THE DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM

STATE OF HAWAII

Quarterly Statistical & Economic Report

1st Quarter 2007

This *Quarterly Statistical and Economic Report* has been prepared by the staff of the Research and Economic Analysis Division of the State Department of Business, Economic Development & Tourism (DBEDT). The report provides concise statistical information and analyses on Labor, Income and Prices, Taxes, Tourism, Construction, and other indicators, as well as an overview of the State of Hawaii and the four counties.

Technical notes and source descriptions have been kept to a minimum. However, the staff of the Research and Economic Analysis Division would be happy to respond to any inquiries of a technical nature that readers may have (586-2466). The quarterly information contained in this report reflects data received by the Research Division on or before February 21, 2007.

On-line availability of *Quarterly Statistical and Economic Report*

Since 1988, the Hawaii Department of Business, Economic Development & Tourism has had the *State of Hawaii Data Book* available on-line to anyone with a personal computer and a modem. Since 1997, the *Quarterly Statistical and Economic Report*, *State of Hawaii Data Book* and other DBEDT publications and information have been made available via the Internet at <http://www.hawaii.gov/dbedt/>.

Printing of the *QSER* was discontinued in March 2000. The full version and a *QSER Executive Summary* will be available on-line at http://www.hawaii.gov/dbedt/info/economic/data_reports/qser/.

For further information about available data and sources, users should call the Research and Economic Analysis Division Library at (808) 586-2424.

This report has been catalogued as follows:

 Part III. Terms and Definitions	 140	

STATE OF THE ECONOMY

Positive growth in employment, personal income, and tax collections in the fourth quarter of 2006 are indicative of a continuing broad-based expansion of Hawaii's economy. The growth rates in many areas, however, have slowed compared to the previous two years. The State's unemployment rate continues to be the lowest in the nation. Total visitor arrivals decreased slightly in the quarter, maintaining record levels of 2005. Total building permit values and construction jobs continued to grow, but at slower rates reflecting a decline in new residential activity.

In the fourth quarter of 2006, the civilian labor force totaled 658,900 people, an increase of 2.4 percent or 15,750 people from the fourth quarter of 2005. For the year, labor force grew 2.7 percent from 2005, the highest annual growth since 1990.

In the fourth quarter of 2006, civilian employment reached 646,050 in Hawaii. This was the highest level since the series originated in 1976. Compared with the fourth quarter of 2005, 19,650 or 3.1 percent more civilian people were employed. In the fourth quarter of 2006, Hawaii's unemployment rate decreased to 2.0 percent, significantly below the U.S. average of 4.5 percent. For all of 2006, total civilian employment was up 3.0 percent and the unemployment rate was 2.6 percent.

Hawaii's economy added 2.2 percent or 13,500 more wage and salary jobs in the fourth quarter of 2006 compared to the same quarter of 2005. Professional and Business Services sector added 3,950 jobs or 5.2 percent increase, followed by Transportation, Warehousing, and Utilities adding 1,850 jobs (5.8 percent), and the Natural Resources, Mining and Construction sector adding 1,200 jobs (3.4 percent). For the year, wage and salary jobs were up 2.6 percent from 2005.

Nominal total personal income rose 6.1 percent in the third quarter of 2006 compared to the third quarter of 2005. The greatest growth was in Dividends, Interest, and Rent (9.2 percent), followed by Personal Current Transfer Receipts (7.1 percent), Supplements to Wages and Salaries (6.4 percent), and Wage and Salary Disbursements (5.7 percent). Contributions for Government Social Insurance, which is subtracted from personal income, increased 6.7 percent. For the first three quarters of 2006, total personal income was up 5.9 percent compared to 2005.

In 2006, Honolulu's consumer price increased 5.9 percent. This is the highest increase since 1991 and significantly higher than the 3.8 percent increase in 2005.

Tax revenue distributed to the State general fund totaled nearly \$1,096.7 million in the fourth quarter of 2006, an 11.1 percent increase from the fourth quarter of 2005. Revenues from the general excise and use tax (GET) increased by 13.8 percent and net individual income tax collections increased 7.7 percent in the quarter compared to the fourth quarter of 2005. Transient Accommodation Tax (TAT) revenue increased 4.7 percent. For all of 2006, the State general fund revenues were up 6.3 percent, GET up 8.6 percent, net individual income tax collections up 8.9 percent, and TAT up 6.3 percent.

The total number of visitors arriving by air decreased slightly (-0.5 percent) in the fourth quarter of 2006, compared with the fourth quarter of 2005. An 8.6 percent decrease in international arrivals outweighed a 2.9 percent increase in domestic arrivals, resulting in the overall quarterly decrease in arrivals. The average daily visitor census was down 1.7 percent for the quarter. For all of 2006, total arrivals were basically flat, while average daily census was down 0.3 percent from 2005. Hotel occupancy rates decreased 2.9 percentage points to 74.4 percent for the fourth quarter of 2006, compared with the fourth quarter of 2005. For the year, hotel occupancy averaged 79.8 percent, down 1.3 percentage points from 2005.

Indicators of Hawaii's construction industry remained positive, but the growth rates slowed significantly in 2006 compared to the previous year. Construction jobs increased 3.4 percent to 36,550 jobs in the fourth quarter of 2006 compared to the fourth quarter of 2005. The value of private building authorizations in the fourth quarter of 2006 was up only 3.8 percent from the fourth quarter of 2005. This growth is substantially lower than in 2005 when construction jobs grew 7.6 percent and total value of private building permits increased 8.0 percent.

The total number of bankruptcy filings decreased 79 percent in the third quarter of 2006, with the total filings for the first three quarters decreasing 76.0 percent to 711 from 2,966 as compared to 2005.

OUTLOOK FOR THE ECONOMY

In its latest quarterly forecast, DBEDT forecasts that Hawaii's economy will maintain moderate growth in 2007. Continued job growth, improvement in visitor arrivals, strong growth in non-residential construction, and the ongoing federal military housing privatization initiative should maintain the growth of the overall economy in the near-term.

The real (inflation-adjusted) personal income growth is now estimated to be just 0.5 percent in 2006, 1.6 percentage points lower than in the previous forecast. This was due mainly to a much higher actual rate of inflation of 5.9 percent, which was 1.1 percentage points more than expected earlier. A slower than expected nominal income growth also contributed to a lowered real income growth in 2006. Real personal income is expected to increase 1.9 percent in 2007 and 2.1 percent in 2008.

Hawaii's real gross domestic product (GDP) is estimated to have increased 2.7 percent in 2006, 0.6 of a percentage point lower than in the previous forecast, due to lowered expectations for nominal GDP growth. Real GDP is expected to grow 2.6 percent in 2007 and 2.5 percent in 2008.

The future conditions of Hawaii's economy are linked to the growth of the Mainland U.S. and Japanese economies. According to the February 2007 *Blue Chip Economic Consensus Forecasts*, the projected real GDP growth for the U.S. is 2.7 percent in 2007 and 3.0 percent in 2008. For Japan, real GDP growth is projected to be 2.1 percent in 2007 and 2.2 percent in 2008. The expectation for U.S. consumer price inflation is 1.9 percent for 2007 and 2.3 percent for 2008.

