

HAWAII COUNTY INDUSTRY ANALYSIS

2001-2018

Department of Business, Economic Development and Tourism
December 2019

This report fulfills the reporting requirements of Senate Concurrent Resolution 86 of the 2019 Legislative Session and was prepared by the Research and Economic Analysis Division headed by Dr. Eugene Tian, Division Administrator. Data and analyses were developed, and the report was written by Dr. Binsheng Li, economist and edited by Dr. Joseph Roos and Laura Meisinger.

EXECUTIVE SUMMARY

Senate Concurrent Resolution 86 of the 2019 Legislative Session requested that the Department of Business, Economic Development and Tourism (DBEDT) to conduct a study on potential industries, other than tourism, to promote economic development in the county of Hawaii. In this report, DBEDT attempts to analyze the industry structural changes during the 2001-2018 period using employment and earnings by industry data. The analysis consists of four metrics: (1) The ranking of industries by employment in 2018; (2) the growth of employment between 2001 and 2018 and industry contributions to the growth; (3) the industry concentrations of Hawaii County industries as compared with the state total; and (4) industries with growing potentials – mapped the industries by performance.

The analysis focuses on 20 high level industries sectors as defined by The North American Industry Classification System (NAICS) at the 2-digit level. Table S-1 summarizes jobs and average earnings for each of the respective NAICS-based sectors for Hawaii County. In 2018, Hawaii County had 107,926 jobs including full-time, part-time, payroll and self-employed jobs. Hawaii County’s Government Sector had the most jobs in 2018, accounted for 13.9 percent of the total jobs for Hawaii County. Government sector jobs include all three levels of government. The next four largest sectors were Accommodation and Food Services, Retail Trade, Health Care and Social Assistance, and Administrative and Support and Waste Management. The top five sectors accounted for about 55 percent of total jobs in 2018. The detail industry breakdown of the top five industries is provided in Section IV of this report.

TABLE S-1. JOBS AND AVERAGE EARNINGS FOR HAWAII COUNTY IN 2018

Industry	2018 Jobs	% of Total Jobs	NAICS	2018 Average Earnings
All Industry Total	107,926	100.00		45,966
Government	14,979	13.88	90	77,226
Accommodation and Food Services	14,319	13.27	72	38,143
Retail Trade	12,420	11.51	44	34,654

Mining, Quarrying, and Oil and Gas Extraction	215	0.20	21	33,731

Source: EMSI and DBEDT, READ.

It should be noted that tourism is not an industry sector in NAICS, tourism is usually defined as the combination of parts of the industries such as Accommodation and Food Services, Retail Trade, Real Estate and Rental and Leasing, Transportation and Warehousing, and Arts, Entertainment, and Recreation.

Though the top 5 industries were the same for both Hawaii County and the state, Hawaii County was heavier in Tourism (more job concentration in Accommodation and Food Services, 13.3 percent for Hawaii County, 12.5 percent for State, and Retail trade, 11.5 percent for Hawaii County versus 9.7 percent for state). In contrast, the state overall was heavily weighted towards Government (government job share was 19.8 percent for the state and 13.9 percent for Hawaii County). Hawaii County was significantly concentrated in Agriculture, Forestry, Fishing and Hunting with 6.8 percent of the jobs in this sector while the state jobs share was only 1.6 percent.

Between 2001 and 2018, Hawaii County added 27,047 jobs, with an average annual job growth rate of 1.7 percent, and this was higher than the state average annual job growth of 1.3 percent. Administrative and Support and Waste Management contributed the most to the job growth (14.5 percent of total additional jobs); followed by Health Care and Social Assistance (10.8 percent), Accommodation and Food Services (9.9 percent), Retail Trade (8.8 percent), and Government (8.6 percent). The top 5 sectors accounted for 52.7 percent of total additional jobs from 2001 to 2018. Among the 20 sectors, no sector lost jobs and 12 sectors had an average annual job growth rate above the overall Hawaii County average of 1.7 percent.

To measure the performance of the industries in comparison with the state overall, the Industry Life Cycle model was applied. An industry is in the **Emerging Group** if the industry has been performing well by showing both job growth and an increase in their competitive share of the state (county growth rate is higher than that of the state). However, these industries have yet to achieve a concentration in the county's economy equal to the same industry for the state. An industry is in **Base-Growth Group** if the industry has been growing their job counts and are increasing their competitive State of Hawaii industry share. Moreover, they have exceeded the State of Hawaii level of industry concentration in the economy and are probably exporting at least a proportion of their output. An industry is in **Transitioning Group** if the industry has been maintaining or growing their workforce, however, they are losing competitive State of Hawaii industry share (growing more slowly than the same industry in the state). This is typical of mature industries that are still important to the economy but are having difficulty maintaining State of Hawaii market share.

