# UIPA Record Request Log

Hawaii's Public Records Law  
Chapter 92F, HRS

(Revised: November 5, 2012)

Thank you for taking the time to learn how to use the **UIPA Record Request Log** to track and report on requests for public records under the Uniform Information Practices Act, HRS Chapter 92F.

The Log is currently being rolled out to the State Executive Branch and the Judiciary. The Counties and Legislature will also find the Log very helpful and are welcome to use it, but are not being required to do so at this time.

**For detailed UIPA Log Instructions,  
Frequently Asked Questions,  
& other training materials:**

- visit OIP's website [hawaii.gov/oip](http://hawaii.gov/oip)
- click on Laws/Rules/Opinions,  
then the UIPA page:  
<http://hawaii.gov/oip/uipa.html>

**Full instructions** for using the UIPA Log, along with frequently asked questions, and other training materials, are available on OIP's website at [hawaii.gov/oip](http://hawaii.gov/oip), on the UIPA page.

Today's training assumes that you have basic knowledge about the UIPA's requirements. If not, please first study OIP's online videos and training materials about the UIPA, at [hawaii.gov/oip](http://hawaii.gov/oip). We will not discuss the various exemptions from disclosure or other nuances of the UIPA in great detail in this training. While this presentation will explain many of the UIPA's requirements, it is primarily for the purpose of helping you learn how to fill out the Log.

OIP has separate training on how to upload an agency's Log to the Master Log at [data.hawaii.gov](http://data.hawaii.gov), which you will also find on the website.

## To log in a written request for records...

- The Excel spreadsheet has pop-up instructions ... just mouse over the column heading.

Using the Log should not be a problem for those who already understand the UIPA law. The Log itself is intuitive and easy to fill out. Besides having instructions in the headings, the Log also has **pop-up instructions**, which provide helpful reminders of the UIPA's requirements. Just move the cursor over a column heading to get the instructions to pop up online. Or you can go to **[hawaii.gov/oip](http://hawaii.gov/oip)** and print out a copy of the full instructions to keep by your computer as you fill out the Log.

## Hawaii's Public Records Law

HRS § 92F-18 requires each agency to:

- **Inform employees** of the UIPA's requirements
- Compile a report **using forms prescribed by OIP**
- Ensure that the information remains **accurate and complete**

Why do agencies need use the Log? Because the **UIPA** (HRS § 92F-18) **requires agencies to:**

(1) take steps to assure that its **employees are informed** of the UIPA's requirements;

(2) compile a public **report using forms prescribed by OIP;**

(3) and annually report to OIP to **ensure the information remains accurate and complete.**

OIP created the Log to help agencies meet their UIPA obligations and ensure that the information they report to OIP is accurate and complete. Through the State's new centralized website, [data.hawaii.gov](http://data.hawaii.gov), the Log totals can now be easily collected, summarized, and analyzed to provide much more relevant and useful information regarding the UIPA.

Rather than being criticized for incidents reported by the media, your department will now have objective data to show the public how well you are responding to requests for public records and fulfilling your core function of providing open, transparent, and accountable government services. If you're not doing well, then the Log will help to identify where the problem areas are and possibly how to fix them.

## Benefits! ... the UIPA Log helps an agency to:

- **Track** its written requests for records & the agency's response
- **Report** requests & outcomes onto data.hawaii.gov
- **Assist** requesters
- **Calculate** fees & costs
- **Keep** government open

The UIPA Log helps agencies keep on **TRACK** when they receive **formal written requests** for records. It is still up to the agencies to keep track on their own and report to OIP the number of routine requests they receive, such as those for DOH birth certificates and UH transcripts, for which UIPA notices to requesters are not sent by the agencies. But agencies should use the Log to keep track of formal requests **where the agencies must send out notices or acknowledgements to requesters.**

The Log helps the agencies by providing the following **benefits**:

- 1) The Log is a tool to help agencies keep **TRACK** of written requests for public and personal records, and when and how the agency responded.
- 2) The Log provides a uniform method to **REPORT** the numbers and types of record requests and the outcomes.
- 3) The Log helps agencies to properly **ASSIST** requesters while keeping the agencies in compliance with the UIPA.
- 4) The Log helps agencies to **CALCULATE** fees and costs.
- 5) The Log furthers the UIPA's goal to **KEEP GOVERNMENT OPEN** and agencies accountable to the public.

Once the Log data is uploaded to data.hawaii.gov, the results can be summarized and reviewed to account to the public and show how well agencies are meeting their UIPA responsibilities.

## The UIPA Log has 3 main parts:

- Identification
- Resolution of requests
- Fees & costs

What is the Log? The UIPA Log is an Excel spreadsheet that can be downloaded from OIP's website onto your agency's computer. Although it has many columns, don't be intimidated by them. Eleven of the columns are automatically populated by the Log and will calculate for you such things as fees and costs. In the Request Resolution section, out of 9 columns, you may only have to input data into two columns. For a simple typical request, you may only have to input 12 data entries for the Log. The many areas that are highlighted on the Log require no data entry.

The Log can be broken down into three main parts:

The first part basically **identifies** the department, agency, record requester, agency employee working on the response, and type of record request.

The second part **records how and when** the requests were **resolved**.

The third part **calculates fees & costs** based on the agency's input of hours, costs, and fee waivers.

The Log also has a yellow highlighted row of “Totals” just under the examples. These totals are automatically calculated based on the agency’s entries in the rows below. (They do not include the hypothetical numbers from the examples above). The Totals are posted at the top of the Log like this, so that the agency can easily see the totals and continue to enter data in the rows below for as many record requests that it may receive. If the agency receives more than 1,000 record requests in a year, it can add new rows at the bottom or call OIP for help.

