INTRODUCTION

This study examines statistics from Hawaii individual income tax returns that were filed by resident and nonresident taxpayers for tax year 2012. Nonresident taxpayers include part-year residents and nonresidents who have Hawaii individual income tax liabilities. The Department of Taxation has prepared annual studies on individual income tax statistics since 1958, but work on the studies was discontinued after 2008, owing to cutbacks in personnel in the wake of the Great Recession. The present study for tax year 2012 is the first one published since the study for tax year 2005 was published in February of 2008.

Every individual doing business in the State must file an individual income tax return, whether or not the individual derives taxable income from the business. Also, every individual receiving more gross income than a threshold amount must file a tax return. The threshold amount for resident taxpayers generally is equal to the sum of the amount of the standard deduction plus the personal exemption. For dependent taxpayers (individuals who may be claimed as a dependent on the tax return of another taxpayer), the threshold amount is the standard deduction amount. For nonresident aliens, the threshold amount is the personal exemption amount. For other nonresidents, the threshold amount is prorated according to the portion of the taxpayer's total income that is included in Hawaii adjusted gross income (AGI). Taxpayers with income below the threshold may nevertheless want to file an individual income tax return to claim refundable tax credits.

This study presents data taken from Hawaii individual income tax returns filed by all resident and nonresident taxpayers for tax year 2012. Residents may file Form N-11 or Form N-13 to pay their Hawaii individual income tax. Form N-13 (which is a shorter and simpler form) is available for resident taxpayers with taxable income below \$100,000 who do not itemize deductions or claim adjustments to income. Form N-11 may be used by any individual taxpayer who is a resident and who files a federal income tax return. Form N-11 uses federal AGI as the starting point for calculating Hawaii taxable income. Nonresidents with Hawaii income tax liabilities and part-year residents must use Form N-15.

HAWAII'S INDIVIDUAL INCOME TAX LAW AND THE INTERNAL REVENUE CODE

Hawaii generally follows federal definitions for taxable income of individuals, and the State Legislature annually passes legislation to conform Hawaii's income tax law to selected changes that were made to provisions in the previous year's Internal Revenue Code (IRC). However, there are a number of differences between the income tax laws of Hawaii and those of the federal government. The main differences in the definition of taxable income are that the federal government includes social security benefits, distributions from employer-provided pensions, interest on U.S. savings bonds,

contributions made to a Hawaii individual housing account, and (in 2012) the first \$5,975 of Hawaii National Guard duty or military reserve pay, whereas Hawaii does not. On the other hand, Hawaii includes in taxable income the cost-of-living allowances given to federal civilian employees in Hawaii, State or County employee contributions to the Hawaii state government contributory plan or to the hybrid plan of the Employees Retirement System, and interest on state and local government bonds issued by jurisdictions outside of Hawaii, whereas the federal government does not. Hawaii generally does not conform to tax credits in the IRC and offers a number of its own tax credits that are not available in the IRC.

Hawaii does not conform to the amounts for the standard deduction or personal exemption in the IRC. Also, Hawaii allows an extra personal exemption for taxpayers who are at least 65 years of age and an exemption of \$7,000 for a person who is blind, deaf or totally disabled. However, Hawaii's regular personal exemption was only \$1,040 for tax year 2012, whereas the federal personal exemption was \$3,800. For 2012, the federal standard deduction for 2012 was \$11,900 for married couples filing a joint tax return, \$5,950 for single individuals and married couples filing separate tax returns and \$8,700 for heads of household. Hawaii's standard deductions for these categories for 2012 were \$4,000, \$2000 and \$2,920. The federal exemption and standard deduction amounts are adjusted each year to account for inflation, whereas Hawaii's standard deduction and exemption amounts are not adjusted for inflation.

INDIVIDUAL INCOME TAX LEGISLATION

Hawaii's legislature enacted several measures related to individual income taxes that were effective for tax year 2012, of which the following are the most prominent:

Act 60, Session Laws of Hawaii (SLH) 2009 created new top tax brackets for ordinary income of 9%, 10% and 11% for taxable years 2009 through 2015, after which the top rate is scheduled to return to 8.25%.