Based on the latest data and the outlook in the near-term, forecast of visitor growth has been lowered from the previous forecast. Total arrivals are now expected to increase 1.4 percent in 2007, 1.2 percentage points lower than the previous forecast. Similarly, visitor days are expected to increase 1.5 percent in 2007, 0.9 of a percentage point decrease from the previous forecast. Total nominal (current dollar) visitor expenditures are now forecast to increase 4.8 percent in 2007, a 1.2

percentage points lower than the earlier forecast. In 2008, both visitor arrivals and visitor days are predicted to grow 2.0 percent, while visitor expenditures are predicted to grow 5.2 percent.

Outlook for Hawaii's construction sector remains positive in the near-term despite a decline in new residential construction. Construction jobs increased 7.6 percent in 2006. Building permits for private construction, especially for commercial/industrial and alterations/additions, continues to grow, indicating more construction activity in coming quarters. In 2006, the statewide total value of private building permits increased 8.0 percent despite a nearly 20 percent dip for new residential permits. In dollar terms, the value of total permits increased from nearly \$3.5 billion in 2005 to nearly \$3.8 billion in 2006.

Government construction also remained strong. In 2006, the value of government contracts awarded totaled \$854 million statewide, a 17.8 percent increase from 2005. The ongoing multi-billion military housing privatization initiative will also add to positive growth in Hawaii's construction industry in coming years.

Given strong job growth of 2.6 percent in 2006 and positive outlook for continuing job growth in coming months total wage and salary job growth is expected to be 1.8 percent in 2007, 0.3 of a percentage point higher than in the previous forecast. Job growth is projected to moderate to 1.5 percent in 2008. At 1.6 percent, Hawaii had the lowest unemployment rate in the nation in December 2006, according to the U.S. Bureau of Labor Statistics. In all of 2006, the Hawaii unemployment rate (not seasonally adjusted) averaged 2.6 percent, as compared to 2.8 percent in 2005.

After a larger-than-expected 5.9 percent increase in Honolulu's Consumer Price Index for 2006, the 2007 inflation rate has now been revised up to 4.0 percent from 3.6 percent in the previous forecast. The rate of inflation is expected to be 3.4 percent in 2008.

COUNTY ECONOMIC CONDITIONS

Overall economic conditions remained positive in all counties as evidenced by growth in tax revenues and continued growth in the civilian labor force, civilian employment, and wage and salary jobs in the fourth quarter of 2006 as compared to the fourth quarter of 2005 (Tables 2 through 5). The performance of the visitor sector, however was mixed - with fourth quarter decreases in the City and County of Honolulu and Hawaii County. The latter also saw a decrease in the value of building permits in the fourth quarter of 2006 over 2005 .

In the fourth quarter of 2006, all counties saw increases in Net Individual Income Tax collections from the fourth quarter of 2005. Maui County had the highest growth (20.0 percent) in Net Individual Income Tax collections, followed by Kauai (15.1 percent), Hawaii (7.8 percent), and Honolulu (6.7 percent).

All counties also showed positive General Excise and Use Tax revenues growth in the fourth quarter of 2006 from that of 2005, with the City and County of Honolulu having the highest growth (14.5 percent), followed by Kauai (13.1 percent), Hawaii (11.6 percent), and Maui (6.5 percent).

In the fourth quarter of 2006, Honolulu added 9,200 wage and salary jobs or 2.0 percent over the fourth quarter of 2005. The largest increases occurred in Professional and Business Services (3,650 jobs or 6.0 percent), followed by the State Government (2,000 jobs or 3.6 percent), Transportation, Warehousing, and Utilities (1,350 jobs or 5.6 percent), Other Services (500 jobs or 2.5 percent), and Financial Activities (500 jobs or 2.2 percent). Honolulu lost 100 or 5.3 percent of its agricultural wage and salary jobs in the quarter.

In the fourth quarter of 2006, Hawaii County added 2,450 wage and salary jobs, a 3.7 percent increase from the fourth quarter of 2005. The

State Government added the most (500 jobs), followed by Natural Resources, Mining and Construction (400 jobs), Retail Trade (300 jobs), Transportation, Warehousing and Utilities (250 jobs), and Food Services & Drinking Places (200 jobs). The Agriculture sector lost 50 jobs.

Maui County saw a net gain of 1,350 jobs in the fourth quarter of 2006, 1.9 percent more than in the fourth quarter of 2005. Food Services and Drinking Places and Natural Resources, Mining and Construction added 500 and 300 jobs, respectively, while Agriculture lost 100 jobs in the quarter.

In the fourth quarter of 2006, Kauai County registered a gain of 800 wage and salary jobs or a 2.6 percent increase from the same quarter last year. Natural Resources, Mining and Construction showed the largest gain of 250 jobs, followed by State Government and Retail Trade (150 jobs each), and Professional and Business Services (100 jobs).

Both total visitor arrivals and visitor days by air showed increases in the fourth quarter of 2006 in Maui and Kauai counties, compared to the fourth quarter of 2005. Honolulu and Hawaii counties showed a decline in both total visitor arrivals and visitor days by air due to declines in international arrivals. Hotel occupancy rates were down for Honolulu and Hawaii counties, but were slightly up for Maui and Kauai counties.

In the fourth quarter of 2006, Kauai and Maui showed strong growth in the value of permit activity (Table E-8), compared to the fourth quarter of 2005. Kauai County showed the highest increase of 44.3 percent in the total value of building authorizations, followed by Maui County at 22.3 percent, and Honolulu at 9.3 percent. Hawaii County experienced strong decrease in the value of permit, down by 28.6 percent in the fourth quarter of 2006 compared with the same quarter in 2005.

A. LABOR FORCE AND JOBS

Hawaii's civilian labor force, employment, and wage and salary jobs all increased in the fourth quarter of 2006, compared to the fourth quarter of 2005. All private and government sector industries, except for Agriculture, Manufacturing, and Art, Entertainment and Recreation showed positive job growth in the fourth quarter of 2006. The unemployment rate hit a record low.

In the fourth quarter of 2006, the civilian labor force totaled 658,900 people, an increase of 15,750 people or 2.4 percent from the fourth quarter of 2005 (Tables 1 and A-1). In all of 2006, civilian labor force grew 2.7 percent from 2005, the highest annual growth since 1990.

Employment levels continued to show strong growth which began in 2005 at rates not seen since 1990. During the fourth quarter of 2006, 646,050 people were employed in Hawaii, an increase of 19,650 people or 3.1 percent from the fourth quarter of 2005 (Tables 1 and A-2). For the year, civilian employment increased 3.0 percent from 2005 on top of 3.0 percent growth between 2004 and 2005.

The number of civilian unemployed averaged 12,850 in the fourth quarter of 2006, a 23.3 percent decrease compared to the fourth quarter of 2005 (Table A-3). This is the lowest quarterly unemployment level in Hawaii since the fourth quarter of 1990. The average number of unemployed for the year was down 5.6 percent to 16,750, the lowest since 1991.

Due to a large decrease in the number of unemployed and a strong job growth, the Hawaii civilian unemployment rate (not seasonally adjusted) decreased to 2.0 percent in the fourth quarter of 2006 (Table A-4). This is the lowest unemployment rate ever recorded in

Hawaii. In 2006, the Hawaii unemployment rate averaged 2.6 percent, slightly lower than the 2.8 percent rate in 2005, and lowest annual unemployment rate since 1990.

In the fourth quarter of 2006, Hawaii's civilian wage and salary jobs reached an all-time high of 635,250, an increase of 2.2 percent or 13,500 jobs over the fourth quarter of 2005 (Table A-5). This was the lowest quarter over quarter job growth since the first quarter of 2004. In all of 2006, Hawaii economy added 2.6 percent or 15,750 more wage and salary jobs.