The yellow highlighted row of “Totals” will be partially redacted and it is the only portion of the agency’s Log that will be uploaded each January and July onto the Master Log at data.hawaii.gov, where OIP or any member of the public can then create their own summaries and graphs to see how your agency and the State as a whole are doing in fulfilling UIPA requests.

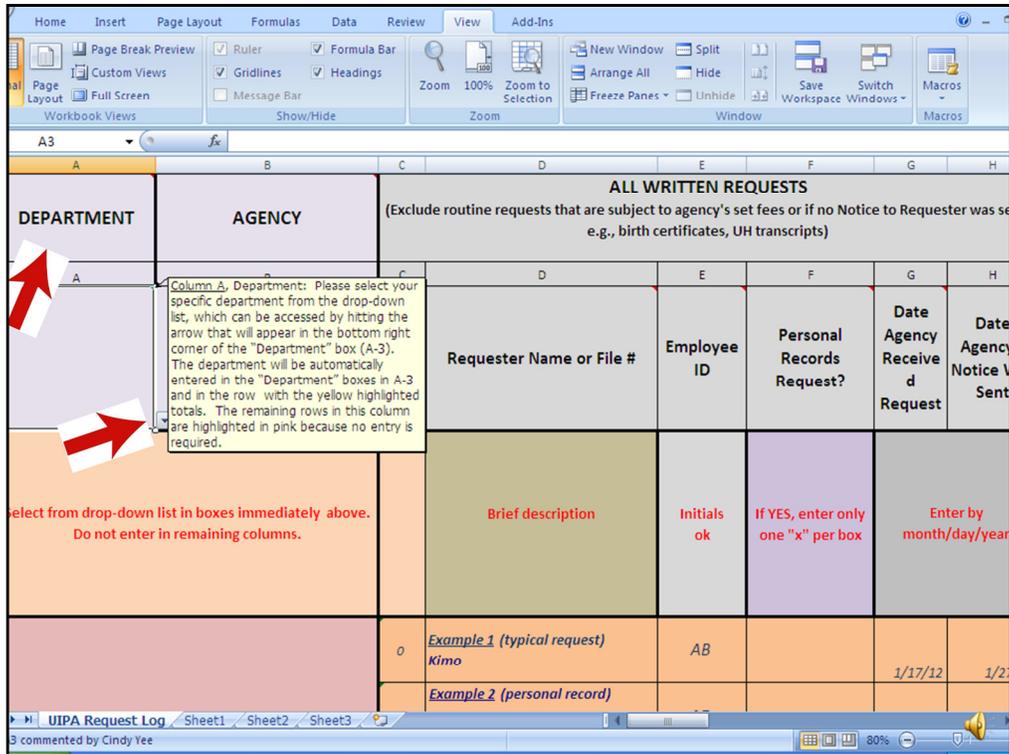

## The UIPA Log-- First part is:

1. Identification

2. Resolution of requests
3. Fees & costs

Now, let's go back to explaining the first part of the Log, which **identifies** who and what we're dealing with, and who is responsible for resolving the request.

The department and agency names **need to be entered only once** on the Log, using the drop-down menus that will appear when you place the cursor over the bottom right corner of the Department and Agency boxes in Row 3. In this slide, the lower arrow shows you where to find the drop down menu to select your department.

In the lower left corner of this screen shot, you will see that the Columns A and B have been **highlighted**. **Since the area is highlighted, you know that you don't have to enter any data there.**

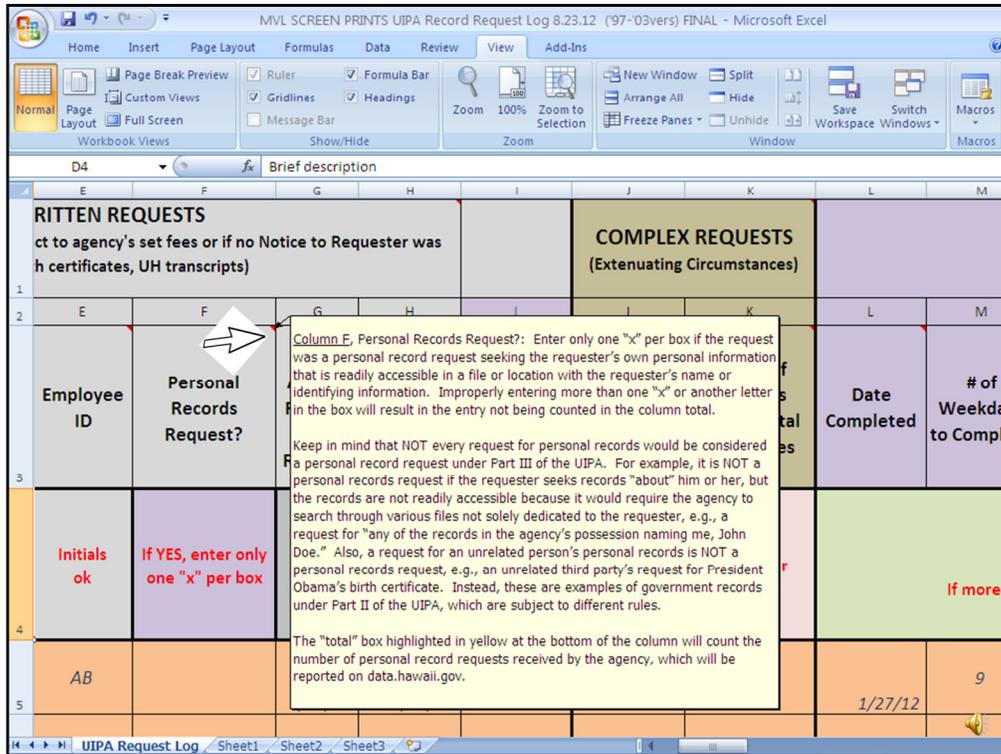

***Columns D & E:***  
**Requester Name or File # and  
Employee ID**

- These are for the agency's benefit to identify the request and who is responsible to work on it.
- The names/ID will not be uploaded to Data.hawaii.gov.

