

**Table 2.34-- ESTIMATED USE OF SELECTED SUBSTANCES, FOR HAWAII AND THE UNITED STATES: 2015-2016**

[Data in this table are annual averages based on the 2015-2016 National Survey on Drug Use and Health. Current users are those persons 12 years old and over. The numbers in this table are based on national design-based estimates. In 2015, a number of changes were made to the survey questionnaire and data collection procedures resulting in the establishment of a new baseline for a number of measures. Therefore, estimates for several measures included in prior reports are not available]

<b>Subject and geographic area</b>	<b>Marijuana 1/</b>	<b>Cocaine 2/</b>	<b>Any illicit drug other than marijuana 1/ 3/</b>	<b>Binge alcohol use 1/ 4/</b>	<b>Cigarettes 1/</b>
Estimated users (1,000)					
Hawaii	95	23	37	239	172
United States	23,103	4,950	9,195	66,009	51,642
Estimated users as percent of population					
Hawaii	8.2	2.0	3.2	20.6	14.9
United States	8.6	1.8	3.4	24.6	19.2

1/ Use in past month.

2/ Use in past year.

3/ Illicit drug use other than marijuana includes the misuse of prescription psychotherapeutics or the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

4/ Binge alcohol use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e. at the same time or within a couple hours of each other) on at least one day in the past 30 days. In 2015, the definition for females changed from five to four drinks.
