

Quarterly Statistical & Economic Report

1st Quarter 2006

This *Quarterly Statistical and Economic Report* has been prepared by the staff of the Research and Economic Analysis Division of the State Department of Business, Economic Development & Tourism (DBEDT). The report provides concise statistical information and analyses on Labor, Income and Prices, Taxes, Tourism, Construction, and other indicators, as well as an overview of the State of Hawaii and the four counties.

Technical notes and source descriptions have been kept to a minimum. However, the staff of the Research and Economic Analysis Division would be happy to respond to any inquiries of a technical nature that readers may have (586-2466). The quarterly information contained in this report reflects data received by the Research Division on or before February 22, 2006.

On-line availability of Quarterly Statistical and Economic Report

Since 1988, the Hawaii Department of Business, Economic Development & Tourism has had the *State of Hawaii Data Book* available on-line to anyone with a personal computer and a modem. Since 1997, the *Quarterly Statistical and Economic Report, State of Hawaii Data Book* and other DBEDT publications and information have been made available via the Internet at http://www.hawaii.gov/dbedt/.

Printing of the *QSER* was discontinued in March 2000. The full version and a *QSER Executive Summary* will be available on-line at http://www.hawaii.gov/dbedt/info/economic/data_reports/qser/.

For further information about available data and sources, users should call the Research and Economic Analysis Division Library at (808) 586-2424.

This report has been catalogued as follows:

STATE OF THE ECONOMY

2005 was one of the best years in Hawaii's most recent business cycle that started in 1991. Personal income grew 7.5 percent during the first three quarters of 2005 compared with that period in 2004. Growth of labor force and employment for the year were also the highest since 1990. Unemployment rate was the lowest since 1990 and is notably the lowest rate in the nation. Visitor arrivals reached a historical high level of 7.4 million, general fund tax revenue growth was also the highest since 1990.

Hawaii's labor force surged by 3.2 percent in 2005 compared with 2004 - it was the highest growth rate since 1990. The increase in labor force was caused by the increase in job opportunities. In the fourth quarter of 2005, 630,600 people were employed in Hawaii, a new all-time quarterly employment peak. This was 31,400 or 5.2 percent more than the fourth quarter of 2004. This is the highest-ever quarter-over-quarter rate of growth in employment since this data compilation began in 1976. For the year, employment was up 3.7 percent from 2004. The Hawaii unemployment rate averaged 2.6 percent for the quarter. For the year, Hawaii unemployment rate averaged 2.8 percent compared to 3.3 percent for 2004.

Hawaii's total wage and salary jobs increased 2.7 percent or by 16,000 jobs when comparing the fourth quarter of 2005 to 2004. For the year, wage and salary jobs were up 2.8 percent from 2004.

Nominal personal income, not adjusted for inflation, rose \$2.7 billion or 6.5 percent in the third quarter of 2005 compared to the third quarter of 2004. Among its components, wage and salary disbursements increased by 6.5 percent and supplements to wages and salaries by 8.9 percent. Similarly, proprietors' income, the income most closely related to entrepreneurial activity, grew 10.7 percent, dividends, interest, and rent by 2.6 percent, and personal current transfer receipts, consisting largely of retirement and medical payments, by 5.2 percent. Contributions to government social insurance, payments subtracted from personal income, increased 5.8 percent.

Tax revenues distributed to the State general fund rose 11.4 percent to \$987 million comparing the fourth quarter of 2005 to 2004. Revenues from the general excise and use tax (GET) grew by 13.7 percent, net individual income tax revenues rose 9.7 percent, and transient accommodations tax (TAT) revenues increased 16.6 percent. For the year, State general fund rose 16.6 percent, GET grew 13. 7 percent, net individual income tax increased 17.2 percent, and TAT increased 9.2 percent from 2004.

The total number of visitors arriving to Hawaii by air was up 5.7 percent in the fourth quarter of 2005 from the fourth quarter of 2004. This quarterly increase in arrivals resulted from a 7.2 percent increase in domestic arrivals and a 2.2 percent increase in international arrivals. For the year, domestic arrival was up 7.4 percent and international arrival was up 5.2 percent from 2004. The average daily visitor census was up 6.0 percent. During the fourth quarter of 2005, hotel occupancy rates increased 3.9 percentage points to 77.3 percent from the fourth quarter of 2004, bringing the hotel occupancy rates for the year to 81.2 percent.

Indicators of Hawaii's construction industry remained positive in the fourth quarter of 2005 with signals for the future pointing toward sustained strong building activity. For the fourth quarter of 2005, wage and salary jobs in the natural resources, mining and construction industry in the state totaled 34,000 or up 11.3 percent from the fourth quarter of 2004. For the year, jobs in this category were up 10.6 percent from 2004. The value of private building authorizations was up 59.9 percent from the fourth quarter of 2004. For the year, value of private building permit was 28.1 percent higher than the year earlier, providing notification of over \$765 million in future Hawaii construction.

The total number of bankruptcy filings increased by 77.9 percent in third quarter 2005 compared to the second quarter of 2004. This was only the second quarterly increase in Hawaii bankruptcy filings in fourteen quarters. It is likely that the increase in Chapter 7 filings was in anticipation of the stiffening of the bankruptcy law.

OUTLOOK FOR THE ECONOMY

After three consecutive years of economic growth at higher than national rates, DBEDT forecasts for Hawaii's economy will see a solid real gross state product growth rate in 2006 at 3.0 percent. DBEDT projections are based on the current trend of growth in Hawaii's economy, and the growth U.S. mainland and Japan, the two economies that influence our growth the most. The February 2006 Blue Chip Economic Consensus Forecast projects that the economic growth for these two economies remain strong. Real GDP growth in 2006 for the U.S. is projected to be 3.3 percent, and 2.4 percent for Japan. Growth in 2007 is expected to be 3.1 percent for the U.S. and 2.2 percent for Japan. The expectation for U.S. consumer price inflation is about 2.9 percent in 2006 and 2.4 percent for 2007.

Based on current conditions, visitor days in 2006 are expected to increase 3.1 percent, up from the 2.9 percent forecast of the previous forecast. Visitor expenditures are forecast to increase 4.6 percent and visitor arrivals are expected to increase 3.2 percent in 2006. In 2007, visitor days, visitor arrivals, and visitor expenditures are predicted to increase 2.4 percent, 2.5 percent, and 5.2 percent, respectively, followed by moderate increases in 2008 and 2009.

