Respondents admit to the veracity of the allegations, and Respondent John G's agrees to the voluntary surrender of its license, which shall become effective immediately upon approval of the Settlement Agreement by the Board. Respondent John G's shall not apply for a new license until the expiration of at least five years from the effective date of the surrender of the license.

Cades Schutte

Cades Schutte requests confirmation that a contractor's license is not required to perform construction management services, such as coordinating the design, engineering, procurement, construction, commissioning, testing and initial start-up of a wind power project.

Auwahi Wind Energy LLC will utilize Sempra Renewables Services, LLC to act as Auwahi's agent (with no responsibility or authority to perform or subcontract any construction work), and RMT, Inc. will be the contractor performing and supervising all of the construction on the project.

Recommendation: Sempra is not required to obtain a contractor's license to perform the construction management services as described above.

Chris Salem

Chris Salem requests determination on whether the C-49 Swimming pool contractor license includes the installation of underground electrical conduits, electrical grounding wires for pool lights, and the installation of pool lights.

Recommendation: The installation of underground electrical conduits, electrical grounding wires for pool lights, and pool lights does not fall within the scope of the C-49 license.

Valentina Stewart Watson

Valentina Stewart Watson requests determination on whether a contractor's license is required to perform value engineering services to reduce the cost of construction. Services include consulting with contractors, engineers, and architects. Her client signed a letter of intent to perform value engineering services, which indicated that the contract for the construction will be awarded to him for \$170,000, although he did not hold a contractor's license at that time.

Recommendation: An active contractor's license is required to provide the services described above.

DAGS

DAGS requests determination on whether a contractor with the C-35 Pile driving, pile and caisson drilling, and foundation license may install drilled piers for the Keaau Middle School new classroom building project. Work involves excavating the shaft to the required depth, placing a reinforcing steel cage into the shaft, and pouring concrete.

Recommendation: The C-41 Reinforcing steel license is required to install the rebar; and either the "A" General Engineering, "B" General Building, C-31

Masonry, C-31a Cement concrete, or C-35 license is required to pour the concrete.

DOE

DOE requests determination on whether the C-22 Glazing and tinting license is required to install pre-fabricated polycarbonate translucent panels on the Stevenson Intermediate School re-roofing project. Panels will be installed under the eaves.

Recommendation: The installation of the panels may be performed by the "B" General Building contractor.

Executive Officer Oda stated that she received an inquiry this morning before the Board meeting on whether the C-16 Elevator contractor's license is required for the installation of portable ADA pool lifts. (The Board, at its October 2011 meeting, had recommended that the C-16 Elevator contractor license was required to install ADA compliant pool lifts).

Recommendation: A contractor's license is not required to install a portable pool lift.

After discussion, it was moved by Mr. Yamada, seconded by Mr. Lau, and unanimously carried to approve the above scope recommendations.