Entering a requester name or file number in Column D is needed just to **identify** the request, so that the agency can find it later, if necessary. Column E asks for the initials of the employee responsible for responding to the request. The identifying information in both Columns D and E are not included in the row of "Totals" and **will not be uploaded to data.hawaii.gov.**

Note, however, that **if this Log is produced by the agency in response to a government records request**, then the requester's name is generally **not** considered confidential information and should **not** be redacted. (See OIP Op. Ltr. No. 90-37.) But, while OIP has not formally ruled on the issue, if the Log is also tracking personal records requests, then the names of **personal record requesters may arguably be confidential** if disclosure could identify them, for example, as crime victims or could expose confidential financial information related to their creditworthiness. If you have any questions about the redaction of names or confidential information, please check with OIP.

If you need a refresher as to **“What is a personal records request?”** the answer will pop up in Column F. It is important to properly identify a request as being a personal records request, because different rules apply. For example, there may be confidentiality or privacy concerns; search, review, and segregation fees cannot be charged; and fee waivers are not applicable to personal records requests.

## *Column F:*

**Q.** What is a “personal record?”

**A.** A “personal record” is a government record that contains information “about” the individual who is requesting the record.

This includes an individual’s educational, financial, or medical records, or items that reference the individual by name or otherwise.

What is a “personal record?” The T-shirt here is not the official legal answer, but it’s one easy way to remember what constitutes a personal record. The T-shirt says “**It’s All About Me.**”

A “personal record” is a government record that contains information “about” the individual who is requesting the record, such as the individual’s educational, financial, or medical records, or items that reference the individual by name or otherwise. The information can be in a file specifically labeled with the requester’s name, or it could be in another file.

**Note:** Not every request for personal records would be considered a personal record request under UIPA, Part III.

- For example, it is not a personal records request if the requester seeks records “about” him or her, but the records are not readily accessible because it would require the agency to search through various files not solely dedicated to the requester.
- Also, a request for an unrelated person’s personal records is not a personal records request.

**But if the agency cannot readily find or identify other files containing the requester’s personal records, then those records are not “accessible” and need not be disclosed.**

(HRS 92F-21) In other words, the agency need not expend an unreasonable amount of time or effort to search through all of its files to try to find information about the requester.

**As another example, a request for an unrelated person’s personal records is not a personal records request.**

President Obama can make a personal records request for his own birth certificate. But, if an **unrelated third party** makes a request for President Obama’s birth certificate, it would be a **government record request subject to Part II of the UIPA, which has different requirements from personal record requests under Part III of the UIPA.**

Let's learn how to enter a personal records request by looking at Examples 2 and 3 on the UIPA Log. Requester "Lee" in Example 2 has made a **personal records request** for information about himself. So we have entered one "x," **and only one "x,"** under "Personal Records Request" in Column F. **The sums won't tally properly if you enter more than one "x" or a different symbol.**

In contrast, note that Example 3 by an anonymous birther is **not** a personal records request. First, a **personal record request cannot be made anonymously** because you have to know that the requester is the person entitled to obtain the information about himself or herself. Second, a request for an **unrelated** person's personal record, such as a birth certificate, is not a personal record request for your own record. Therefore, no "x" has been entered in Column F for the anonymous birther's request.

## *Columns G thru I:*

- Date of agency's receipt of request
- Date agency's notice to requester was sent
- Was notice or acknowledgment **sent within 10 work days?**

Now that we know whether or not the request was for personal records, let's move on to Columns G through I, which ask for the **dates that the agency received** the request and **sent its notice to requester**, and **whether the notice or acknowledgment was sent within ten work days**.

ALL WRITTEN REQUESTS (Exclude routine requests that are subject to agency's set fees or if no Notice to Requester was sent, e.g., birth certificates, UH transcripts)						
#	Requester Name or File #	Employee ID	Personal Records Request?	Date Agency Received Request	Date Agency's Notice Was Sent	Notice or Acknowledgment Sent Within 10 Work Days
	Brief description	Initials ok	If YES, enter only one "x" per box	Enter by month/day/year		If yes, enter only one "x" per box

Columns G and H ask for the dates that the agency received the request and when the agency sent out its notice to the requester. The dates that the agency enters in these two boxes will be counted as entries in the yellow highlighted “Totals” row to provide the total numbers of requests the agency receives and the notices that it sends out. The date that the agency received the request will also be used to calculate the agency’s median response time in a later column.

Column I asks whether the notice, or the acknowledgment in complex cases, was sent within ten work days, as is required by the UIPA. Blanks in Column I should serve as **reminders to the agency that it needs to act within ten work days**, and it will be **one indicator of whether the agency is timely responding to requests**.

