STATE OF HAWAII
DEPARTMENT OF LAND AND NATURAL RESOURCES
COMMISSION ON WATER RESOURCE MANAGEMENT

APPLICATION FOR SURFACE WATER USE PERMIT FOR *EXISTING USE* IN THE NA WAI EHA, MAUI, SURFACE WATER MANAGEMENT AREAS

FORM SWUPA-E (NA WAI EHA, MAUI)

For detailed instructions on filling out this application, refer to the attached instructions.

For Official Use Only:
RECEIVED
COMMISSION ON WATER RESOURCE MANAGEMENT
2009 APR 23 PM 4:34
Event ID: SWUP.2264.6

SWUP No. 54

APPLICANT INFORMATION:
Note: In accordance with §174C-51(1)(B), HRS, *in the event a lessee, licensee, developer, or any other person with a terminable interest or estate in the land, which is the water source of the permitted water, applies for a water permit, the landowner shall also be stated as a joint applicant for the water permit.*

1. APPLICANT'S NAME	Applicant's Contact	2. SOURCE LANDOWNER'S NAME	Source Landowner's Contact

EXISTING SOURCE INFORMATION

The following must be attached before this application is accepted as complete:
- Portion of 7.5-Minute Series USGS topographic map (scale 1:24,000) labeled with stream and diversion locations and quad map name.
- Property Tax Map Key (TMK), showing stream or diversion location, and location of water use referenced to established property boundaries.
- Photograph(s) of the surface water diversion works and end use.

3. SURFACE WATER HYDROLOGIC UNIT AND CODE: ☒ Waihee/6022 ☐ Waiehu/6023 ☐ Iao/6024 ☐ Waikapu/6001

4a. TMK OF STREAM DIVERSION LOCATION: 3 (Zone) - 2 (Sector) - 014 (Plat) : 001 (Parcel)

4b. TMK OF DITCH DIVERSION LOCATION: 3 (Zone) - 2 (Sector) - 6 (Plat) : 8 (Parcel)

5. STREAM DIVERSION: How is water diverted from the stream to your property? Check all that apply.

☒ Pipe ☐ Pump ☒ Ditch/auwai ☐ Other Describe: A pipe diverts water from Waihe`e South Kuleana `Auwai; see attachment

Is the diverted water returned to the stream or ditch? ☒ Yes. ☐ No. If yes, how much water is returned? See attachment

6. FLOW MEASUREMENT INFORMATION:

Does the stream diversion have a flowmeter with totalizer or other device to measure diverted amounts?

☐ Yes. Enter the installation date:

Describe the device and enter measured amounts in Table 1.

☒ No. Explain how you are measuring flow to justify amounts shown in Table 1 in the space below

See attachment

EXISTING USER INFORMATION

We claim traditional & customary Native Hawaiian rights to grow kalo

7. APPURTENANT RIGHT: Do you claim an appurtenant right for your water use? ☐ Yes ☒ No

If yes, has the appurtenant right been established by the courts or the Commission? ☐ Yes ☐ No

8. END USER INFORMATION: Are you an end user on an existing water system? ☒ Yes ☐ No

If yes, who is the operator of the water system? Wailuku Water Company, LLC

9. REGISTRATION AND DECLARATION OF WATER USE: Do you have a Registration and Declaration of Water Use with the Commission?

☒ Yes. List the file reference name(s): Apo G.

☐ No

10. STREAM DIVERSION WORKS PERMIT (SDWP):

Have you ever been issued a SDWP by the Commission?

☐ Yes. List the permit number(s):

☒ No

NOTE: Signing below indicates that the signatories understand and affirm that the information provided on this application is accurate and true to the best of their knowledge. Furthermore, the signatories understand that: 1) if necessary, further information may be required before the application is considered complete; 2) if a water use permit is granted by the Commission, this permit will be subject, but not limited, to any existing legal uses, changes in sustainable yields and instream flow standards, Hawaiian Home Lands uses, and any other conditions imposed by the Commission; and 3) the applicant is responsible for paying the required public notice fees associated with this application.

