

Specifications
for the Class:

CARPENTER II

Distinguishing Characteristics

This class reflects the working supervisor in the series.

A Carpenter II, in addition to performing skilled carpentry work in the construction, alteration and repair of structural woodwork and wooden articles, as a major work assignment, supervises the work of skilled carpenters as a continuing work assignment, including setting the pace and quality of workmanship.

This class differs from Carpenter Supervisor I in that the Carpenter II spends a majority of the work time in performing skilled carpentry work and, in addition, supervises other skilled carpenters; whereas the Carpenter Supervisor I plans, lays out and inspects the work of a group of several skilled carpenters, and perhaps other workers, on a substantially full-time basis, and only occasionally may perform skilled carpentry work.

Examples of Duties *(Positions may not be assigned all of the duties listed, nor do the examples necessarily include all of the duties that may be assigned. The omission of specific statements does not preclude the assignment of such duties if they are a logical assignment for the position. The classification of a position should not be based solely on the examples of duties performed.)*

Plans, lays out, assigns, and participates in the cutting, fitting and joining of lumber to construct small buildings and a variety of wooden structures; operates and supervises the operation of woodworking machines in the construction of cabinets, shelves, stairs, and other wooden articles; inspects buildings to determine needed repairs, and orders needed supplies and materials; reads blueprints or sketches, and estimates needed material and labor.

Minimum Qualification Requirements

Experience and Training: Six (6) years of work experience in performing a variety of rough and finished carpentry work, of which two years shall have been as a fully competent carpenter; or any equivalent combination of training and experience.

Knowledge of: Practices and methods used in the carpentry trade, including safety procedures; tools, equipment and materials used in the carpentry trade.

Ability to: Use hand and power tools common to the carpentry trade; read and interpret blueprints and sketches; estimate time and materials needed to complete carpentry work and keep records and make reports; plan, lay out, assign and review the work of other skilled carpenters; understand, give and follow oral and written instructions.

Physical and Medical Requirements

Applicants must be able to perform the essential functions of the position effectively and safely, with or without reasonable accommodation.

This is an amendment to the specifications for class Carpenter II, which were approved on May 9, 1983.