Several indicators support an optimistic forecast for Hawaii for the coming year, the most notable of which may be the level of private building permit authorizations in 2005. Permit levels averaging \$291 million per month in 2005 should mean a robust construction sector for 2006. Coupled with a vibrant visitor sector and increased federal government spending, all the pieces seem to be in place for healthy employment and earnings.

The U.S. Bureau of Economic Analysis's (BEA) estimate of Hawaii's nominal (current dollar) personal income growth was 6.5 percent for the third quarter of 2005 over the same period of 2004, after an average of 8.0 percent growth for the first two quarters. BEA usually revises its previous quarter estimates when new estimate is released. Given the labor market condition and tax revenue collection during the third quarter of 2005, we expect that BEA would revise Hawaii personal income estimate upward for third quarter of 2005. expectation, and along with the recent upward trend in Hawaii's individual income tax revenue, contributed to the current 2006 forecast of 6.8 percent in nominal personal income, up from a 6.2 percent forecast last quarter. For 2007, we project a slightly slower 6.2 percent growth rate. Real personal income growth rates for 2006 and 2007 are forecast to be 3.2 percent and 2.8 percent after deflating the nominal projections by the forecast Honolulu CPI.

The 2006 DBEDT forecast for total wage and salary jobs growth has been increased slightly to 1.8 percent. Hawaii had the lowest unemployment rate in the nation in 2005. Job growth in 2007 is now projected to be 1.3 percent.

Hawaii's projected inflation rates for 2006 and 2007 are 3.5 percent and 3.3 percent. These projections are higher than we forecasted in the previous quarter, mainly due to the higher than expected inflation in the second half of 2005 and the housing and energy price pressures in the near future.

COUNTY ECONOMIC CONDITIONS

All four Hawaii counties had positive growth during the fourth quarter of 2005 as compared to 2004. Employment and job growth for the entire year was even higher. Visitor days and arrivals increased in all counties because of growth in domestic visitors, and for all counties except Maui, the 2005-over-2004 annual average growth was higher than that of the fourth quarter. All counties had positive growth in individual income tax collections for both the fourth guarter and the 2005-over-2004 total. Only Hawaii and Maui counties showed a decrease in general excise & use tax collections and only for the 2005-over-2004 (Tables 2 through 5).

The City and County of Honolulu, in the fourth quarter of 2005, added 12,300 wage and salary jobs or 2.8 percent over a year earlier. The largest private sector increases in jobs were in Professional and Business Services, and Transportation, Warehousing, and Utilities (both sectors with 2,500 jobs); and Natural Resources, Mining Construction (2,350 jobs). For 2005, there was an increase of 12,250 over 2004 led by the same sectors but with Transportation first, at 2,250 jobs. The public sector declined by 950 jobs over the fourth quarters with federal and local government jobs each increasing by 50 and State jobs 1,050 fewer.

Hawaii County had the highest rate of job growth at 2.9 percent, of any of the counties during the fourth quarter of 2005 compared with 2004, adding 1,850 jobs. Natural Resources, Mining and Construction leads with an increase of 450 jobs, followed by Food Services & Drinking Places with 350.

Maui County had an overall gain of 1,500 jobs for a 2.3 percent increase for the quarter. Natural Resources, Mining and Construction

led in job gains for the quarter with an increase of 600. Food Services & Drinking Places added 200 jobs, as did Health Care and Social Assistance, Professional and Business Services, and Other Services for fourth quarter of 2005 compared to 2004. The annual growth was 1,500 jobs, with 600 in Natural Resources, Mining & Construction.

Kauai County added 350 jobs for a 1.2 percent growth rate fourth quarter 2005-over-2004 and an increase of 750 jobs or 2.6 percent for 2005-over-2004. The largest quarterly gain was in Professional and Business Services which added 250 jobs or 7.7 percent, while the largest annual gain was in Natural Resources, Mining and Construction with 100 jobs or 7.1 percent.

Visitor arrivals by air in the fourth quarter were up 12.0 percent in Kauai County, 8.7 percent in Hawaii County, 7.4 percent in Maui County and 3.2 percent in the City & County of Honolulu. Domestic arrivals grew in all counties, as did international visitor arrivals. Hotel occupancy rates were up in 6.1 percentage points, to 83.7 percent on Oahu, 5.4 percentage points in Hawaii County to 68.6 percent, up 2.2 percentage points in Maui County to 73.9 percent. The only quarterly 2005-over-2004 decline was in Kauai County at -1.4 percent to 69.1 percent.

General excise and use tax revenue collections were up in all counties' fourth quarter 2005-over-2004 but led by Honolulu at 15.4 percent. Individual income tax collections were likewise up in all counties but led by Hawaii County at 26.5 percent.

Private building authorizations increased in all counties but were led by a 158.7 percent increase in Maui County (Table E-8).

^{1/} Labor force and jobs are based on monthly rounded data.

^{2/} Change represents absolute change in rates rather than percentage change in rates.

A. LABOR FORCE AND JOBS

The fourth quarter 2005 saw gains of about five percent in both labor force and employment. Job growth averaged nearly three percent but was as high as eleven percent in Natural Resources, Construction & Mining. The growth for the year 2005 are only slightly less remarkable.

In the fourth quarter of 2005, total labor force increased 4.9 percent from the fourth quarter of 2004 to 647,750, the highest quarterly growth since data compilation began in 1976. For the year, Hawaii civilian labor force was up 3.2 percent from 2004 (Tables 1 and A-1).

During the fourth quarter of 2005, 630,600 people were employed in Hawaii, a new all-time quarterly employment peak. This employment level was 31,400 or 5.2 percent more than fourth quarter of 2004 (Tables 1 and A-2). This is also the highest quarterly growth since data compilation began in 1976.. For the year, employment was up 3.7 percent from 2004.

The number of civilian unemployed decreased 5.0 percent to 17,200 in the fourth quarter of 2005 from the same period of 2004. For the year, the number of people unemployed was 2,400 or 12.0 percent lower than that for 2004 (Table A-3).