Let's see how this section was entered by looking at Example 2. In Column G, we see that the agency received the request on January 18th. Column H shows that the agency sent the notice to requester on February 1st. And in Column L, the date completed is also February 1st. So at a glance, we have the **key dates** for Lee's records request and know that the agency timely sent its notice **within 10 business days**, which is why Column I has been marked with an "x."

*Columns J & K:*  
**Complex Requests**  
(voluminous records or  
extenuating circumstances):

Is it a complex request?

- Date agency's acknowledgment was sent
- Dates of agency's incremental responses

The acknowledgment is sent only for **complex requests**, which involve **voluminous records** or **extenuating circumstances**. **Once the acknowledgment is sent within 10 work days of the request, the agency has additional time to send its notice to the requester, for a total of 20 work days from the time it received the request.** Columns J and K must be filled out only if the agency receives a complex request.

The pop-up instructions will refer you to the “OIP’s Informal Guide to Processing Large or Complex Record Requests,” which can be found on the Openline/Guidance page of the OIP website.

What follows next is an example and brief summary of the agency’s obligations in a complex request involving a large number of records or extenuating circumstances.

Take a look at the arrow at the lower left, which points to **Example 4**, a **complex request** from the “**Honolulu News**” made on January 23, as shown in Column G. Because this was a complex request, the agency had additional time to respond. The agency sent the requester an **Acknowledgement**, as required within 10 business days, on February 6, as shown in Column J, and the **Notice to Requester** on February 17, within 20 business days from the date of the request, as shown in Column H. Because it was a complex request and the agency sent its acknowledgment within 10 work days from receiving the request, the agency should check off the box in Column I. For this complex request that contained voluminous records, the agency made **three incremental responses**, as shown in Column K. The first incremental response was made on February 21, **within 5 business days of the agency sending the notice or receiving prepayment. Thereafter, disclosures were due within 20 business days** (excluding weekends and state holidays) after disclosure of each previous increment. As Column K shows, additional disclosures were made on March 20 and April 19. The last disclosure was made on May 17, which is the “date completed” in Column L, and leads us into the Request Resolution section.

## The UIPA Log-- Second part is:

1. Identification

2. Resolution of requests

3. Fees & costs

Having identified the request, let's look at the section that records how requests are resolved.

## *Columns L & M:* **Request Resolution**

- Date completed?
- # of weekdays to complete is **automatically calculated**, based on date the request was received and date of completion.

The request resolution section starts by asking for the date of completion (Col. L), which is when the agency either provided or made the records available, or denied the request in whole or in part, or when the requester abandoned or withdrew the request.

Based on when the request was received, the Log will automatically calculate the number of weekdays that it took the agency to complete its response. (This calculation does not include the date the request was received or weekends, but does include holidays, so is merely an estimate and not an official accounting of number of work days taken to complete a request.)

COMPLEX REQUESTS (Extenuating Circumstances)			REQUEST RESOLUTION									SEARCHING (No SRS fees charged)			
Notice or Acknowledgment Sent Within 10 Work Days	Date Agency's Acknowledgment Was Sent	Dates of Agency's Incremental Responses	Date Completed	# of Weekdays to Complete	Request Granted in Full? Actual Search Hours	Actual Review/Segregation Hours	Actual Legal Review Hours	TOTAL Actual SRS Hours
If yes, enter only one "x" per box			For Column L, enter month/day/year. Column M will be automatically calculated.									25 = 15 minutes; 50 = 30 min.; 75 = 45 min.; 1.0 = 1 hour		Automatically calculated	
x			1/27/12	8								0.25			0.25
x			2/9/12	10				x				0.50	0.25		0.75
x			2/23/12	10			x			x		0.75	3.00		3.75
x	2/16/12	2/22/12, 3/20/12, 4/18/12	5/17/12	83				x	x		x	25.00	20.50	15.50	131.00
				Median											
				0								0.00	0.00	0.00	0.00

The four examples in this slide show the number of weekdays that it took to complete each request. In column M, you'll see 8, 10, 10, 83.

Once the agency enters data in the rows below, then the yellow highlighted total box in Column M will calculate the **median** number of days that it takes the agency to complete record requests, meaning that half of them take longer and the other half take a shorter period of time to complete. Thus, in our four examples, the median would be 10 weekdays. The median gives a better indication of the time that it took the agency to respond to most requests, because it throws out the high and the low numbers. If we had used the average of all four days, we would have had an average of nearly 28 weekdays to complete requests, because the complex request that took 83 days to complete would have skewed the results. (This slide does not show a median number of days in the yellow highlighted box in Column M because no actual data has been entered below.)

**The Log helps the agency to keep track of requests** so that they don't fall between the cracks, in case a staff person is sick, goes on vacation, or leaves the agency. **The agency will be able to easily see in Column L where there are blank spaces, which means that those requests were not completed and require follow-up.** The agency can also tell how timely its responses are by looking at the median number of days for completion in the yellow highlighted "Totals" box in Column M (which will be automatically calculated, once actual data has been entered).

## *Columns N thru T:* **Request Resolution**

An agency may check off more than one box in this section ... see Example 4.

- Request granted in full?
- Denied in full?
- Denied in part?
- Request withdrawn?
- Unable to respond?
- Requester abandoned or failed to pay fees & costs?
- Lawsuit filed?

Columns N thru T must be filled out by the agency to report how a UIPA request was resolved. Each of these columns has **pop-up instructions** to guide the agency. The agency **may check off more than one box in this section.**

Whether a request was granted in full, denied in full, denied in part, or withdrawn by the requester are easy to determine. But why would an agency be **unable to respond** to the request and when does a requester **abandon** a request?

