DBEDT
THE DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM
STATE OF HAWAII

This *Quarterly Statistical and Economic Report* has been prepared by the staff of the Research and Economic Analysis Division of the State Department of Business, Economic Development & Tourism (DBEDT). The report provides concise statistical information and analyses on Labor, Income and Prices, Taxes, Tourism, Construction, and other indicators, as well as an overview of the State of Hawaii and the four counties.

Technical notes and source descriptions have been kept to a minimum. However, the staff of the Research and Economic Analysis Division would be happy to respond to any inquiries of a technical nature that readers may have (586-2466). The quarterly information contained in this report reflects data received by the Research Division on or before December 2, 2013.

On-line availability of *Quarterly Statistical and Economic Report*

Since 1988, the Hawaii Department of Business, Economic Development & Tourism has had the *State of Hawaii Data Book* available on-line to anyone with a personal computer and a modem. Since 1997, the *Quarterly Statistical and Economic Report*, *State of Hawaii Data Book* and other DBEDT publications and information have been made available via the Internet at <http://www.hawaii.gov/dbedt/>.

Printing of the *QSER* was discontinued in March 2000. The full version and a *QSER Executive Summary* will be available on-line at http://www.hawaii.gov/dbedt/info/economic/data_reports/qser/.

For further information about available data and sources, users should call the Research and Economic Analysis Division at (808) 586-2466.

This report has been catalogued as follows:

STATE OF THE ECONOMY

Hawaii's major economic indicators were mixed in the third quarter of 2013. Visitor arrivals and average daily visitor census both increased, but visitor expenditures decreased. Government contracts awarded, private building permits, wage and salary jobs, and personal income increased, but State general fund tax revenues decreased in the quarter as compared to the same quarter last year.

Hawaii's tourism sector performed well in the third quarter of 2013 compared to the same quarter of 2012. The total number of visitors arriving by air to Hawaii increased 2.2 percent in the quarter. Both international and domestic visitor arrivals increased. Due to shorter lengths of stay, the daily visitor census increased 1.7 percent in the quarter. However, since visitors spent less on a daily basis during the third quarter, total visitor spending by air decreased 1.3 percent in the quarter.

In construction, the government contracts awarded and the value of private building permits both increased. In the third quarter of 2013, government contracts awarded increased \$158.1 million; the permit value for private construction increased \$1.8 million compared to the same quarter of 2012. In the third quarter of 2013, the construction sector added 3,200 jobs or 10.8 percent compared with the same quarter of 2012. According to the most recent data available, current construction put-in-place based on excise tax data increased \$254.6 million or 15.1 percent in the second quarter of 2013 compared with the same quarter of 2012.

In the third quarter of 2013, State general fund tax revenues were down \$38.6 million or 2.9 percent over the same period of 2012. As an indicator of current economic activity, state general excise tax revenue decreased \$40.1 million or 5.4 percent in the third quarter of 2013 compared to the same quarter in 2012. For the first three quarters of 2013, State general fund tax revenues increased \$174.3 million or 4.4 percent, and state general excise tax revenue increased \$59.7 million or 2.8 percent, compared with the same period last year.

The labor market conditions also show that the economy is improving. After ten consecutive quarterly decreases in jobs from the second quarter of 2008 to the second quarter of 2010, Hawaii's jobs increased for the 12th time. In the third quarter of 2013 Hawaii's civilian non-agricultural wage and salary jobs averaged 608,550 jobs, an increase of 6,700 jobs or 1.1 percent from the same quarter of 2012.

The job increase in the third quarter of 2013 was in the private sector. In this quarter, the private sectors added about 10,000 non-agricultural jobs compared to the third quarter of 2012. Jobs increased the most in Natural Resources, Mining, and Construction (added 3,200 jobs or 10.8 percent); followed by Food Services and Drinking Places (added 2,350 jobs or 4.0 percent), Other Services (added 1,800 jobs or 6.9 percent), Professional & Business Services (added 1,000 jobs or 1.3 percent), Health Care & Social Assistance (added 550 jobs or 0.9 percent), and Arts, Entertainment & Recreation (added 550 jobs or 4.8 percent), compared to the same quarter of 2012. The only job losses were in Information (100 jobs), Educational Services (400 jobs) and Retail Trade (450 jobs). During the third quarter of 2013, the three levels of government lost 3,300 jobs compared to the same quarter of 2012.

The most recent data from the U.S. Bureau of Economic Analysis (BEA) shows that Hawaii's total nominal annualized personal income in the second quarter of 2013 increased \$1,728 million or 2.8 percent from the same quarter of 2012. This increase includes inflation so that the growth of real personal income was smaller. The increase in nominal personal income during the second quarter of 2013 was due to increases in all major components of personal income. In dollar terms, the largest increases occurred in wage and salary disbursements, followed by dividends, interest, and rent, personal current transfer receipts, proprietors' income, and supplements to wage and salaries, which includes retirement and unemployment insurance benefits. For the first half of 2013, total annualized personal income was \$63,562 million, an increase of 2.8 percent from the same period last year.

According to the most recent data available, consumer prices in Honolulu increased 1.8 percent in the first half of 2013 compared with the same period of 2012, as measured by the Honolulu Consumer Price Index for Urban Consumers (CPI-U). By contrast, the U.S. CPI-U increased 1.5 percent in the first half of 2013. In 2012, the Honolulu CPI-U increased 2.4 percent over the previous year.

The higher Honolulu CPI-U in the first half of 2013 was primarily due to relatively large increases in the Food & Beverages (3.9 percent), Followed by Medical Care (2.8 percent), Recreation (2.6 percent), Housing (2.0 percent), Education and Communication (1.8 percent), and Other Goods and Services (1.4 percent). The price of Transportation decreased 0.2 percent, and the price of Apparel decreased 2.3 percent, compared to the first half of 2012.

OUTLOOK FOR THE ECONOMY

Based on the most recent development in the national and global economy, the performance of Hawaii's tourism industry, the labor market conditions, and growth of personal income and tax revenues, Hawaii's economy is expected to continue positive growth for the rest of 2013 and into 2014. Overall, the current DBEDT forecast is slightly less optimistic compared with the previous forecast.

Hawaii's economy depends significantly on conditions in the U.S. economy and key international economies, especially Japan. According to the November 2013 *Blue Chip Economic Consensus Forecasts*, U.S. real GDP is expected to increase by 1.7 percent in 2013 as a whole, 0.2 of a percentage point higher than the 1.5 percent growth rate projected in the August 2013 forecast. For 2014 the consensus forecast now expects an overall 2.5 percent growth in U.S. real GDP, slightly lower than the 2.6 percent growth rate projected in the August 2013 forecast.

Forecasts for Japan were more optimistic for 2013 in the November 2013 *Blue Chip Economic Consensus Forecasts*. Real GDP growth for Japan is now expected to increase 1.8 percent in 2013, slightly higher than the 1.7 percent growth rate projected in the August 2013 forecast. For 2014, the consensus forecast now expects an overall 1.8 percent growth in Japanese real GDP, also slightly higher than the 1.7 percent growth rate projected in the August 2013 forecast.

For the local economy, DBEDT expects some of the economic indicators will grow at a slower rate than that of the previous forecast.