Compared to the fourth quarter of 2005 Professional and Business Services added the most jobs in the fourth quarter of 2006, - an increase of 3,950 jobs or 5.2 percent as (Table A-14), followed by Transportation, Warehousing, and Utilities with 1,850 jobs or 5.8 percent (Table A-11), Natural Resources, Mining and Construction with 1,200 jobs or 3.4 percent (Table A-7), and Food Services and Drinking Places with 1,050 jobs or 1.9 percent (Table A-19). Financial Activities was another notable sector, adding 700 jobs or 2.3 percent in the fourth quarter of 2006 compared to the same period of 2005 (Table A-13).

In the fourth quarter of 2006, Agriculture lost 250 wage and salary jobs or 3.8 percent compared with the fourth quarter of 2005 (Table A-24).

From the fourth quarter of 2005 to the fourth quarter of 2006, government added 3,450 jobs or 2.9 percent, with Federal government adding 300 jobs or 0.9 percent (Table A-21), State government adding 2,850 jobs or 3.9 percent (Table A-22), and Local government adding 300 jobs or 1.7 percent (Table A-23).

1/ Data have been adjusted to incorporate revised intercensal population controls for the 1990's. Counties' data from 1990-1999 reflect 2000 Census-based geography & new model-based controls at the state level. Data from 2000-2006 reflect 2000-based geography, new model controls, 2000 Census inputs & methodological changes.

2/ All data are preliminary and will not be revised until the following year after benchmarking is completed.

B. INCOME AND PRICES

Hawaii total personal income continued to increase at a solid pace during the third quarter of 2006 (the period for which the latest data are available from the U.S. Bureau of Economic Analysis) over the same quarter of 2005. The rate of increase was the highest for Dividends, Interest and Rent. Third quarter earnings increased for all major sectors except for Health Care and Social Assistance, Real Estate, Rental and Leasing, and Farming (Table B-1). A continued large increase in Honolulu's Consumer Price Index, however, negatively affects the ability of consumers to spend.

Total nominal personal income (i.e., not adjusted for inflation) increased \$2,706 million or 6.1 percent in the third quarter of 2006 compared to the third quarter of 2005 (Tables B-1 and B-2). That was slightly higher than a 5.8 percent increase in the previous quarter. During the first three quarters of 2006, total personal income increased 5.9 percent over the same period of 2005, which is lower than a 6.7 percent increase seen in 2005 over 2004.

In the third quarter of 2006, Wage and Salary Disbursements, the largest component of personal income, increased \$1,450 million or 5.7 percent from the third quarter of 2005. Year-to-date, Wage and Salary Disbursements grew 6.0 percent, slightly lower than the 6.4 percent growth seen in 2005 over 2004 (Table B-3). Wage and Salary Disbursements comprised about 58 percent of total personal income.

During the third quarter of 2006, Supplements to Wages and Salaries, consisting of employer payments to retirement plans, private group health insurance plans, private workers compensation plans, and other such benefits, increased by \$450 million or 6.4 percent from the third quarter of 2005 (Table B-4). Year-to-date, Supplements to Wages and Salaries increased 5.4 percent, more than three percentage points lower than the 8.5 percent annual increase in 2005 over 2004.

Proprietors' Income, the income most closely related to entrepreneurial activity, grew by \$37 million or 1.2 percent in the third quarter of 2006 over that in 2005 (Table B-5). This is the lowest quarter-over-quarter increase since the first quarter

of 2003. Year-to-date, Proprietors' Income was up 4.3 percent, 5.2 percentage points lower than 2005 over 2004.

Dividends, Interest, and Rent increased \$612 million or 9.2 percent in the third quarter of 2006 from the same quarter of 2005. This is the highest quarterly increase since the fourth quarter of 2004. Year-to-date, Dividends, Interest, and Rent were up 7.5 percent compared to a 4.7 percent growth in 2005 over 2004 (Table B-6).

Personal Current Transfer Receipts, consisting largely of retirement and medical payments, grew by \$401 million or 7.1 percent in the third quarter of 2006 from the same quarter of 2005. Year-to-date, Personal Current Transfer Receipts grew at a lower rate of 6.0 percent compared to a 7.7 percent growth in 2005 (Table B-7).

Contributions to Government Social Insurance increased \$245 million or 6.7 percent comparing the third quarters of 2006 and 2005. In the first three quarters of 2006, Contributions to Government Social Insurance grew 7.6 percent, on top of 7.6 percent growth in 2005 over 2004 (Table B-8).

Earnings grew across most private sectors in the third quarter of 2006 over 2005. In dollar terms, the largest growth occurred in Professional and Technical Services, followed by Accommodations and Food Services, Construction, and Information. Total government earnings also rose significantly (Table B-1).

In the second half of 2006, Honolulu's consumer price index (CPI) increased 5.8 percent compared to the U.S. average of 2.6 percent. Combined with a 5.8 percent increase in the first half, this produces a 5.9 percent increase for the year compared to 3.2 percent for the U.S. This is the highest increase since 1991 and significantly higher than the 3.8 percent increase in 2005 (Table B-9). The Honolulu increase was primarily due to Housing, Transportation (mostly fuels), and food and beverage components, which increased 8.4 percent, 5.5 percent, and 4.5 percent, respectively.

C. TAX REVENUES

All components of the State general fund tax revenues increased in the fourth quarter of 2006 from the fourth quarter of 2005.¹ Except for Net Corporate Income Tax collections all components of the State general fund tax revenues increased in 2006, but at slower rates than in 2004 and 2005.

For the fourth quarter of 2006, total tax collections distributed to the State general funds totaled \$1,096.7 million (Tables C-1 and C-2). This is a \$109.7 million or an 11.1 percent increase over the fourth quarter of 2005. For all of 2006, State general fund tax revenues amounted to \$4,521.8 million, a \$269.6 million or 6.3 percent increase from 2005 compared to two-digit growth seen in the previous two years.

During the fourth quarter of 2006, General Excise and Use Tax (GET) revenues totaled \$625.6 million, an increase of \$75.9 million or 13.8 percent over the fourth quarter of 2005 (Tables C-1 and C-3). For all of 2006, GET collections totaled \$2,457.4 million, up nearly \$194.0 million or 8.6 percent from 2005.

Compared to the fourth quarter of 2005 Net Individual Income Tax revenues increased \$26.5 million or 7.7 percent to \$369.1 million in the fourth quarter of 2006 (Table C-4). By component, Declaration of Estimated Taxes increased \$9.5 million or 22.9 percent (Table C-5), Payments with Returns increased \$8.8 million or 38.8 percent (Table C-6), Withholding Tax on Wages increased \$17.4 million or 5.6 percent (Table C-7), and Refunds, which is

subtracted from Net Individual tax revenues, increased \$9.2 million or 28.1 percent (Table C-8).

For all of 2006, Net Individual Income Tax collections increased \$128.9 million or 8.9 percent from 2005 to 1,576.7 million. This increase was the result of strong gains in Declaration of Estimated Taxes and Payments with Returns and a moderate increase in Refunds. Declaration of Estimated Taxes increased 19.5 percent or \$69.5 million, while Payments with Returns increased 29.6 percent or \$49.6 million. Refunds increased by about 1.7 percent or \$5.7 million.