Hawaii unemployment rate (not seasonally adjusted) was down in the fourth quarter of 2005 to 2.6 percent compared to the 2.9 percent unemployment rate in the fourth quarter of 2004. This is the fifth straight quarter that Hawaii's unemployment rate has been below 3.0 percent (Table A-4). Parenthetically, at 2.4 percent, Hawaii had the lowest unemployment rate in the nation in December 2005, according to the U.S. Bureau of Labor Statistics. For the year, Hawaii unemployment rate averaged 2.8 percent compared to 3.3 percent for 2004.

Hawaii's total wage and salary jobs increased 2.7 percent or by 16,000 jobs in the fourth quarter

of 2005 from the fourth quarter of 2004. For all of 2005, wage and salary jobs were up 2.8 percent from 2004 (Table A-5). All private sector industries except for Manufacturing and Information showed positive job growth for the fourth quarter of 2005. Four private sector industries added more than 2,000 jobs and two more sectors added more than 1,000 jobs in the fourth quarter of 2005 compared to 2004.

Resources. The Natural Mining and Construction sector added the most jobs comparing the fourth quarters of 2005 and 2004 an increase of 3,450 jobs or 11.3 percent (Table Professional and Business Services A-7). contributed the next greatest increase with 3,150 jobs or a 4.4 percent increase (Table A-14). Visitor-related industries also did well, with Transportation, Warehousing, and Utilities adding 2,550 jobs or 8.8 percent (Table A-11), Food Services and Drinking Places 2,150 jobs or 3.9 percent (Table A-19), and Retail Trade 1,750 jobs or 2.5 percent (Table A-10). With an increase of 1,550 jobs or 2.8 percent (Table A-16), Health Care and Social Assistance rounds out the list of the sectors with the highest job growth in the fourth quarter of 2005.

During the fourth quarter of 2005, two private sector industries lost jobs compared with the fourth quarter of 2004: Information declined 300 jobs or 2.7 percent (Table A-12) and Manufacturing was down 250 jobs or 1.6 percent of its employment (Table A-8).

Comparing the fourth quarter of 2004 with that in 2005, the number of jobs decreased by 1,200 or 1.0 percent in the government sectors (Table 1). While Federal government and Local government jobs grew by 0.2 percent and 1.5 percent, respectively, State government lost 2.0 percent, which caused the total government jobs to decrease for the quarter and 0.8 percent over the year (Tables A-21 to A-23).

B. INCOME AND PRICES

Hawaii personal income total continued to rise during the third quarter of 2005 (the period for which the latest data are available from the U.S. Bureau of Economic Analysis), over the third quarter of 2004, although at a lower rate than in the previous two quarters. The greatest increase was seen in Proprietors' Income, followed by Supplements to Wages and Salaries, Wage and Salary Disbursements, Personal Current Transfer Receipts and Dividends. Interest. and Rent. Contributions for Government Social Insurance, which is subtracted from personal income, also increased. Year-toyear quarterly earnings increased for all sectors except for Information and Finance and Insurance (Table B-1).

Nominal personal income, not adjusted for inflation, rose \$2.7 billion or 6.5 percent in the third quarter of 2005 compared to the third quarter of 2004 (Table B-1 or B-2). Year-to-year quarterly growth in personal income in each of the previous four quarters was more than 8 percent, averaging 8.9 percent. Wage and salary disbursements grew by about \$1.6 billion or 6.5 percent in the third quarter of 2005 (Table B-3). Wages and salaries accounted for about 58 percent of total personal income.

Supplements to Wages and Salaries, consisting of employer payments to retirement plans, private group health insurance plans, private workers compensation plans, and other such benefits, increased by \$586 million or 8.9 percent in the third quarter of 2005 compared to the third quarter of 2004 (Table B-4).

Proprietors' Income, the income most closely related to entrepreneurial activity, grew by \$304 million or 10.7 percent in the third quarter of 2005 compared to the third quarter of 2004 (Table B-5).

Dividends, Interest, and Rent rose by \$162 million or 2.6 percent in the third quarter of 2005 over that in 2004 (Table B-6). Personal Current Transfer Receipts, consisting largely of retirement and medical payments, grew by \$276 million or 5.2 percent for the quarter (Table B-7).

Contributions to Government Social Insurance, payments subtracted from personal income, increased \$197 million or 5.8 percent (Table B-8).

Earnings increased across most private sector industries between the third quarter of 2004 and the third calendar quarter of 2005. In dollar terms, the largest increases came in Natural Resources, Mining and Construction, followed by Health and Social Assistance, Retail Trade, and Professional and Technical Services. Federal Government earnings increased 4.1 percent and State and Local Government earnings increased 4.9 percent (Table B-1).

Honolulu's inflation rate increased 4.5 percent in the second half of 2005. This was considerably higher than the 3.3 percent increase in the second half of 2004. The annual average for 2005 was up 3.8 percent (Table B-9). Honolulu's rate was 0.7 percent higher than the 3.8 percent inflation experienced on the Mainland during the second half of 2005. The Honolulu increase was produced by the Housing component increasing 7.2 percent and Transportation, mostly fuels, increasing 5.7 percent.

C. TAX REVENUES

State general fund tax revenues continued to grow at double-digit rates in the fourth quarter of 2005 increasing by 11.4 percent over the fourth quarter of 2004. This growth came from strong increases in collections of the General Excise and Use Tax (GET), Individual Income Tax, and the Transient Accommodations Tax (TAT).

For the fourth quarter of 2005, total tax collections distributed to the State general fund totaled \$987 million (Tables C-1 and C-2). This is about \$100 million or an 11.4 percent increase over the fourth quarter of 2004. For the year, State general fund tax collections were up \$599.5 million or 16.4 percent from 2004 (Table C-1).

During the fourth quarter of 2005, GET revenues were up \$66.3 million or 13.7 percent over the fourth quarter of 2004 (Tables C-1 and C-3). For 2005-over-2004, GET collections increased by \$271.9 million or 13.7 percent.

Net Individual Income Tax collections increased by \$30.2 million or 9.7 percent in the fourth quarter of 2005 over the same period a year ago (Table C-4). This increase was the result of gains in all individual collections categories offset somewhat by an increase in refunds. Withholding Tax on Wages was up 6.7 percent or \$19.6

million (Table C-7), Declaration of Estimated Taxes increased 13.0 percent or \$4.7 million (Table C-5), and Payment with returns increased by 49.9 percent or \$7.5 million (Table C-6). Refunds were up 5.2 percent or \$1.6 million (Table C-8).