PUBLIC INTEREST

§174C-2(c) states that: *The state water code shall be liberally interpreted to obtain maximum beneficial use of the waters of the State for purposes such as domestic uses, aquaculture uses, irrigation and other agricultural uses, power development, and commercial and industrial uses. However, adequate provision shall be made for the protection of traditional and customary Hawaiian rights, the protection and procreation of fish and wildlife, the maintenance of proper ecological balance and scenic beauty, and the preservation and enhancement of waters of the State for municipal uses, public recreation, public water supply, agriculture, and navigation. Such objectives are declared to be in the public interest.*

Explain below how the uses in your application are consistent with the public interest as described above. Attach additional sheets if necessary.
See attahment

SURFACE WATER USE PERMIT APPLICATION
EXISTING USE (NA WAI EHA, MAUI)

INSTRUCTIONS FOR FILLING OUT *FORM SWUPA-E*

This application form is to be used for actual **existing uses** as of the effective date of designation, April 30, 2008, for the Na Wai Eha Surface Water Management Areas. Based on the State Water Code, Section 174C, Part IV Regulation of Water Use, a completed application must be filed with the Commission on Water Resource Management (CWRM) no later than **April 30, 2009**, to qualify as an existing use. Failure to meet the filing deadline may cause your application to be considered a new use and require you to file an Application for Surface Water Use Permit for New Use.

If you are applying for a new surface water use, which are proposed uses after the date of designation, please use the Application for Surface Water Use Permit for New Use, Form SWUPA-N.

Information about surface water management areas and the current application forms are available at our website: http://www.hawaii.gov/dlnr/ewrm/; by contacting the Stream Protection and Management Branch at 587-0234; or sending an email to: dlnr.cwrm@hawaii.gov.

REQUIREMENTS FOR A COMPLETE APPLICATION Information must be legible. Therefore, please type or clearly print all information in ink.

a. Fill in the most recent application form.
b. Fill in every line on the application.
c. Enclose a check for the non-refundable filing fee of $25 payable to: Department of Land and Natural Resources.
d. Pay for the cost of publishing any required public notices related to your application.
e. Mark the source and end use locations on the appropriate USGS quad map and TMK map and attach to your application.
f. Attaeb photos showing your existing diversion, measuring device (if applicable) and end use areas.
g. Sign the application form. Both the applicant and the landowner of the source must sign the application form.
h. Submit one original and 15 copies of the application form; one original and 15 copies of the attachments (instructions, maps, photos and any additional attachments) and filing fee to: Commission on Water Resource Management, P.O. Box 621, Honolulu, HI 96809.

The applicant **must** establish that the existing use of water is a reasonable and beneficial use. According to §174C-3 of the State Water Code: *"Reasonable-beneficial use" means the use of water in such a quantity as is necessary for economic and efficient utilization, for a purpose, and in a manner which is both reasonable and consistent with the state and county land use plans and the public interest.*

Furthermore, public interest is described in §174C-2(c) of the State Water Code which states that: *(t)he state water code shall be liberally interpreted to obtain maximum beneficial use of the waters of the State for purposes such as domestic uses, aquaculture uses, irrigation and other agricultural uses, power development, and commercial and industrial uses. However, adequate provision shall be made for the protection of traditional and customary Hawaiian rights, the protection and procreation of fish and wildlife, the maintenance of proper ecological balance and scenic beauty, and the preservation and enhancement of waters of the State for municipal uses, public recreation, public water supply, agriculture, and navigation. Such objectives are declared to be in the public interest.*

LINE BY LINE INSTRUCTIONS FOR COMPLETING THE APPLICATION FORM

APPLICANT INFORMATION

1. APPLICANT'S NAME: Fill in the information for the applicant. This should be the entity that will be responsible for all conditions of the water use permit.
2. SOURCE LANDOWNER'S NAME: Fill in the information for the landowner of the property where the existing surface water diversion works is located. Note: in accordance with §174C-51(1)(B), *In the event a lessee, licensee, developer, or any other person with a terminable interest or estate in the land, which is the water source of the permitted water, applies for a water permit, the landowner shall also be stated as a joint applicant for the water permit.*

EXISTING SOURCE INFORMATION

3. SURFACE WATER HYDROLOGIC UNIT AND CODE: Check the appropriate box for the hydrologic unit name and hydrologic code where the source is located. The "source" is the stream, ditch, or conduit from which water is diverted to the user. For information on hydrologic unit names and unit codes please refer to the *Surface-Woter Hydrologic Unit: A Management Tool for Instream Flow Standards* report available on the CWRM website at: http://www.hawaii.gov/dlnr/cwrm/, or contact CWRM staff at (808) 587-0234. You may also contact CWRM toll-free from Maui at: 984-2400, ext. 70234.