Net Corporate Income Tax revenues increased slightly by \$1.3 million or 20.2 percent in the fourth quarter of 2006 compared to the fourth quarter of 2005 (Table C-9). Declaration of Estimated Taxes increased \$18.0 million or 123.9 percent (Table C-10) and Corporate Payments with Returns increased \$2.5 million or 57.5 percent during the quarter (Table C-11), compared to a \$19.3 million or 153.0 percent increase in Refunds (Table C-12). For the year, Net Corporate Income Tax revenues decreased \$45.6 million or 34.4 percent from 2005. This decline was caused mainly by an unusually large one-time payment of \$40 million in September 2005.

Transient Accommodations Tax (TAT) revenues were up nearly \$2.2 million or 4.7 percent in the fourth quarter of 2006 compared to the fourth quarter of 2005 (Table C-13). In 2006, TAT collections grew \$13.2 million or 6.3 percent from 2005, although the growth rate was lower than that in last two years.

¹ When interpreting tax figures in conjunction with other quarterly data in this report, it should be kept in mind that the tax data represent collections during the quarter. The transactions on which the taxes were paid did not necessarily take place during the quarter.

D. TOURISM

Both total visitor arrivals and average visitor daily census by air declined in the fourth quarter of 2006 as compared to that in 2005. The decline was the result of a small increase in visitors arriving from domestic airports combined with a large decrease in visitors arriving from international airports. Compared to the fourth quarter of 2005, hotel occupancy rate was also down in the fourth quarter of 2006. Airline capacity, on the other hand, was up in the fourth quarter.

The total number of visitors arriving by air to Hawaii decreased 0.5 percent in the fourth quarter of 2006 compared to that of 2005 (Tables D-1 and D-2). Similarly, total average daily census was down 1.7 percent. For the year, total visitor arrivals were flat, while average daily census decreased 0.3 percent from 2005 compared to 8.1 and 6.5 percent increases seen in the previous two years.

Total visitor arrivals on domestic flights increased about 37,200 or 2.9 percent in the fourth quarter of 2006 from that in 2005 (Table D-3). For the year, domestic arrivals were up about 137,400 or 2.6 percent from 2005 to nearly 5,450,700 visitors. Although the rate of growth was much lower than in the previous four years, total domestic arrivals reached an all time high.

Arrivals on international flights decreased nearly 46,300 or 8.6 percent in the fourth quarter of 2006 over 2005 (Table D-4). This marked the fourth consecutive quarterly decline in international arrivals. Reversing a positive trend in the previous two years, international arrivals were down nearly 139,400 or 6.6 percent in 2006 from 2005.

In terms of major markets, from the fourth quarter of 2005 to that of 2006, arrivals from the U.S. West increased about 39,650 or 5.3 percent (Table D-5), while arrivals from the U.S. East decreased about 8,000 or 1.9 percent (Table D-6). This was the second quarterly decline in the U.S. East Market since the second quarter of 2002. Arrivals from Japan decreased 38,550 or 10.1

percent (Table D-7). This was the sixth quarter over quarter decline in the Japanese market. Thus, the fourth quarter increase in domestic arrivals came primarily from the increase in U.S. West arrivals while the decline in international arrivals was largely due to the decline in arrivals from Japan. For the year, arrivals from U.S. West were up nearly 126,050 or 4.2 percent, arrivals from the U.S. East were down 11,375 or 0.6 percent, and Japanese arrivals were down nearly 143,000 or 9.4 percent from 2005.

The total average daily visitor census was down 1.7 percent or nearly 3,000 visitors per day in the fourth quarter of 2006 over the fourth quarter of 2005 (Table D-8). Like arrivals, the small increase in domestic average daily census (1.6 percent or nearly 2,200 visitors per day) was outweighed by a large decrease in international average daily census (12.5 percent, or about 5,150 visitors per day), producing a decline in total daily census (Tables D-9 and D-10). For all of 2006, domestic daily census was up 1.8 percent, while total and international daily census were down 0.3 percent and 7.5 percent, respectively, compared to 2005.

Airline capacity, as measured by the number of available seats flown to Hawaii, was up 6.3 percent in the fourth quarter of 2006 (Table D-11). This increase came mainly from an 8.9 percent increase in domestic capacity (Table D-12) as international seats were almost flat at 0.2 percent (Table D-13).

In the fourth quarter of 2006, statewide hotel occupancy rate averaged 74.3 percent, 2.9 percentage points lower than that in the fourth quarter of 2005 (Table D-14). For the year, occupancy rate stood at 79.8, down 1.3 percentage points from 2005. This is the first year over year decline in occupancy levels since 2001.

Readers interested in visitor statistics on a monthly basis can find them at: <http://www.hawaii.gov/dbedt/info/visitor-stats/tourism/> and those interested in daily passenger arrival data at: http://www.hawaii.gov/dbedt/info/economic/data_reports/special/

E. CONSTRUCTION

Despite a continued decline in new residential building activity, Hawaii's construction sector showed positive growth in the fourth quarter of 2006. Both construction jobs and the total value of private building authorizations grew, although the pace of growth has slowed. At the same time, the median sale price for single family homes stabilized and that for condominium resales continued to increase, the number of single family homes and condominium units sold decreased significantly.

Construction continues to be the one of the major contributors to ongoing job growth in Hawaii. In the fourth quarter of 2006, the Natural Resources, Mining and Construction sector added 1,200 jobs, an increase of 3.4 percent from the fourth quarter of 2005 (Table 1 and Table A-7). The pace of growth has slowed in this last quarter, however, from the pace of the last year and a half. Nonetheless, 36,550 construction jobs is the highest since the fourth quarter of 1990. For the year, construction sector added 2,550 jobs, a 7.6 percent increase from 2005.

In the fourth quarter of 2006, private building authorizations increased nearly \$38 million or 3.8 percent compared with the fourth quarter of 2005 (Tables E-1 and E-8). The value of residential permits was down by nearly \$308 million or 42.3 percent, while the value of commercial and industrial permits was up by about \$242 million or 394.5 percent. Additionally, the value of additions and alternations was up by about \$103 million or 47.1 percent.

For the year, the total value of private building permits was nearly \$3.8 billion, an 8.0 percent increase from 2005. At the county level, the value of Honolulu's total private building permits increased 19.2 percent and the value of Maui County authorizations increased 17.8 percent in 2006. The value of Hawaii County private authorizations, however, was down by 8.2 percent in 2006 from 2005. Similarly, value of Kauai County's residential permits was down 17.0 percent during the same period (Table E-8).

Residential permit values were down in all four counties in 2006.

After a decrease in the third quarter, government contracts awarded increased 76.6 percent in the fourth quarter of 2006 compared to the fourth quarter of 2005. For all of 2006, the value of government contracts awarded increased 17.8 percent over 2005 (Table E-1).

State Government Capital Improvement Project (CIP) expenditures were down 24.0 percent in the fourth quarter of 2006 from the same quarter in 2005. The largest share of CIP expenditure in the quarter was General Obligation bond funds (51.7 percent), followed by Special funds (27.2 percent), and Federal funds (15.3 percent) (Table E-2)

The single-family unit authorizations were down 28.9 percent for the fourth quarter and down 17.4 percent for the year from 2005 (Table E-4). Similarly, multi-family unit authorizations were down 79.3 percent for the fourth quarter and 58.9 percent for the year (Table E-5).

