purchases for others generally for a commission or fee.