4a. TMK OF STREAM DIVERSION LOCATION: Fill in the current Tax Map Key (TMK) number of the parcel where the stream diversion is located if applicable. To find out your TMK number, call Maui County Real Property Tax Division at: (808) 270-7297, or check online at: www.mauipropertytax.com/

4b. TMK OF DITCH DIVERSION LOCATION: Fill in the current Tax Map Key (TMK) number of the parcel where the ditch diversion is located, if applicable.

5. STREAM DIVERSION: How is water diverted from the stream to your property? Check the appropriate box(es). Is the diverted water returned to the stream or ditch? Check "Yes" or "No." If yes, enter the amount of water returned.
6. FLOW MEASUREMENT INFORMATION: Check "Yes" or "No". If you have a working flowmeter with a totalizer, answer "Yes" to this question, and fill in the date that the flowmeter was installed and any other information you may have (manufacturer, serial number, etc.). A totalizer directly measures the total use for the source (similar to a car's odometer). Otherwise, answer "No" and explain how stream diversion is measured or estimated to justify amounts requested in Table 1

EXISTING USER INFORMATION

7. APPURTENANT RIGHT: An appurtenant water right is a legally recognized right to a specific amount of surface freshwater – usually from a stream – on the specific property that has that right. This right traces back to the first time the land was converted to fee simple title; i.e., the Great Mahele and the issuance of either a Land Commission Award or Royal Patent. The quantity of water under the appurtenant right is the amount that was being used on the land shortly before or at the time of the Mahele.
   Do you claim an appurtenant right for your water use? Check "Yes" or "No."
   If yes, has your appurtenant right been established by the courts or the Commission? Check "Yes" or "No."
8. END USER INFORMATION: Are you an end user on an existing water system? Check "Yes" or "No". If yes, please list the name of the water system operator.
9. REGISTRATION AND DECLARATION OF WATER USE: Do you have a Registration and Declaration of Water Use from the Commission? Check "Yes" or "No". If yes, please list the name of the registrant(s).
10. STREAM DIVERSION WORKS PERMIT (SDWP): Have you ever been issued a SDWP by the Commission? If yes, please list the permit number(s). Otherwise, check "No."
11. APPLICANT: Please sign and print your name, and date your application.
12. LANDOWNER: Please sign and print your name, and date your application. The landowner shall be the joint applicant in the event the applicant is a lessee, licensee, developer, or any other person with a terminable interest or estate in the land which is the water source of the permitted water. §174C-51(1)(B)

SURFACE WATER USE PERMIT APPLICATION
EXISTING USE (NA WAI EHA, MAUI)

TABLE 1: 12-MONTH AVERAGE DAILY USE - Measured or calculated use of water at the source or end use as of the effective date of designation, April 30, 2008.

Please fill out Table 1 to calculate your existing use as of the effective date of the designation, April 30, 2008, of the Na Wai Eha Surface Water Management Areas. The effective date of designation is the date of the publication of the public notice of the Commission designation aetion. The qualifying dates have been filled in for this application. Fill in as completely as possible.

The **12-month average** is the average daily use[a] of 12 months of consecutive use[b] from the last month[c] of the period.

a. Average daily use. This is the average daily use for one month in gallons per day (GPD). To calculate this average, take the total use (in gallons) for the month, and divide this amount by the number of days in the month.
b. 12 months of consecutive use. To calculate the average monthly withdrawal for 12 consecutive months of use, add the average daily use for all 12 months and divide that amount by 12.
c. Last month. The last month of the period is the effective date of designation, April 30, 2008.