For all of 2005, Net Individual Income Tax collections were up 17.2 percent or \$212.0 million from 2004.

Net Corporate Income Tax revenue were down 44 percent or \$5.0 million in the fourth quarter of 2005 compared to the fourth quarter of 2004 (Table C-9). This decrease in Net Corporate Income Taxes was largely the result of an increase of 48.3 percent in Corporate Refunds (Table C-12). Some decreases in both Declaration of Estimated Taxes (5.1 percent) and Payment with Returns (1.4 percent) also contributed to this decline (Tables C-10 and C-11). Despite the decrease in the fourth quarter, Net Corporate Income Tax collections were still up 76.4 percent or \$57.4 million for all of 2005 over 2004.

TAT revenue was up more \$6.6 million or 16.6 percent in the fourth quarter of 2005 compared to the fourth quarter of 2004 (Table C-13). For the year, TAT collections increased by \$17.5 million or 9.2 percent compared to 2004.

¹ When interpreting tax figures in conjunction with other quarterly data in this report, it should be kept in mind that the tax data represent collections during the quarter. The transactions on which the taxes were paid did not necessarily take place during the quarter.

D. TOURISM

During the fourth quarter of 2005, both the total number of visitor arrivals and the average daily visitor census were up from the fourth quarter of 2004. Substantial increases in domestic visitor arrivals and days combined with moderate increases in international visitor arrivals and days produced the gains made during the quarter. Hotel rates occupancy also showed improvement for the quarter.

The total number of visitors arriving by air was up 5.7 percent in the fourth quarter of 2005 from the fourth quarter of 2004 (Tables D-1 and D-2). This is an increase of about 97,000 visitors compared with the fourth quarter of 2004. For the year, the total number of visitors by air was up 6.8 percent from 2004.

The overall quarterly increase in arrivals resulted from increases in both domestic visitor arrivals and international arrivals. Arrivals on domestic flights were up 7.2 percent, while the number of travelers on international flights increased by 2.2 percent, comparing the fourth quarter of 2005 to that of 2004 (Tables D-3 and D-4). For all of 2005, domestic arrival was up 7.4 percent and international arrival was up 5.2 percent from 2004.

Considering the different major market areas, the U.S. West market showed 55,849 more visitors for an 8.2 percent increase in the fourth quarter 2005 from the fourth quarter 2004 (Table D-5). Arrivals from the U.S. East market also contributed to growth, increasing 4.1 percent or 16,849 visitors (Table D-6). In the fourth quarter of

2005, the Japan market was down 1.8 percent or 7,047 visitors over the fourth quarter of 2004 (Table D-7). For the year, arrivals from U.S. West, U.S. East, and Japan increased 7.9 percent, 5.6 percent, and 2.7 percent, respectively.

The total average daily visitor census was up about 10,150 visitors a day or a 6.0 percent increase in the fourth quarter of 2005 from the fourth quarter of 2004 (Table D-8). This total increase was produced by a 6.9 percent increase in domestic visitors' daily census, those arriving on flights from U.S. Mainland airports, and a 3.3 percent increase for the international visitors' daily census (Tables D-9 and D-10).

Airline capacity to Hawaii, as measured by the number of available seats flown, was up 0.4 percent in the fourth quarter of 2005 (Table D-11). Domestic capacity was up 1.0 percent (Table D-12), while international capacity was down 1.2 percent (Table D-13). For the year, total air seats increased 7.0 percent from 2004.

Hotel occupancy rates rose 3.9 percentage points from 73.4 percent in the fourth quarter of 2004 to 77.3 percent in the fourth quarter of 2005 (Table D-14). For the year, hotel occupancy rates averaged 81.2 percent or up 3.5 percentage points from 2004.

Readers interested in visitor statistics on a monthly basis can find them at: http://www.hawaii.gov/dbedt/monthly/index.html and those interested in daily passenger arrival data can find them at: http://www.hawaii.gov/dbedt/special/index.html

^{1/} Source revised the annual average.

E. CONSTRUCTION

Hawaii's construction industry continued to expand in the fourth quarter of 2005. In particular, construction jobs and housing prices continued to grow. Private building authorizations were up over the high level reached in the third quarter, signally more growth in the next few years.

For the fourth quarter of 2005, wage and salary jobs in Natural Resources, Mining and Construction (99 percent are construction jobs and one percent mining jobs) in the State totaled 34,000 or up 11.3 percent from the fourth quarter of 2004 (Table 1, Table A-7). For the year, total constructions jobs were up 10.6 percent over Construction jobs grew in all four 2004 counties. From the fourth quarter of 2004 to that of 2005, City and County of Honolulu construction jobs grew 11.0 percent (Table 2), Hawaii County 10.0 percent (Table 3), Maui County 18.5 percent (Table 4), and Kauai County 7.1 percent (Table 5). For the year, county construction jobs grew 10.0 percent, 7.9 percent, 18.0 percent, and 7.4 percent, respectively.

Total value of private building authorizations increased 59.9 percent for the fourth quarter of 2005 over 2004 (Tables E-1 and E-8). The values of residential permits was up 73.4 percent and of additions and alterations was up 58.0 percent, while the value of commercial and industrial permits was down 15.0 percent.

For the year, total value of private building permits and of residential permits were both up about 28 percent, the value of commercial and industrial permits up 43 percent, and additions and alterations up 22 percent over 2004.

All four counties saw increases in building activity. In the fourth quarter of 2005, total value of Maui County authorizations increased 158.7 percent or by over \$177 million from the fourth quarter of 2004. Honolulu's value of total private authorizations was up 58.6 percent, Hawaii County's increased by 20.7 percent and that of

Kauai¹ was up 6.6 percent (Table E-8). For the year, the increase in value of private permits was highest for Kauai County (120.5 percent), followed by Maui (85.2 percent), Hawaii (22.0 percent), and Honolulu (3.3 percent).

For the fourth quarter of 2005, total value of Government contracts awarded fell 70.9 percent from the fourth quarter of 2004 and fell 47.6 percent for the year (Table E-1). State Government Capital Improvement Project (CIP) expenditures for the fourth quarter were up by 52.4 percent to \$200 million (Table E-2). The largest share of CIP expenditure was from General Obligation bond funds, but large shares were also from Special funds and Federal funds.

