

## Testimonials

I'd like to thank you, Dori Palcovich, and Sharon Pang for all your help in our discussion of the last draft of the Health Dept's Administrative Rules. I know that all businesses in the Islands owe you both a debt of gratitude for your honest and forthcoming efforts to allow fairness within the Governmental system. I also appreciate all the effort each board member puts in assuring a fair process.

It is an effort that I am sure does not often yield overt praise and accolades but I for one am convinced that all your efforts are for the betterment of everybody here in Hawaii. That includes the business owners, their employees and families and even the bureaucrats that can't always see the positive side of business.

Your office and the board make me proud and content to know that somebody out there in government has a head on their shoulders and demands some common sense out of politics and reactionary government. Our groups may not always win before the board but we know that we will get a fair process and that is what every business person asks for throughout any governmental system.

Thank you and all of your department.

Sincerely,  
Bill Comerford. Spokesman
