

Layer Name: 2010 United States Congressional District Boundaries

Name: cd10

Layer Type: Polygon

Status: Complete

Geog. Extent: Main Hawaiian Islands

Projection: Universal Trans Mercator, Zone 4 (Meters), NAD83

Description: Congressional Districts for the 111th Congress (January 2009 to 2011)

Source: U.S. Census Bureau (September 2011)

History: Clipped to Census Blocks coastline. Projected from decimal degrees to UTM Zone 4 NAD83 using ArcToolbox. Removed extraneous fields (e.g., State Code).

Notice: Sept. 9, 2011: Several census layers have been revised due to two census blocks being inadvertently deleted as a result of clipping with the State GIS coastline layer:

- Block number 150030001122002, population = 95 (Kuapa Isle, Hawaii Kai, Oahu)
- Block number 150039814001002, population = 15 (islet just west of Sand Island, Oahu).

Population calculations would have only been affected for analysis done at the census block level. For consistency, the following layers were revised with the coastline from the 2010 census blocks layer: blocks, block groups, census county divisions, census designated places and tracts.

We regret any inconvenience this error may have caused.

Attributes: Polygons:

GEOID10 4-digit (State-2, District-2)

NAMELSAD10 District Number

CDSSESSN Congress Session

Note: The official City and County of Honolulu census geography includes the Northwestern Hawaiian Islands, which we have not included in this layer.
