

Layer Name: Boating Facilites
File Name: BoatingFacilities
Layer Type: Point
Status: Complete
Geographic Extent: Islands of Hawaii, Kauai, Lanai, Maui, Molokai, and Oahu
Projection: UTM Zone 4 (meters)
Datum: NAD 83 HARN

Please note - if you are using data in the [State's web services](#) or downloading from the [State's geoportal](#), the data is served and exported in WGS84 coordinates, although it is stored internally in UTM coordinates.

Description: This data shows the location of boating facilities on the main Hawaiian islands as of December, 2002.

Source: Digitized by DLNR, Division of Aquatic Resources (DAR) staff, December, 2002.

History: This dataset was generated using a variety of sources, including NOAA Raster Nautical Charts, DLNR/DOBOR, Bryans Sectional Maps and Charlie's Charts of the Hawaiian Islands. The raster nautical charts were re-projected from their original projection/datum to UTM Zone 4, NAD 83 using NOAA's Nautical Chart Re-projector v 1.8.3. NOAA's ArcView Chart Viewer extension was used to display the re-projected nautical charts in ArcView 3.2. Data points were then plotted using the individual charts as basemaps. The data was then merged into a single dataset / shapefile covering the entire state. Completed, December, 2002.

Attributes:

Points:	
ID	Point ID
ISLAND	Island on which the boating facility is located
NAME	Name of the facility
FACILITY	Type of facility
JURISDICTION	Jurisdiction under which facility exists

Note: Data not to be used for navigational purposes. Data were not reviewed or authenticated by the Office of Coast Survey, NOAA National Ocean Service. NOAA is not responsible for use of this data as a navigational tool.