Check only one of the following boxes per row in Table 1:

- Metered – data is based on an operational meter with a totalizer.
- Estimated – data is based on some indirect measurement technique (e.g. measured flow rate multiplied by time of operation).
- Aetive but unknown – source is aetive, but there is no means to measure or estimate flow coming from source.
- Inactive – source was not pumped or diverted for the month.
- Other - describe how water use was measured or calculated in this box.

TABLE 2: LAND USE CONSISTENCY/EFFICIENCY

1. PURPOSE / WATER USE CATEGORY: Choose one of the following purpose or category codes listed below for each row in Table 2. There may be several purpose/categories on a single TMK, and eaeh purpose or category must be listed in a separate row. Attaeh additional copies if necessary.

AGRICULTURE	
AGRAQ	Aquatic Plants & Animals
AGRCP	Crops & Processing
AGRLI	Livestock & Processing, and Pasture
AGRON	Ornamental & Nursery Plants
AGROTH	Other
DOMESTIC	
DOM	Single & Multi Low-Risa & High-Rise Household
DOMN	Domestic (Non-residential)
DOMNCB	Commercial Businesses
DOMNRI	Religious Institutions
DOMNHOS	Hospitals
DOMNHOT	Hotels
DOMNOB	Office buildings
DOMNOTH	Domestic Non-Residential – Other
DOMNSC	Schools
INDUSTRIAL	
INDEL	Geothermal, Thermoelectric Cooling, Power Development
INDFP	Fire Protection
INDMI	Mining, Dust Control
INDOTH	Industrial – Other
IRRIGATION	
IRRGC	Golf Coursa
IRRHM	Habitat Maintenance
IRRHOT	Hotel
IRRLA	Landscape/Water Features
IRROTH	Other
IRRPA	Parks
IRRSC	Schools
MILITARY	
MIL	Military
MUNICIPAL	
MUNCO	County
MUNPR	Privately owned end operated tut defined as a publle system by the Department of Health
MUNST	State

2. USE TMK: The Tax Map Key number of the parcel over which the water is applied. There should only be one parcel for each line. Also, attaeh a TMK map(s) for the lots showing the boundaries of irrigated aereage, etc., as well as a photograph of the area of use.
3. STATE LAND USE DISTRICT: To find out the eurrent Land Use Distric‌t contact the Land Use Commission at 587-3822.
4. CDUP REQUIRED: If a Conservation Distriet Use Permit (CDUP) is required, enter either: "Yes" and the date the CDUP was approved if you have a CDUP applicable to this project; or "Yes" and "not acquired" in this box. If a CDUP is not required, enter "N" for no in this box. To check if your parcel is in the Conservation District, contact the Land Use Commission at 587-3822. If your parcel is in a Conservation Distriet, contact the Department of Land and Natural Resources Office of Conservation and Coastal Lands at 587-0328 to find out if a CDUP is required.
5. COUNTY ZONING CODE: To find out the Zoning Code for your property, call Maui County Planning Department at 270-6279, or 270-7253
6. SMAP REQUIRED: If a Special Management Area Permit (SMAP) is required for this project, enter either: "Y" and the date SMAP was approved; or "Y" and "not aequired" in this box. If a SMAP is not required, enter "N" for no in this box. To find out if your property is in a Special Management Area and requires an SMAP, call Maui County Planning Department at 270-8205.
7. QUANTITY OF USE: Enter the quantity of use in gallons per day (GPD). Justification for the quantities requested may depend on your answers to items 8 and 9, and you should describe the justification in item 10.
8. SUBMETERED? (Y/N): If the specific use is submetered, enter "Y" for yes here. If it is not submetered, enter "N" for no. Submetering is specific to each line item.
9. UNITS OR ACREAGE: This is the value and category as the basis for calculating the duty. "Duty" is the amount of water used or requested for a "unit" over a specific time period, e.g. gallons per acre per day, or gallons/acre/day. "Unit" ean mean dwelling units, or number of people, or animals. Examples to fill in for this category are: 400 dwelling units, 500 people, 3.74 acres.
10. APPLICANT'S JUSTIFICATION FOR REQUESTED QUANTITY OF USE FOR ITEM 7: Explain how you are justifying the amount you are requesting. Attach additional sheets if necessary.

