government, and the research community. The State Broadband Data and Development (SBDD) Grant Program is a matching grant program that implements the joint purposes of the American Recovery and Reinvestment Act (ARRA) and the Broadband Data Improvement Act (BDIA). The program has provided a grant to assist the State of Hawaii in gathering and verifying state-specific data on the availability, speed, location, and technology type of broadband services. The data collected and compiled will also be used to develop publicly available state-wide broadband maps and to inform the comprehensive, interactive, and searchable national broadband map that the U.S. Department of Commerce's National Telecommunications and Information Administration (NTIA) is required by the Recovery Act to create and make publicly available by February 17, 2011. The national broadband map will publicly display the geographic areas where broadband service is available; the technology used to provide the service; the speeds of the service; and broadband service availability at public schools, libraries, hospitals, colleges, universities, and public buildings. The national map will also be searchable by address and show the broadband providers offering service in the corresponding census block or street segment. The State of Hawaii is required to contribute at least 20 percent non-federal matching funds toward project costs. In addition, the State of Hawaii must meet the standards described in NTIA's Notice of Funds Availability (NOFA) for this program. U.S.

Quarterly Activities/ Project Description		
The project team has been collecting and processing mapping data from nine (9) providers (Oceanic Cable, Hawaiian Telcom Communications, Inc, Clearwire Corp., TW Telecom Holdings, Inc., Verizon Communications, Inc., Sprint Nextel, AT&T, Inc., Wavecom, and Sandwich Isles Communications, Inc.). These nine (9) providers account for the overwhelming majority of actual broadband subscribers in Hawaii. The project team is in the process of verifying these coverage areas and broadband speed claims. Also, a baseline Community Anchor Institutions database has been compiled and is being updated and verified. The most recent iteration of updated and verified mapping data was submitted to NTIA on September 30, 2010 in accordance with the latest FCC broadband data model. Contracts are being executed for implementing the project's