Overall, Hawaii's economy as measured by real GDP is projected to show a 2.4 percent increase in 2013, 0.2 of a percentage point lower than the growth rate forecasted last quarter. Real GDP growth in 2014 is expected at 2.8 percent, 0.4 of a percentage point higher than the growth rate forecasted last quarter.

Hawaii's unemployment rate is projected to be 4.6 percent in 2013 and 4.2 percent in 2014.

Visitor arrivals are expected to increase 2.9 percent in 2013, 1.4 percentage points below the previous forecast. The forecast for visitor days in 2013 decreased from 2.7 percent to 1.5 percent. The forecast for visitor expenditure in 2013 is revised downward to 3.0 percent, from 5.3 percent growth projected in the previous forecast. For 2014, the growth rates of visitor arrivals, visitor days, and visitor expenditures are now expected to be 2.7 percent, 2.8 percent, and 4.2 percent, respectively.

The projection for non-agricultural wage and salary job growth rate in 2013 is 1.3 percent, 0.5 of a percentage point below the previous forecast. In 2014, jobs are projected to increase 1.8 percent, same as the previous forecast.

The Honolulu Consumer Price Index (CPI), which increased 2.4 percent in 2012, is now expected to increase 1.7 percent in 2013, 0.2 of a percentage point below the previous forecast. In 2014, the CPI is projected to increase 2.1 percent.

Personal income in current dollars is now expected to increase 4.0 percent in 2013, 0.5 of a percentage point lower than the previous forecast. The real personal income is currently projected to grow 2.3 percent in 2013, 0.3 of a percentage point lower than the previous forecast. In 2014, current-dollar personal income and real personal income are expected to increase 5.5 percent and 3.3 percent, respectively.

Beyond 2014 the economy will be on the expansion path with job growth expected to increase 1.7 percent in 2015 and 1.5 percent in 2016. Visitor arrivals are expected to increase 2.3 percent in 2015 and 2.1 percent in 2016. Visitor expenditures are expected to increase 5.0 percent in 2015 and 4.8 percent in 2016. Real personal income is projected to increase 2.7 percent in 2015 and 2.4 percent in 2016. Hawaii's real GDP growth is expected to increase 2.5 percent in 2015 and 2.3 percent in 2016. The unemployment rate is expected to be 4.0 percent in 2015 and 3.8 percent in 2016.

**ACTUAL AND FORECAST KEY ECONOMIC INDICATORS FOR HAWAII:

COUNTY ECONOMIC CONDITIONS

Overall economic conditions were mostly positive across counties in the third quarter of 2013. The unemployment rate decreased in all counties and total non-agricultural wage and salary jobs increased in all counties. Total visitor arrivals by air increased in all counties. The value of private building permits increased in Honolulu, but decreased in all neighbor island counties in the quarter.

In the third quarter of 2013, the unemployment rate in all counties decreased. The unemployment rate in Honolulu decreased 1.2 percentage points from 5.2 percent to 4.0 percent; the unemployment rate in Maui County decreased 1.6 percentage points from 6.3 percent to 4.7 percent; the unemployment rate in Hawaii County decreased 2.2 percentage points from 8.4 percent to 6.2 percent; and the unemployment rate in Kauai County decreased 2.1 percentage points from 7.2 percent to 5.1 percent.

In the third quarter of 2013, Honolulu gained 3,150 or 0.7 percent non-agricultural wage and salary jobs over the same quarter of 2012. Natural Resources, Mining, and Construction added the most jobs in the quarter (3,000 jobs), followed by Professional and Business Services (1,100 jobs), Food Services and Drinking Places (1,000 jobs), Transportation, Warehousing, and Utility (800 jobs), Health Care & Social Assistance (450 jobs), and Arts, Entertainment & Recreation (350 jobs). The Government sector lost 2,850 jobs. The largest private sector job losses occurred in Retail Trade (lost 700 jobs), followed by Accommodation (lost 150 jobs).

In the third quarter of 2013, Hawaii County gained 1,600 non-agricultural wage and salary jobs or 2.6 percent from the same quarter of 2012. Food Services and Drinking Places added the most jobs in the quarter (500 jobs), followed by Other Services (450 jobs), Natural Resources, Mining, and Construction (300 jobs), and Professional and Business Services (200 jobs). Job losses were largest in Transportation, Warehousing, and Utility (lost 200 jobs), followed by Educational Services (lost 100 jobs). In the third quarter of 2013, Government lost 50 jobs.

Maui County saw a net gain of 1,450 jobs or 2.1 percent increase in the third quarter of 2013 from the same quarter of 2012. Job gains in Other Services (700 jobs), Food Services and Drinking Places (650 job), and Accommodation (450 jobs) exceeded job losses in Educational Services (lost 150 jobs), Manufacturing (lost 150 jobs), Health Care & Social Assistance (lost 100 jobs), and Professional and Business Services (lost 100 jobs). The Government sector lost 250 jobs in the quarter.

In the third quarter of 2013, Kauai County gained 650 wage and salary jobs or 2.3 percent from the same quarter of 2012. Food Services and Drinking Places added 250 jobs. Accommodation and Other Services both added 200 jobs. Professional and Business Services lost 150 jobs. In this quarter, Government lost 100 jobs.

In the third quarter of 2013, visitor arrivals by air increased in all counties. Visitor arrivals by air increased 4.1 percent in Honolulu, 1.7 percent in Hawaii County, 3.1 percent in Maui, and 2.3 percent in Kauai. Visitor days increased 6.4 percent in Maui, 3.9 percent in Hawaii, 6.2 percent in Kauai, but decreased 2.0 percent in Honolulu, compared to the same quarter of 2012. In the third quarter of 2013, the hotel occupancy rate decreased in all counties. The hotel occupancy rate was the highest in Honolulu (at 87.2 percent and decreased 1.5 percentage points in the quarter), followed by Kauai (at 71.6 percent and lost 0.9 of a percentage point in the quarter), Maui (at 70.6 percent and lost 0.8 of a percentage point in the quarter), and Hawaii County (at 58.6 percent and lost 2.7 percentage points in the quarter).

In the third quarter of 2013, the growth rates of the values of total private building permits were positive in Honolulu, but negative in all other counties. In this quarter, private building permits increased \$53.1 million or 12.1 percent in Honolulu; decreased \$17.9 million or 13.6 percent in Hawaii County; decreased \$28.1 million or 32.9 percent in Maui; and decreased \$5.3 million or 18.0 percent in Kauai from the same quarter of the previous year.

12/3/2013

A. LABOR FORCE AND JOBS

Hawaii's labor market conditions continued to improve in the third quarter of 2013. Since the civilian labor force declined and the civilian employment increased in the quarter, the civilian unemployment rate declined 1.3 percentage points in the quarter. For the 12th consecutive quarters, civilian non-agricultural wage and salary jobs increased.

In the third quarter of 2013, the civilian labor force averaged 644,900 people, decreased 4,350 people or 0.7 percent from the same quarter of 2012 (Table A-1). For the first three quarters of 2013, civilian labor force decreased 5,000 people or 0.8 percent from the same period last year.

Civilian employment totaled 616,200 people in the third quarter of 2013, an increase of 4,800 people or 0.8 percent compared to the same quarter of 2012 (Table A-2). This is the fourth quarterly increase following three consecutive quarterly decreases from the first quarter of 2012 to the third quarter of 2012. For the first three quarters of 2013, average civilian employment increased 3,750 people or 0.6 percent from the same period last year.