Based on the above criterion, seven sectors (Agriculture, Mining, Retail Trade, Entertainment, Real Estate, Administrative Services, Manufacturing) in Hawaii County qualified as base-growth sectors for the 2001 to 2018 period. These sectors have been growing faster than the state counterparts and have been exceeding the state level of industry concentration. These seven sectors accounted for 36.6 percent of the total jobs in 2018. There were nine sectors (Healthcare, Wholesale Trade, Professional Services, Transportation, Private Educational Services, Information, Government, and Finance and Insurance) in the emerging category. These sectors accounted for 43.2 percent of the total jobs in 2018. The industries in the above two groups have greater growth potential in the future. There were four sectors (Accommodation and Food Services, Management of Companies, Construction, and Utilities) in the transitioning category. They accounted for 20.2 percent of the total jobs in 2018. These four industries are still very important to the county but need greater effort to maintain them at the current level. No sector lost jobs in the 2001 to 2018 period.

In 2018, the average earnings of all industries for Hawaii County was \$45,966, 19.2 percent below the state average. Among the 20 sectors, in only three sectors (Utilities, Entertainment, and Government) their average earnings for Hawaii County were above the state average. For the following sectors, the average earnings for Hawaii County were significantly below the state average: Finance and Insurance, Management of Companies, Professional Services, Information, Health Care, Construction, Mining, Transportation, Manufacturing, and Wholesale Trade.

From 2001 to 2018, Hawaii County's average earnings for all industries combined increased 2.5 percent per year in nominal measures (not inflation adjusted), 0.2 of a percentage points below the state average. The average earnings for Hawaii County increased the most in the Government sector; followed by Educational Services, Administrative and Support and Waste Management, Agriculture, Forestry, Fishing and Hunting, and Arts, Entertainment, and Recreation. The average earnings increased the least for Mining, Quarrying, and Oil and Gas Extraction; followed by Real Estate and Rental and Leasing, Professional, Scientific, and Technical Services, Construction, and Information.

TABLE S-2. INDUSTRY SECTORS MAPPED BY PERFORMANCE, 2001-2018

Hawaii County Total Jobs, 2018: 107,926 Average Annual Earnings, 2018: \$45,966 Net Change in Jobs, 2001-2018: 33.4%					
Group	Change in Jobs	Average Earnings	CS	LQ2018	HI County Jobs 2018
Base-Growth Group: 36.6% of Jobs					
Agriculture, Forestry, Fishing and Hunting	14.1%	25,698	0.012	4.287	7,300

I. INTRODUCTION

RESEARCH OBJECTIVES

Hawaii Senate Concurrent Resolution 86 of the 2019 Legislative Session requested that the Department of Business, Economic Development and Tourism (DBEDT) to conduct a study on potential industries, other than tourism, to promote economic development in the county of Hawaii. This report is a response to the legislature request.

The analysis in this report uses employment and earning data at the 20-industry level as defined by the North American Industry Classification System (NAICS). The objective of this report is to examine Hawaii County's industry sectors and their performance against the state overall. Specifically, this study has the following research objectives:

- 1) To benchmark the Hawaii County's economic sectors.
- 2) To compare the job and earnings structures between Hawaii County and the State of Hawaii.
- 3) To compare the historical performance of the economic sectors between Hawaii County and the State of Hawaii.
- 4) To examine the performance in each of the 20 sectors for Hawaii County.

DATA SOURCES

The major data source is the Economic Modeling Specialists, Inc. (EMSI). EMSI data consist primarily of jobs and labor earnings that are available annually at the six-digit NAICS level.¹ The EMSI data are available at both the state and the county level, but only available since 2001.

MAJOR INDUSTRY SECTORS OF THE ECONOMY

The NAICS defines 20 sectors at the 2-digit level. As shown in Table 1, in 2018, the 20 industry sectors for Hawaii County had a total of 107,926 jobs. The average annual earnings for all sectors for Hawaii County was \$45,966 per job in 2018.

¹ The basic data are compiled by Economic Modeling Specialists, Inc. (EMSI) and processed by DBEDT. EMSI supplements data from the Federal Departments of Labor and Commerce by including estimates of proprietors and self-employed jobs, and by estimating data for very small industries that are not reported by the Federal agencies due to disclosure issues.

