STAFF SUBMITTAL

COMMISSION ON WATER RESOURCE MANAGEMENT

August 21, 2013
Honolulu, Hawaii

Request to Enter into a Joint Funding Agreement with U.S. Geological Survey
For Statewide Hydrologic Data Collection and
Water Resource Monitoring for Federal Fiscal Year (FFY) 2014

SUMMARY OF REQUEST

The Commission staff recommends that the Commission on Water Resource Management (Commission) enter into a Joint Funding Agreement ("Agreement") with the U.S. Geological Survey (USGS) for the inventory and investigation of Hawaii's water resources.

BACKGROUND

The cooperative monitoring of Hawaii's hydrologic resources began in 1909 when the USGS entered into an agreement with the Territory of Hawaii. At its inception, monitoring focused mainly on surface water. Initially only 12 streams were gauged continuously. By 1914, 87 continuous-record stations were gauged. The program grew to a peak in 1966 when 197 gages were operational under the agreement. Over the years, some gauges were discontinued for a variety of reasons, including shifting fiscal priorities, changing economic realities, completed data acquisition objectives, and dwindling partnership engagement in monitoring and data collection.

In 1972, groundwater data collection became an integral part of the Agreement and began establishing the baseline data throughout the State with 170 observation wells. For reasons similar to the surface water gages, observation well data recording has steadily declined over the years such that only 14 well sites now remain to provide data continuity in FFY 2014.

Beginning in 1998, the Commission streamlined the Cooperative Agreement by transferring the crest-stage stream-gauging program to civil defense agencies where these data (e.g. flooding issues) are more relevant to disaster response rather than sustainability issues, and by eliminating duplication of groundwater data collection efforts in wells. Groundwater data gathering changed and expanded to incorporate the data provided by water system purveyors and well owners, who were required by law and rule to report their water-use and groundwater and chloride levels.

A partnership with the Division of Forestry and Wildlife (DOFAW) through its Watershed Management Grant Program (WMGP) boosted the streamflow gauging stations operations on watershed partnership lands. Due to challenging economic times, the WMGP withdrew its support for these gauging operations in watershed management areas, disengaged from the watershed partnerships and from USGS efforts to monitor water resources in watershed areas.

However, to support the recent DOFAW Rain Follows the Forest initiative, the Commission will fund a continuous-record streamflow gage on the Moanalua Stream in the recently acquired Moanalua Valley State Forest Reserve. The data gathered from this gage will help DOFAW evaluate the impact of their watershed restoration efforts.

The Waiahole Trust Fund continues to help defray the cost of monitoring the Waiahole Ditch system and its sources. Exhibit 1 provides a summary of changes to the program, including the operational cost, since FFY 2007. Exhibit 2 shows the changes in the total number of monitoring stations since the program's inception.

The cooperative monitoring of Hawaii's hydrologic resources fulfills the Commission's mandate to "maintain an inventory of all water uses and water resources." Haw. Rev. Stat. §174C-5(14). The program allows the Commission to assess water resource impacts from climate variability, changing land use, and increasing water demands. Maintaining a long-term hydrologic monitoring program with the USGS is an essential component of the Commission's mission to manage Hawaii's water resources.

CURRENT AGREEMENT

Although the nature of the Agreement and relationship of the parties remains the same as the previous year's Agreement, the total number of stream gauging stations has decreased from 28 to 25. A proposed list of stations to be funded in the FFY 2014 agreement is attached (Exhibit 4). The total cost of the agreement will not exceed \$702,650. The Commission's share will not exceed \$433,218. Federal funding to the USGS was reduced in FY 2013 due to sequestration. Additional reductions in Federal funding are anticipated in FY 2014. Because of these changes, the USGS reduced its contribution to the program by 4.5 percent (\$12,678). As a result, CWRM will need to increase its contribution by 3.7 percent (\$15,568) to prevent a further reduction in the number of stations.

Under the Joint Funding Agreement for FFY 2014, the USGS will collect basic hydrologic data and provide data summary reports on water resources throughout the State of Hawaii. A proposed scope of services outlines the expectations of the Agreement (see Exhibit 3). The Agreement will span FFY 2014 (October 1, 2013 to September 30, 2014).

The table below summarizes the annual changes in funding requirements for this Joint Funding Agreement.

COST	FFY2012	FFY2013	FFY2014
Total Joint Funding Requirement	\$857,760	\$699,760	\$702,650
Expected (full-year) CWRM cost-share not to exceed	\$487,760	\$417,650	\$433,2180
Percentage CWRM cost-share	57%	59%	62%
DOFAW Watershed Management Grant	\$0	\$0	\$0
Waiahole Ditch Monitoring Fund	\$41,850	\$39,850	\$41,650
Ground water well continuous monitoring	\$6,800	\$6,090	\$7,230
Rain gage continuous recording	\$10,800	\$9,670	\$9,670
Continuous recording stream gage	\$22,500	\$20,150	\$20,090

OTHER

I. Chapter 343 – Environmental Assessment (EA) Compliance

EA Triggers

In accordance with §HRS 343-5(a), the proposed action triggers the need for an EA based on the use of state funds.