The agency may be **unable to respond** because the request description was **unclear and the agency needed clarification.** (See Example 4, Honolulu News.)

The request may be deemed **abandoned** if the agency's notice to requester asked for further clarification or for payment of fees, and the requester failed to provide the clarification or payment within 20 business days. The request may also be deemed **abandoned** if the requester has asked to pick up the records and failed to do so. **If a file is abandoned, then the date that the agency sent the notice or made the records available becomes the completion date for Column L.** (See Example 3, Anonymous Birther.)

Finally, if the agency knows that a requester has sued to obtain the requested records, then it will indicate that a **lawsuit has been filed** in the Request Resolution section. Please note that the agency may not know at the time it uploads the Log to data.hawaii.gov whether a lawsuit has been filed against it. The agency should just do its best to fill out the Log and should separately report lawsuit information to OIP when it becomes aware of the lawsuit. Let's see how this works in the next slide demonstrating Example 4, Honolulu News.

			Median											

Here’s the entire “Request Resolution” section for the “Honolulu News” example, which was completed on 5/17/12 when the last incremental set of records was provided to the requester. The Log has automatically calculated in Column M that it took 83 weekdays (including holidays) to complete the request.

In Column P, the agency has entered one “x” for “**Request Denied in Part,**” and also in Column Q for “**Agency Unable to Respond to Request**” because it was, at an earlier date, unable to respond to the unclear request and had to wait to receive clarification from the requester.

Finally, in Column T, the agency entered an “x” for “**UIPA lawsuit filed against agency**” because the requester filed a lawsuit challenging the agency’s partial denial.

Again, please notice all the **single “x’s”** in the boxes in the Request Resolution section. Please **enter only one “x” per box** so that the data will be **properly counted** in the **column’s total amount**. If more than one “x” is entered or if another character is entered, the data will not be properly counted in the “Totals” row below the examples.

## The UIPA Log-- Third part is:

1. Identification

2. Resolution of requests

3. Fees & costs

Having identified the request and tracked its resolution, let's now go on to the third part of the Log, which automatically calculates **fees & costs** based on the agency's input of search, review, and segregation hours, copying and delivery costs, and fee waivers.

## UIPA Log, Part 3: Fees & Costs

Automatic Calculations based on agency's input of hours, costs, & fee waivers

- Search, review, segregation fees (SRS)  
-- Fee waivers
- Copy/delivery costs
- Total fees and costs

The Fees and Costs section breaks out the agency's expenses by (1) **search, review, segregation fees, including fee waivers** and (2) **copy and delivery costs**.

Based on the agency's input, the Log also calculates for the agency the **total fees and costs** by: (1) what the agency actually incurred, (2) what it can properly charge, (3) what the requester actually paid, and (4) what the agency incurred but could not recover.

Ultimately, this data helps to evaluate the costs and benefits of the UIPA and whether amendments to OIP's administrative rules, adopted in 1998, should be made.

## Search, Review, Segregation Fees (SRS)

### Q & A

#### ■ What are SRS fees?

These are fees that the agency may charge for time spent searching for, reviewing, and segregating government records in response to a request:

\$2.50 per fifteen minutes or fraction thereof for **searching** for the record; and

\$5.00 per fifteen minutes or fraction thereof for **reviewing and segregating** the record.

SRS Fees are fees that the agency may charge for time spent **searching** for, **reviewing**, and **segregating** or redacting government records in response to a request.

To **search** for the record, the agency may charge \$2.50 per 15 minutes or fraction thereof.

To **review** and **segregate** the record, the agency may charge \$5.00 per 15 minutes or fraction thereof.

## Search, Review, Segregation Fees (SRS) Q & A

### ■ Are these fees in OIP's administrative rules?

Yes, at §2-71-31 of "Agency Procedures and Fees for Processing Government Records Requests."

See the rules on OIP's website.

These fees are set out in OIP's administrative rules (HAR section 2-71-31), which were adopted in 1998, and can be found on OIP's website.

Like the other sections of the Log, below the column headings are **additional instructions** that may span across several affected columns. In this slide, the instructions under Columns U, V, and W show how to enter the time in quarterly increments per hour, so .25 = 15 minutes, .50 = 30 minutes, .75 = 45 minutes, 1.0 = 1 hour.

Below those instructions, the agency has entered the **time it spent in search, review, and segregation efforts** for the **four record request examples**. Under Column U for “**Actual Search Hours,**” each example shows varying amounts of time the agency spent on searching to locate and determine if the agency, or another party under the agency’s administrative control, “maintains” the requested record.

Example 1 shows “0.25” entered for a 15-minute search, which is the minimum time that should be entered.

Example 2 shows “0.50” for a 30-minute search.

Example 3 shows “.75” for a 45-minute search.

Example 4 shows “95.0” for 95 search hours on a complex record request.

Note: While the Log can also be used as a tool to calculate estimated fees and costs for prepayment by a requester, please enter the actual search, review, and segregation hours in the Log that will be uploaded to the Master Log at data.hawaii.gov.

Here, in Column V, the agency has entered the time spent reviewing and segregating the records. Under “**Actual Review/Segregation Hours,**” each example shows varying amounts of time the agency spent to review the record to determine which portions, if any, may be exempt from disclosure, and then redacting the exempt portions.

Example 1 shows no time spent reviewing and segregating.

Example 2 shows “0.25” for 15 minutes spent reviewing and segregating.

Example 3 shows “3.0” for 3 hours.