The Honolulu Construction Cost Index for Single Family Residences rose 10.9 percent in the fourth quarter of 2006 over that of 2005 (Table E-6), while the comparable index for High-Rise Buildings rose 9.9 percent (Table E-7).

Honolulu's median prices for single family resales stabilized in the fourth quarter of 2006, with no change in the single-family median price at \$620,000 (Table E-9). The median price for condominiums is up 5.0 percent to \$315,000 from the fourth quarter of 2005 (Table E-10). However, the numbers of single-family and condominium resales in the fourth quarter were down 14.5 percent and 42.0 percent, respectively (Tables E-11 and E-12). For the year, the number of units sold was down 12.5 percent for single family homes and 20.2 percent for condominiums. The median prices were \$630,000 for single family homes and \$310,000 for condominiums, respectively, increases of 6.8 percent and 15.2 percent over the same time period in 2005.

First Hawaiian Bank has discontinued compiling Government Contracts Awarded. Hawaii State Department of Business, Economic Development & Tourism has compiled preliminary estimates beginning with the fourth quarter 1997 based on data in *Building Industry*.

1/ Formerly, this category was "Value of Construction Completed", subject to revision by Hawaii State Department of Taxation.

2/ Includes hotels.

3/ Kauai data for November consist of residential data only.

4/ Beginning in 2002 Kauai data available for residential only.

5/ Beginning in 2002 Kauai data available for residential only. And Total Private Authorizations and Residential have been revised.

Source: Hawaii State Department of Taxation; county building departments; U.S. Census Bureau; First Hawaiian Bank; *Building Industry*.

This table is not directly comparable to Contracts Awarded data in Table E-1.

1/ Consists of general obligation bonds and reimbursable general obligation bonds.

2/ Consists of revenue bonds and special purpose revenue bonds.

3/ Includes special federal aid: interstate, primary, secondary; and federal funds.

4/ Not meaningful.

F. OTHER INDICATORS

The total number of bankruptcy filings in Hawaii decreased by more than 79 percent for the third quarter in 2006. Year-to-date, total filings dropped 76.0 percent to 711 from 2,966 in the same period of 2005. The number of filings declined in all bankruptcy categories in the third quarter with the exception of Chapter 11.

The number of Chapter 7 filings, the largest category, saw a decrease of 82.2 percent in the third quarter of 2006 as compared to the same period last year. Chapter 7 filings are intended to liquidate assets and discharge debt to provide the debtor with a fresh start. Year-to-date, Chapter 7 filings were down 78.1 percent. In 2005, Chapter 7 filings were up 51.2 percent from 2004.

Chapter 11 filings increased from 1 in the third quarter of 2005 to 2 in the third quarter of 2006. Year-to-date, Chapter 11 filings, have, however, decreased from 13 to 8 or 38.5 percent. Chapter 11 filings involve the structuring of repayment plans for companies. Chapter 11 filings were also down 30.4 percent in 2005.

Chapter 13 filings decreased 28.6 percent in the third quarter of 2006 to 50 from 70 in the third quarter of 2005. During the first three quarters of 2006, Chapter 13 filings were 54.6 percent from the same period of 2005. Chapter 13 bankruptcy allows debtors to work out repayment arrangements with creditors. In 2005, Chapter 13 filings were down 4.2 percent from 2004.

For quarterly bankruptcy statistics, see: <http://www.uscourts.gov/bnkrpctstats/statistics.htm>

G. SELECTED COUNTY TABLES

Beginning with the December 2003 issue, additional county tables have been provided to supplement the State statistics provided:

Title	State table	Page	County tables	Pages
Civilian Labor Force	A- 1.	16	G- 1. to G- 4.	112-115
Civilian Employed	A- 2.	17	G- 5. to G- 8.	116-119
Civilian Unemployed	A- 3.	18	G- 9. to G-12.	120-123
Civilian Unemployment Rate	A- 4.	19	G-13. to G-16.	124-127
Total Visitor Arrivals - By Air	D- 2.	76	G-17. to G-20.	128-131
Hotel Occupancy Rate	D-14.	88	G-21. to G-24.	132-135
Private Residential Building Permits (Units)	E-3.	93	G-25. to G-28.	136-139

Table G-1. CIVILIAN LABOR FORCE - HONOLULU

<i>Year</i>	<i>First Quarter</i>	<i>Second Quarter</i>	<i>Third Quarter</i>	<i>Fourth Quarter</i>	<i>Annual Average</i>
Number of Persons 1/					
1990	407,450	411,550	409,250	408,850	409,250
1991	411,300	414,150	411,250	411,350	412,000

1/ Data have been adjusted to incorporate revised intercensal population controls for the 1990's. Counties' data from 1990-1999 reflect 2000 Census-based geography & new model-based controls at the state level. Data from 2000-2006 reflect 2000-based geography, new model controls, 2000 Census inputs & methodological changes.

2/ All data are preliminary and will not be revised until the following year after benchmarking is completed.

III. TERMS AND DEFINITIONS

Accommodation Jobs – This industry provides lodging or short-term accommodations for travelers, vacationers, and others. Some provide lodging only; while others provide meals, laundry, and recreational facilities, as well as lodging. There are three industry groups: (1) traveler accommodation includes establishments that primarily provide traditional types of lodging services. This group includes hotels, motels, and bed and breakfast inns. (2) recreational accommodation includes establishments that operate lodging facilities primarily designed to accommodate outdoor enthusiasts. Included are travel trailer campsites, recreation vehicle parks, and outdoor adventure retreats; and (3) rooming and boarding houses includes establishments providing temporary or longer-term accommodations that for the period of occupancy may serve as a principal residence. Board (i.e., meals) may be provided but is not essential.

Agriculture Wage and Salary Jobs – Full- and part-time jobs for which payment was made by the employer in the survey week containing the 12th of the month. Includes farm jobs and machinery operators. Closely related management and services jobs are included for sugar and pineapple but are excluded for other types of agriculture.

Airline Seat – Total number of available seats from all direct flights to Hawaii, including scheduled and chartered flights.

Arts, Entertainment & Recreation Jobs – This industry includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises (1) establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing; (2) establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest; and (3) establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure-time interests. Excluded from this sector are: (1) establishments that provide both accommodations and recreational facilities, such as hunting and fishing camps and resort and casino hotels; (2) restaurants and night clubs that provide live entertainment in addition to the sale of food and beverages, (3) motion picture theaters, libraries and archives, and publishers of newspapers, magazines, books, periodicals, and computer software; and (4) establishments using transportation equipment

to provide recreational and entertainment services, such as those operating sightseeing buses, dinner cruises, or helicopter rides.

Average Daily Visitor Census- By Air – Average number of visitors present daily in the state. Figures are computed monthly by the Research & Economic Analysis Division, DBEDT based on arrival and departure dates from ground and in-flight surveys.

Average Length of Stay- By Air – Number of days visitors are in the State including the day of arrival and of departure.

Bankruptcy Filings –

Chapter 7 – Is available to both individuals and business debtors. Its purpose is to achieve a fair distribution to creditors of whatever non-exempt property the debtor has and to give the individual debtor a fresh start through the discharge in bankruptcy.

Chapter 11 – Is available for both consumer and business debtors. Its purpose is to rehabilitate a business as a going concern or reorganize an individual's finances through a court-approved reorganization plan.

Chapter 12 – Is designed to give special debt relief to a family farmer with regular income from farming.