TABLE 1. JOB AND AVERAGE EARNING FOR HAWAII COUNTY IN 2018

Industry	2018 Jobs	% of Total Jobs	NAICS	2018 Average Earnings
All Industry Total	107,926	100.00		45,966
Government	14,979	13.88	90	77,226
Accommodation and Food Services	14,319	13.27	72	38,143

II. EMPLOYMENT ANALYSIS

INDUSTRY RANKING IN 2018

As noted in the previous section, the economy includes 20 sectors based on the 2-digit NAICS code. This section examines the relative performance of the 20 sectors using employment data and compares Hawaii County with the State of Hawaii.

Figure 1 compares the share of jobs for the 20 sectors. In 2018, the top five sectors for Hawaii County were: Government, Accommodation and Food Services, Retail Trade, Health Care and Social Assistance, and Administrative and Support and Waste Management. These sectors together accounted for about 55.0 percent of Hawaii County's total jobs in 2018. The top five sectors for Hawaii County were also the top five sectors of the state. The respective sectors accounted for 57.8 percent of state total jobs in 2018.

The job share of Hawaii County's Agriculture, Forestry, Fishing and Hunting sector was 5.2 percentage points above that of the state average; this was followed by Retail Trade (1.8 percentage point), Accommodation and Food Services (0.7 of a percentage point), Construction (0.7 of a percentage point), and Administrative and Support and Waste Management (0.7 of a percentage point). On the other hand, the job share of Hawaii County's Government sector was 5.9 percentage points below that of the state average; this was followed by Finance and Insurance (1.0 percentage point below), Transportation and Warehousing (0.8 of a percentage point below), Professional, Scientific, and Technical Services (0.8 of a percentage point below), and Management of Companies and Enterprises (0.7 of a percentage point below).

The above analysis indicates that Hawaii County was more concentrated in Agriculture, Tourism, construction, and Administrative Support but less so in Government, Finance and Insurance, Transportation, Professional Services, and Management Services, as compared with the state overall.

FIGURE 1. JOB SHARE COMPARISON FOR 2018 (% OF TOTAL JOBS)

Source: EMSI and DBEDT, READ.

JOB GROWTH FOR HAWAII COUNTY: 2001-2018

From 2001 to 2018, of the 20 industry sectors for Hawaii County, no sector lost jobs over the period and 12 had an average annual job growth rate above the overall Hawaii County average of 1.7 percent (Figure 2). Mining, Quarrying, and Oil and Gas Extraction had the highest job growth; followed by Educational Services, Administrative and Support and Waste Management, Transportation and Warehousing, and Real Estate and Rental and Leasing.

Though Mining, Quarrying, and Oil and Gas Extraction had the highest jobs growth between 2001-2018, this industry sector was still the smallest among the 20 industry sectors with only 215 jobs in 2018.

FIGURE 2. HAWAII COUNTY AVERAGE ANNUAL JOB GROWTH RATE, 2001-2018

Source: EMSI and DBEDT, READ.

While this study focuses more on long-term trends, it is important to examine how jobs have been impacted by the recession. The Hawaii economy experienced severe job losses from the recession that began in late 2007. As shown in Table 2, from 2001 to 2018, Hawaii County added 27,047 jobs; 21,680 jobs were added from 2001 to 2007, and 5,367 jobs were added from 2007 to 2018.

TABLE 2. HAWAII COUNTY JOB CHANGES FROM 2001 TO 2018

Industry Group	Changes in Jobs		
	01-07	07-18	01-18
All Industry Total	21,680	5,367	27,047
Administrative and Support and Waste Management	1,623	2,296	3,919
Health Care and Social Assistance	1,276	1,650	2,926
Accommodation and Food Services	1,895	793	2,688
Retail Trade	2,240	130	2,370
Government	1,114	1,223	2,338
Real Estate and Rental and Leasing	1,849	303	2,152
Other Services (except Public Administration)	1,514	337	1,851
Transportation and Warehousing	1,064	430	1,495
Professional, Scientific, and Technical Services	1,013	255	1,268
Educational Services	649	425	1,074
Finance and Insurance	624	290	914
Agriculture, Forestry, Fishing and Hunting	1,173	-273	900
Arts, Entertainment, and Recreation	1,069	-198	870

Mining, Quarrying, and Oil and Gas Extraction	6	157	163
Management of Companies and Enterprises	45	55	101

Source: EMSI and DBEDT, READ.