SURFACE WATER USE PERMIT APPLICATION
EXISTING USE (NA WAI EHA, MAUI)

TABLE 3: IRRIGATION INFORMATION

If you have grown crops in the year prior to the date of designation, please list all the crops (including landscape and golf course irrigation) that you have grown. Enter a single crop and single TMK per line. If you have multiple crops, list them all as separate line items. Attach additional copies of Table 3 if necessary.

1. USE TAX MAP KEY (TMK): Enter the parcel number where the crop is being grown. Attach a map outlining irrigated area(s) and photos.
2. CROP: Enter the crop type.
3. TOTAL ACREAGE: Enter the total acreage of the parcel listed.
4. NET IRRIGATED ACREAGE: Enter the acreage for the specific crop grown.
5. BEGIN GROWTH PERIOD (MONTH): This is the month of the start of the growth cycle. For perennial crops, list the 12th month prior to the date of designation.
6. END GROWTH PERIOD (MONTH): This is the month of the end of the growth cycle. For perennial crops, list the month of the date of designation.
7. IRRIGATION SYSTEM: Enter one of the following:

    - TRICKLE, DRIP
    - TRICKLE, SPRAY
    - MULTIPLE SPRINKLERS
    - SPRINKLER, CONTAINER NURSERY
    - SPRINKLER, LARGE GUNS
    - SEEPAGE, SUBIRRIGATION
    - CROWN FLOOD
    - FLOOD (TARO)
    - OTHER – Please describe.

8. IRRIGATION PRACTICE: Enter one of the following:

    - IRRIGATE TO FIELD CAPACITY
    - APPLY A FIXED DEPTH PER IRRIGATION
    - DEFICIT IRRIGATION
    - OTHER – Please describe.

TABLE 4: ALTERNATIVES ANALYSIS

Please address every alternative listed in Table 4 and whether or not they are available, for both potable and non-potable needs. Other alternatives on the last line may include stormwater reclamation, rainwater catchment, etc.

Surface water is defined in §174C-3 as *both contained surface water - that is, water upon the surface of the earth in bounds created naturally or artificially including, but not limited to, streams, other watercourses, lakes, reservoirs, and coastal waters subject to state jurisdiction - and diffused surface water - that is, water occurring upon the surface of the ground other than in contained waterbodies. Water from natural springs is surface water when it exits from the spring onto the earth's surface.*

PUBLIC INTEREST

Explain how the uses in your application are consistent with the public interest as described in §174C-2(c): *(t)he state water code shall be liberally interpreted to obtain maximum beneficial use of the waters of the State for purposes such as domestic uses, aquaculture uses, irrigation and other agricultural uses, power development, and commercial and industrial uses. However, adequate provision shall be made for the protection of traditional and customary Hawaiian rights, the protection and procreation of fish and wildlife, the maintenance of proper ecological balance and scenic beauty, and the preservation and enhancement of waters of the State for municipal uses, public recreation, public water supply, agriculture, and navigation. Such objectives are declared to be in the public interest.*

Attachment

Existing Source Information:

Appended hereto as Exhibit 1 is a copy of a 7.5 minute-series USGS topographic map with the Waihe`e stream and Spreckels Ditch diversion labeled. Exhibit 2 is a TMK map showing the location of our property, ditch diversion, and end uses. Exhibit 3 contains copies of photographs of our ditch diversion and end uses. Exhibit 4 includes copies of documents establishing that our land was in kalo at the time of the Māhele of 1848.

Piko A`o, LLC is a culturally-based organization dedicated to creating a Hawaiian learning center at Paeloko in Waihe`e. We purchased this property in 2002 to provide a space where Kanaka Maoli and our culture can thrive. One of our principal goals is to feed our community: both physically and spiritually. Another core mission is to provide place-based educational opportunities for people of all ages, from elementary, high school, and college students and their families, to life-long learners who have finished their formal schooling. On an average year, over a thousand students and their families are served by our programs, all of which are done under a non-profit auspice.