Single-family unit authorizations were up about 26 percent for the quarter, as well as for the year (Table E-4) and that of multi-family units were up 66.9 percent for the quarter, but down 9.8 percent for the year (Table E-5).

The Honolulu Construction Cost Index for Single Family Residences rose by 8.8 percent in the fourth quarter of 2005, over that of 2004 (Table E-6), while the comparable index for High-Rise Buildings rose by 6.3 percent (Table E-7).

Median sale prices and units sold for both single family and condominium resales in Honolulu continued to increase in the fourth quarter of 2005. The single-family median price was up 26.5 percent to \$620,000 (Table E-9) and the median Honolulu condominium price was up 36.4 percent to \$300,000 (Table E-10). For the year, single-family median resale prices were up 28.3 percent and condominium prices were up 29 percent from 2004. The number of single-family and condominium unit resales were both down about 11.0 percent for the quarter and relatively flat for the year (Tables E-11 and E-12).

.

¹ (Beginning with the third quarter of 2004, Kauai County permit value data are for residential only.

This table is not directly comparable to Contracts Awarded data in Table E-1.

1/ Consists of general obligation bonds and reimbursable general obligation bonds.

2/ Consists of revenue bonds and special purpose revenue bonds.

3/ Includes special federal aid: interstate, primary, secondary; and federal funds.

4/ Not meaningful.

F. OTHER INDICATORS

Following the national trend, the total number of Hawaii bankruptcy filings increased in the third quarter of 2005 over the third quarter of 2004. This was the second quarterly increase in Hawaii bankruptcy filings following declines for thirteen quarters, and the highest number of filings since the first quarter of 2002.

The total number of bankruptcy filings increased by 77.9 percent in the third quarter 2005 compared to the third quarter of 2004 (Table F-1). Total bankruptcies increased over the period from 684 to 1,217.

Chapter 7 filings, the largest category, were up from the previous third quarter by 87.9 percent. Chapter 7 filings are intended to liquidate assets and discharge debt to provide the debtor with a fresh start. Individuals are allowed to keep certain exempt property while the remaining property is sold to pay creditors.

Chapter 11 filings saw no change at 1 filing for the third quarter of both 2004 and 2005. Chapter 11 filings involve the structuring of repayment plans for companies.

Chapter 13 filings decreased slightly from 72 to 70 or 2.8 percent in the third quarter of 2005 over that in 2004. Chapter 13 bankruptcy allows debtors to work out repayment arrangements with creditors.

U.S. bankruptcy filings also increased in the third quarter of 2005. Total U.S. bankruptcies were also up, by 36.7 percent for the third quarter of 2005 compared with the third quarter 2004.

For quarterly bankruptcy statistics, see: http://www.uscourts.gov/bnkrpctystats/statistics.htm.

III. TERMS AND DEFINITIONS

Accommodation Jobs – This industry provides lodging short-term accommodations for travelers, vacationers, and others. Some provide lodging only; while others provide meals, laundry, and recreational facilities, as well as lodging. There are three industry groups: (1) traveler accommodation includes establishments that primarily provide traditional types of lodging services. This group includes hotels, motels, and bed and breakfast inns. (2) recreational accommodation includes establishments that operate lodging facilities primarily designed to accommodate outdoor enthusiasts. Included are travel trailer campsites, recreation vehicle parks, and outdoor adventure retreats; and (3) rooming and boarding houses includes establishments providing temporary or longer-term accommodations that for the period of occupancy may serve as a principal residence. Board (i.e., meals) may be provided but is not essential.

Agriculture Wage and Salary Jobs – Full- and part-time jobs for which payment was made by the employer in the survey week containing the 12th of the month. Includes farm jobs and machinery operators. Closely related management and services jobs are included for sugar and pineapple but are excluded for other types of agriculture.

Airline Seat – Total number of available seats from all direct flights to Hawaii, including scheduled and chartered flights.

Arts, Entertainment & Recreation Jobs – This industry includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises (1) establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing: (2) establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest; and (3) establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure-time interests. Excluded from this sector are: (1) establishments that provide both accommodations and recreational facilities, such as hunting and fishing camps and resort and casino hotels; (2) restaurants and night clubs that provide live entertainment in addition to the sale of food and beverages, (3) motion picture theaters, libraries and archives, and publishers of newspapers, magazines, books, periodicals, and computer software; and (4) establishments using transportation equipment to provide recreational and entertainment services, such as those operating sightseeing buses, dinner cruises, or helicopter rides.

Average Daily Visitor Census- By Air – Average number of visitors present daily in the state. Figures are computed monthly by the Research & Economic Analysis Division, DBEDT based on arrival and departure dates from ground and in-flight surveys.

Average Length of Stay- By Air – Number of days visitors are in the State including the day of arrival and of departure.

Bankruptcy Filings -

Chapter 7 – Is available to both individuals and business debtors. Its purpose is to achieve a fair distribution to creditors of whatever non-exempt property the debtor has and to give the individual debtor a fresh start through the discharge in bankruptcy.

Chapter 11 – Is available for both consumer and business debtors. Its purpose is to rehabilitate a business as a going concern or reorganize an individual's finances through a court-approved reorganization plan.

Chapter 12 – Is designed to give special debt relief to a family farmer with regular income from farming.

Chapter 13 – Is available for an individual with regular income whose debts do not exceed specific amounts, typically used to budget some of the debtor's future earnings under a plan through which creditors are paid in whole or in part.

Additional information may be found at the American Bankruptcy Institute "Bankruptcy Chapters" website http://www.abiworld.org/media/chapters.html

Chained (1996) dollar Gross State Product (GSP) series are calculated (using national chain-type implicit price deflators) as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive; that is, state totals usually do not add to regional totals or to U.S. totals, and regional totals usually do not add to U.S. totals.

Civilian Employment – Persons 16 years of age or older who, during the survey week containing the 12th of the month, were either at work for pay or profit, or worked without pay for 15 hours or more on a

family farm or business, or were with a job but not at work. Both permanent and temporary employees and those who are working either full- or part-time are included.

Civilian Labor Force —Total of employed and unemployed persons, excluding those in the armed forces and 16 years of age or under. U.S. Census Bureau does surveys for the U.S. Bureau of Labor Statistics.