As shown in Figure 3, from 2001 to 2007, the annual growth rate of all sectors combined for Hawaii County was 4.0 percent. Among the 20 sectors, no one lost jobs and 11 sectors had an average annual job growth rate above the overall Hawaii County average of 4.0 percent. The strongest performers during this period were Construction, Educational Services, Transportation and Warehousing, Real Estate and Rental and Leasing, and Arts, Entertainment, and Recreation.

FIGURE 3. HAWAII COUNTY AVERAGE ANNUAL JOB GROWTH RATE, 2001-2007

Source: EMSI and DBEDT, READ.

As shown in Figure 4, from 2007 to 2018, Hawaii County’s annual average growth rate for all sectors combined was 0.5 percent. Among the 20 sectors, five sectors lost jobs and 13 sectors had an average annual job growth rate above the overall Hawaii County average of 0.5 percent. The strongest performers during this period were the Mining, Quarrying, and Oil and Gas Extraction Sector; followed by Administrative and Support and Waste Management, Utilities, Educational Services, and Health Care and Social Assistance.

FIGURE 4. HAWAII COUNTY AVERAGE ANNUAL JOB GROWTH RATE, 2007-2018

Source: EMSI and DBEDT, READ.

INDUSTRY CONTRIBUTIONS TO JOB GROWTH: 2001-2018

Industries with faster job growth rates may not be the heavier contributor to the overall job growth due to the size of the industry. For example, Mining, Quarrying, and Oil and Gas Extraction had the highest average annual job growth rate, but the industry sector was the smallest with only 163 jobs added during the 2001-2018 period. To account for both the sizes of the industry and the growth rates, the contributions to the total additional jobs was calculated.

As shown in Table 3, from 2001 to 2018, Hawaii County added 27,047 jobs. Administrative and Support and Waste Management contributed the most job growth (14.5 percent of total additional jobs); followed by Health Care and Social Assistance (10.8 percent), Accommodation and Food Services (9.9 percent), Retail Trade (8.8 percent), and Government (8.6 percent). The top 5 sectors accounted for 52.7 percent of total additional jobs from 2001 to 2018. Among the 20 sectors, no sector lost jobs and 12 sectors had an average annual job growth rate above the overall Hawaii County average of 1.7 percent.

TABLE 3. CONTRIBUTIONS TO TOTAL ADDITIONAL JOBS FROM 2001 TO 2018

Industry Group	Contribution to Job Growth 01-18		
	Hawaii County	State	Hawaii above State
Administrative and Support and Waste Management	14.5%	9.9%	4.6%
Health Care and Social Assistance	10.8%	14.2%	-3.4%
Accommodation and Food Services	9.9%	14.8%	-4.8%
Retail Trade	8.8%	4.5%	4.3%
Government	8.6%	7.6%	1.0%
Real Estate and Rental and Leasing	8.0%	8.6%	-0.7%
Other Services (except Public Administration)	6.8%	5.6%	1.3%
Transportation and Warehousing	5.5%	6.0%	-0.5%
Professional, Scientific, and Technical Services	4.7%	5.9%	-1.2%
Educational Services	4.0%	3.9%	0.1%
Finance and Insurance	3.4%	4.3%	-1.0%
Agriculture, Forestry, Fishing and Hunting	3.3%	-0.6%	3.9%
Arts, Entertainment, and Recreation	3.2%	2.8%	0.4%
Construction	3.1%	8.3%	-5.2%
Wholesale Trade	2.0%	1.0%	1.0%
Manufacturing	0.8%	0.0%	0.8%
Utilities	0.8%	1.4%	-0.6%
Information	0.8%	-1.1%	1.8%
Mining, Quarrying, and Oil and Gas Extraction	0.6%	0.3%	0.3%
Management of Companies and Enterprises	0.4%	2.1%	-1.7%

STATE COMPETITIVENESS OF HAWAII COUNTY

Another measure that can help shed light on the economy is the performance compared with the State of Hawaii industry average for each sector. If a Hawaii County sector has an average annual growth rate that is higher than the state average for the respective sector, then the Hawaii County sector is effectively increasing its competitive share of the total State of Hawaii industry. Conversely, if Hawaii County's growth rate for a respective sector is less than the state average, then the Hawaii County sector is effectively decreasing its competitive share of the total State of Hawaii industry.

Figure 5 shows how much more or less Hawaii County's sectors grew per year on average compared with the respective sectors of the state. For instance, over the 2001 to 2018 period, jobs in the Mining, Quarrying, and Oil and Gas Extraction Sector grew at an average annual rate that was 3.7 percentage points higher for Hawaii County than the respective sector for the state. Thus, Hawaii's Mining, Quarrying, and Oil and Gas Extraction Sector increased its competitive State of Hawaii industry share. On the other hand, the Utilities Sector lost State of Hawaii industry share due to an average annual growth rate that was 1.5 percentage points below the State of Hawaii sector growth rate.

