**Table 15.22-- ESTABLISHMENT AND EMPLOYMENT CHANGES  
FROM ENTERPRISE BIRTHS, DEATHS, EXPANSIONS AND  
CONTRACTIONS, BY EMPLOYMENT SIZE: 2005 TO 2006 -- Con.**

D Withheld to avoid disclosing data for individual companies.

1/ For establishment deaths and continuing establishments, the enterprise size is determined by the employment of the controlling enterprise in the initial year. The enterprise size is determined by the employment of the controlling enterprise in the subsequent year for single-unit establishment births. For multiunit establishment births, the enterprise size is determined by the employment of the controlling enterprise in the initial year and by the employment of the controlling enterprise in the subsequent year if the enterprise does not exist in the initial year. Enterprise size designations are determined by the summed employment of all associated establishments.

2/ A single physical location where business is conducted or where services or industrial operations are performed.

3/ The designation for which state in the U.S. the data refers to is determined by the initial year data for establishment deaths and continuing establishments and by the subsequent year data for establishment births. For the purposes of the dynamic tabulations, an establishment is considered in existence in a given year if it has first quarter employment for that year.

4/ Establishments that have zero employment in the first quarter of the initial year and positive employment in the first quarter of the subsequent year.

5/ Establishments that have positive employment in the first quarter of the initial year and zero employment in the first quarter of the subsequent year.

6/ Full or part-time employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12. Included are employees on sick leave, holidays, and vacations; not included are proprietors and partners of unincorporated businesses.
