

Hawai'i Community Stewardship Directory

December 2015

Acknowledgements:

The original directory was prepared in March 2008, as part of the Place-, Culture-, and Community-Based Approaches to Natural and Cultural Resource Management Project (Project) by Tetra Tech EM Inc. under contract to the Hawai'i CZM Program, Office of Planning, Department of Business, Economic Development and Tourism and by 58 participating community stewardship groups and organizations throughout Hawai'i.

Updated versions thereafter are completed by Hawai'i CZM Program staff and would not be possible without the interest and response received from the community stewardship groups across the islands that are dedicated toward the conservation, preservation, and management of Hawai'i's precious natural and cultural resources.

Community-based organizations interested in having their information included in the next update may contact Justine Nihipali at the Hawai'i CZM Program (justine.w.nihipali@hawaii.gov or 808-587-2803).

A publication of the Coastal Zone Management Program, Office of Planning, Department of Business, Economic Development and Tourism, State of Hawai'i, pursuant to National Oceanic and Atmospheric Administration (NOAA) Award No. NA14NOS4190079, funded in part by the Coastal Zone Management Act of 1972, as amended, administered by the Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, United States Department of Commerce. The views expressed herein are those of the author(s) and do not necessarily reflect the views of NOAA or any of its sub-agencies.

Overview

The Community Stewardship Directory (Directory) is an ongoing effort of the Hawai‘i Coastal Zone Management (CZM) Program to help community groups and organizations connect with each other to share their experiences and lessons learned in natural and cultural resources management. The Directory is one element to implement the Hawai‘i Ocean Resources Management Plan (ORMP). The ORMP, revised in 2013 and available through the CZM Program website (<http://hawaii.gov/dbedt/czm/>), promotes place-, culture-, and community-based approaches to natural and cultural resource management and charts a new course of action that advocates for the community and all levels of government to work together collaboratively. The Directory will be updated periodically.

Contributors to this directory completed an organizational profile that included names and locations of projects that typify their organization’s activities. Organizations were asked to select project locations based on the State’s jurisdictional district boundaries, rather than specific ahupua‘a or traditional moku, as there are currently disagreements for some names and boundaries across the State. As these issues become resolved, we hope to incorporate these boundaries into updated versions.

We hope this Community Stewardship Directory is a useful resource as organizations conduct projects and programs across the State. Currently, **95 organizations** have requested inclusion in this directory. Organizations are listed in alphabetical order, and include contact information, mission statements, areas where they conduct stewardship activities, and notable projects. As this directory shows, community organizations are active across all of the main islands, dedicating their time, knowledge and inspiration to enhancing Hawai‘i’s precious resources.

The following list provides a translation of Hawaiian words found in the directory.

Mission Statement

To strive to link three overlapping domains - the environmental, the human and the technological, to understand humans as inhabitants and transformers of the earth. It has roots in both the physical and the social sciences. An overriding spatial perspective is reflected in such integrative concepts as place, region, landscapes and seascapes, human and physical systems. The search for such understanding involves a thorough study of (a) interlocking systems of the natural environment (climate, landforms, oceans, biota); (b) the social use (and abuse) of natural resources; (c) the diverse historical, cultural, social, economic, and political structures and processes which affect the spatial organization of population groups and their activities; and (d) areas of the Earth's surface at various scales - cities, regions, nations, states or landscapes - where integrated interpretation of cultural, economic and political processes can be attempted.

Active on:

- All Islands

Past academic activities have occurred *mauka*, *mawaena* and *makai*. The University of Hawai'i Geography Department currently has 16 full-time faculty positions and 3 staff positions.