FIGURE 5. GAIN OR LOSS OF STATE OF HAWAII COMPETITIVE INDUSTRY SHARE, 2001-2018

Source: EMSI and DBEDT, READ.

Of Hawaii County’s 20 sectors, only four sectors lost competitive share over the 2001-2018 period. Sectors that have both positive job growth and an increase in competitive state industry share represent the best performing industry sectors over the period. Industry sectors with the higher competitive share metric are probably showing a higher comparative advantage compared with the respective sectors in the State of Hawaii.

INDUSTRY CONCENTRATION - HAWAII COUNTY’S SPECIALTIES

The third performance metric that helps in the evaluation of the industry portfolio is job concentration (Figure 6). This is a measure of the Hawaii County’s level of specialization in each respective sector and helps shed light on the sectors’ export potential.

FIGURE 6. CONCENTRATION OF INDUSTRY EMPLOYMENT COMPARED TO STATE, 2018

Source: EMSI and DBEDT, READ.

Export activity brings new money into Hawaii County and is a basis for long-term industry growth. Unfortunately, estimates of industry exports are not part of standard industry data programs. Thus, it is not clear how much output in a given sector is exported or consumed by out-of-county consumers.

However, it is possible to identify sectors that are likely exporting by measuring the concentration of their employment in the county’s economy. As explained above, an industry that employs a higher proportion of jobs for Hawaii County than the same industry for the state is relatively more concentrated and is more likely to be exporting a portion of its output.

Industry concentration is measured by a metric called the Location Quotient or LQ for short. The LQ for an industry at the county level that is equal to the state level is 1.0. Hawaii County industries with an LQ measure of more than 1.0 are more concentrated in the county economy than the same industry for the state. Conversely, those industries that are below 1.0 are less concentrated in the county economy than the state as whole.

Of the 20 sectors for Hawaii County, ten sectors had a concentration level for Hawaii County’s economy that was higher than the respective sector for the state. Sectors that are less concentrated for Hawaii County may also be exporting some of their output. However, a majority of the output is probably supplying local demand.

PERFORMANCE MAP FRAMEWORK: IDENTIFYING EMERGING INDUSTRIES

A framework to better understand the overall implications of these key performance metrics is the performance map adapted from the industry life cycle model. The performance map breaks industries in the economy into four generalized stages of life, starting with an *emerging* phase, moving to a *base-growth* industry phase, followed by a mature or *transitioning* phase and finally a *declining* phase. Of course, not all industries fit nicely into this notion, especially over short periods of time. However, with some qualifications, this notion of development stages can help us evaluate the status of the all industry portfolio.

Based on the performance metrics from Figures 2, 5, and 7, the 20 sectors can be placed into one of four life-cycle quadrants according to the criteria shown in Table 4 and described below.

TABLE 4. PERFORMANCE MAP CRITERIA

TRANSITIONING	BASE-GROWTH
<ul style="list-style-type: none"> • Positive job growth • Losing competitive national industry share 	<ul style="list-style-type: none"> • Positive job growth • Highly concentrated in the economy • Increasing competitive national industry share
DECLINING	EMERGING
<ul style="list-style-type: none"> • Losing jobs over period 	<ul style="list-style-type: none"> • Positive job growth • Current low concentration in the economy • Increasing competitive national industry share

Emerging Quadrant: These are industries that are potentially in the early, take-off stage. They have been performing well by showing both job growth and an increase in their competitive share of the state. However, these industries have yet to achieve a concentration in the county's economy equal to the same industry for the state. An *emerging* industry is one that has found a competitive niche in the economy and is gaining in competitive State of Hawaii industry share. At some point, if the process continues, the industry's concentration will exceed the State of Hawaii level and the emerging industry will graduate to a base-growth industry in the county's economy.

Base-Growth Quadrant: These are industries that have become potential economic drivers. They are growing their job counts and are increasing their competitive State of Hawaii industry share. Moreover, they have exceeded the State of Hawaii level of industry concentration in the economy and are probably exporting at least a proportion of their output.