Act 14, SLH, Special Session I, 2009 phased out the personal exemption for certain high income taxpayers for taxable years 2009 through 2014.

Act 97, SLH 2011 repealed the state tax deduction and capped itemized deductions for certain high-income taxpayers for taxable years 2011 through 2015. The caps are set to expire December 31, 2015. The Act also delayed (until 2013) and made permanent a 10% increase in the standard deduction and personal exemption.

ACT 179, SLH 2012, adopted amendments to conform to changes in the Internal Revenue Code to assure continued state conformity with federal income tax law and to reduce the taxpayer's burden in complying with Hawaii's income tax law.

DATA SOURCE AND METHODOLOGY

Data for this report were collected from the Department of Taxation's Integrated Tax Information Management System (ITIMS), which provides data in electronic form. Data from the ITIMS Tax Processing System (ITPS) were retrieved for income tax returns filed for tax year 2012 and processed by March 31, 2014. (The due date for 2012 tax returns with extensions was October 20, 2013.) A total of 679,070 tax returns were extracted for the study. The data taken from the tax returns are items as reported by individuals, before any subsequent audits, but after automatic adjustments that the Department made when processing the tax returns.

The data items on the tax returns were checked for accuracy by examining the largest entries for each item and checking them against images of the tax returns, and by making sure that figures for total income, deductions, exemptions, and taxable income were consistent with each other.

NUMBER OF TAX RETURNS FILED, BY TYPE OF RETURN AND BY FILING STATUS

Table 1 shows the number and type of tax returns filed by residents and by nonresidents for tax year 2012, by Hawaii AGI class and by tax district. (Hawaii is divided into the following four tax districts: the First District is the City and County of Honolulu; the Second District consists of Maui and Kalawao Counties; the Third District consists of Hawaii County; and the Fourth District consists of Kauai County.) Residents filed a total of 601,420 Hawaii individual income tax returns for tax year 2012. About 96% of the resident tax returns were filed on Form N-11 and 4% were filed on form N-13. Of the resident tax returns, 71% were from taxpayers on Oahu, 11% were from taxpayers on Maui, 12% were from taxpayers on Hawaii and 5% were from taxpayers on Kauai. Nonresidents filed a total of 77,650 tax returns, or about 11% of the total number of tax returns filed. For both resident and nonresidents, the income class containing the greatest number of tax returns was the class for Hawaii AGI less than \$5,000 (including tax returns showing losses). Tax returns in this income class accounted for 15% of all tax returns filed by residents and for 52% of the tax returns filed by nonresidents.

Table 1
Types of Individual Income Tax Returns Filed for Tax Year 2012 ^{1/}

By Hawaii AGI Class				
Hawaii AGI Class	Forms N-11	Forms N-13	Forms N-15	All Individual Returns
less than \$5,000	90,270	11,440	40,613	142,323

\$75,000 " \$100,000	43,780	322	1,418	45,510
\$100,000 " \$150,000	40,805	10	1,262	42,077
\$150,000 " \$200,000	13,692	0	545	14,237
\$200,000 " \$300,000	7,707	0	446	8,153
\$300,000 and over	6,053	0	570	6,623
Total - All Returns	575,922	25,498	77,650	679,070

By Tax District ^{2/}				
Tax District	Forms N-11	Forms N-13	Forms N-15	All Individual Returns
Oahu (District 1)	409,192	18,601	73,380	501,173
Maui (District 2)	65,879	1,938	1,775	69,592
Hawaii (District 3)	71,101	3,919	1,747	76,767
Kauai (District 4)	29,750	1,040	748	31,538
Total - All Returns	575,922	25,498	77,650	679,070

^{1/} Includes both taxable and nontaxable tax returns.

^{2/} Forms N-15 for nonresidents that have an out-of-state address are allocated to Oahu.

Table 2 shows the distribution of the number of tax returns and of Hawaii AGI by filing status. Among residents, the 'Single' filing status accounted for the biggest percentage of the tax returns (50%), followed by 'Joint' (Married, filing jointly) with 37%. 'Head of household,' 'Qualified widower' and 'Married, filing separately' together accounted for 13% of the resident tax returns. The most common filing status among nonresident tax returns was 'Joint' (49%), followed by 'Single' (41%). Tax returns with 'Joint' status accounted for the biggest percentage (62%) of the total Hawaii AGI for both the resident tax returns and the nonresident tax returns. Tax returns with 'Single' status accounted for 28% of the total Hawaii AGI reported on the resident tax returns and for 27% of the total Hawaii AGI reported on the nonresident tax returns.