Currently, our water use is predominantly for kalo cultivation. We grow kalo in traditional ways for home, ceremonial, and educational purposes. We also grow wauke, dye plants, kī, `uala, ulu, kukui, ma`ia, plumeria, and macadamia nut trees, and we maintain a historic pond that provides important habitat for endemic waterbirds.

Box 2: Source Landowner

Not applicable pursuant to HRS § 174C-51(1)(B), because we do not have a terminable interest in the land which is the source of the permitted water. According to the Water Commission's records, which we have not independently verified, Wailuku Water Company, LLC claims to be the source landowner.

Box 5: Stream Diversion

We use water from the kuleana `auwai that runs to the South of Waihe`e River. Water is diverted from Waihe`e River at the Waihe`e and Spreckels diversions (see USGS Topographical Map, Exhibit 1). All the water from the Spreckels diversion enters the Spreckels Ditch, as does some water from the Waihe`e diversion. The South Waihe`e kuleana `auwai receives water via a pipe in the Spreckels Ditch. The pipe empties into an open `auwai on the south side of Waihe`e River. The water continues makai in the `auwai until it passes our property, where we divert some water via a ditch for wetland kalo cultivation and diversified agriculture, as detailed in the attached photo exhibits. Some outflow from our lo`i goes into Paeloko pond; the remainder flows back into Waihe`e Stream. The amount returned to the stream varies depending on a number of factors, including crop needs and climate conditions.

Box 6: Flow Measurement Information

We estimated our existing water use for wetland kalo cultivation at 51,000 gallons per day ("gpd") by multiplying the amount of land we had in wetland kalo cultivation on April 30, 2008 (0.17 acres) by 300,000, the average amount of water we understand is required to grow healthy wetland kalo.

We estimated our existing water use for diversified agriculture at 9,575 gpd by multiplying the amount of land we had in agriculture on April 30, 2008 (3.83 acres) by 2,500, the amount of water we understand the Water Commission applied for diversified agriculture in the Waiāhole case.

We estimated our existing domestic water use, including our use of water for household purposes, e.g., dish and hand washing, etc., by applying the 2002 State of Hawai`i Water System Standard for Maui County of 600 gallons per house lot.

Based on the information above, we estimate that our existing wetland kalo, diversified agriculture, and domestic water uses total approximately 61,175 gpd.

We also estimate that we have been using 10 gallons per minute of water from the outflow of our lo`i kalo to maintain a historic pond called Paeloko, which also serves as a native bird sanctuary. This is much less water than was directed to this pond in the past, but it has allowed some level of restoration and endemic waterbirds have returned to use the pond once more. We are not requesting a separate allocation for this use because it comes from the outflow of our lo`i. We note that oral histories from this area detail the hydrologic connection between this pond and the wetlands in Waihe`e makai, including those wetlands now managed by the Maui Coastal Land Trust.

Box 7: Appurtenant Rights

Exhibit 4 contains true and correct copies of various Land Commission Awards and other documentation establishing that this land was in kalo at the time of the Māhele and had appurtenant rights. We believe that Wailuku Water Company (then Wailuku Agribusiness) reserved the appurtenant rights when we purchased our property in 2002. As a result, it appears our property's appurtenant rights may be extinguished, although we reserve the right to claim appurtenant rights in the future based on further information.

Table 1: 12-Month Average Daily Use

See supplemental response for Box 6, above.

Table 2: Land Use Consistency/Efficiency

Boxes 3 & 5 – Our application is for an existing use of water on land zoned for agriculture. The cultivation of wetland kalo and other traditional Hawaiian crops is consistent with state and county general plans and land use designations. Additionally, this use is consistent with county land use plans and general policies.

Box 10 – See supplemental response for Box 6, above.