EA Exemption

The proposed action qualifies for an exemption from an EA based on §HAR11-200-8(a), basic data collection, research, experimental management and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource.

RECOMMENDATIONS

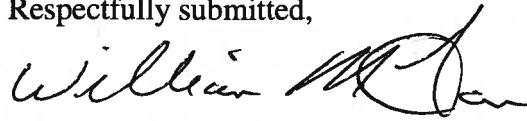

Staff recommends that the Commission:

- 1) Authorize the Chairperson to enter into a Joint Funding Agreement with the U.S. Geological Survey in FFY 2014 to undertake the specified monitoring activities, and
- 2) Delegate authority to the Chairperson to modify the list of monitoring stations to delete stations from the Joint Funding Agreement if other cooperators can be found.

The Agreement is subject to the approval of the Department's Deputy Attorney General. Contract execution will be done in accordance with Haw. Rev. Stat. Chapter 103D and Hawaii Administrative Rules, Chapter 3-122.

August 21, 2013

Respectfully submitted,

WILLIAM M. TAM
Deputy Director

SCOPE OF SERVICES

1. This Joint Funding Agreement is a continuation of the joint funding agreement for the collection of hydrological data in the State of Hawaii between the U.S. Geological Survey, United States Department of the Interior and the Commission on Water Resource Management, Department of Land and Natural Resources, State of Hawaii.
2. The scope of services involves the collection and computation of data on water resources collected in multiple locations throughout the State of Hawaii.
3. U.S. Geological Survey shall collect data at an agreed upon list of surface water stations, ground water monitoring stations, and rainfall stations, as set forth in Exhibit 4 which is attached hereto and incorporated by reference.
4. U.S. Geological Survey shall provide data summary reports and review of historical data sets.
5. U.S. Geological Survey shall host the maps, data, and reports resulting from this program in a publicly-accessible website, and shall provide the Commission staff direct and easy access to acquire, download, or transfer the data and report from a USGS server. The parties shall use good faith efforts to resolve any disagreements in the scope and validation of data acquisition and the contents of the report.
6. U.S. Geological Survey shall provide a readable statement of cooperative relations and visually identifiable symbol of the Commission as a cooperator in print, digital, and online publications of the data and reports of the monitoring stations that are included in the current cooperative program, and as well as the stations that were historically supported and funded by the Commission.
7. At least quarterly and upon request by the Commission on Water Resource Management, the U.S. Geological Survey will update the Commission on the progress of its work on this Joint Funding Agreement.
8. The Commission on Water Resource Management shall assist the U.S. Geological Survey in its work under the Joint Funding Agreement to the extent feasible and practicable under existing resources of the Commission.

August 2, 2013

Mr. William Tam, Deputy Director
State of Hawaii
Department of Land and Natural Resources
Commission on Water Resource Management
P.O. Box 621
Honolulu, Hawaii 96809

Attention: Jeremy Kimura

Dear Mr. Tam:

Subject: Joint Funding Agreement to continue our cooperative water-resource monitoring program during the period October 1, 2013 to September 30, 2014

Enclosed is a Joint Funding Agreement (JFA) between the State of Hawaii Department of Land and Natural Resources Commission on Water Resource Management (CWRM) and the U.S. Geological Survey (USGS) to continue our cooperative water-resource monitoring program during the period October 1, 2013 to September 30, 2014. The total cost of the program will be \$702,650 of which \$433,218 will be provided by the CWRM and \$269,432 will be provided by the USGS.

The purpose of the water-resource monitoring program is to collect data needed to evaluate the status and trends of surface-water and groundwater resources in Hawaii. Data are collected by the USGS at selected rainfall, streamflow, and groundwater monitoring stations in accordance with well-documented techniques and quality-assurance procedures. The agreement covers the cost for station operation and maintenance, quality assurance, real-time data display on our website, and data archival. Data will be collected by the USGS in accordance with well-documented techniques and quality-assurance procedures, stored in the USGS National Water Information System database and made publicly available on the USGS internet website (<http://hi.water.usgs.gov>), and finalized for publication by April 1, 2015.

The number and type of monitoring stations is periodically adjusted to meet current priorities and available funds. A complete list of monitoring stations and associated costs for the period October 1, 2013 to September 30, 2014 (Federal Fiscal Year 2014) is attached. There are no proposed changes to the list of stations and cost to the CWRM.