Table 2
 Number of Tax Returns and Hawaii AGI by Status of Taxpayer – 2012
 (Dollar amounts are in millions)

Status	Residents				Nonresidents			
	Number of Returns	% of Total	Hawaii AGI	% of Total	Number of Returns	% of Total	Hawaii AGI	% of Total
Joint	219,323	36.5	\$18,381	61.7	37,689	48.5	\$559	61.6

Note: Details may not add to totals due to rounding.

HIGHLIGHTS OF STATISTICS FROM RESIDENT TAX RETURNS

Resident Income and Adjustments

Selected data from resident tax returns are shown in Appendix Tables A-1 and A-2. Figure 1 shows the major components of resident tax returns for tax year 2012. Residents with taxable income reported aggregate Hawaii AGI of \$30.1 billion on their Hawaii income tax returns for 2012. Of the total, \$29.7 billion was reported on Form N-11 and the remainder (\$0.4 billion) was reported on Form N-13. Residents with nontaxable income reported aggregate Hawaii AGI of -\$296 million on Form N-11 and aggregate Hawaii AGI of \$4 million on Form N-13.

Federal AGI is not reported on Form N-13, but it is the starting point for calculating Hawaii taxable income on Form N-11, where Hawaii AGI is derived by subtracting income that is taxed by the federal government but not by Hawaii, and adding income that is taxed by Hawaii but not by the federal government. The largest income items subtracted from the federal AGI are social security benefits and certain employer-provided pensions. The largest income items added to federal AGI include cost-of-living allowances for civilian federal employees, contributions to the state employees' retirement system, and interest on out-of-state bonds. Items added to the federal AGI in 2012 totaled \$601.1 million, whereas the items subtracted totaled \$3.4 billion.

Figure 1
COMPONENTS OF A RESIDENT TAX RETURN
(Dollar amounts are in millions)

TAXABLE RETURNS		NONTAXABLE RETURNS
\$29,723	INCOME FROM ALL SOURCES OTHER THAN EXEMPT PENSIONS AND SOCIAL SECURITY	(\$213)
(\$359)	LESS ADJUSTMENTS TO INCOME <u>1/</u>	\$79
\$30,082	EQUALS HAWAII AGI	(\$292)
\$4,639	MINUS TOTAL DEDUCTIONS (ITEMIZED DEDUCTIONS OR THE STANDARD DEDUCTION) <u>2/</u>	\$937
\$1,075	AND MINUS EXEMPTIONS	\$264
\$24,368	EQUALS TAXABLE INCOME	-
\$1,653	TIMES APPLICABLE TAX RATES EQUALS TAX LIABILITIES BEFORE TAX CREDITS	-
\$208	MINUS TAX CREDITS <u>3/</u>	\$24
\$1,445	EQUALS TAX AFTER CREDITS	(\$24)

Note: Details may not add to totals due to rounding.

1/ Adjustments to income include student loan interest, payments to IRA plans, part of reservist or National Guard wages, adjustments for self employed, certain business expenses, moving expenses, alimony paid, forfeited interest, health savings accounts, educator expenses, federal adjustments.

2/ Itemized deductions are the sum of charitable contributions, interest, taxes, medical and dental expenses, casualty losses and miscellaneous deductions.

3/ Tax credits available to individuals in 2012 (including carryovers of credits from prior years) were those for refundable food/excise, low-income household renters, child and dependent care expenses, child passenger restraint systems, employment of vocational rehabilitation referrals, low income housing, school repair and maintenance, fuel for commercial fishers, motion picture and digital media, renewable energy technologies, enterprise zones, ethanol facilities, capital good excise taxes, individual development accounts, high technology business investment, energy conservation, hotel construction and remodeling, technology infrastructure, residential construction and remodeling, and other tax credits.