In the third quarter of 2013, the number of civilian unemployed averaged 28,700, a decrease of 9,200 people or 24.3 percent from the same quarter of 2012 (Table A-3). For the first three quarters of 2013, the number of unemployed decreased 8,750 people or 22.2 percent from the same period last year.

The unemployment rate (not seasonally adjusted) decreased from 5.9 percent in the third quarter of 2012 to 4.4 percent in the third quarter of 2013 (Table A-4). For the first three quarters of 2013, the rate decreased 1.3 percentage point from the same period last year to 4.8 percent.

In the third quarter of 2013, Hawaii's civilian non-agricultural wage and salary jobs averaged 608,550 jobs, an increase of 6,700 jobs or 1.1 percent from the same quarter of 2012 (Table A-6). This is the 12th consecutive quarterly increase in non-agricultural wage and salary jobs

after ten consecutive quarterly decreases in jobs since the first quarter of 2008. For the first three quarters of 2013, average non-agricultural wage and salary jobs increased 1.4 percent or 8,150 jobs from the same period last year.

The job increase in the third quarter of 2013 was due to job increases in the private sector. In this quarter, the private sectors added about 10,000 non-agricultural jobs compared to the third quarter of 2012. Jobs increased the most in Natural Resources, Mining, and Construction, adding 3,200 jobs or 10.8 percent (Table A-7); followed by Food Services and Drinking Places, adding 2,350 jobs or 4.0 percent (Table A-19), Other Services added 1,800 jobs or 6.9 percent (Table A-20), Professional & Business Services added 1,000 jobs or 1.3 percent (Table A-14), Health Care & Social Assistance added 550 jobs or 0.9 percent (Table A-16), and Arts, Entertainment & Recreation added 550 jobs or 4.8 percent (Table A-17). Job growth also occurred in visitor-related industries in the quarter. Accommodation added 500 jobs or 1.3 percent (Table A-18) compared to the same quarter of 2012.

In the third quarter of 2013, only Information (Table A-12), Educational Services (Table A-15), and Retail Trade (Table A-10) lost jobs compared to the same quarter of 2012 or 100, 400, and 450 jobs respectively.

During the third quarter of 2013, the three levels of government lost 3,300 jobs or 2.7 percent (Table A-21) compared to the same quarter of 2012. The Federal Government lost 1,350 jobs (Table A-22); the State Government lost 2,000 jobs (Table A-23), while Local Government added 50 jobs (Table A-24).

The initial liable claims for unemployment, which measures the number of people who lost jobs in Hawaii and moved to other states, increased 46.0 percent in the third quarter of 2013 compared to the same quarter of 2012 (Table A-27). For the first three quarters of 2013, the initial liable claims for unemployment increased 18.0 percent from the same period last year.

B. INCOME AND PRICES

Hawaii's total personal income increased during the second quarter of 2013 over the same quarter of 2012, all major components of personal income increased in the quarter. In dollar terms, the largest increases occurred in wage and salary disbursements, followed by dividends, interest, and rent, personal current transfer receipts, proprietors' income, and supplements to wage and salaries, which include retirement and unemployment insurance benefits (Table B-1).

In the second quarter of 2013, total nominal annualized personal income (i.e., not adjusted for inflation) increased \$1,727.6 million or 2.8 percent from the second quarter of 2012 (Table B-2). For the first half of 2013, total annualized personal income was \$63,561.6 million, increased 2.8 percent from the same period last year.

In the second quarter of 2013, wage and salary disbursements increased \$949.8 million or 3.1 percent from the second quarter of 2012. This was the twelfth quarter-over-quarter increase since the second quarter of 2010. For the first half of 2013, wage and salary disbursements increased 3.5 percent from the same period last year (Table B-3).

Supplements to wages and salaries, consisting of employer payments to retirement plans, private group health insurance plans, private workers compensation plans, and other such benefits, increased \$132.3 million or 1.4 percent in the second quarter of 2013 from the same quarter of 2012 (Table B-4). For the first half of 2013, supplements to wages and salaries increased 1.8 percent from the same period last year.

Proprietors' income increased \$259.4 million or 6.3 percent in the second quarter of 2013 over that of 2012 (Table B-5). For the first half of 2013, proprietors' income was up 6.0 percent from the same period last year.

Dividends, interest, and rent increased \$650.8 million or 4.9 percent in the second quarter of 2013 from the same quarter of 2012. For the first half of 2013, income in this category was up 4.5 percent from the same period last year (Table B-6).

The annualized personal current transfer receipts grew by \$448.4 million or 4.7 percent in the second quarter of 2013 from the same quarter of 2012 (Table B-7). For the first half of 2013, personal current transfer receipts increased 4.4 percent from the same period last year.

Contributions to government social insurance, which is subtracted from total personal income, increased \$713.1 million or 15.4 percent in the second quarter of 2013 as compared to that in 2012. For the first half of 2013, contributions to government social insurance increased 16.0 percent from the same period last year (Table B-8).

In the second quarter of 2013, total non-farm private sector annualized earnings increased \$1,386.0 million or 3.2 percent from the second quarter of 2012. In dollar terms, the largest increase was in construction, followed by accommodation and food services, professional and technical services, real estate and rental and leasing, transportation and warehousing, wholesale trade, and administrative and waste services; the largest decrease occurred in mining.

During the second quarter of 2013, total government earnings decreased \$22.7 million or 0.2 percent from the same quarter of 2012. Earnings from the federal government decreased \$28.9 million or 0.3 percent in the second quarter of 2013. Earnings from the state and local governments increased \$6.3 million or 0.1 percent in the quarter.

In the first half of 2013, Honolulu's Consumer Price Index for Urban Consumers (CPI-U) increased 1.8 percent from the same period in 2012, higher than the U.S. average CPI-U increase of 1.5 percent for the same period (Table B-9). In 2012, the Honolulu CPI-U increased 2.4 percent from the previous year. The Honolulu CPI-U increased most in Food & Beverages (3.9 percent), followed by Medical Care (2.8 percent), Recreation (2.6 percent), Housing (2.0 percent), Education and Communication (1.8 percent), and Other Goods and Services (1.4 percent). Transportation decreased 0.2 percent, and Apparel decreased 2.3 percent, compared to the first half of 2012.

C. TAX REVENUES

The State general fund tax revenues declined in the third quarter of 2013 compared to the same quarter of 2012.¹ The decrease in State general fund tax revenues was due to decreased GET; all other components of State general fund tax revenues increased in the quarter.

In the third quarter of 2013, total tax collections distributed to the State general fund totaled \$1,311.1 million, decreased \$35.7 million or 2.7 percent over the same quarter of 2012 (Tables C-1 and C-2). For the first three quarters of 2013, State general fund tax revenues were up \$177.2 million or 4.4 percent over the same period last year.

During the third quarter of 2013, GET revenues (excluding the Honolulu County Surcharge) totaled \$698.7 million, a decrease of \$40.1 million or 5.4 percent over the same quarter of 2012 (Table C-3). For the first three quarters of 2013, GET revenues increased \$59.7 million or 2.8 percent from the same period last year.