Transitioning Quadrant: Transitioning industries are still maintaining or growing their workforce, however, they are losing competitive State of Hawaii industry share (growing more slowly than the same industry in the state). This is typical of mature industries that are still important to the economy but are having difficulty maintaining State of Hawaii market share. They are considered transitioning because they could either continue to lose industry share and eventually fall into the declining quadrant or reinvigorate themselves and begin to regain industry share and continue growing. Also, in this quadrant may be former emerging industries that never reached base-growth status before losing competitive state industry share and some previously declining industries that are fighting back into competitiveness.

Declining Quadrant: The declining quadrant contains industry sectors showing job losses over the period. All these industry sectors have lost jobs to some extent between 2001 and 2018. Most industries that are losing jobs are also losing competitive share within the state. However, while they are declining in jobs for the period, these industries are not necessarily dying industries. Some temporary circumstances may have put some of Hawaii County's industries into the declining quadrant for the period studied. Their appearance in the declining quadrant is a red flag that warrants more careful analysis to understand the problem.

It should be emphasized that the performance map framework is more of a guide to understand an industry's situation rather than a conclusion about the value of the industry to the economy. It provides a starting point for assessing the strengths and weaknesses of the industries in the portfolio. Also, it is important to note that, within industries that are experiencing mixed or poor performance, there may be pockets of very successful firms.

Table 5 shows how each of the respective NAICS-based sectors fell on the performance map based for the 2001 to 2018 performance measures. Combined, Hawaii County had 107,926 jobs in 2018. From 2001 to 2018, total jobs for Hawaii County increased 33.4 percent. The average earning of the whole economy was \$45,966 in 2018.

There were seven sectors that qualified as base-growth sectors for the 2001 to 2018 period. These sectors accounted for 36.6 percent of the total jobs in 2018. There were nine sectors in the emerging category. These sectors accounted for 43.2 percent of the total jobs in 2018. There were four sectors in the transitioning category. They accounted for 20.2 percent of the total jobs in 2018. No sector lost jobs in the 2001 to 2018 period.

TABLE 5. ALL INDUSTRY SECTORS MAPPED BY PERFORMANCE, 2001-2018

Hawaii County Total Jobs, 2018: 107,926 Average Annual Earnings, 2018: \$45,966 Net Change in Jobs, 2001-2018: 33.4%

III. EARNINGS ANALYSIS

Figure 7 compares the average earnings between Hawaii County and the state. In 2018, the average earnings of all industries for Hawaii County was \$45,966, 19.2 percent below the state average. Only three sectors (Utilities, Arts, Entertainment, and Recreation, and Government) had average earnings for Hawaii County that were above the state average. In the following sectors, the average earnings for Hawaii County were significantly below the state average: Finance and Insurance, Management of Companies and Enterprises, Professional, Scientific, and Technical Services, Information, Health Care and Social Assistance, Construction, Mining, Quarrying, and Oil and Gas Extraction, Transportation and Warehousing, Manufacturing, and Wholesale Trade.

FIGURE 7. COMPARISON OF AVERAGE EARNINGS IN 2018 (\$/JOB)

Source: EMSI and DBEDT, READ.

The top five sectors for Hawaii County with the highest average earnings in 2018 were: Utilities, Management of Companies and Enterprises, Government, Construction, and Information. The five sectors in Hawaii with the lowest average earnings were: Agriculture, Forestry, Fishing and Hunting, Other Services (except Public Administration), Administrative and Support and Waste Management, Arts, Entertainment, and Recreation, and Mining, Quarrying, and Oil and Gas Extraction.

As shown in Table 6, from 2001 to 2018, Hawaii County's average earnings for all industries combined increased 2.5 percent per year, 0.2 of a percentage points below the state average. The average earnings for Hawaii County increased the most in the Hawaii government; followed by Educational Services, Administrative and Support and Waste Management, Agriculture, Forestry, Fishing and Hunting, and Arts, Entertainment, and Recreation. The average earnings increased the lowest in Mining, Quarrying, and Oil and Gas Extraction; followed by Real Estate and Rental and Leasing, Professional, Scientific, and Technical Services, Construction, and Information.

TABLE 6. COMPARISON OF THE GROWTH RATE OF AVERAGE EARNINGS FROM 2001 TO 2018

Figure 8 compares the earnings shares of the 20 sectors. In 2018, the top five sectors for Hawaii County with largest earnings shares were: Government, Accommodation and Food Services, Health Care and Social Assistance, Retail Trade, and Construction. These sectors together accounted for 60.7 percent of Hawaii County’s total earnings in 2018. The respective sectors accounted for 59.3 percent of the state total earnings in 2018.

