

Layer Name: Reserves

Layer Type: Polygon

Status: Complete

Geog. Extent: Islands of Niihau, Kauai, Oahu, Maui, Molokai, Lanai, and Hawaii

Projection: Universal Trans Mercator, Zone 4 (Meters)

Datum: NAD 83 HARN

Description: Various reserves, preserves, parks, etc. as of January, 2017.

Abstract: Various reserves, preserves, parks, etc. as of January, 2017. Reserve boundaries are generally based off of the County's tax map key (TMK) layer. Since boundaries from other agencies are derived from different source scales, these boundaries are modified to match the TMK layer with exceptions.

Purpose: Centralized location of managed lands protecting natural and cultural resources of the Main Hawaiian Islands.

Source: Originally compiled 2002 by SOH, DLNR, DOFAW from various sources including the data provided by U.S. Fish and Wildlife Refuges, U.S. National Park Service, Division of State Parks, County parcel boundaries and The Nature Conservancy with input from State foresters and others familiar with the reserve boundaries. The boundaries in this layer are not final; they are updated frequently.

Updates to: Forest Reserves (Kauai, Oahu, and Hawaii); Natural Area Reserves (Hawaii and Maui); National Wildlife Refuges (Statewide); National Parks (Hawaii and Maui); The Nature Conservancy (Hawaii and Maui). Additional updates to: Kohala F.R. (Waimanu Sec.),Kaohe Mitigation & Puu Mali Mitigation 1/28/16; Kahua Coop GMA 12/16/15; Waimanalo Forest Reserve 10/2/15; Kuia NAR 9/22 /15; removed Ookala Coop GMA 12/16/15.

Note: In some cases, differences in the acreage calculated by the GIS and the acreage listed in county real property records may exist. This can be especially evident in large parcels in remote areas, and is often a result of the difficulty in surveying the steep, overgrown terrain found in these natural areas.

Latest Update – January, 2017