Compared to the third quarter of 2012, Net Individual Income Tax revenues increased \$18.6 million or 4.3 percent to \$454.0 million in the third quarter of 2013 (Table C-4). In the third quarter of 2013, Declaration of Estimated Taxes increased \$25.2 million or 36.4 percent (Table C-5); Payments with Returns increased \$0.6 million or 4.9 percent (Table C-6); Revenues from Withholding Tax on Wages increased \$11.9 million or 3.1 percent (Table C-7); and Refunds increased \$19.1 million or 80.1 percent (Table C-8). For the first three quarters of 2013, Net Individual Income Tax collections increased

\$103.3 million or 8.5 percent from the same period last year.

Net Corporate Income Tax revenues, which tend to be volatile in nature, increased \$18.1 million or 85.0 percent in the third quarter of 2013 compared to the same quarter of 2012 (Table C-9). In the third quarter of 2013, the Declaration of Estimated Taxes increased \$25.5 million or 99.1 percent (Table C-10), the Payment with Returns decreased \$2.3 million or 36.3 percent (Table C-11), and the Refunds increased \$5.1 million or 48.1 percent (Table C-12), compared with the same quarter of 2012. For the first three quarters of 2013, Net Corporate Income Tax revenues increased \$6.4 million or 5.7 percent from the same period last year.

In the third quarter of 2013, Transient Accommodations Tax (TAT) revenues increased \$7.4 million or 8.1 percent compared to the same quarter of 2012 (Table C-13). For the first three quarters of 2013, TAT revenues increased \$32.2 million or 12.1 percent from the same period last year.

According to the most recent data available, in the second quarter of 2013, all components of tax base increased compared to the same quarter last year; the Retailing tax base increased 2.4 percent or \$178.7 million (Table C-14), the Services tax base increased 5.6 percent or \$184.9 million (Table C-15), the Contracting tax base increased 15.1 percent or \$254.6 million (Table C-16), and the Hotel Rentals tax base increased 13.4 percent or \$120.5 million (Table C-17), compared to the same quarter of 2012. For the first two quarters of 2013, only the Retailing tax base decreased 2.2 percent; the Services tax base, Contracting tax base, and Hotel Rentals tax base increased 1.3 percent, 16.7 percent, and 10.9 percent, respectively, from the same period last year.

¹ When interpreting tax figures in conjunction with other quarterly data in this report, it should be kept in mind that the tax data represent collections during the quarter. The transactions on which the taxes were paid did not necessarily take place during the quarter.

D. TOURISM

After a very strong growth in 2012, Hawaii's tourism sector continued the positive growth in the third quarter of 2013. Both domestic and international visitor arrivals, especially international visitor arrivals, increased in the quarter compared with the same quarter in 2012. Due to shorter lengths of stay, the increase in daily visitor census was lower than the increase in visitor arrivals. However, since visitors spent less on a daily basis during the third quarter of 2013, total visitor spending decreased in the quarter. On the other hand, total airline capacity and hotel occupancy rate both increased in the quarter.

The total number of visitors arriving by air to Hawaii increased 44,105 or 2.2 percent in the third quarter of 2013 compared to the same quarter of 2012 (Tables D-1 and D-2). The total average daily census was up 3,495 or 1.7 percent in the quarter. For the first three quarters of 2013, total visitor arrivals by air increased 255,171 or 4.3 percent, while average daily census increased 6,019 or 3.0 percent from the same period last year.

Following a 4.0 percent growth in the third quarter of 2012, in the third quarter of 2013, total visitor arrivals on domestic flights increased 10,279 or 0.7 percent compared to the same quarter of 2012 (Table D-3). For the first three quarters of 2013, domestic arrivals were up 114,016 or 2.8 percent from the same period last year.

After a very strong 21.6 percent growth in the third quarter of 2012, arrivals on international flights increased 33,826 or 5.2 percent in the third quarter of 2013 compared to the third quarter of 2012 (Table D-4). For the first three quarters of 2013, international arrivals were up 141,155 or 7.7 percent from the same period last year.

In terms of major market areas, from the third quarter of 2012 to the same period of 2013, arrivals from the U.S. West decreased 6,326 or 0.8 percent (Table D-5); arrivals from the U.S. East increased 12,038 or 2.9 percent (Table D-6); and arrivals from Japan increased 1,795 or 0.4 percent (Table D-7). For the first three quarters of 2013, arrivals from U.S. West were up 105,930 or 4.5 percent; arrivals from the U.S. East were up 20,751 or 1.6 percent; and Japanese

arrivals were up 36,034 or 3.3 percent from the same period last year.

Because of shorter lengths of stay, the average total daily visitor census increased less than the increase in visitor arrivals. The total average daily visitor census was up 1.7 percent or 3,495 visitors per day in the third quarter of 2013 over the same quarter of 2012 (Table D-8). Domestic average daily census increased 1.7 percent or 2,376 visitors per day (Table D-9), while the international average daily census increased 2.1 percent or 1,119 visitors per day (Table D-10). For the first three quarters of 2013, domestic average daily census increased 3,748 or 2.5 percent; international average daily census increased 2,272 or 4.3 percent from the same period last year.

Nominal visitor expenditures by air totaled \$3,602.9 million in the third quarter of 2013, down 1.3 percent or \$46.2 million from the same quarter of 2012 (Table D-11). For the first three quarters of 2013, visitor expenditures increased \$433.0 million or 4.1 percent compared with the same period last year.

Total airline capacity, as measured by the number of available seats flown to Hawaii, increased 3.8 percent or 101,189 seats (Table D-12) in the third quarter of 2013; domestic seats increased 0.8 percent or 14,244 seats (Table D-13); international seats increased 10.6 percent or 86,945 seats (Table D-14), compared to the same quarter of 2012. For the first three quarters of 2013, the number of total available seats increased 7.9 percent or 599,777 seats from the same period last year.

In the third quarter of 2013, the statewide hotel occupancy rate averaged 77.6 percent, 1.4 percentage point lower than that of the third quarter of 2012 (Table D-15). For the first three quarters of 2013, statewide hotel occupancy rate averaged 77.7 percent, 0.1 percentage points lower than the 2012.

Readers interested in visitor statistics on a monthly basis can find them on the DBEDT website: <http://www.hawaii.gov/dbedt/info/visitor-stats/tourism/> and those interested in daily passenger arrival data at: http://www.hawaii.gov/dbedt/info/economic/data_reports/special/

E. CONSTRUCTION

The indicators of Hawaii's construction industry were all positive in the third quarter of 2013. Government contracts awarded, the value of private building authorizations, State Government CIP expenditures, and construction jobs all increased in the quarter.

Construction was one of the major contributors to job growth in Hawaii over the past few years. From 2002 to 2007, construction job growth averaged 8.0 percent per year. In the fourth quarter of 2007, the average construction job reached a peak of 40,000 jobs. Since the second quarter of 2008; however, the quarter-over-quarter growth rate of construction jobs has been negative in all quarters until the second quarter of 2011. In the third quarter of 2013, the construction sector added 3,200 jobs or 10.8 percent compared with the same quarter of 2012. For the first three quarters of 2013, the construction sector added 2,850 jobs (Table A-7) from the same period last year.

In the third quarter of 2013, the private building authorizations for the whole state increased \$1.8 million or 0.3 percent compared with the third quarter of 2012 (Table E-8). For the first three quarters of 2013, private building authorizations for the state increased \$140.9 million or 7.5 percent compared with the same period last year.