Table 3 shows the adjustments that residents made to their federal AGI to reach their Hawaii AGI on Form N-11, along with the number of tax returns on which the adjustments were reported. For residents who filed Form N-11, federal AGI was \$31.5 billion for those with Hawaii taxable income and \$1.7 billion for those without Hawaii taxable income. The bulk of the difference between federal AGI and Hawaii AGI was accounted for by social security benefits and pensions that are taxed federally but exempt from Hawaii income tax. Together, these items amounted to \$2.4 billion for residents with Hawaii taxable income and \$1.9 billion for residents without Hawaii taxable. Data on exempt pension and social security information are not available for this study for the residents who filed Form N-13, but residents filing Form N-13 accounted for less than 4% of the total number of age exemptions claimed by residents in 2012.

Table 3

Differences Between Federal AGI and Hawaii AGI for Residents Who Filed Form N-11 for Tax Year 2012

(Dollar amounts are in millions)

	Taxable Returns		Nontaxable Returns	
	Number	Amount	Number	Amount
	of Returns		of Returns	
Federal AGI	479,724	\$31,749	96,198	\$1,667

EQUALS				
Hawaii AGI	479,724	\$29,709	96,198	(\$296)

Note: Details may not add to totals due to rounding.

1/ Includes interest on federal obligations, interest on an Individual Housing Account, expenses connected with federal credits, individual development accounts, certain income from high technology businesses, and other adjustments.

2/ Includes taxable amounts of Individual Housing Accounts, Hawaii tax refunds, excluded income earned outside of the United States, certain depreciation amounts, and other adjustments.

Resident Deductions and Personal Exemptions

Residents may reduce their adjusted gross income by a standard deduction amount or by their allowable itemized deductions. The standard deduction amount for 2012 is based on the individuals' filing status, as shown below:

<u>Status</u>	<u>Standard Deduction for 2012 (\$)</u>
Single	2,000
Married Filing Joint	4,000
Married Filing Separate	2,000
Head of Household.....	2,920
Qualified Widow(er) with Dependent Child	4,000

The standard deduction for individuals who may be claimed as a dependent is limited to the greater of \$500 or their earned income, up to the full standard deduction for their filing status. In most cases, the dependent individual's filing status is single, and the corresponding maximum standard deduction is \$2,000.

Unlike the federal standard deduction amounts, which are adjusted annually for inflation, the Hawaii standard deduction amounts are fixed by statute and are infrequently changed (see Table 4 below). Prior to 1982, the standard deduction amounts were equal to 10% of adjusted gross income, up to a maximum of \$1,000 for married persons filing a joint return and \$800 for persons with a filing status of 'Single' or 'Head of Household'.

Table 4
Changes in Hawaii's Standard Deduction Over
Time

Status	Year			
	1982	1987	1989	2007
	Standard Deduction (\$)			
Single	800	1,000	1,500	2,000
Married Filing Joint	1,000	1,700	1,900	4,000
Married Filing Separate	500	850	950	2,000
Head of Household	800	1,500	1,650	4,000

There are six categories of itemized deductions: charitable contributions, interest expenses, medical and dental expenses, casualty and theft losses, taxes paid, and miscellaneous deductions. The amounts of itemized deductions that may be claimed are subject to various limitations, including limits on the total amount of such deductions based on the taxpayer's total income. Appendix Table A-4 shows the types and amounts of deductions claimed by residents in 2012, including the standard deductions

and itemized deductions, as well as the amounts of itemized deductions that were disallowed owing to the limits on the deductions. The data are summarized in Table 5 below.

Table 5
Itemized and Standard Deductions Claimed by Residents – 2012
(Dollar amounts are in millions)

Deduction Type	Number of Returns	% of All Returns	Amount	% of Total Allowable Deductions
Charitable Contributions	231,828	38.5	\$679	12.2
Interest	166,551	27.7	2,084	37.4
Medical and Dental	86,904	14.4	533	9.6
Casualty and Theft	376	0.1	5	0.1
Taxes	318,403	52.9	1,416	25.4
Miscellaneous	124,180	20.6	551	9.9
Total Itemized Deductions	324,373	53.9	\$5,268	94.5
Total Unallowed Itemized Deductions	21,173	3.5	392	7.0
Allowable Itemized Deductions	324,373	53.9	4,876	87.4
Total Standard Deductions	277,047	46.1	701	12.6
Total Allowable Deductions	601,420	100.0	\$5,577	100.0

Note: Details may not add to totals due to rounding.