The total cost for this program in FY 2014 is \$702,650 which represents an increase of 0.4 percent (\$2,890) compared to FY 2013. Federal funding to the USGS was reduced in FY 2013 due to sequestration. Additional reductions in Federal funding are anticipated in FY 2014. Because of these changes, the USGS needs to reduce its contribution to this program by 4.5 percent (\$12,678). Regrettably, the CWRM will need to increase its contribution by 3.7 percent (\$15,568) to prevent a reduction in the number of stations.

EXHIBIT 4

Mr. William Tam, Deputy Director

Page 2

If you are in agreement with this program, please sign and return a copy of the enclosed JFA by September 30, 2013, or at your earliest convenience.

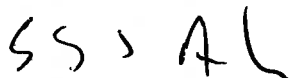

The legal authority for the USGS to enter into this program is 43 USC 50. Work performed with funds from this agreement will be conducted on a fixed-price basis. This means that invoices will be based on the agreed-upon amount, rather than actual itemized expenses. Your agency will be billed using Form DI-1040, according to the terms of the agreement

The results of the work under this agreement will be available to the USGS for publication and use in connection with related work. In addition, the USGS may provide unpublished USGS data or information to your office for review during the course of this jointly planned activity and partnership. Guidance concerning the U.S. Geological Survey's non-disclosure policy will be provided with any review material and is further explained in USGS Circular 1367, Fundamental Science Practices, available at <http://pubs.usgs.gov/circ/1367/pdf/C1367.pdf>.

If you have any questions concerning this program, please feel free to contact Ron Rickman of my staff at 587-2407 or by e-mail (rrickman@usgs.gov).

Thank you for your continued interest in working with the USGS to provide water resource information for the State of Hawaii.

Sincerely,

Stephen S. Anthony
Center Director

 Fixed Cost YES
 Agreement

**FOR
WATER RESOURCES INVESTIGATIONS**

THIS AGREEMENT is entered into as of the, 1st day of October, 2013 by the U.S. GEOLOGICAL SURVEY, UNITED STATES DEPARTMENT OF THE INTERIOR, party of the first part, and the COMMISSION ON WATER RESOURCE MANAGEMENT, DEPARTMENT OF LAND AND NATURAL RESOURCES, STATE OF HAWAII, party of the second part.

1. The parties hereto agree that subject to availability of appropriations and in accordance with their respective authorities there shall be maintained in cooperation a water-resource monitoring program in the State of Hawaii, according to the list of monitoring stations provided in Attachment 1, herein called the program. The USGS legal authority is 43 USC 36C; 43 USC 50; and 43 USC 50b.

2. The following amounts shall be contributed to cover all of the cost of the necessary field and analytical work directly related to this program. 2(b) includes In-Kind Services in the amount of \$0.00

(a) by the party of the first part during the period	Amount	Date	to	Date
	\$269,432.00	October 1, 2013		September 30, 2014
(b) by the party of the second part during the period	Amount	Date	to	Date
	\$433,218.00	October 1, 2013		September 30, 2014

 - (c) Additional or reduced amounts by each party during the above period or succeeding periods as may be determined by mutual agreement and set forth in an exchange of letters between the parties.
 - (d) The performance period may be changed by mutual agreement and set forth in an exchange of letters between the parties.

3. The costs of this program may be paid by either party in conformity with the laws and regulations respectively governing each party.

4. The field and analytical work pertaining to this program shall be under the direction of or subject to periodic review by an authorized representative of the party of the first part.

5. The areas to be included in the program shall be determined by mutual agreement between the parties hereto or their authorized representatives. The methods employed in the field and office shall be those adopted by the party of the first part to insure the required standards of accuracy subject to modification by mutual agreement.

6. During the course of this program, all field and analytical work of either party pertaining to this program shall be open to the inspection of the other party, and if the work is not being carried on in a mutually satisfactory manner, either party may terminate this agreement upon 60 days written notice to the other party.

- 7. The original records resulting from this program will be deposited in the office of origin of those records. Upon request, copies of the original records will be provided to the office of the other party.
- 8. The maps, records, or reports resulting from this program shall be made available to the public as promptly as possible. The maps, records, or reports normally will be published by the party of the first part. However, the party of the second part reserves the right to publish the results of this program and, if already published by the party of the first part shall, upon request, be furnished by the party of the first part, at costs, impressions suitable for purposes of reproduction similar to that for which the original copy was prepared. The maps, records, or reports published by either party shall contain a statement of the cooperative relations between the parties.
- 9. USGS will issue billings utilizing Department of the Interior Bill for Collection (form DI-1040). Billing documents are to be rendered Quarterly. Payments of bills are due within 60 days after the billing date. If not paid by the due date, interest will be charged at the current Treasury rate for each 30 day period, or portion thereof, that the payment is delayed beyond the due date. (31 USC 3717; Comptroller General File B-212222, August 23, 1983).
