COMPARING HAWAI'I STATE/LOCAL GOVERNMENT FINANCES TO THOSE OF OTHER AMERICAN STATES

Volume II: Appendices (Detailed Tables, Most Recent Year, State/Local Government Combined)

John M. Knox & Associates, Inc. May 2016

INTRODUCTORY NOTE

This volume contains detailed data downloaded or further calculated from the U.S. Census Survey of State and Local Government Finances (FY <u>2013</u>, comprising the majority of data) and from the Annual Survey of Government Employment and Payroll (FY <u>2014</u>, which focuses on a single month and comprises only one of the appendices below). Further calculations include sub-category percentages of total categories and divisions by State Gross Domestic Product or population to facilitate comparison.

The data in this Vol. II appendix are for <u>combined</u> State and Local Governments, which we believe usually represents the most valid way to compare Hawai'i with the rest of the country. However, an additional Vol. III appendix contains <u>only</u> State Government data for the same recent years, as well as information about what percentage of the combined government data for each measure (to be found in this Vol. II) comes from state-level data only.

CONTENTS

Volume II: Appendices (Detailed Tables)

- A. Characteristics of States That Are Potentially Relevant to Government Comparability
- B. State and Local Government Revenue Data, FY 2013
- C. State and Local Government Expenditure Data, FY 2013
- D. State and Local Government Employment and Payroll Data, FY 2014
- E. State and Local Government Debt, FY 2013
- F. State and Local Government Cash and Security Holdings, FY 2013

APPENDIX A:

CHARACTERISTICS OF STATES THAT ARE POTENTIALLY RELEVANT TO GOVERNMENT COMPARABILITY

- (1) All 50 States (excluding District of Columbia, including Hawai'i)
- (2) Hawai'i and "Comparable States"

As noted in Vol. I, the original intent was to identify five states that would be relatively "more comparable" to Hawai'i than others. This was attempted, and the states selected were Delaware, Nebraska, New Hampshire, Rhode Island, and Vermont. All following appendices summarize and average information for these "Comparable States." However, the data for these states usually show almost as much variability among the "Comparable States" as among all 50 U.S. states. Therefore, the average of the "Comparable States" is not actually much discussed in the findings of Vol. I.

APPENDIX B:

STATE AND LOCAL GOVERNMENT REVENUE DATA, FY 2013

- (1) All 50 States (excluding District of Columbia, including Hawai'i)
- (2) Hawai'i and "Comparable States"

The framework (original Census vs. modifications for this study) for expenditure categories is presented in Vol. I, Figure 2.1 and 2.2. Also, <u>see Vol. I Sec. 2.7 for notes on definitions of various "Other" categories – e.g., "Other Taxes" or "Other Charges."</u> These additional <u>selected</u> notes are from the most recent "Government Finance and Employment Classification Manual," downloaded May 2016 from https://www.census.gov//govs/local/.

General (Broad) Categories

- (1) "From Federal Government:" Standard federal operational subsidies (e.g., housing assistance, public welfare, Medicaid, job training, disaster recovery) and planning/construction grants for selected airports, highways, storm drainage, etc. Some things excluded and instead counted under other categories e.g., federal grants for urban mass transit.
- (2) "State & Local Taxes:" "Taxes are compulsory contributions exacted by a government for public purposes, other than for employee and employer assessments and contributions to finance retirement and social insurance trust systems and for special assessments to pay capital improvements. Tax revenue comprises gross amounts collected (including interest and penalties) minus amounts paid under protest and amounts refunded during the same period."
- (3) "Current Charges:" "...amounts received from the public for performance of specific services which benefit the person charged and from the sale of commodities or services other than utilities and liquor stores. Includes fees, maintenance assessments, and other reimbursements for current services; rents and sales derived from commodities or services furnished incident to the performance of particular functions; gross income of commercial enterprises; and the like. Charges are distinguished from license taxes, which are privileges granted by a government or fees collected to finance regulatory activities."
- (4) "Insurance Trusts" (abbreviation of "Social Insurance Trusts"): Funds that meet the following criteria (a) financed by a separate accounting fund; (b) has assured revenue stream or dedicated revenue source; (c) has a social insurance purpose; (d) members of system must be outside government (though public employees here considered "outside"); (e) administered directly by government itself, not turned over to outside insurer. (Note that Insurance Trusts are properly a portion of <u>Total</u> Revenue, while Taxes and Charges are portions of <u>General</u> Revenue.)