All individuals filing a Hawaii income tax return, other than those who may be claimed as a dependent, may claim one personal exemption for themselves and an additional exemption for each qualified dependent. Individuals who are 65 or older may claim an additional personal exemption. The personal exemption amount is \$1,040 per exemption, but individuals who are certified as blind, deaf, or totally disabled may claim a personal exemption of \$7,000 for themselves. For tax year 2012, a total of 1.3 million exemptions (including the age exemption) were reported on 571,030 resident income tax returns, for an average 2.3 exemptions per return. The aggregate amount of exemptions claimed was \$1.3 billion. The number and amount of the exemptions claimed in each income class are shown in Appendix Table A-5.

Resident Taxable Income and Tax Liability

Of the tax returns filed by residents, 18% had no taxable income. Residents with taxable income reported total tax liabilities for 2012 of \$1.7 billion before tax credits and \$1.4 billion after tax credits. Oahu (District 1) accounted for 75% of the total taxable income of residents, followed by Maui (District 2) with 11%, Hawaii (District 3) with 10% and Kauai (District 4) with 4%. Appendix Table A-6 shows average Hawaii income tax liabilities and average effective tax rates by income class, both before and after tax

credits. Appendix Table A-7 provides selected data on income, deductions and tax liabilities by tax district.

Figure 2 shows the percentage distribution of total resident tax liability by Hawaii AGI class. Residents with \$100,000 in Hawaii AGI or more paid 59% of the total taxes paid by all residents before tax credits and 57% of the total after tax credits. Residents with \$200,000 or more in Hawaii AGI paid 35% of the total taxes paid by all residents before tax credits and 33% of the total after tax credits.

Figure 2
Distribution of Total Tax Liabilities of Residents by Hawaii AGI Class – 2012