Example 4 shows “20.5” for 20 hours and 30 minutes spent reviewing and segregating a complex record request.

Typically, supervisors, managers, or attorneys would be doing the review and segregation. Attorneys’ time spent actually reviewing and segregating a record can be included here, but not their time to do legal research for possible exemptions from disclosure. Instead, such non-chargeable legal review time is separately entered in the next column, W.

Looking at Column W, the agency has entered the time spent for **legal review by its attorney(s)**. **Note that this is not a fee that can actually be charged by an agency under OIP’s current rules**, which do not allow an agency to charge for attorneys’ time to research possible exemptions from disclosure or to determine and advise the agency on the propriety of the agency’s response. OIP, however, is collecting the legal review data to get a full picture of how much time and resources are being devoted to fulfilling UIPA record requests.

Under “**Actual Legal Review Hours**,” the first three examples show no time spent for legal review. **Example 4**, however, shows “15.5” for 15 hours and 30 minutes spent for legal review in a complex records request case.

Column X shows the “**TOTAL Actual SRS & Legal Review Hours**” for each of the four examples.

These totals are **automatically calculated**, by adding the hours inputted by the agency from the previous three columns: search hours, review/segregation hours, and legal review hours. Again, note that this is not the basis for the amount of fees that can be charged to a requester, but Column X gives a more accurate picture of how much time the agency has actually incurred in responding to the request.

Example 1, the typical record request, shows a total of “0.25” hours, or 15 minutes.

Example 2, the personal record request, shows a total of “0.75” hours, or 45 minutes.

Example 3, the anonymous birther request, shows a total of “3.75” hours, or 3 hours and 45 minutes.

Example 4, the complex request from the Honolulu News, shows a total of “131” hours.

In Column Y, the log has **automatically calculated** the “**TOTAL SRS Fees Incurred**” for each of the four examples.

This is the **total gross fees** incurred for Search, Review, Segregation, **excluding the legal review time, and not accounting for any fee waivers**. Again, this is **not** the amount that may actually be charged by the agency.

Example 1, the typical record request, shows \$2.50 for the total SRS fees incurred.

Example 2, the personal record request, shows a total of \$10.00.

Example 3, the anonymous birther request, shows a total of \$67.50 incurred for SRS fees.

Example 4, the complex request from the Honolulu News, shows a total of \$1,360.00 incurred for SRS fees.

Column Z is where the agency enters “**Additional Response Fees Incurred But Not Chargeable.**” Most times, there will be no entry for this.

But, there may be times when an agency incurs additional fees that **cannot** be recovered by the agency under the UIPA. For example, the agency may incur, but cannot charge for, **special counsel’s legal fees or an expert witness’s fees to defend a lawsuit** brought by a requester to compel disclosure. The agency in that case should **estimate** and list such nonrecoverable fees in this column. Example 4 at the bottom of Column Z shows the agency’s estimate of \$5,000 in additional fees spent in defending the lawsuit in the complex case brought by the Honolulu News.

## Search, Review, Segregation Fees (SRS)

### Q & A

#### ■ What are fee waivers?

The agency **must** waive the first \$30 in fees for search, review, and segregation ...

OR the first \$60 in SRS fees where the agency finds that the requester has met the requirements under OIP's administrative rules for a public interest waiver.

Now, we know what fees the agency has incurred in responding to a request. Next, we need to determine whether any of these fees must be **waived**. **Remember that we are discussing waivers only for SRS fees, and not for copying and delivery costs that are not subject to OIP's waiver rules.**

OIP's rules provide for **two kinds of waivers for SRS fees:**

(1) The agency must waive the **first \$30** in fees for search, review, and segregation ... **OR**

(2) the **first \$60 in SRS fees if a public interest waiver** applies. Before granting the request for a public interest waiver, the agency must find that the requester has met the requirements under OIP's administrative rules for the waiver, which will be discussed in greater detail shortly.

## Search, Review, Segregation Fees (SRS) Q & A

### ■ How are fee waivers recorded on the log?

Enter the waiver as a negative number (“-30.00” or “-60.00”).

For a personal records request, do not enter the \$30 or \$60 fee waiver because SRS fees may not be charged in the first place.

To record a fee waiver on the Log, the agency must **enter the waiver as a negative number** (either “-30.00” or “-60.00”) in Columns AA or AB.

**For a personal records request, do not enter the \$30 or \$60 fee waiver because no SRS fees may be charged in the first place.**

Here, in Columns AA and AB, we see how an agency has recorded fee waivers.

In Column AA, we see that two **\$30 waivers** have been granted in Examples 1 and 2, and recorded as a **negative \$30 (-30)**. Note that there is no waiver in Column AA for the personal records request, which was in Example 2, because personal record requests are not subject to SRS fees.

In Column AB, a we see that a **\$60 public interest fee waiver** (“-60.00”) has been granted for the “Honolulu News” in Example 4.

Column AB shows the **\$60 fee waiver**, with detailed pop-up instructions about when to grant this **public interest waiver**. As the pop-up instructions state, the \$60 public interest fee waiver must be granted when **(1)** the request for such waiver is supported by a statement of facts, including the requester's identity, **and (2)** the agency finds that the waiver would be in the public interest. § 2-71-32 (a) H.A.R.

A \$60 public interest fee waiver is in the public interest when **(1)** the requested record pertains to an agency's operation or activities (but the record's relative importance to the public is not applicable in applying the waiver); **(2)** the record is not readily available in the public domain; **and (3)** the requester has the primary intention and actual ability to widely disseminate information from the government record to the general public at large. § 2-71-32 (b) H.A.R.

