

Layer Name: 2010 Census Tracts  
Shapefile: tracts10.shp  
Layer Type: Polygon  
Status: Complete  
Geog. Extent: Main Hawaiian Islands  
Projection: Universal Trans Mercator, Zone 4 (Meters), NAD 83  
Description: 2010 Census Tracts  
Source: U.S. Census Bureau (February, 2011).  
History: Clipped to Census Blocks coastline. Projected from decimal degrees to UTM Zone 4 NAD83 using ArcToolbox. Removed extraneous fields (e.g., State Code). Added Tract Names, 2014.  
Notice: Sept. 9, 2011: Several census layers have been revised due to two census blocks being inadvertently deleted as a result of clipping with the State GIS coastline layer:

- Block number 150030001122002, population = 95 (Kuapa Isle, Hawaii Kai, Oahu)
- Block number 150039814001002, population = 15 (islet just west of Sand Island, Oahu).

Population calculations would have only been affected for analysis done at the census block level. For consistency, the following layers were revised with the coastline from the 2010 census blocks layer: blocks, block groups, census county divisions, census designated places and tracts.

We regret any inconvenience this error may have caused.