The earnings share of Hawaii County’s Agriculture, Forestry, Fishing and Hunting Sector was 2.9 percentage points above that of the state average; this was followed by Retail Trade (2.5 percentage points), Accommodation and Food Services (2.4 percentage points), Construction (1.0 percentage point) and Arts, Entertainment, and Recreation (0.7 of a percentage point). On the other hand, the earnings share of Hawaii County’s Government Sector was 3.4 percentage points below that of the state average; this was followed by Finance and Insurance (2.1 percentage point below), Professional, Scientific, and Technical Services (1.5 percentage point below), Management of Companies and Enterprises (1.4 percentage point below), Health Care and Social Assistance (0.9 of a percentage point below), and Transportation and Warehousing (0.9 of a percentage point below).

FIGURE 8. COMPARISON OF EARNINGS IN 2018 (% OF TOTAL EARNINGS)

Source: EMSI and DBEDT, READ.

From 2001 to 2018, Hawaii County's total earnings increased \$2,519 million. As shown in Table 7, the Government Sector contributed the most earnings growth (25.3 percent of total earnings growth); followed by Health Care and Social Assistance (10.5 percent), Accommodation and Food Services Government (10.1 percent), Retail Trade (7.6 percent), and Administrative and Support and Waste Management (7.0 percent). The top 5 sectors accounted for 60.6 percent of total additional earnings from 2001 to 2018.

Government

The Government Sector ranked first in terms of its share in 2018 total jobs (13.9 percent). With an average annual job growth rate from 2001 to 2018 at 1.0 percent, lower than the average growth rate of all industry total (1.7 percent), the contribution to total additional jobs from 2001 to 2018 was 8.6 percent, which ranked the 5th among all industries (Table 3). Average annual earnings in 2018 was \$77,226, about 68.0 percent above the average earnings of all industry total that year. The average annual growth rate of earnings was 4.5 percent, above the average growth rate of all industry total (4.0 percent) between 2001 and 2018, and its contribution to the additional earnings was the highest among all industry sectors at 25.3 percent (Table 7).

As shown in Table 10, the Government Sector includes nine groups based on six-digit NAICS code. In 2018, the State Government employed 9,579 jobs, the Local Government employed 2,697 jobs, the Federal Military and Civilian employed 1,438 and 1,264 jobs, respectively. From 2001 to 2018, the State Government added 1,601 jobs, the Local Government added 442 jobs, the Federal Civilian Government added 268 jobs, and the Federal Military Government added 27 jobs.

TABLE 10. JOBS AND AVERAGE EARNINGS IN THE GOVERNMENT SECTOR

NAICS	Industry	2018 Jobs	Job Changes 01-18	2018 Average Earnings
90	Government	14,979	2,338	\$ 77,226
901149	US Postal Service	235	-4	\$ 89,352
901199	Federal Government, Civilian, Excluding Postal Service	1,030	272	\$ 101,321
901200	Federal Government, Military	1,438	27	\$ 22,801

Accommodation and Food Services

Accommodation and Food Services ranked second in terms its share in 2018 total jobs (13.3 percent). With an average annual job growth rate from 2001 to 2018 at 1.2 percent, below the average growth rate of all industry total (1.7 percent), its contribution to total additional jobs from 2001 to 2018 was 9.9 percent, ranked the third largest (Table 3). The annual average earnings in this sector was \$38,143 in 2018, 17.0 percent below the average of all industry total that year. The average annual earnings growth rate in this sector was 3.6 percent between 2001 and 2018, lower than the average growth rate of all industry total (4.0 percent). The sector's contribution to additional earnings from 2001 to 2018 was 10.1 percent, was also the third largest (Table 7).

As shown in Table 11, the Accommodation and Food Services Sector includes 14 industry groups based on six-digit NAICS code. The top five groups in the Accommodation and Food Services Sector which employed the most jobs in 2018 were Hotels (except Casino Hotels) and Motels, Full-Service Restaurants, Limited-Service Restaurants, Snack and Nonalcoholic Beverage Bars, and Bed-and-Breakfast Inns. From 2001 to 2018, the Full-Service Restaurants generated the most additional jobs; followed by Limited-Service Restaurants. The Hotels (except Casino Hotels) and Motels lost the most jobs from 2001 to 2018.

TABLE 11. JOBS AND AVERAGE EARNINGS IN THE ACCOMMODATION AND FOOD SERVICES SECTOR

NAICS	Industry	2018 Jobs	Job Changes 01-18	2018 Average Earnings
72	Accommodation and Food Services	14,319	2,688	\$ 38,143

Source: EMSI and DBEDT, READ.