In the third quarter of 2013, the private building authorizations in Honolulu increased \$53.1 million or 12.1 percent compared with the third quarter of 2012 (Table E-8). For the first three quarters of 2013, private building authorizations in Honolulu increased \$198.9 million or 16.5 percent compared with the same period last year.

In the third quarter of 2013, private building authorizations in Hawaii County decreased \$17.9 million or 13.6 percent compared with the third quarter of 2012 (Table E-8). For the first three quarters of 2013, private building authorizations in Hawaii County decreased \$0.9 million or 0.3 percent compared with the same period last year.

In the third quarter of 2013, private building authorizations in Maui decreased \$28.1 million or

32.9 percent compared with the third quarter of 2012 (Table E-8). For the first three quarters of 2013, private building authorizations in Maui decreased \$53.4 million or 17.3 percent compared with the same period last year.

In the third quarter of 2013, the private building authorizations (residential only) in Kauai decreased \$5.3 million or 18.0 percent compared with the third quarter of 2012 (Table E-8). For the first three quarters of 2013, private building authorizations in Kauai decreased \$3.6 million or 5.8 percent compared with the same period last year.

Government contracts awarded increased \$158.1 million or 48.9 percent in the third quarter of 2013 compared to the same quarter of 2012. For the first three quarters of 2013, government contracts awarded increased \$405.8 million or 60.1 percent compared with the previous year (Tables E-1). State Government CIP expenditures increased \$21.7 million or 8.5 percent in the quarter (Table E-2). For the first three quarters of 2013, CIP expenditures decreased \$139.7 million or 14.1 percent from the same period last year.

According to the most recent data available, in the first quarter of 2013, Honolulu's median price for single family resales was \$600,000, down \$16,950 or 2.7 percent from the same quarter of 2012 (Table E-9); the median price for condominium units was \$340,000, up \$30,000 or 9.7 percent from the same quarter of 2012 (Table E-10). In the third quarter of 2013, the number of single-family unit resales was up 11.3 percent, and the number of condominium unit resales was up 14.6 percent compared with the third quarter of 2012 (Tables E-11 and E-12). For the first three quarters of 2013, the number of single-family unit resales was up 11.0 percent, and the number of condominium unit resales was up 23.2 percent compared with the same period last year.

In the third quarter of 2013, single-family unit resales increased 12.6 percent, and condominium unit resales increased 38.1 percent in Maui County compared to the same quarter of 2012 (Tables E-17 and E-18).

This table is not directly comparable to Contracts Awarded data in Table E-1.

1/ Consists of general obligation bonds and reimbursable general obligation bonds.

2/ Consists of revenue bonds and special purpose revenue bonds.

3/ Includes special federal aid: interstate, primary, secondary; and federal funds.

4/ 'Total Expenditures' and 'Federal Funds' revised from previous QSER.

F. OTHER INDICATORS

The total number of bankruptcy filings in Hawaii decreased 11.8 percent or by 68 cases for the third quarter of 2013 from the same quarter of 2012. This was the eleventh quarter-over-quarter decline since the last quarter of 2010. For the first three quarters of 2013, total filings decreased 16.0 percent or 312 cases from the same period last year.

The number of Chapter 7 filings, the largest category, decreased 13.4 percent or 58 cases in the third quarter of 2013. Chapter 7 filings are intended to liquidate assets and discharge debt. For the first three quarters of 2013, Chapter 7 filings were down 17.6 percent or 261 cases from the same period last year.

Chapter 11 filings increased from zero in the third quarter of 2012 to 7 cases in the third quarter of 2013. For the first three quarters of 2013,

Chapter 11 filings increased to 17 cases from 9 cases in the same period of 2012. Chapter 11 filings involve the structuring of repayment plans for companies.

Chapter 13 filings in the third quarter of 2013 decreased 12.1 percent, or 17 cases from the third quarter of 2012. For the first three quarters of 2013, Chapter 13 filings were down 12.4 percent or 57 cases from the same period last year. Chapter 13 bankruptcy allows debtors to work out repayment arrangements with creditors.

For quarterly bankruptcy statistics, see: <http://www.uscourts.gov/bnkrpctstats/statistics.htm>.

For District of Hawaii monthly statistics, see: http://www.hib.uscourts.gov/stats/index_stats.html

III. TERMS AND DEFINITIONS

Accommodation Jobs – This industry provides lodging or short-term accommodations for travelers, vacationers, and others. Some provide lodging only; while others provide meals, laundry, and recreational facilities, as well as lodging. There are three industry groups: (1) traveler accommodation includes establishments that primarily provide traditional types of lodging services. This group includes hotels, motels, and bed and breakfast inns. (2) recreational accommodation includes establishments that operate lodging facilities primarily designed to accommodate outdoor enthusiasts. Included are travel trailer campsites, recreation vehicle parks, and outdoor adventure retreats; and (3) rooming and boarding houses includes establishments providing temporary or longer-term accommodations that for the period of occupancy may serve as a principal residence. Board (i.e., meals) may be provided but is not essential.

Agriculture Wage and Salary Jobs – Full- and part-time jobs for which payment was made by the employer in the survey week containing the 12th of the month. Includes farm jobs and machinery operators. Closely related management and services jobs are included for sugar and pineapple but are excluded for other types of agriculture.

Airline Seat – Total number of available seats from all direct flights to Hawaii, including scheduled and chartered flights.

Arts, Entertainment & Recreation Jobs – This industry includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises (1) establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing; (2) establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest; and (3) establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure-time interests. Excluded from this sector are: (1) establishments that provide both accommodations and recreational facilities, such as hunting and fishing camps and resort and casino hotels; (2) restaurants and night clubs that provide live entertainment in addition to the sale of food and beverages, (3) motion picture theaters, libraries and archives, and publishers of newspapers, magazines, books, periodicals, and computer software; and (4) establishments using transportation equipment

to provide recreational and entertainment services, such as those operating sightseeing buses, dinner cruises, or helicopter rides.

Average Daily Visitor Census- By Air – Average number of visitors present daily in the state. Figures are computed monthly by the Research & Economic Analysis Division, DBEDT based on arrival and departure dates from ground and in-flight surveys.

Average Length of Stay- By Air – Number of days visitors are in the State including the day of arrival and of departure.

Bankruptcy Filings –

Chapter 7 – Is available to both individuals and business debtors. Its purpose is to achieve a fair distribution to creditors of whatever non-exempt property the debtor has and to give the individual debtor a fresh start through the discharge in bankruptcy.

Chapter 11 – Is available for both consumer and business debtors. Its purpose is to rehabilitate a business as a going concern or reorganize an individual's finances through a court-approved reorganization plan.

Chapter 12 – Is designed to give special debt relief to a family farmer with regular income from farming.

Chapter 13 – Is available for an individual with regular income whose debts do not exceed specific amounts, typically used to budget some of the debtor's future earnings under a plan through which creditors are paid in whole or in part.

Additional information may be found at the American Bankruptcy Institute "Bankruptcy Chapters" website <http://www.abiworld.org/media/chapters.html>

Chained (1996) dollar Gross Domestic Product by State (GDP) [Note: formerly called 'Gross State Product'] series are calculated (using national chain-type implicit price deflators) as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive; that is, state totals usually do not add to regional totals or to U.S. totals, and regional totals usually do not add to U.S. totals.