Chapter 13 – Is available for an individual with regular income whose debts do not exceed specific amounts, typically used to budget some of the debtor's future earnings under a plan through which creditors are paid in whole or in part.

Additional information may be found at the American Bankruptcy Institute "Bankruptcy Chapters" website <http://www.abiworld.org/media/chapters.html>

Chained (1996) dollar Gross State Product (GSP) series are calculated (using national chain-type implicit price deflators) as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive; that is, state totals usually do not add to regional totals or to U.S. totals, and regional totals usually do not add to U.S. totals.

Civilian Employment – Persons 16 years of age or older who, during the survey week containing the 12th of the month, were either at work for pay or profit, or worked without pay for 15 hours or more on a

family farm or business, or were with a job but not at work. Both permanent and temporary employees and those who are working either full- or part-time are included.

Civilian Labor Force – Total of employed and unemployed persons, excluding those in the armed forces and 16 years of age or under. U.S. Census Bureau does surveys for the U.S. Bureau of Labor Statistics.

Civilian Unemployment – Persons 16 years of age or older who (1) did not work at all during the survey week but were actively seeking work and were available for work; or (2) did not work at all, were available for work, and were waiting to be called back from layoff or were waiting to report to a new wage or salary job within 30 days.

Condominium Resales: Consists of resales of condominium, duplexes and townhomes that are entered in the Multiple Listing Service. It does not include apartments.

Consumer Price Index: Honolulu or U.S. – Measure of the average change in prices over time for a fixed market basket of goods and services. It is compiled by the U.S. Bureau of Labor Statistics. The index measures changes from a reference date, i.e., 1982-84, which is designated as 100.0. For example, a Honolulu CPI-U (where U refers to All Urban Consumers), All Items, of 171.5 as the annual average for 1998 indicates the average prices of that group's basket was 71.5 percent higher than the weighted average of those same goods and services in 1982-84. Data are published monthly for the U.S. and semi-annually for Honolulu. As of January 1998, BLS changed the reference basket based on 1982-84 consumer expenditures to a 1993-95 basket, but the base remains 1982-84 = 100.0. The BLS Internet site has more information about the CPI at <http://www.bls.gov/cpi/home.htm>.

Contracting Tax Base – The total receipts of businesses engaged in contracting to erect, construct, repair, or improve buildings or structures of any kind or description, or to make any installation therein. Attributed to any business engaging in the practice of architecture, engineering, land surveying, landscape architecture, and the practice of pest control or fumigation.

Contributions for government social insurance - New category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts released in December 1999. Replaces 'Personal contributions

for social insurance'. These contributions, which are subtracted in the calculation of personal income, consist of the contributions, or payments, by employees, by the self-employed, and by other individuals who participate in the following government programs: Old-age, survivors, and disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; railroad retirement; veterans life insurance; and temporary disability insurance. These contributions are excluded from personal income by definition, but the components of personal income upon which these contributions are based—mainly wage and salary disbursements and proprietors' income—are presented gross of these contributions.

Dividends, Interest, and Rent – U.S. Bureau of Economic Analysis presents the State Personal Income estimates of these components together. It consists of income received by individuals and on behalf of individuals by private and government employee retirement plans and by quasi-individuals, including non-profit institutions and private trust funds administered by fiduciaries. Personal dividend income is payments in cash or other assets by corporations in the U.S. or abroad to noncorporate stockholders who are Hawaii residents. Personal interest income is the interest income (monetary and imputed) from all sources that is received by individuals, by private and government employee retirement plans, by nonprofit institutions, and by estates and trusts. Rental income of persons with capital consumption adjustment is the net current-production income of persons from the rental of real property except for the income of persons primarily engaged in the real estate business; the imputed net rental income received by owner-occupants of farm-dwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources. The estimates include BEA adjustments for uninsured losses to real estate caused by disasters, such as hurricanes (e.g. Iniki in 1992) and floods. See [Personal Income](#).

Earnings – This BEA aggregate is the sum of three components of personal income: wages and salary disbursements, other labor income, and proprietors' income. BEA presents earnings because it can be used in analyses of regional economies as a proxy for the income generated from participation in current production. See [Personal Income](#).

Educational Services Jobs – This industry comprises establishments that provide instruction and training by specialized establishments, such as schools, colleges, universities, and training centers. These establishments

may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and accommodation services to their students. Educational services are usually delivered by teachers or instructors that explain, tell, demonstrate, supervise, and direct learning, in diverse settings, such as educational institutions, the workplace, or the home through correspondence, television, or other means.

Employer Contributions to Social Insurance - New category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts released in December 1999. Replaces 'Other labor income'. This component of personal income consists of employer contributions for employee pension and insurance funds and of employer contributions for government social insurance. See [Personal Income](#).

Federal Government Jobs – Includes those in the civilian agencies, i.e. Department of Defense, Agriculture, United States Postal Service and the various armed services exchange systems.

Financial Activities Jobs – Establishments primarily engaged in financial transactions, i.e. those transactions involving the creation, liquidation, or change in ownership of financial assets, and/or in facilitating financial transactions. Three principal types of activities are identified: (1) raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities; (2) pooling of risk by underwriting insurance and annuities, (3) providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs. In addition, monetary authorities charged with monetary control are included in this sector. This also includes real estate and the rental and leasing sector which is comprised of establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks. Excluded from this sector are real estate investment trusts (REITS) and establishments primarily engaged in renting or leasing equipment with operators. In many cases, such as the rental of heavy construction equipment, the operator is essential to operate the equipment.

Food Services & Drinking Places Jobs – These industries prepare meals, snacks, and beverages to customer order for immediate on-premises and off-

premises consumption. Some provide food and drink only; while others provide various combinations of seating space, waiter/waitress services and incidental amenities, such as limited entertainment. The industries are grouped based on the type and level of services provided, i.e. full-service restaurants; limited-service eating places; and special food services including caterers and mobile food services. Food services and drink activities at hotels and motels; amusement parks, theaters, casinos, country clubs, and similar recreational facilities; and civic and social organizations are included here only if these services are provided by a separate establishment primarily engaged in providing food and beverage services. Excluded are establishments operating dinner cruises which are classified as scenic and sightseeing transportation because those establishments utilize transportation equipment to provide scenic recreational entertainment.

General Excise (Gross Income) Tax – Tax charged to businesses on gross sales or gross income. The tax rate is 0.5 percent on wholesaling and intermediary services, blind vendors, producing, manufacturing, sugar processing and pineapple canning; all other activities (retailing, business and professional services, contracting, theater, amusement, radio, interest, commissions, rentals) are taxed at 4.0 percent, except insurance commissions to general agents, subagents and solicitors, who are taxed at 0.15 percent.

General Excise and Use Tax Base – The value of all goods and services sold, including the value of tangible personal property imported into Hawaii for own use or consumption. One of the most comprehensive measures of business activity in the state.

General Fund Tax Revenues – Receipts of the general excise and use tax, net individual and corporate income taxes comprise over 85 percent of the General Fund tax receipts. The general government fund used to account for all financial resources except those required to be accounted for in another fund, such as the highway, airport or capital improvement fund.

Gross State Product (GSP) – GSP is the value added in production by the labor and property located in a state. GSP for a state is derived as the sum of the GSP originating in all industries in the state. The estimates of real GSP are derived by applying national implicit price deflators by detailed industry to the current-dollar GSP estimates by detailed industry. Then, in order to capture the differences across states that reflect the relative differences in the mix of goods and

services that the states produce, the same chain-type index formula used in the national accounts is used to calculate the estimates of total real GSP and real GSP by major industry.