Civilian Unemployment – Persons 16 years of age or older who (1) did not work at all during the survey week but were actively seeking work and were available for work; or (2) did not work at all, were available for work, and were waiting to be called back from layoff or were waiting to report to a new wage or salary job within 30 days.

Condominium Resales: Consists of resales of condominium, duplexes and townhomes that are entered in the Multiple Listing Service. It does not include apartments.

Consumer Price Index: Honolulu or U.S. – Measure of the average change in prices over time for a fixed market basket of goods and services. It is compiled by the U.S. Bureau of Labor Statistics. The index measures changes from a reference date, i.e., 1982-84, which is designated as 100.0. For example, a Honolulu CPI-U (where U refers to All Urban Consumers), All Items, of 171.5 as the annual average for 1998 indicates the average prices of that group's basket was 71.5 percent higher than the weighted average of those same goods and services in 1982-84. Data are published monthly for the U.S. and semiannually for Honolulu. As of January 1998, BLS changed the reference basket based on 1982-84 consumer expenditures to a 1993-95 basket, but the base remains 1982-84 = 100.0. The BLS Internet site more information about the CPI http://www.bls.gov/cpi/home.htm.

Contracting Tax Base – The total receipts of businesses engaged in contracting to erect, construct, repair, or improve buildings or structures of any kind or description, or to make any installation therein. Attributed to any business engaging in the practice of architecture, engineering, land surveying, landscape architecture, and the practice of pest control or fumigation.

Contributions for government social insurance - New category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts released in December 1999. Replaces 'Personal contributions

for social insurance'. These contributions, which are subtracted in the calculation of personal income, consist of the contributions, or payments, by employees, by the self-employed, and by other individuals who participate in the following government programs: Old-age, survivors, disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; railroad retirement; veterans life insurance; and temporary disability insurance. These contributions are excluded from personal income by definition, but the components of personal income upon which these contributions are basedmainly wage and salary disbursements and proprietors' income-are presented gross of these contributions.

Dividends, Interest, and Rent - U.S. Bureau of Economic Analysis presents the State Personal Income estimates of these components together. It consists of income received by individuals and on behalf of individuals by private and government employee retirement plans and by quasi-individuals, including non-profit institutions and private trust funds administered by fiduciaries. Personal dividend income is payments in cash or other assets by corporations in the U.S. or abroad to noncorporate stockholders who are Hawaii residents. interest income is the interest income (monetary and imputed) from all sources that is received by individuals, by private and government employee retirement plans, by nonprofit institutions, and by estates and trusts. Rental income of persons with capital consumption adjustment is the net currentproduction income of persons from the rental of real property except for the income of persons primarily engaged in the real estate business: the imputed net rental income received by owner-occupants of farmdwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources. The estimates include BEA adjustments for uninsured losses to real estate caused by disasters, such as hurricanes (e.g. Iniki in 1992) and floods. Personal Income.

Earnings – This BEA aggregate is the sum of three components of personal income: wages and salary disbursements, other labor income, and proprietors' income. BEA presents earnings because it can be used in analyses of regional economies as a proxy for the income generated from participation in current production. See Personal Income.

Educational Services Jobs – This industry comprises establishments that provide instruction and training by specialized establishments, such as schools, colleges, universities, and training centers. These establishments

may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and accommodation services to their students. Educational services are usually delivered by teachers or instructors that explain, tell, demonstrate, supervise, and direct learning, in diverse settings, such as educational institutions, the workplace, or the home through correspondence, television, or other means.

Employer Contributions to Social Insurance - New category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts released in December 1999. Replaces 'Other labor income'. This component of personal income consists of employer contributions for employee pension and insurance funds and of employer contributions for government social insurance. See Personal Income.

Federal Government Jobs – Includes those in the civilian agencies, i.e. Department of Defense, Agriculture, United States Postal Service and the various armed services exchange systems.

Financial Activities Jobs – Establishments primarily engaged in financial transactions, i.e. transactions involving the creation, liquidation, or change in ownership of financial assets, and/or in facilitating financial transactions. Three principal types of activities are identified: (1) raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities; (2) pooling of risk by underwriting insurance and annuities, (3) providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs. In addition, monetary authorities charged with monetary control are included in this sector. This also includes real estate and the rental and leasing sector which is comprised of establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks. Excluded from this sector are real estate investment trusts (REITS) establishments primarily engaged in renting or leasing equipment with operators. In many cases, such as the rental of heavy construction equipment, the operator is essential to operate the equipment.

Food Services & Drinking Places Jobs – These industries prepare meals, snacks, and beverages to customer order for immediate on-premises and off-

premises consumption. Some provide food and drink only: while others provide various combinations of seating space, waiter/waitress services and incidental amenities, such as limited entertainment. The industries are grouped based on the type and level of services provided, i.e. full-service restaurants; limitedservice eating places; and special food services including caterers and mobile food services. Food services and drink activities at hotels and motels; amusement parks, theaters, casinos, country clubs, and similar recreational facilities; and civic and social organizations are included here only if these services are provided by a separate establishment primarily engaged in providing food and beverage services. Excluded are establishments operating dinner cruises which are classified as scenic and sightseeing transportation because those establishments utilize transportation equipment to provide scenic recreational entertainment.

General Excise (Gross Income) Tax – Tax charged to businesses on gross sales or gross income. The tax rate is 0.5 percent on wholesaling and intermediary services, blind vendors, producing, manufacturing, sugar processing and pineapple canning; all other activities (retailing, business and professional services, contracting, theater, amusement, radio, interest, commissions, rentals) are taxed at 4.0 percent, except insurance commissions to general agents, subagents and solicitors, who are taxed at 0.15 percent.

General Excise and Use Tax Base – The value of all goods and services sold, including the value of tangible personal property imported into Hawaii for own use or consumption. One of the most comprehensive measures of business activity in the state.

General Fund Tax Revenues – Receipts of the general excise and use tax, net individual and corporate income taxes comprise over 85 percent of the General Fund tax receipts. The general government fund used to account for all financial resources except those required to be accounted for in another fund, such as the highway, airport or capital improvement fund.

Gross State Product (GSP) – GSP is the value added in production by the labor and property located in a state. GSP for a state is derived as the sum of the GSP originating in all industries in the state. The estimates of real GSP are derived by applying national implicit price deflators by detailed industry to the current-dollar GSP estimates by detailed industry. Then, in order to capture the differences across states that reflect the relative differences in the mix of goods and

services that the states produce, the same chain-type index formula used in the national accounts is used to calculate the estimates of total real GSP and real GSP by major industry.