## Search, Review, Segregation Fees (SRS)

### Q & A

- **What about personal records?**

No SRS fees are chargeable for **personal** records requests, but keep track of time.

- **What about net SRS fees?**

Net SRS fees chargeable will be **automatically calculated** (without personal record amounts or fee waivers).

Although under current OIP rules, no SRS fees can be charged for personal record requests, agencies should still keep track of the time spent fulfilling them.

As for **net SRS fees chargeable** (Col. AD), these chargeable fees will be **automatically calculated**, leaving out personal record amounts or fee waivers. But for this calculation to work, **the agency must properly identify the request as a personal records request in Column F.**

The next three slides show the pop-up instructions for fees incurred for **personal records**, and **total net SRS fees chargeable**.

What is chargeable to the requester is found in Column AD, where we have the **Total Net SRS Fees Chargeable**. This amount is based on the SRS times entered by the agency, and **excludes amounts for personal records requests, waivers, and fees incurred but not chargeable**. Column AD automatically calculates the net amount that an agency may charge in SRS fees.

For our first two examples, no fees are chargeable. The first example of a typical request shows that only \$2.50 in SRS fees were incurred (Col. Y), and this falls within the \$30 fee waiver. **Although Example 1 shows a negative \$27.50 in net fees chargeable, this does not mean that the requester is entitled to a refund.** The negative number simply indicates that no fees are chargeable.

The second example also shows that no SRS fees can be charged, because it was a **personal record request**.

The **third example** is by an anonymous requester for President Obama's birth certificate, which is a government records request, not a personal records request, and therefore, SRS fees can be charged. In that case, SRS fees of \$67.50 were incurred, and the Log automatically subtracts the \$30 fee waiver, so the total net SRS fees chargeable to the requester is \$37.50, as shown in column AD.

The next slide explains the SRS fees for " Example 4.

The last arrow at the bottom points to the total net SRS fees chargeable in Column AD for the “**Honolulu News**” request (Example 4).

Because this was a **large, complex request** that incurred \$1,360 in SRS fees (Column Y) and was entitled to receive the \$60 public interest fee waiver (Column AB), the Log automatically calculated the net fees chargeable by subtracting \$60 from \$1,360, resulting in total net SRS fees chargeable of \$1,300. (Column AD).

## *Columns AE & AF:* **Copy/Delivery Costs**

- **Gross** copy/delivery costs that agency actually **incurred**, but may not have totally recovered
  - Include copies made for redaction
  
- **Net** copy/delivery costs properly **chargeable** to requester
  - Exclude copies made for redaction
  - Include copies made of electronic record if requester wants them faxed, mailed, or provided in a physical form

Separate from SRS fees, OIP rules (HAR §2-17-19) allow an agency to recover “[a]ny other lawful fees,” such as copy and delivery costs, for responding to a records request. Each agency, not OIP, sets its own schedule of photocopying costs, which is governed by HRS §92-21 and is outside of OIP’s jurisdiction.

Column AE is where the agency enters the **gross copy/delivery costs** that it **incurred**. For gross costs, the agency should **include** all costs of copies, even those made for the agency’s use in redacting the record.

Column AF asks for the **net copy/delivery costs** that the agency can charge to the requester. For net costs, **the agency should exclude extra copies made for the agency’s use in redacting a record – OIP’s rules allow the agency to charge only for the redacted copy that was provided to the requester.** You can **include in the net costs** copies made of an **electronic** record **if** the requester asked them to be faxed, mailed, or otherwise provided in a physical form.

In this slide, Columns AE and AF show the section of the Log for **Copy/Delivery Costs**. The four arrows at the bottom point to the copy/delivery costs for the four request examples.

In the case of Example 2 (Lee), you see that all copying and delivery costs totaled \$15 in column AE, but that only \$5 of that amount could be charged, as shown in Column AF. This implies that \$10 of the total costs were for copies that the agency made for its own purposes to redact the record, which the agency could not charge the requester. Only the cost of copying the redacted record for the requester could be properly charged to the requester.

Similarly, Example 4 shows that \$20 of the copying costs was disallowed.

*Columns AG thru AJ:*

## **Total Fees & Costs**

(this last section shows the “bottom line”  
for agency fees & costs)

Agency to input:

- Total fees & costs **actually paid** by requester

Log automatically calculates (for statistical purposes):

- Total net fees & costs **chargeable**
- Total gross fees & costs **incurred**
- Total gross fees & costs **incurred but not charged**

Finally, we come to the **bottom line** for **total agency fees & costs**. These statistics will show agencies what it is costing them to respond to records requests, and what fees and costs they are actually recovering from requesters.

First, in Column AG, the agency inputs the total fees & costs **actually paid by the requester**. Note that this amount **should not exceed the total chargeable fees and costs in Column AH**.

The Log **automatically calculates Column AH, AI, and AJ:**

1. Total net fees & costs **chargeable** (Column AH);
2. Total gross fees & costs **incurred** by the agency (Column AI); and
3. Total gross fees & costs **incurred but cannot be charged or were not paid, and are unrecoverable** (Column AJ).

Let's look at the **four examples**.

In Example 1 (typical request), Column AG shows that the requester actually paid \$10 which is also the total net fees and costs that could be charged, as shown in Column AH. Per Column AI, the actual total gross fees and costs that the agency incurred is \$12.50, so Column AJ shows that the agency incurred \$2.50 in gross fees and costs that it cannot recover.