Health Care & Social Assistance Jobs – This industry includes establishments that provide both health care and social assistance for individuals. Both are included as it is sometimes difficult to distinguish between the boundaries of these two activities starting with those establishments providing medical care exclusively, continuing with those providing health care and social assistance, and finally finishing with those providing only social assistance. These services are delivered by trained professionals and the industries are defined based on the educational degree held by its practitioners. Excluded are aerobic classes and nonmedical diet and weight reducing centers. Although these can be viewed as health services, these services are not typically delivered by health practitioners.

Honolulu Construction Cost Indexes: High-Rise or Single Family – As compiled, by First Hawaiian Bank, and currently by DBEDT, these indexes measure changes in contractors' costs for building materials and labor. For discussion of Methodology, see [Hawaii's Economy May 2000](http://www.hawaii.gov/dbedt/hecon/he5-00/index.html) at <http://www.hawaii.gov/dbedt/hecon/he5-00/index.html>.

Hotel Occupancy Rate – The percentage of occupied rooms in a hotel. Hotel occupancy rates depend not only on the number of visitors and their length of stay, but also on the hotel room inventory, e.g., a large increase in new hotel units results in a drop in occupancy rates, until such time as visitor traffic builds up enough to fill them. Rates are obtained from a sample survey conducted on a monthly basis.

Hotel Rental Tax Base – is the economic base from which all hotel business activity is taxed. It includes the furnishing of temporary accommodations in a hotel, or other place in which lodgings are regularly furnished to transients for compensation.

Implicit Price Deflator – The implicit price deflator is calculated as the ratio of the current-dollar value to the corresponding chained-dollar value multiplied by 100. **OR** Implicit price deflators are weighted averages of the detailed price indexes used to prepare each aggregate and component and are calculated as the ratio of current- to chained-dollar output multiplied by 100.

Information Jobs – Are in establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data. Included are publishing industries, including software publishing, and both traditional publishing and publishing exclusively on the Internet; the motion picture and sound recording industries; the broadcasting industries, including traditional broadcasting and those broadcasting exclusively over the Internet; the telecommunications industries; the industries known as Internet service providers and web search portals, data processing industries, and the information services industries. For the purpose of developing NAICS, it is the transformation of information into a commodity that is produced and distributed by a number of growing industries that is at issue. The Information sector groups three types of establishments: (1) those engaged in producing and distributing information and cultural products; (2) those that provide the means to transmit or distribute these products as well as data or communications; and (3) those that process data. Many of the industries in the NAICS Information sector are engaged in producing products protected by copyright law, or in distributing them (other than distribution by traditional wholesale and retail methods). Examples are traditional publishing industries, software and directory and mailing list publishing industries, and film and sound industries. Broadcasting and telecommunications industries and information providers and processors are also included in the Information sector, because their technologies are so closely linked to other industries in the Information sector.

Initial Agent Claims – Notices of unemployment filed against another state by its workers who have moved to Hawaii.

Initial Liable Claims – Notices of unemployment filed against Hawaii by Hawaii workers who have moved to another state.

Local Government Jobs – Includes those in the county governments.

Manufacturing Jobs – Are in establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified as construction. Included in manufacturing are plants, factories, or mills and characteristically use

power-driven machines and materials-handling equipment. However, establishments that transform materials or substances into new products by hand or in the worker's home and those engaged in selling to the general public products made on the same premises from which they are sold, such as bakeries, candy stores, and custom tailors, may also be included in this sector. Manufacturing establishments may process materials or may contract with other establishments to process their materials for them. Both types of establishments are included in manufacturing. The following activities are considered manufacturing in NAICS: milk or water bottling and pasteurizing; fresh fish packaging; printing and related activities; ready-mixed concrete production; ship repair and renovation; machine shops; and tire retreading. Conversely, there are activities that NAICS classifies as non-manufacturing, i.e. agriculture, forestry, fishing and hunting; the construction of structures and fabricating operations performed at the site of construction by contractors, establishments engaged in breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, customized assembly of computers, etc

NAICS – The North American Industry Classification System (NAICS) has replaced the U.S. Standard Industrial Classification (SIC) system. NAICS was developed jointly by the U.S., Canada, and Mexico to provide new comparability in statistics about business activity across North America. Estimates of Personal Income earnings, wage and salary disbursements, and employment by NAICS subsector are available starting with 2001. For descriptions of NAICS industries, please see <http://www.census.gov/epcd/www/naics.html> at the Census Bureau.

Natural Resources, Mining & Construction Jobs – In Hawaii, 99 percent of the jobs in this category are in Construction and the remaining 1 percent in Mining. Included are those establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. There are two activities: mine operation and mining support activities. The construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g., highways and utility systems), additions, alterations, or maintenance and repairs. Establishments primarily engaged in the preparation of sites for new construction and establishments primarily engaged in subdividing land for sale as building sites also are included in this sector.

Net Earnings – BEA also calculates this measure as Earnings less Personal Contributions for Social Insurance. Net earnings is used in the presentation of State and local area personal income as the sum of net earnings, transfer payments, and personal dividend income, personal interest income, and rental income of persons. It can be used as a proxy for income before taxes. See [Personal Income](#).

Net Individual or Corporation Income Tax Revenue – For individuals, it is calculated as declaration of estimated taxes plus payments with returns plus withholding tax on wages less refunds. Net corporate income tax revenue is calculated as declarations of estimated taxes plus payments with returns less refunds.

Non-Agriculture Wage and Salary Jobs – Derived monthly from a sample survey of employers reporting the number of persons who received pay for any part of the pay period containing the 12th of the month. Includes all full- and part-time non-agricultural workers, permanent and temporary workers, and workers on paid sick leave and paid vacation.

Other Goods and Services – Honolulu Consumer Price Index component detail. Prior to the CPI 1998 Revision, it measured the change in average prices of tobacco products, personal care goods and services, and personal and educational expenditures. Beginning with January 1998 data, this category includes tobacco, personal care, and miscellaneous goods and services. Other components, for example, schoolbooks and tuition, moved to the new “Education and Communication” and recreational reading to “Recreation”. BLS’ *Monthly Labor Review* (December 1996), and BLS’ Internet site have more information about the CPI at <http://www.bls.gov/cpi/>.

Other Labor Income – See [Employer Contributions to Social Insurance](#).

Other Services (except public administration) Jobs – Are in establishments engaged in providing services not specifically provided for elsewhere in the classification system., such as equipment and machinery repairing, promoting or administering religious activities, grantmaking, advocacy, and providing drycleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services. Private households that engage in employing workers on or about the premises in activities primarily concerned with the operation of the household are included in this sector. Excluded from this sector are establishments primarily engaged in

retailing new equipment and also performing repairs and general maintenance on equipment

Personal Contributions for Social Insurance – See [‘Contributions for government social insurance’](#).

Personal current transfer receipts – Modified category as part of the ‘BEA Comprehensive Revision of the National Income & Product Accounts’ released in December 1999. Formerly ‘Transfer Payments’. This component of personal income is payments to persons for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by Federal, state, and local governments and by businesses. Government payments to individuals includes retirement and disability insurance benefits, medical payments (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance benefits, veterans benefits, and Federal grants and loans to students. Government payments to nonprofit institutions excludes payments by the Federal Government for work under research and development contracts. Business payments to persons consists primarily of liability payments for personal injury and of corporate gifts to nonprofit institutions.