Retail Trade

Retail Trade ranked third in terms of its share in 2018 total jobs (11.5 percent). With an average annual job growth rate from 2001 to 2018 at 1.3 percent, lower than the average growth rate of all industry total (1.7 percent), its contribution to the total additional jobs from 2001 to 2018 was 8.8 percent, ranked the fourth highest (Table 3). Average earnings in this sector was \$34,654 in 2018, 24.6 percent below the average of all industries. Average annual earnings growth rate in this sector was 3.3 percent between 2001 and 2018, lower than the average growth rate of all industry total (4.0 percent). Its contribution to additional earnings from 2001 to 2018 was 7.6 percent, the fourth highest among all industry sectors (Table 7).

As shown in Table 12, the Retail Trade Sector includes 27 industry groups based on four-digit NAICS code. The top five groups in the Retail Trade Sector which employed the most jobs in 2018 were Grocery Stores, Department Stores, Building Material and Supplies Dealers, Direct Selling Establishments, and Other Miscellaneous Store Retailers. From 2001 to 2018, the Grocery Stores generated the most additional jobs, followed by the Department Stores.

The earnings levels are generally low in the Retail Trade Sector, among the 27 industry groups, only four groups had higher average earnings than the all industry average earnings of \$45,966 in 2018.

TABLE 12. JOBS AND AVERAGE EARNINGS IN THE RETAIL TRADE SECTOR

NAICS	Industry	2018 Jobs	Job Changes 01-18	2018 Average Earnings

Health Care and Social Assistance

The Health Care and Social Assistance Sector's share of total jobs ranked fourth in 2018 (8.9 percent). With an average annual job growth rate from 2001 to 2018 at 2.2 percent, higher than the average growth rate of all industry total (1.7 percent). The contribution to total additional jobs from 2001 to 2018 was 10.8 percent, ranked the second highest (Table 3). The average earning in this sector was \$49,389 in 2018, 7.4 percent above the average earnings of all industry total. The average annual earnings growth rate in this sector was 4.6 percent, higher than the average annual growth rate of all industry total (4.0 percent). The sector's contribution to additional earnings from 2001 to 2018 was 10.5 percent, ranked the second largest (Table 7).

As shown in Table 13, the Health Care and Social Assistance Sector includes 16 groups based on four-digit NAICS code. The top five groups in the Health Care and Social Assistance Sector which employed the most jobs in 2018 were Individual and Family Services, Offices of Physicians, Offices of

Other Health Practitioners, Outpatient Care Centers, and Home Health Care Services. From 2001 to 2018, Individual and Family Services generated the most additional jobs. Followed by Outpatient Care Centers.

In 2018, the average earnings ranged from a high \$91,922 in Offices of Physicians to a low of \$23,139 in Individual and Family Services. Among the 16 industry groups, seven groups had higher average earnings than the all industry average earnings of \$45,966 in 2018.

TABLE 13. JOBS AND AVERAGE EARNINGS IN THE HEALTH CARE AND SOCIAL ASSISTANCE SECTOR

NAICS	Industry	2018 Jobs	Job Changes 01-18	2018 Average Earnings
62	Health Care and Social Assistance	9,611	2,926	\$ 49,389

Administrative and Support and Waste Management

The Administrative and Support and Waste Management Sector's share of total jobs ranked fifth in 2018 (7.5 percent). This was due to this industry's growth rate being significantly higher than the overall industry total with an average annual job growth rate from 2001 to 2018 at 4.0 percent, significantly higher than the average growth rate of all industry total (1.7 percent). The contribution to total additional jobs from 2001 to 2018 was 14.5 percent, ranked the highest among all industry sectors (Table 3). The average annual earnings in this sector was \$31,696 in 2018 per job, which was 31.0 percent below the all industry average. The average annual earnings growth rate in this sector was 6.8 percent between 2001 and 2018, above the average growth rate of all industry total (4.0 percent). The sector's contributions to the additional earnings from 2001 to 2018 was 7.0 percent, ranked the fifth highest (Table 7).

As shown in Table 14, the Administrative and Support and Waste Management Sector includes 11 groups based on the four-digit NAICS code. The top five groups by number of jobs in 2018 were Services to Buildings and Dwellings, Employment Services, Travel Arrangement and Reservation Services, Investigation and Security Services, and Business Support Services. From 2001 to 2018, the Services to Buildings and Dwellings generated the most additional jobs, followed by Employment Services.

The earnings levels are generally low in this sector; among the 11 industry groups, only three groups had higher average earnings than the all industry average earnings of \$45,966 in 2018.