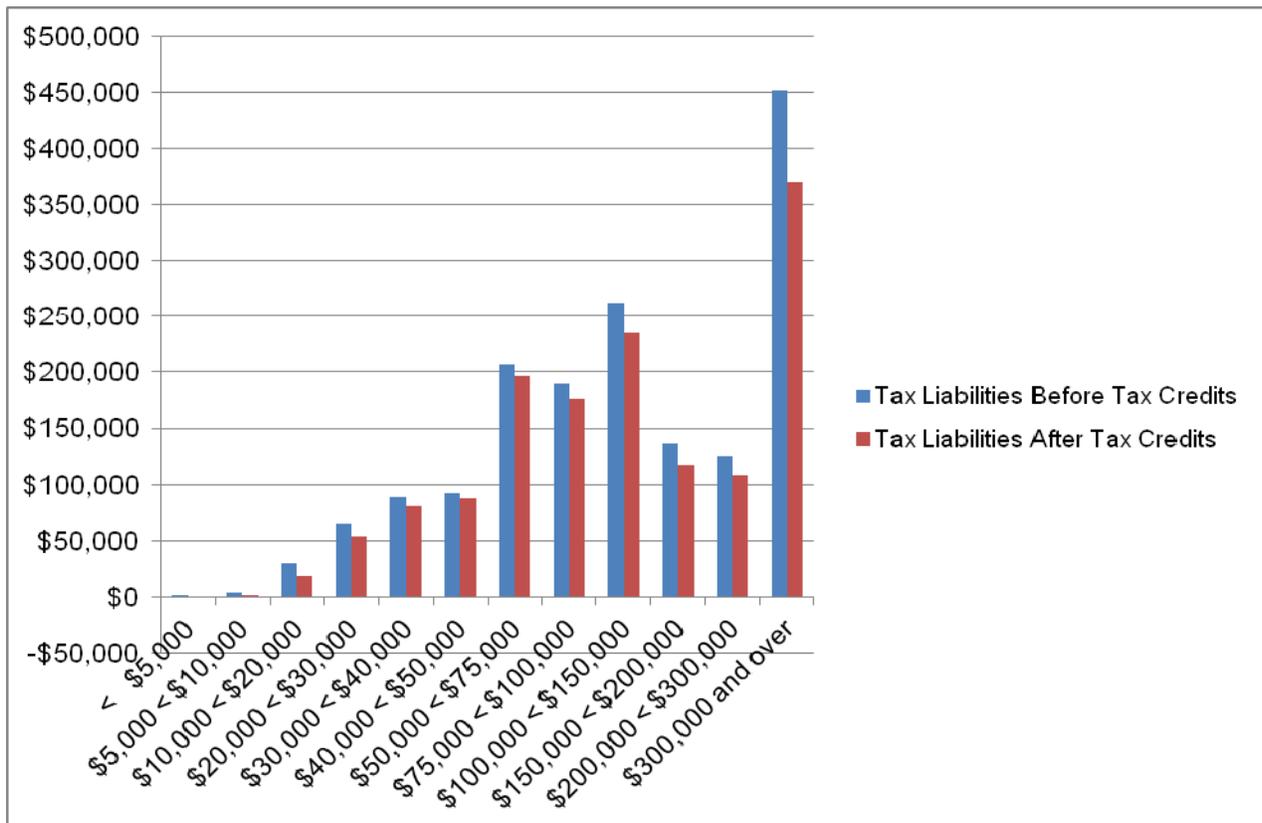

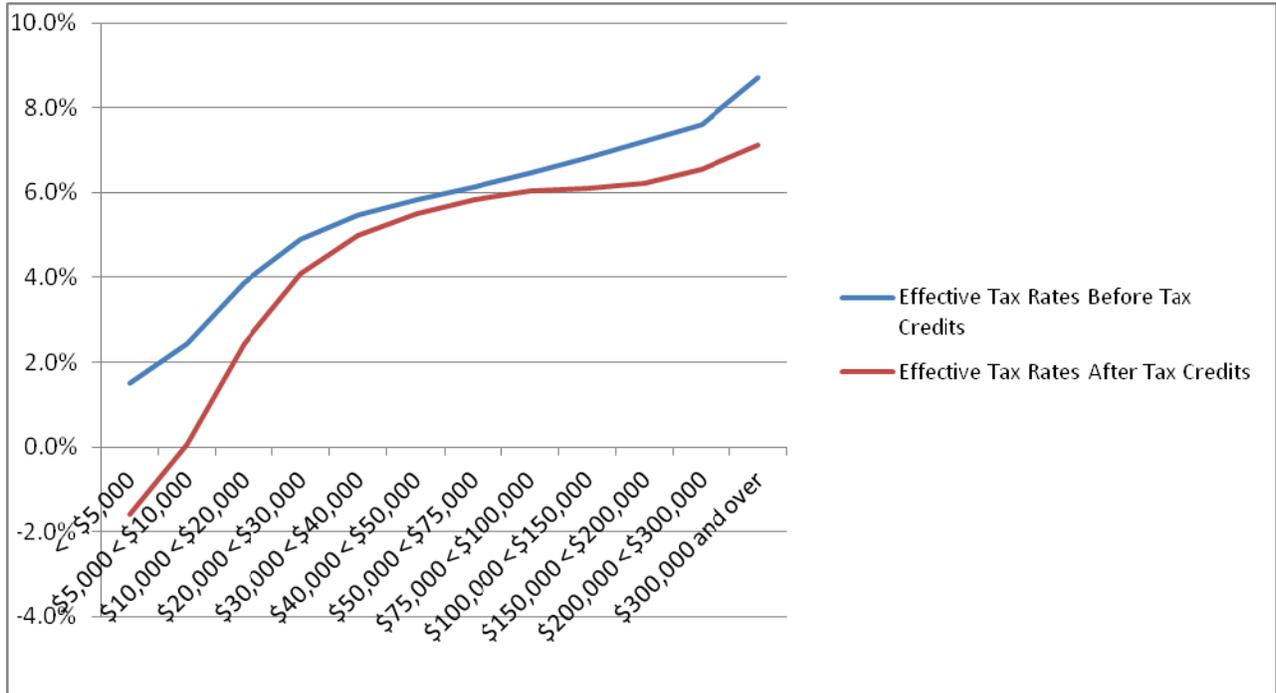

Figure 3 below shows the average effective tax rates for residents by income class. Most residents with Hawaii AGI below \$10,000 (63%) did not have any taxable income. For those in this income group who had taxable income, the average effective tax rate was 2.3% before tax credits, but -0.1% after tax credits. The change in the average effective tax rate caused by tax credits was greatest for residents with Hawaii AGI less than \$5,000, where tax credits caused the average effective rate to drop by 3.1% (from positive 1.5% to negative 1.6%). The average effective tax rate rises with income, both before and after tax credits, showing that Hawaii's income tax is progressive. The rate

of climb of the average effective tax rate is greatest at the low and high ends of the income distribution.

Figure 3
Effective Tax Rates on Taxable Income Before and After Tax Credits,
By Hawaii AGI Class

HIGHLIGHTS OF STATISTICS FROM NONRESIDENT TAX RETURNS

Nonresidents (the term includes those who were residents for only part of the tax year) use Form N-15 to file their Hawaii income taxes. For tax year 2012, nonresidents filed 77,650 tax returns, or 11% of the total number of resident and nonresident tax returns filed for the year. The total, or worldwide AGI of the nonresidents (essentially, what their Hawaii AGI would have been if they had been residents) was \$62.2 billion, which is more than double the Hawaii AGI of all residents. Appendix Table A-3 provides selected statistics from nonresident tax returns by Hawaii AGI class. Table 6 below shows the total AGI, Hawaii AGI, and Hawaii taxable income by total AGI class.

Table 6
 Selected Data from Nonresident Returns by
 Total (Worldwide) AGI Class - 2012
 (Dollar amounts are in millions)

Total AGI Class	Number of Returns	Total AGI	Hawaii AGI	Taxable Income	Tax Liability Before Credits
Taxable					
<0	287	(\$188)	\$36	\$26	\$2
0-5,000	2,113	5	34	30	2
5,000-10,000	3,524	27	19	11	0
10,000-20,000	6,684	100	60	43	2
20,000-30,000	5,265	131	69	55	2
30,000-40,000	3,783	132	63	51	2