Personal Income – Income received by persons for participation in production, from government and business transfer payments, and from government interest. It is calculated as the sum of wage & salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. For additional information see <http://www.bea.doc.gov/bea/regional/spi/>

Professional & Business Services Jobs – Are in establishments that specialize in performing professional, scientific, and technical activities for others and require a high degree of expertise and training. These activities include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services to business and sometimes to households, but excludes establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and recordkeeping, personnel, and

physical distribution and logistics. The management sector comprises establishments that hold the securities of companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or establishments that administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic or organizational planning and decisionmaking role of the company or enterprise. Establishments in this sector perform essential activities that are often undertaken, in-house, by establishments in many sectors of the economy but by consolidating the performance of these activities, economies of scale are achieved. Also included are establishments that perform routine support activities, such as office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services on a contract or fee basis.

Proprietors' Income – This component of BEA Personal income is the current-production income (including income in kind) of sole proprietorships, partnerships and cooperatives. Corporate directors' fees and the imputed net rental income of owner-occupants of farm dwellings is included in proprietors' income but the imputed net rental income of owner-occupants of nonfarm dwellings is included in rental income of persons. Proprietors' income excludes dividends and monetary interest received by nonfinancial business and rental incomes by persons not primarily engaged in the real estate business; these incomes are included in dividends, net interest, and rental income of personas, respectively. See [Personal Income](#).

Retail Tax Base – includes the general excise tax base on retailing. Retail sales include sales for consumption or use by the purchaser and not for resale. The general excise tax at the retail level (4%) is sometimes loosely called a sales tax. However, it differs from a typical sales tax in two respects: (1) it is a tax on the gross income of the seller rather than a tax on the purchase price of the buyer; (2) the retail excise tax in Hawaii applies to all retail sales (both goods and services) whereas most Mainland sales taxes exempt some commodities such as food and services.

Retail Trade Jobs – Are in establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The retailing process is the final step in the distribution of merchandise; retailers are, therefore, organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and nonstore

retailers. Store retailers operate fixed point-of-sale locations, located and designed to attract a high volume of walk-in customers where they have extensive displays of merchandise and use mass-media advertising to attract customers from the general public for personal or household consumption, but some also serve business and institutional clients. These include establishments such as office supply stores, computer and software stores, building materials dealers, plumbing supply stores, and electrical supply stores. Catalog showrooms, gasoline services stations, automotive dealers, and mobile home dealers are treated as store retailers. Generally, establishments engaged in retailing merchandise and providing after-sales services are classified in this sector. Nonstore retailers are also organized to serve the general public, but they reach customers and market merchandise with methods, such as the broadcasting of "infomercials," the broadcasting and publishing of direct-response advertising, the publishing of paper and electronic catalogs, door-to-door solicitation, in-home demonstration, selling from portable stalls (street vendors, except food), and distribution through vending machines.

Services Tax Base – includes tax base data on establishments primarily engaged in providing a wide variety of services for individuals, business and government establishments, and other organizations; hotels and other lodging places; establishments providing personal, business, repair, and amusement services; health, legal, engineering, and other professional services; educational institutions; membership organizations and other miscellaneous services.

Single Family Home Resales: Consists of resales of single family homes that are entered in the Multiple Listing Service.

State Government Jobs – Education includes all employees under the Department of Education (DOE) and the University of Hawaii System. This includes public library personnel, substitute teachers who received pay during the pay period including the 12th of the month, and support personnel such as cafeteria workers, classroom cleaners, and school security attendants. Also included are part-time employees in special programs such as the A+ After School.

State Government Jobs – Non-Education - Includes all other executive branch departments (i.e. Agriculture, Transportation, etc.), the legislative and judicial branches, and the Research Corporation of the University of Hawaii (RCUH).

Total Wage and Salary Jobs – includes nonagricultural wage and salary workers and agriculture wage and salary workers. Persons on the payroll of more than one establishment during the pay period are counted in each establishment that reports them.

Transfer Payments – See [Personal current transfer receipts](#).

Transient Accommodations Tax – Tax levied on resort time-share vacation units and the furnishing of a room, apartment, suite which is customarily occupied by a person or group for fewer than 180 consecutive days by a hotel, apartment, motel, or cooperative apartment, rooming house, or other place in which lodgings are generally furnished to transients. The tax as of January 1, 1999 is imposed at the rate of 7.25 percent and the tax base includes time-share units.

Transportation, Warehousing, & Utilities Jobs – Are in industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation - air, rail, water, road, and pipeline. The sector distinguishes subsectors for each mode of transportation, a subsector for warehousing and storage, and a subsector for establishments providing support activities for transportation. In addition, there are subsectors for establishments that provide passenger transportation for scenic and sightseeing purposes, postal services, and courier services. Warehousing establishments in this sector are distinguished from merchant wholesaling in that the warehouse establishments do not sell the goods. Excluded are establishments primarily engaged in providing travel agent services that support transportation and other establishments, such as hotels, businesses, and government agencies. The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Within this sector, the specific activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities. Excluded from this sector are establishments primarily engaged in waste management services that do not use sewer systems or sewage treatment facilities.

Unallocated General Excise & Use Tax Revenues –

General excise and use tax revenues that could not be allocated to specific activities of the general excise & use tax. It also includes collections from penalty and interest, assessments and corrections, delinquent collections, refunds, protested payments, settlements, etc.

Unemployment Rate – Ratio of unemployed persons to the civilian labor force expressed as a percentage.

Use Tax – Excise tax levied on tangible personal property that is imported or purchased from an unlicensed seller for use in the state. The tax is based upon the purchase price or value of the tangible personal property purchased or imported, whichever is applicable. Rates: 0.5 percent, if for resale at retail; 4.0 percent, if for use or consumption.

Visitor Arrivals- By Air, Total – All persons who stayed in Hawaii for a period between one night and one year.

Domestic Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year, arriving on flights from Mainland U.S. A foreign resident arriving in Hawaii on a flight directly from the U.S. Mainland is counted as a domestic visitor.

International Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year arriving on flights from foreign countries. An U.S. resident arriving in Hawaii on a flight directly from a foreign country is counted as an international visitor.

Visitor Days – Measures the number of days visitors stay in the State and are the most comprehensive

measurement of visitations. Visitor days take into account both the number of visitors and their length of stay and is the main indicator used by most of the tourism-related businesses to plan their activities.

Wages and Salary Disbursements– This component of Personal Income consists of the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; and receipts in kind, or pay-in-kind, such as the meals furnished to the employees of restaurants. It reflects the amount of wages and salaries disbursed, but not necessarily, earned during the year. See [Personal Income](#).

Wholesale Trade Jobs – Are in establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise and includes the outputs of agriculture, mining, manufacturing, and certain information industries, such as publishing. It is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of goods for resale, capital or durable nonconsumer goods, and raw and intermediate materials and supplies used in production. Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office that have little or no display of merchandise and do not solicit walk-in traffic. Transactions are often conducted between wholesalers and clients that have long-standing business relationships. There are two main types: merchant wholesalers that sell goods on their own account and business to business electronic markets, agents, and brokers that arrange sales and purchases for others generally for a commission or fee.