In Example 2 (personal record request), Column AG shows that the requester actually paid \$5, which is the net chargeable amount in Column AH. Column AI, however, shows that the agency actually incurred \$25 to fulfill this request, and since only \$5 was actually paid, Column AJ shows that \$20 in gross fees and costs were incurred but not charged by the agency and were not recovered.

In Example 3 (anonymous birther), Column AG shows that this requester paid nothing, because she had abandoned the request (Column S). Column AH shows that \$37.50 could have been charged by the agency, and Column AI shows that the agency actually incurred \$67.50 in gross fees and costs, which it could not recover per Column AJ.

Finally, in Example 4 (Honolulu News), we see that the total fees and costs actually paid by the requester was \$1,315 (Column AG), which is just under the \$1,320 in Column AH that could be charged by the agency. The agency actually incurred total gross fees and costs of \$6,710 as shown in Column AI, leaving it with \$5,395 in unrecoverable fees and costs per Column AJ.

The total fees and costs that are automatically calculated by the Log will provide important objective data regarding the cost of meeting UIPA record requests. Once the Log is uploaded to data.hawaii.gov, even more statistics can be calculated to determine how well agencies are responding to UIPA requests. For example, it will be possible to calculate the percentages of requests that were completed within 10 business days, how they were completed, and how many were complex requests. Thanks to your efforts in filling out the Log and uploading the totals to data.hawaii.gov, we will finally have detailed, relevant, and useful data to help analyze the costs and benefits of Hawaii's open records law and to show how well the government is meeting its UIPA responsibilities.

**For detailed UIPA Log Instructions,

Now that you've been trained to fill out the Log, where do you go for help when you're actually doing it? Remember that you have some instructions in the Log's headings, as well as pop-up instructions in the on-line Log.

You have already found this power point presentation on OIP's website, where can also find other help, including:

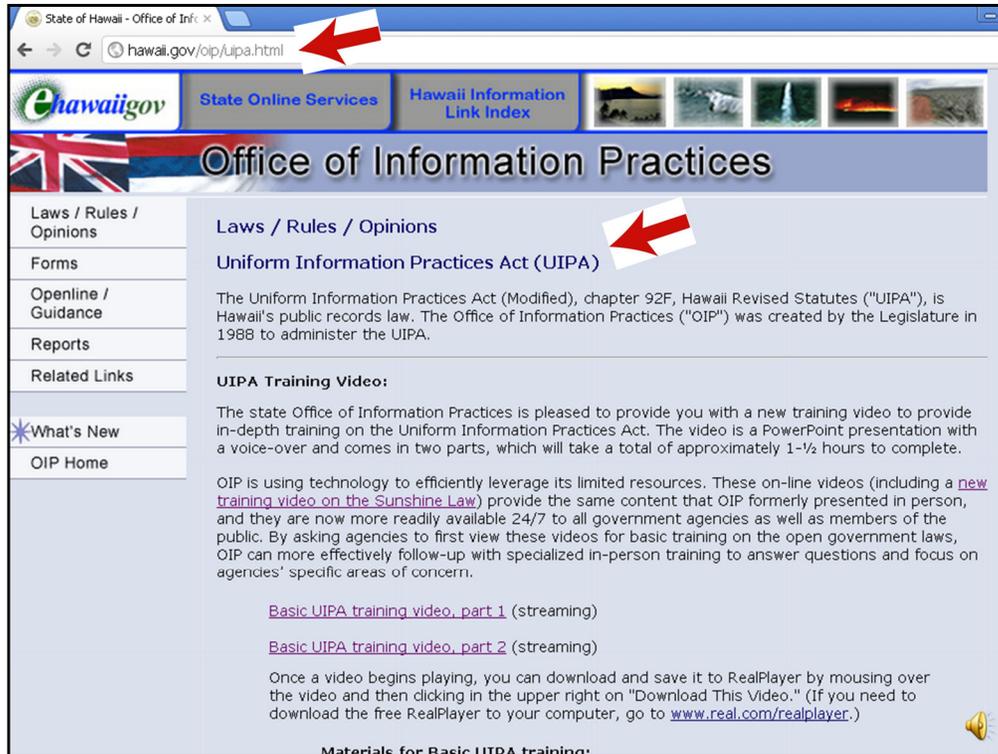

- 1)The full set of UIPA Log instructions;
- 2)Frequently Asked Questions about the Log;
- 3) How to upload the agencies' Log to the Master Log at [data.hawaii.gov](http://data.hawaii.gov);
- 4) The UIPA training guide; and
- 5) The UIPA power point presentation and training materials.

The next two slides illustrate how to get back to the training page.

Here's the **OIP home page**, with the navigation bar on the left, just above the state seal. You'll find at the top, the page for **“Laws/Rules/Opinions.”**

At the bottom of the list, you will see the page for **“What's New,”** where you will find timely updates concerning OIP and open government news. If you are not receiving OIP's emailed What's New articles, please email or contact OIP to be added to the What's New email list.

On OIP’s Laws/Rules/Opinion page, you will find extensive training materials that you can study at your pace and convenience 24/7. You can access all UIPA and Sunshine Law training by clicking on the “Training” link. Alternatively, you can go to a specific topic, such as the UIPA, Sunshine Law, OIP’s rules, formal opinions, informal opinion summaries, or recent legislation, which will take you directly to the materials on that topic.

This slide shows you the UIPA page that open up when you click on that topic, where you will find all of the UIPA training materials, including detailed Log Instructions, Frequently Asked Questions, and the other training materials for the Log.