Civilian Employment – Persons 16 years of age or older who, during the survey week containing the 12th of the month, were either at work for pay or profit, or

worked without pay for 15 hours or more on a family farm or business, or were with a job but not at work. Both permanent and temporary employees and those who are working either full- or part-time are included.

Civilian Labor Force – Total of employed and unemployed persons, excluding those in the armed forces and 16 years of age or under. U.S. Census Bureau does surveys for the U.S. Bureau of Labor Statistics.

Civilian Unemployment – Persons 16 years of age or older who (1) did not work at all during the survey week but were actively seeking work and were available for work; or (2) did not work at all, were available for work, and were waiting to be called back from layoff or were waiting to report to a new wage or salary job within 30 days.

Condominium Resales: Consists of resales of condominium, duplexes and townhomes that are entered in the Multiple Listing Service. It does not include apartments.

Consumer Price Index: Honolulu or U.S. – Measure of the average change in prices over time for a fixed market basket of goods and services. It is compiled by the U.S. Bureau of Labor Statistics. The index measures changes from a reference date, i.e., 1982-84, which is designated as 100.0. For example, a Honolulu CPI-U (where U refers to All Urban Consumers), All Items, of 171.5 as the annual average for 1998 indicates the average prices of that group's basket was 71.5 percent higher than the weighted average of those same goods and services in 1982-84. Data are published monthly for the U.S. and semi-annually for Honolulu. As of January 1998, BLS changed the reference basket based on 1982-84 consumer expenditures to a 1993-95 basket, but the base remains 1982-84 = 100.0. The BLS Internet site has more information about the CPI at <http://www.bls.gov/cpi/home.htm>.

Contracting Tax Base – The total receipts of businesses engaged in contracting to erect, construct, repair, or improve buildings or structures of any kind or description, or to make any installation therein. Attributed to any business engaging in the practice of architecture, engineering, land surveying, landscape architecture, and the practice of pest control or fumigation.

Contributions for government social insurance - New category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts released

in December 1999. Replaces 'Personal contributions for social insurance'. These contributions, which are subtracted in the calculation of personal income, consist of the contributions, or payments, by employees, by the self-employed, and by other individuals who participate in the following government programs: Old-age, survivors, and disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; railroad retirement; veterans life insurance; and temporary disability insurance. These contributions are excluded from personal income by definition, but the components of personal income upon which these contributions are based—mainly wage and salary disbursements and proprietors' income—are presented gross of these contributions.

Dividends, Interest, and Rent – U.S. Bureau of Economic Analysis presents the State Personal Income estimates of these components together. It consists of income received by individuals and on behalf of individuals by private and government employee retirement plans and by quasi-individuals, including non-profit institutions and private trust funds administered by fiduciaries. Personal dividend income is payments in cash or other assets by corporations in the U.S. or abroad to noncorporate stockholders who are Hawaii residents. Personal interest income is the interest income (monetary and imputed) from all sources that is received by individuals, by private and government employee retirement plans, by nonprofit institutions, and by estates and trusts. Rental income of persons with capital consumption adjustment is the net current-production income of persons from the rental of real property except for the income of persons primarily engaged in the real estate business; the imputed net rental income received by owner-occupants of farm-dwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources. The estimates include BEA adjustments for uninsured losses to real estate caused by disasters, such as hurricanes (e.g. Iniki in 1992) and floods. See [Personal Income](#).

Earnings – This BEA aggregate is the sum of three components of personal income: wages and salary disbursements, other labor income, and proprietors' income. BEA presents earnings because it can be used in analyses of regional economies as a proxy for the income generated from participation in current production. See [Personal Income](#).

Educational Services Jobs – This industry comprises establishments that provide instruction and training by specialized establishments, such as schools, colleges,

universities, and training centers. These establishments may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and accommodation services to their students. Educational services are usually delivered by teachers or instructors that explain, tell, demonstrate, supervise, and direct learning, in diverse settings, such as educational institutions, the workplace, or the home through correspondence, television, or other means.

Employer Contributions to Social Insurance - New category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts released in December 1999. Replaces 'Other labor income'. This component of personal income consists of employer contributions for employee pension and insurance funds and of employer contributions for government social insurance. See [Personal Income](#).

Federal Government Jobs – Includes those in the civilian agencies, i.e. Department of Defense, Agriculture, United States Postal Service and the various armed services exchange systems.

Financial Activities Jobs – Establishments primarily engaged in financial transactions, i.e. those transactions involving the creation, liquidation, or change in ownership of financial assets, and/or in facilitating financial transactions. Three principal types of activities are identified: (1) raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities; (2) pooling of risk by underwriting insurance and annuities, (3) providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs. In addition, monetary authorities charged with monetary control are included in this sector. This also includes real estate and the rental and leasing sector which is comprised of establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks. Excluded from this sector are real estate investment trusts (REITS) and establishments primarily engaged in renting or leasing equipment with operators. In many cases, such as the rental of heavy construction equipment, the operator is essential to operate the equipment.

Food Services & Drinking Places Jobs – These industries prepare meals, snacks, and beverages to

customer order for immediate on-premises and off-premises consumption. Some provide food and drink only; while others provide various combinations of seating space, waiter/waitress services and incidental amenities, such as limited entertainment. The industries are grouped based on the type and level of services provided, i.e. full-service restaurants; limited-service eating places; and special food services including caterers and mobile food services. Food services and drink activities at hotels and motels; amusement parks, theaters, casinos, country clubs, and similar recreational facilities; and civic and social organizations are included here only if these services are provided by a separate establishment primarily engaged in providing food and beverage services. Excluded are establishments operating dinner cruises which are classified as scenic and sightseeing transportation because those establishments utilize transportation equipment to provide scenic recreational entertainment.

General Excise (Gross Income) Tax – Tax charged to businesses on gross sales or gross income. The tax rate is 0.5 percent on wholesaling and intermediary services, blind vendors, producing, manufacturing, sugar processing and pineapple canning; all other activities (retailing, business and professional services, contracting, theater, amusement, radio, interest, commissions, rentals) are taxed at 4.0 percent, except insurance commissions to general agents, subagents and solicitors, who are taxed at 0.15 percent.

General Excise and Use Tax Base – The value of all goods and services sold, including the value of tangible personal property imported into Hawaii for own use or consumption. One of the most comprehensive measures of business activity in the state.

General Fund Tax Revenues – Receipts of the general excise and use tax, net individual and corporate income taxes comprise over 85 percent of the General Fund tax receipts. The general government fund used to account for all financial resources except those required to be accounted for in another fund, such as the highway, airport or capital improvement fund.

Gross Domestic Product by State (GDP) [Note: formerly called 'Gross State Product'] – GDP is the value added in production by the labor and property located in a state. GDP for a state is derived as the sum of the GDP originating in all industries in the state. The estimates of real GDP are derived by applying national implicit price deflators by detailed industry to the current-dollar GDP estimates by

detailed industry. Then, in order to capture the differences across states that reflect the relative differences in the mix of goods and services that the states produce, the same chain-type index formula used in the national accounts is used to calculate the estimates of total real GDP and real GDP by major industry.