Health Care & Social Assistance Jobs – This industry includes establishments that provide both health care and social assistance for individuals. Both are included as it is sometimes difficult to distinguish between the boundaries of these two activities starting with those establishments providing medical care exclusively, continuing with those providing health care and social assistance, and finally finishing with those providing only social assistance. These services are delivered by trained professionals and the industries are defined based on the educational degree held by its practitioners. Excluded are aerobic classes and nonmedical diet and weight reducing centers. Although these can be viewed as health services, these services are not typically delivered by health practitioners.

Honolulu Construction Cost Indexes: High-Rise or Single Family – As compiled, by First Hawaiian Bank, and currently by DBEDT, these indexes measure changes in contractors' costs for building materials and labor. For discussion of Methodology, see <u>Hawaii's Economy May 2000</u> at http://www.hawaii.gov/dbedt/hecon/he5-00/index.html.

Hotel Occupancy Rate – The percentage of occupied rooms in a hotel. Hotel occupancy rates depend not only on the number of visitors and their length of stay, but also on the hotel room inventory, e.g., a large increase in new hotel units results in a drop in occupancy rates, until such time as visitor traffic builds up enough to fill them. Rates are obtained from a sample survey conducted on a monthly basis.

Hotel Rental Tax Base – is the economic base from which all hotel business activity is taxed. It includes the furnishing of temporary accommodations in a hotel, or other place in which lodgings are regularly furnished to transients for compensation.

Implicit Price Deflator – The implicit price deflator is calculated as the ratio of the current-dollar value to the corresponding chained-dollar value multiplied by 100.
 OR Implicit price deflators are weighted averages of the detailed price indexes used to prepare each aggregate and component and are calculated as the ratio of current- to chained-dollar output multiplied by 100.

Information Jobs – Are in establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data. Included are publishing industries, including software publishing, and both traditional publishing and publishing exclusively on the Internet; the motion picture and sound recording industries; industries, broadcasting including traditional broadcasting and those broadcasting exclusively over the Internet; the telecommunications industries; the industries known as Internet service providers and web search portals, data processing industries, and the information services industries. For the purpose of developing NAICS, it is the transformation of information into a commodity that is produced and distributed by a number of growing industries that is at issue. The Information sector groups three types of establishments: (1) those engaged in producing and distributing information and cultural products; (2) those that provide the means to transmit or distribute these products as well as data or communications; and (3) those that process data. Many of the industries in the NAICS Information sector are engaged in producing products protected by copyright law, or in distributing them (other than distribution by traditional wholesale and retail methods). Examples are traditional publishing industries, software directory and mailing list publishing industries, and film and sound industries. Broadcasting and telecommunications industries and information providers and processors are also included in the Information sector, because their technologies are so closely linked to other industries in the Information sector.

Initial Agent Claims – Notices of unemployment filed against another state by its workers who have moved to Hawaii.

Initial Liable Claims – Notices of unemployment filed against Hawaii by Hawaii workers who have moved to another state.

Local Government Jobs – Includes those in the county governments.

Manufacturing Jobs – Are in establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified as construction. Included in manufacturing are plants, factories, or mills and characteristically use power-driven machines and materials-handling equipment. However, establishments that transform materials or substances into new products by hand or in the worker's home and those engaged in selling to the general public products made on the same premises from which they are sold, such as bakeries, candy stores, and custom tailors, may also be included in this sector. Manufacturing establishments may process materials or may contract with other establishments to process their materials for them. Both types of establishments are included in manufacturing. The following activities are considered manufacturing in NAICS: milk or water bottling and pasteurizing; fresh fish packaging; printing and related activities; ready-mixed concrete production; ship repair and renovation; machine shops; and tire retreading. Conversely, there are activities that NAICS classifies as non-manufacturing, i.e. agriculture, forestry, fishing and hunting; the construction of structures and fabricating operations performed at the site of construction by contractors, establishments engaged in breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, customized assembly of computers, etc

NAICS – The North American Industry Classification System (NAICS) has replaced the U.S. Standard Industrial Classification (SIC) system. NAICS was developed jointly by the U.S., Canada, and Mexico to provide new comparability in statistics about business activity across North America. Estimates of Personal Income earnings, wage and salary disbursements, and employment by NAICS subsector are available starting with 2001. For descriptions of NAICS industries, please see http://www.census.gov/epcd/www/naics.html at the Census Bureau.

Natural Resources, Mining & Construction Jobs - In Hawaii, 99 percent of the jobs in this category are in Construction and the remaining 1 percent in Mining. Included are those establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. There are two activities: mine operation and mining support activities. The construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g., highways and utility systems), additions, alterations, or maintenance and repairs. Establishments primarily engaged in the preparation of sites for new construction and establishments primarily engaged in subdividing land for sale as building sites also are included in this sector.

Net Earnings – BEA also calculates this measure as Earnings less Personal Contributions for Social Insurance. Net earnings is used in the presentation of State and local area personal income as the sum of net earnings, transfer payments, and personal dividend income, personal interest income, and rental income of persons. It can be used as a proxy for income before taxes. See Personal Income.

Net Individual or Corporation Income Tax Revenue – For individuals, it is calculated as declaration of estimated taxes plus payments with returns plus withholding tax on wages less refunds. Net corporate income tax revenue is calculated as declarations of estimated taxes plus payments with returns less refunds.

Non-Agriculture Wage and Salary Jobs — Derived monthly from a sample survey of employers reporting the number of persons who received pay for any part of the pay period containing the 12th of the month. Includes all full- and part-time non-agricultural workers, permanent and temporary workers, and workers on paid sick leave and paid vacation.

Other Goods and Services – Honolulu Consumer Price Index component detail. Prior to the CPI 1998 Revision, it measured the change in average prices of tobacco products, personal care goods and services, and personal and educational expenditures. Beginning with January 1998 data, this category includes tobacco, personal care, and miscellaneous goods and services. Other components, for example, schoolbooks and tuition, moved to the new "Education and Communication" and recreational reading to "Recreation". BLS' Monthly Labor Review (December 1996), and BLS' Internet site have more information about the CPI at http://www.bls.gov/cpi/.