40,000-50,000	3,130	140	61	50	2
50,000-75,000	5,934	366	146	121	6
75,000-100,000	4,057	353	126	105	6
100,000-150,000	4,760	579	191	163	10
150,000-200,000	2,293	395	119	104	7
200,000-300,000	2,147	517	134	122	8
>300,000	5,505	40,679	714	696	56
Taxable total	49,475	\$43,236	\$1,771	\$1,576	\$106
Nontaxable					
Loss	3,055	(\$4,085)	(\$293)		
0-5,000	4,666	4	(15)		
5,000-10,000	857	6	(3)	NOT APPLICABLE	
10,000 and over	19,597	23,010	(553)		
Nontaxable Total	28,175	\$18,935	(\$864)		
Total	77,650	\$62,172	\$907	\$1,576	\$106

Note: Details may not add to totals due to rounding.

Nonresident Deductions and Exemptions

Nonresidents must prorate the standard deductions and personal exemption amounts to determine their Hawaii taxable income. The prorated amount is the ratio of Hawaii AGI to worldwide AGI. Hawaii AGI, less the prorated exemption amount, and less either the Hawaii itemized deductions or the prorated standard deduction, equals Hawaii taxable income. In 2012, 48,410 nonresident tax returns had the standard deduction and 29,240 nonresident tax returns had allowable itemized deductions. The nonresidents claimed prorated itemized deductions of \$660 million, but their allowable itemized deductions were only \$290 million. Their prorated standard deductions totaled \$61 million and their prorated exemptions totaled \$43 million.

Nonresident Taxable Income and Tax Liability

As shown in Table 6, income and Hawaii tax liability of the nonresidents is heavily skewed towards the high end of the income distribution. Nonresidents reported \$1.6 billion in total income subject to Hawaii taxation in 2012 on total Hawaii AGI of \$1.8 billion. Their total Hawaii tax liability before tax credits was \$106 million, of which over half (53%) was owed by nonresidents with worldwide AGI of \$300,000 or more. The nonresidents had total Hawaii tax liability after tax credits of \$91 million, including negative amounts of tax owed by nonresidents with nontaxable returns. The average gross tax liability before tax credits was \$1,362 and the average net tax liability after tax credits was \$1,177.