Health Care & Social Assistance Jobs – This industry includes establishments that provide both health care and social assistance for individuals. Both are included as it is sometimes difficult to distinguish between the boundaries of these two activities starting with those establishments providing medical care exclusively, continuing with those providing health care and social assistance, and finally finishing with those providing only social assistance. These services are delivered by trained professionals and the industries are defined based on the educational degree held by its practitioners. Excluded are aerobic classes and nonmedical diet and weight reducing centers. Although these can be viewed as health services, these services are not typically delivered by health practitioners.

Honolulu Construction Cost Indexes: High-Rise or Single Family – As compiled, by First Hawaiian Bank, and currently by DBEDT, these indexes measure changes in contractors' costs for building materials and labor. For discussion of Methodology, see [Hawaii's Economy May 2000](http://www.hawaii.gov/dbedt/hecon/he5-00/index.html) at <http://www.hawaii.gov/dbedt/hecon/he5-00/index.html>.

Hotel Occupancy Rate – The percentage of occupied rooms in a hotel. Hotel occupancy rates depend not only on the number of visitors and their length of stay, but also on the hotel room inventory, e.g., a large increase in new hotel units results in a drop in occupancy rates, until such time as visitor traffic builds up enough to fill them. Rates are obtained from a sample survey conducted on a monthly basis.

Hotel Rental Tax Base – is the economic base from which all hotel business activity is taxed. It includes the furnishing of temporary accommodations in a hotel, or other place in which lodgings are regularly furnished to transients for compensation.

Implicit Price Deflator – The implicit price deflator is calculated as the ratio of the current-dollar value to the corresponding chained-dollar value multiplied by 100. **OR** Implicit price deflators are weighted averages of the detailed price indexes used to prepare each aggregate and component and are calculated as the

ratio of current- to chained-dollar output multiplied by 100.

Information Jobs – Are in establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data. Included are publishing industries, including software publishing, and both traditional publishing and publishing exclusively on the Internet; the motion picture and sound recording industries; the broadcasting industries, including traditional broadcasting and those broadcasting exclusively over the Internet; the telecommunications industries; the industries known as Internet service providers and web search portals, data processing industries, and the information services industries. For the purpose of developing NAICS, it is the transformation of information into a commodity that is produced and distributed by a number of growing industries that is at issue. The Information sector groups three types of establishments: (1) those engaged in producing and distributing information and cultural products; (2) those that provide the means to transmit or distribute these products as well as data or communications; and (3) those that process data. Many of the industries in the NAICS Information sector are engaged in producing products protected by copyright law, or in distributing them (other than distribution by traditional wholesale and retail methods). Examples are traditional publishing industries, software and directory and mailing list publishing industries, and film and sound industries. Broadcasting and telecommunications industries and information providers and processors are also included in the Information sector, because their technologies are so closely linked to other industries in the Information sector.

Initial Agent Claims – Notices of unemployment filed against another state by its workers who have moved to Hawaii.

Initial Liable Claims – Notices of unemployment filed against Hawaii by Hawaii workers who have moved to another state.

Local Government Jobs – Includes those in the county governments.

Manufacturing Jobs – Are in establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing,

except in cases where the activity is appropriately classified as construction. Included in manufacturing are plants, factories, or mills and characteristically use power-driven machines and materials-handling equipment. However, establishments that transform materials or substances into new products by hand or in the worker's home and those engaged in selling to the general public products made on the same premises from which they are sold, such as bakeries, candy stores, and custom tailors, may also be included in this sector. Manufacturing establishments may process materials or may contract with other establishments to process their materials for them. Both types of establishments are included in manufacturing. The following activities are considered manufacturing in NAICS: milk or water bottling and pasteurizing; fresh fish packaging; printing and related activities; ready-mixed concrete production; ship repair and renovation; machine shops; and tire retreading. Conversely, there are activities that NAICS classifies as non-manufacturing, i.e. agriculture, forestry, fishing and hunting; the construction of structures and fabricating operations performed at the site of construction by contractors, establishments engaged in breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, customized assembly of computers, etc

NAICS – The North American Industry Classification System (NAICS) has replaced the U.S. Standard Industrial Classification (SIC) system. NAICS was developed jointly by the U.S., Canada, and Mexico to provide new comparability in statistics about business activity across North America. Estimates of Personal Income earnings, wage and salary disbursements, and employment by NAICS subsector are available starting with 2001. For descriptions of NAICS industries, please see <http://www.census.gov/epcd/www/naics.html> at the Census Bureau.

Natural Resources, Mining & Construction Jobs – In Hawaii, 99 percent of the jobs in this category are in Construction and the remaining 1 percent in Mining. Included are those establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. There are two activities: mine operation and mining support activities. The construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g., highways and utility systems), additions, alterations, or maintenance and repairs. Establishments primarily engaged in the preparation of sites for new construction and establishments primarily engaged in

subdividing land for sale as building sites also are included in this sector.

Net Earnings – BEA also calculates this measure as Earnings less Personal Contributions for Social Insurance. Net earnings is used in the presentation of State and local area personal income as the sum of net earnings, transfer payments, and personal dividend income, personal interest income, and rental income of persons. It can be used as a proxy for income before taxes. See [Personal Income](#).

Net Individual or Corporation Income Tax Revenue – For individuals, it is calculated as declaration of estimated taxes plus payments with returns plus withholding tax on wages less refunds. Net corporate income tax revenue is calculated as declarations of estimated taxes plus payments with returns less refunds.

Non-Agriculture Wage and Salary Jobs – Derived monthly from a sample survey of employers reporting the number of persons who received pay for any part of the pay period containing the 12th of the month. Includes all full- and part-time non-agricultural workers, permanent and temporary workers, and workers on paid sick leave and paid vacation.

Other Goods and Services – Honolulu Consumer Price Index component detail. Prior to the CPI 1998 Revision, it measured the change in average prices of tobacco products, personal care goods and services, and personal and educational expenditures. Beginning with January 1998 data, this category includes tobacco, personal care, and miscellaneous goods and services. Other components, for example, schoolbooks and tuition, moved to the new “Education and Communication” and recreational reading to “Recreation”. BLS’ *Monthly Labor Review* (December 1996), and BLS’ Internet site have more information about the CPI at <http://www.bls.gov/cpi/>.

Other Labor Income – See [Employer Contributions to Social Insurance](#)’.

Other Services (except public administration) Jobs – Are in establishments engaged in providing services not specifically provided for elsewhere in the classification system., such as equipment and machinery repairing, promoting or administering religious activities, grantmaking, advocacy, and providing drycleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services. Private households that engage in employing workers on or about the premises in

activities primarily concerned with the operation of the household are included in this sector. Excluded from this sector are establishments primarily engaged in retailing new equipment and also performing repairs and general maintenance on equipment

Personal Contributions for Social Insurance – See [‘Contributions for government social insurance’](#).

Personal current transfer receipts – Modified category as part of the ‘BEA Comprehensive Revision of the National Income & Product Accounts’ released in December 1999. Formerly ‘Transfer Payments’. This component of personal income is payments to persons for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by Federal, state, and local governments and by businesses. Government payments to individuals includes retirement and disability insurance benefits, medical payments (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance benefits, veterans benefits, and Federal grants and loans to students. Government payments to nonprofit institutions excludes payments by the Federal Government for work under research and development contracts. Business payments to persons consists primarily of liability payments for personal injury and of corporate gifts to nonprofit institutions.

