## The Three Guiding Perspectives of the Hawai'i ORMP

### Charting a New Course for Hawai'i with the Ocean Resources Management Plan

Agencies and organizations in Hawai'i are changing the way they manage activities affecting natural and cultural resources by implementing the Hawai'i Ocean Resources Management Plan (ORMP).

#### The Ocean Resources Management Plan (ORMP) is...

- ...an integrated approach to managing Hawai'i's natural and cultural resources.
- ...built upon Native Hawaiian management principles, emphasizing the importance of land and sea connections and working together toward a common vision.
- ...based on three guiding perspectives.

#### Who is Involved?

- The Hawai'i Coastal Zone Management (CZM) Program is responsible for coordinating the implementation and periodic updates of the ORMP.
- A network of government, academic, and community partners work to implement and further develop the ORMP.
- Please see the logos of the partners involved across the bottom.

- Download the ORMP at:** [http://www.state.hi.us/dbedt/czm/ormp/reports/ormp\\_2006.pdf](http://www.state.hi.us/dbedt/czm/ormp/reports/ormp_2006.pdf)

#### Perspective 1: Connecting Land and Sea

Looking to the mountain from the shore, we see the land connected to the ocean and understand that inland activities directly affect the ocean resources and the benefits we derive from them.

#### Perspective 2: Preserving Our Ocean Heritage

The ocean offers cultural enhancement, inspiration, and recreation. It is also where we harvest valuable resources and carry out numerous economic activities. In order to continue to benefit from the ocean, we need to take better care of it.

#### Perspective 3: Promoting Collaboration and Stewardship

In order to improve and maintain our efforts caring for the land and sea, we must work together and share our knowledge, experiences, and resources.