STATISTICS FROM TAX RETURNS OF ELDERLY RESIDENTS

Elderly taxpayers (those 65 years of age or older) may claim an extra exemption. The extra age exemption was claimed on a total of 124,571 resident tax returns for 2012. The tax returns showed total Hawaii AGI of \$4.3 billion and total taxable income of \$3.5 billion. Fewer than half of the tax returns with an age exemption reported taxable income. Income taxes paid on the returns totaled \$255 million before tax credits and \$192 million after tax credits. The tax returns showed a total of \$136 million in standards deductions and a total of \$698 million in itemized deductions. Tax returns filed with Form N-11 that included an age exemption showed \$2.4 billion in pension income that was exempt from Hawaii income tax and an additional \$0.9 billion in exempt Social Security benefits. Data on exempt pension and social security income are not available for this study for residents who filed Form N-13, but taxpayers filing Form N-11 accounted for over 96% of the total number of age exemptions claimed by resident taxpayers in 2012. Overall, the tax returns averaged \$34 thousand in Hawaii AGI per return and \$1,540 per return in net tax after tax credits. Selected data from resident tax returns with at least one age exemption are shown in Table 7.

Table 7

Itemized Deductions	\$627	\$71
Taxable income	\$3,502	-
Tax Liability Before Credits	\$255	-
Tax Liability After Credits	\$206	(\$14)
Number of Taxpayers Over 65	57,876	62,663
Number of Taxpayers' Spouses Over 65	22,713	22,392

STATISTICS FROM TAX RETURNS OF DISABLED RESIDENTS

A special personal exemption of \$7,000 in lieu of the \$1,040 regular personal exemption is available to blind, deaf, or totally disabled taxpayers. A disabled spouse on a joint tax return is also entitled to the \$7,000 exemption, but disabled taxpayers may not claim any additional exemptions for dependents or age, so the maximum allowable exemption on a joint tax return with two disabled taxpayers is \$14,000.

In 2012 there were 5,349 resident tax returns with at least one special exemption for disabled. These tax returns showed Hawaii AGI of \$177 million, Hawaii taxable income of \$106 million, and Hawaii income taxes of \$6 million before tax credits and \$5 million after tax credits. Overall, the tax returns averaged \$33 thousand in Hawaii AGI per return and \$870 per return in tax after tax credits. Selected data from the tax returns are shown in Table 8.

Table 8

Tax Liability Before Credits	\$6	-
Tax Liability After Credits	\$5	(\$1)
Number of Disabled Taxpayers	1,913	1,964
Number of Disabled Spouses	1,071	545

STATISTICS FROM TAX RETURNS OF DEPENDENT RESIDENTS

Taxpayers who may be claimed as dependants by other taxpayers may not claim a personal exemption for themselves. Dependents may itemize deductions, or they may claim the standard deduction, which is the greater of \$500 or their earned income (up to the full standard deduction for their filing status).

A total of 34,054 dependents filed tax returns in 2012, including nonresidents. Their Hawaii AGI totaled \$259 million and their taxable income totaled \$207 million. Their tax returns had tax liability before tax credits of \$10 million and tax liability after tax credits of \$9 million. Overall, the tax returns averaged \$8 thousand in Hawaii AGI per return and \$25 per return in tax after tax credits.

STATISTICS ON NET LONG-TERM CAPITAL GAINS

Hawaii taxes long-term capital gains at 7.25%, or at the taxpayer's marginal tax rate on ordinary income, whichever is less. The alternative rate for long-term capital gains is an important feature of Hawaii's income tax law, because a substantial part of the total taxable income consists of long-term capital gains.

Table 9 shows the distribution of long term capital gains by income class for Hawaii residents and nonresidents with taxable returns. As shown in the table, the capital gains are heavily concentrated on the high end of the income distribution.

Table 9
Income Eligible for the Tax Rate on Long-Term Capital Gains (7.25%)
On Taxable Returns
(Dollar amounts are in millions)