Personal Income – Income received by persons for participation in production, from government and business transfer payments, and from government interest. It is calculated as the sum of wage & salary disbursements, supplements to wages and salaries, proprietors’ income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. For additional information see <http://www.bea.doc.gov/bea/regional/spi/>

Professional & Business Services Jobs – Are in establishments that specialize in performing professional, scientific, and technical activities for others and require a high degree of expertise and training. These activities include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services to business and sometimes to households, but excludes establishments

primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and recordkeeping, personnel, and physical distribution and logistics. The management sector comprises establishments that hold the securities of companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or establishments that administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic or organizational planning and decisionmaking role of the company or enterprise. Establishments in this sector perform essential activities that are often undertaken, in-house, by establishments in many sectors of the economy but by consolidating the performance of these activities, economies of scale are achieved. Also included are establishments that perform routine support activities, such as office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services on a contract or fee basis.

Proprietors’ Income – This component of BEA Personal income is the current-production income (including income in kind) of sole proprietorships, partnerships and cooperatives. Corporate directors’ fees and the imputed net rental income of owner-occupants of farm dwellings is included in proprietors’ income but the imputed net rental income of owner-occupants of nonfarm dwellings is included in rental income of persons. Proprietors’ income excludes dividends and monetary interest received by nonfinancial business and rental incomes by persons not primarily engaged in the real estate business; these incomes are included in dividends, net interest, and rental income of personas, respectively. See [Personal Income](#).

Retail Tax Base – includes the general excise tax base on retailing. Retail sales include sales for consumption or use by the purchaser and not for resale. The general excise tax at the retail level (4%) is sometimes loosely called a sales tax. However, it differs from a typical sales tax in two respects: (1) it is a tax on the gross income of the seller rather than a tax on the purchase price of the buyer; (2) the retail excise tax in Hawaii applies to all retail sales (both goods and services) whereas most Mainland sales taxes exempt some commodities such as food and services.

Retail Trade Jobs – Are in establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The retailing process is the final step in the distribution of merchandise; retailers

are, therefore, organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and nonstore retailers. Store retailers operate fixed point-of-sale locations, located and designed to attract a high volume of walk-in customers where they have extensive displays of merchandise and use mass-media advertising to attract customers from the general public for personal or household consumption, but some also serve business and institutional clients. These include establishments such as office supply stores, computer and software stores, building materials dealers, plumbing supply stores, and electrical supply stores. Catalog showrooms, gasoline services stations, automotive dealers, and mobile home dealers are treated as store retailers. Generally, establishments engaged in retailing merchandise and providing after-sales services are classified in this sector. Nonstore retailers are also organized to serve the general public, but they reach customers and market merchandise with methods, such as the broadcasting of "infomercials," the broadcasting and publishing of direct-response advertising, the publishing of paper and electronic catalogs, door-to-door solicitation, in-home demonstration, selling from portable stalls (street vendors, except food), and distribution through vending machines.

Services Tax Base – includes tax base data on establishments primarily engaged in providing a wide variety of services for individuals, business and government establishments, and other organizations; hotels and other lodging places; establishments providing personal, business, repair, and amusement services; health, legal, engineering, and other professional services; educational institutions; membership organizations and other miscellaneous services.

Single Family Home Resales: Consists of resales of single family homes that are entered in the Multiple Listing Service.

State Government Jobs – Education includes all employees under the Department of Education (DOE) and the University of Hawaii System. This includes public library personnel, substitute teachers who received pay during the pay period including the 12th of the month, and support personnel such as cafeteria workers, classroom cleaners, and school security attendants. Also included are part-time employees in special programs such as the A+ After School.

State Government Jobs – Non-Education - Includes all other executive branch departments (i.e. Agriculture, Transportation, etc.), the legislative and judicial

branches, and the Research Corporation of the University of Hawaii (RCUH).

Total Wage and Salary Jobs – includes nonagricultural wage and salary workers and agriculture wage and salary workers. Persons on the payroll of more than one establishment during the pay period are counted in each establishment that reports them.

Transfer Payments – See [Personal current transfer receipts](#).

Transient Accommodations Tax – Tax levied on resort time-share vacation units and the furnishing of a room, apartment, suite which is customarily occupied by a person or group for fewer than 180 consecutive days by a hotel, apartment, motel, or cooperative apartment, rooming house, or other place in which lodgings are generally furnished to transients. The tax as of January 1, 1999 is imposed at the rate of 7.25 percent and the tax base includes time-share units.

Transportation, Warehousing, & Utilities Jobs – Are in industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation - air, rail, water, road, and pipeline. The sector distinguishes subsectors for each mode of transportation, a subsector for warehousing and storage, and a subsector for establishments providing support activities for transportation. In addition, there are subsectors for establishments that provide passenger transportation for scenic and sightseeing purposes, postal services, and courier services. Warehousing establishments in this sector are distinguished from merchant wholesaling in that the warehouse establishments do not sell the goods. Excluded are establishments primarily engaged in providing travel agent services that support transportation and other establishments, such as hotels, businesses, and government agencies. The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Within this sector, the specific activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities. Excluded from this sector are establishments primarily engaged in waste

management services that do not use sewer systems or sewage treatment facilities.

Unallocated General Excise & Use Tax Revenues – General excise and use tax revenues that could not be allocated to specific activities of the general excise & use tax. It also includes collections from penalty and interest, assessments and corrections, delinquent collections, refunds, protested payments, settlements, etc.

Unemployment Rate – Ratio of unemployed persons to the civilian labor force expressed as a percentage.

Use Tax – Excise tax levied on tangible personal property that is imported or purchased from an unlicensed seller for use in the state. The tax is based upon the purchase price or value of the tangible personal property purchased or imported, whichever is applicable. Rates: 0.5 percent, if for resale at retail; 4.0 percent, if for use or consumption.

Visitor Arrivals- By Air, Total – All persons who stayed in Hawaii for a period between one night and one year.

Domestic Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year, arriving on flights from Mainland U.S. A foreign resident arriving in Hawaii on a flight directly from the U.S. Mainland is counted as a domestic visitor.

International Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year arriving on flights from foreign countries. An U.S. resident arriving in Hawaii on a flight directly from a foreign country is counted as an international visitor.

Visitor Days – Measures the number of days visitors stay in the State and are the most comprehensive measurement of visitations. Visitor days take into account both the number of visitors and their length of stay and is the main indicator used by most of the tourism-related businesses to plan their activities.

Wages and Salary Disbursements– This component of Personal Income consists of the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; and receipts in kind, or pay-in-kind, such as the meals furnished to the employees of restaurants. It reflects the amount of wages and salaries disbursed, but not necessarily, earned during the year. See [Personal Income](#).

Wholesale Trade Jobs – Are in establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise and includes the outputs of agriculture, mining, manufacturing, and certain information industries, such as publishing. It is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of goods for resale, capital or durable nonconsumer goods, and raw and intermediate materials and supplies used in production. Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office that have little or no display of merchandise and do not solicit walk-in traffic. Transactions are often conducted between wholesalers and clients that have long-standing business relationships. There are two main types: merchant wholesalers that sell goods on their own account and business to business electronic markets, agents, and brokers that arrange sales and purchases for others generally for a commission or fee.