Table 4: Alternatives Analysis

Our exercise of our traditional and customary right as Native Hawaiians to cultivate kalo on our land in a traditional manner is constitutionally protected, and by definition should not be required to use alternative, non-traditional sources. Even if such a requirement applied, there is no potentially available alternative source that is economically practicable, especially compared to our current source drawing directly from the `auwai on our property. We cultivate kalo and native plants on our land for cultural, subsistence, and educational purposes; the kalo and native plants we grow are shared with neighbors, community members, and school and other educational groups and nourish our physical and spiritual well-being. An alternative water source that would require us to pay for the volume of constantly flowing water in our lo`i necessary to keep temperatures cool and support healthy kalo, would make our practice economically impossible. We would effectively be denied our traditional and customary right to grow kalo on our land. As shown below, each potentially available alternative water source imposes a cost on exercising our protected right.

Municipal Sources. We do not have county water on our property. The kuleana `auwai is the only available source that is able to supply our water needs.

Wastewater reuse. Reusing wastewater is impracticable because we would still be required to pay for large volumes of flowing water. As a culturally-based educational program engaged in traditional uses, we do not have the means to hookup to and use that water. The closest wastewater treatment plant is in Kahului.

Ditch system. We are currently using water from an existing `auwai, although water is not available consistently and in sufficient amounts to support the existing uses on our system, including our own uses. Getting water from other ditch systems is not practicable. First, the other ditch systems in Nā Wai ʻEhā do not consistently have enough water to support additional users. Second, we lack the property, access, permissions and funding necessary to permit and construct another ditch diversion. As a culturally-based educational program engaged in traditional uses, the cost of taking water from or constructing another ditch is not practicable.

Desalinization. Desalinization of brackish water is not a practicable alternative because we are not aware of any such plant having been built on Maui. According to the County's estimates, a plant is expected to be built in 2013 at the earliest.

Ground Water. Even if we were able to secure the permits necessary to drill a well and pump ground water for our uses, installing and operating such a well to provide flowing water for kalo cultivation would be unprecedented and extremely burdensome. As a culturally-based educational program engaged in traditional uses, we do not have the means to install and maintain such infrastructure.

Table 4: Public interest section

Generally, "water use for diversified agriculture on land zoned for agriculture is consistent with the public interest." In re Waiāhole Ditch Combined Contested Case, 94 Hawai'i 97, 162, 9 P.3d 409, 474 (2000) ("Waiāhole I"). Further, domestic uses, protection of traditional and customary Hawaiian rights, protection of fish and wildlife, and the maintenance of proper ecological balance and scenic beauty are "in the public interest." HRS § 174C-2(c). Our water use is predominantly for kalo cultivation. We grow kalo in traditional ways and use it for home, ceremonial, and educational purposes. We also also grow wauke, dye plants, kī, `uala, `ulu, kukui, mai`a, plumeria, and macadamia nut trees, and we maintain the historic Paeloko pond, which provides important habitat for endemic waterbirds. We are Native Hawaiians engaged in traditional agricultural practices, and our crops help to maintain ecological balance and scenic beauty. As such, our existing use of stream water is consistent with the public interest.

Our Existing Use is a Protected Public Trust Purpose

Kalo cultivation by Native Hawaiians is a protected public trust purpose. Waiāhole I, 94 Haw. at 137, 9 P.3d at 449; see also Haw. Const. art. XII, § 7 (protecting traditional and customary Native Hawaiian rights). Additionally, because much of the water we use will be returned to Waihe`e River, our use supports other existing public trust purposes such as: (1) the maintenance of waters in their natural state; (2) resource protection; (3) water for domestic purposes; and (4) the protection of traditional and customary Native Hawaiian rights.

Our Existing Use Supports Beneficial Instream Uses

Because we return much of the water we divert for kalo cultivation directly to Waihe`e stream, our existing use also supports beneficial instream uses such as: (1) the maintenance of fish and wildlife habitats; (2) outdoor recreational activities; (3) maintenance of ecosystems such as estuaries, wetlands, and stream vegetation; (4) aesthetic values such as waterfalls and scenic waterways; (5) maintenance of water quality; (6) the conveyance of irrigation and domestic water supplies to downstream points of diversion; and (7) the protection of traditional and customary Native Hawaiian rights. See HRS § 174C-3.