Other Labor Income – See Employer Contributions to Social Insurance'.

Other Services (except public administration) Jobs – Are in establishments engaged in providing services

not specifically provided for elsewhere in the classification system., such as equipment and machinery repairing, promoting or administering religious activities, grantmaking, advocacy, and providing drycleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services. Private households that engage in employing workers on or about the premises in activities primarily concerned with the operation of the household are included in this sector. Excluded from this sector are establishments primarily engaged in

retailing new equipment and also performing repairs and general maintenance on equipment

Personal Contributions for Social Insurance – See 'Contributions for government social insurance'.

Personal current transfer receipts – Modified category as part of the 'BEA Comprehensive Revision of the National Income & Product Accounts' released in December 1999. Formerly 'Transfer Payments'. This component of personal income is payments to persons for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by Federal, state, and local governments and by businesses. Government payments to individuals includes retirement and disability insurance benefits, medical payments (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance benefits, veterans benefits, and Federal grants and loans to students. Government payments to nonprofit institutions excludes payments by the Federal Government for work under research and development contracts. Business payments to persons consists primarily of liability payments for personal injury and of corporate gifts to nonprofit institutions.

Personal Income –Income received by persons for participation in production, from government and business transfer payments, and from government interest. It is calculated as the sum of wage & salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. For additional information see http://www.bea.doc.gov/bea/regional/spi/

Professional & Business Services Jobs - Are in establishments that specialize in performing professional, scientific, and technical activities for others and require a high degree of expertise and training. These activities include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services to business and sometimes to households, but excludes establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and recordkeeping, personnel, and physical distribution and logistics. The management sector comprises establishments that hold the securities of companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or establishments administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic organizational planning decisionmaking role of the company or enterprise. Establishments in this sector perform essential activities that are often undertaken, in-house, by establishments in many sectors of the economy but by consolidating the performance of these activities, economies of scale are achieved. Also included are establishments that perform routine support activities, such as office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services on a contract or fee basis.

Proprietors' Income – This component of BEA Personal income is the current-production income (including income in kind) of sole proprietorships, partnerships and cooperatives. Corporate directors' fees and the imputed net rental income of owner-occupants of farm dwellings is included in proprietors' income but the imputed net rental income of owner-occupants of nonfarm dwellings is included in rental income of persons. Proprietors' income excludes dividends and monetary interest received by nonfinancial business and rental incomes by persons not primarily engaged in the real estate business; these incomes are included in dividends, net interest, and rental income of personas, respectively. See Personal Income.

Retail Tax Base – includes the general excise tax base on retailing. Retail sales include sales for consumption or use by the purchaser and not for resale. The general excise tax at the retail level (4%) is sometimes loosely called a sales tax. However, it differs from a typical sales tax in two respects: (1) it is a tax on the gross income of the seller rather than a tax on the purchase price of the buyer; (2) the retail excise tax in Hawaii applies to all retail sales (both goods and services) whereas most Mainland sales taxes exempt some commodities such as food and services.

Retail Trade Jobs – Are in establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The retailing process is the final step in the distribution of merchandise; retailers are, therefore, organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and nonstore

Store retailers operate fixed point-of-sale locations, located and designed to attract a high volume of walk-in customers where they have extensive displays of merchandise and use mass-media advertising to attract customers from the general public for personal or household consumption, but some also serve business and institutional clients. These include establishments such as office supply stores, computer and software stores, building materials dealers, plumbing supply stores, and electrical supply stores. Catalog showrooms, gasoline services stations, automotive dealers, and mobile home dealers are treated as store retailers. establishments engaged in retailing merchandise and providing after-sales services are classified in this sector. Nonstore retailers are also organized to serve the general public, but they reach customers and market merchandise with methods, such as the broadcasting of "infomercials," the broadcasting and publishing of direct-response advertising, publishing of paper and electronic catalogs, door-todoor solicitation, in-home demonstration, selling from portable stalls (street vendors, except food), and distribution through vending machines.

Services Tax Base — includes tax base data on establishments primarily engaged in providing a wide variety of services for individuals, business and government establishments, and other organizations; hotels and other lodging places; establishments providing personal, business, repair, and amusement services; health, legal, engineering, and other professional services; educational institutions; membership organizations and other miscellaneous services.

Single Family Home Resales: Consists of resales of single family homes that are entered in the Multiple Listing Service.

State Government Jobs – Education includes all employees under the Department of Education (DOE) and the University of Hawaii System. This includes public library personnel, substitute teachers who received pay during the pay period including the 12th of the month, and support personnel such as cafeteria workers, classroom cleaners, and school security attendants. Also included are part-time employees in special programs such as the A+ After School.

State Government Jobs – Non-Education - Includes all other executive branch departments (i.e. Agriculture, Transportation, etc.), the legislative and judicial branches, and the Research Corporation of the University of Hawaii (RCUH).

Total Wage and Salary Jobs – includes nonagricultural wage and salary workers and agriculture wage and salary workers. Persons on the payroll of more than one establishment during the pay period are counted in each establishment that reports them.

Transfer Payments – See <u>Personal current transfer receipts.</u>

Transient Accommodations Tax – Tax levied on resort time-share vacation units and the furnishing of a room, apartment, suite which is customarily occupied by a person or group for fewer than 180 consecutive days by a hotel, apartment, motel, or cooperative apartment, rooming house, or other place in which lodgings are generally furnished to transients. The tax as of January 1, 1999 is imposed at the rate of 7.25 percent and the tax base includes time-share units.

Transportation, Warehousing, & Utilities Jobs - Are in industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation - air, rail, water, road, and pipeline. The sector distinguishes subsectors for each mode of transportation, a subsector for warehousing and storage, and a subsector for establishments providing support activities for transportation. In addition, there are subsectors for establishments that provide passenger transportation for scenic and sightseeing purposes, postal services, and courier services. Warehousing establishments in this sector are distinguished from merchant wholesaling in that the warehouse establishments do not sell the goods. Excluded are establishments primarily engaged in providing travel agent services that support transportation and other establishments, such as hotels, businesses, and government agencies. The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Within this sector, the specific activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities. Excluded from this sector are establishments primarily engaged in waste management services that do not use sewer systems or sewage treatment facilities.