Our Existing Use is a "Reasonable-Beneficial Use"

"Reasonable-beneficial use" is defined as "the use of water in such a quantity as is necessary for economic and efficient utilization, for a purpose, and in a manner which is both

reasonable and consistent with the state and county land use plans and public interest." HRS § 174C-3. As indicated above, our existing use is consistent with state and county land use plans and the public interest. It is also "economic and efficient" because we are only using the amount we need. If we stopped receiving water from the `auwai, our cultivation of kalo and other crops would be impossible. Moreover, we have taken steps to make our water use more efficient. We use pipes to transfer water, our sprinkler and drip system is set on a timer for early morning and evenings, and we use of mulch, volunteer cover crops, and green manure to minimize water loss. Therefore, our existing use is "reasonable-beneficial."[1]

[1] We do note, however, that our level of cultivation has been severely limited by the lack of water. We are also filing an application for a new water use to expand our existing area of cultivation.

Waihee & Honolua Claims

C. 3792 Quanui.

Palaau &c. The Claimant claims 3 pieces in Waihee, Maui.
No 1 is 3 lots in Pahoaoka.
" 2 " 1 lot "
" 3 " a House lot in Kepuhu
The Claimant procured No 1 from Lauhoe in 1832 and No 2 from Oku in 1845 and he from Paaku, and he from Hekaaui before 1839, and No 3 from his wife whose ancestors have had it time of mind.
No 1 is bounded Mauka, by Lauhoe's land. Makaikuloa, by Pilas land Makai by Lauhoe's land Waiuka, by my land.
No 2 is bounded Mauka, by Pilas land Kukakuloa, by the same Makai by Prahima's Lot. Waiuka by Lauhoe's land.
No 3 is bounded. Mauka, by the ile of Pualala Kukululoa, by Prahima's Lot Road Makai by my land Waiuka, by Quanui's land.

C. 3157 Palaau.

This Claim was heard under C. 3299 Nakalau on the 25th July 1849.

C. 4446 Kalikina.

This was heard at Pahoaoa under another number

C. 445. Kapuu.

Q. Kaauwai &c. This is a claim for land, a House lot at Oahu in the village of Honolulu.
He received it from his father Moe at the time of the building the Fort at Honolulu, and lived there until about 1831. Adams Hai was then on it now. Kaauwai is a Counter Claimant.
It is bounded Mauka, by Broadway. Waikiki, by Honolulu Makai Waikai by Merchant Street Eau, by Mr Reynolds Lot
The Claimant lives at Waihee.

Waihee Waikapu 51

No. 4405 Kukakuka.

This Claimant made oath that his Claim was presented in due season to Certificate.

Waiehaea Sen. His Ele Land is two pieces of Kuleana and kalo in the ili of Pahiehie, Waihee, Maui.

The Claimant received his Land from Antonia Sylva in 1863. and he from his Tutu Kikiaa Kuhelemai. His kalo was partly taken away by the Konohiki, but it belonged to Pahiehie. There are 3 fruit trees on it.

It is bounded. Mauka, by the Govt Road. Makakuka, by the Poalima Lot. Makai, by the Eardrew Lot. Waiehu, by Lumiliami Lot.

No 4405. Kahiwa.

Makaole Sen. Knows that Kahiwa's Claim was sent in before Feb 21. 1848.

The Ele Land consists of 3 pieces in Waihee Maui

No 1 is 21 lots in Waikanaana.

" 2 " 19 " "

" 3 " 13 " Paulauai.

No received No 1 & 2 from me in 1835, and No 3 from Kukiukuka in 1836. His title is not disputed except for No 3. which was taken away from him in 1846 because the Konohiki found the fence. Makinekua — from is the konohiki that took them away. There is one fruit tree in No 1

No 1 is bounded. Mauka, by the Govt. Kukakuka, by the ili of Moolaki. Makai, by the Pualua Lot. Waiehu, by the Govt.

No 2 is bounded. Mauka, by the ili of Paulauai Kukakuka, by the same. Makai, by Pukii Lands. Waiehu, by Makapaki Lands.

No 3 is bounded. Mauka, by Makais Lands Kukakuka, by the Pali. Makai, by Kukiukuka's Land. Waiehu, by the Govt.

Waihee July 27. 1849.

No 4405 Kalua 1st