Revenues for Insurance Trusts – including Employee Retirement Systems – are comprised of contributions and earnings on investment (both realized and unrealized gains/losses). Rarely, as in the Great Recession, large unrealized losses can result in negative numbers.

CONTINUED TECHNICAL/DEFINITIONAL NOTES

(Selected) Categories of Taxes

- (1) "General Sales:" "Taxes applicable with only specified exceptions (e.g., food and prescribed medicines) to sales of all types of goods and services or to all gross receipts, whether at a single rate or at classified rates; and sales use taxes." Logically, this would include Hawai'i's General Excise Tax, though the word "excise" appears nowhere in the Census manual. *Note:* Hawai'i's Transient Accommodations Tax (TAT) is <u>not</u> part of "General Sales," but falls under the "Selective Sales and Gross Receipts" tax category.
- (2) "Alcohol and Tobacco Products:" Category for this study that combines original Census categories for selective sales taxes on "Alcoholic Beverages" and "Tobacco Products" i.e., consumer taxes rather than licenses for businesses. On a weighted national basis, alcoholic beverage taxes comprised just 27% (and in Hawai'i 30%) of the combined total in FY 2013, though the Hawai'i alcohol percentage was higher in the 1990s.
- (3) "Individual Income Taxes:" "Taxes on individuals measured by net income and taxes on special types of income (e.g., interest, dividends, income from intangible property, etc." Excludes "... income taxes on unincorporated businesses ... payroll taxes to finance insurance trusts programs, such as Social Security taxes ...; and city gross earnings taxes."
- **(4) "Corporate Income Taxes:"** "Taxes on corporations and unincorporated businesses (when taxed separately from individual income), measured by net income, whether on corporations in general or on specific kinds of corporations, such as financial institutions… Although such taxes may be called 'license' or 'franchise' taxes, they are classified here if measured by net income."
- (5) "Motor Vehicle License Taxes:" "Licenses imposed on owners or operators of motor vehicles for the right to use public highways, such as fees for title registration, license plates, vehicle inspection, vehicle mileage, and weight taxes on motor carriers, highway use taxes, and off-highway fees." (Note: The manual specifies a number of other specific types of License taxes e.g., "Hunting and Fishing" but Motor Vehicle is the only one to appear in the publicly available dataset. This is why it is assumed in Vol. I Sec. 2.7 that "Other Taxes" includes all other license taxes.)

(Selected) Categories of "Charges" and "Miscellaneous General Revenue"

- (1) "Higher Education:" "Tuition, laboratory fees, and other charges of higher education facilities ... Gross receipts from sales and charges by dormitories, cafeterias, athletic contests, lunchrooms, student activities, bookstores, and similar commercial activities ..."
- (2) "(Public) Hospitals:" "Charges from patients, private insurance companies, and public insurance programs (such as Medicare) of public hospitals and of institutions for care and treatment of the handicapped, and receipts of hospital canteens, cafeterias, gift shops, etc."
- (3) "Air Transportation (Airports):" "Hangar rentals, landing fees, terminal and concession rents, sale of aircraft fuel and oil, parking fees at airport lots, and other charges for use of airport facilities or for services associated with their use."
- (4) "Interest Earnings:" "Amounts from interest on all interest-bearing deposits and accounts; accrued interest on investment securities sold; interest on funds held for construction; and interest related to public debt for private purposes." Excludes interest on deposits and investments of employee retirement and other insurance trust funds; dividends from investments; accrued interest on bonds issued by the government; recorded profits on sale of investments; and accrued interest on the purchase of investments.

APPENDIX C:

STATE AND LOCAL GOVERNMENT EXPENDITURE DATA, FY 2013

- (1) All 50 States (excluding District of Columbia, including Hawai'i)
- (2) Hawai'i and "Comparable States"

TECHNICAL/DEFINITIONAL NOTES RELEVANT TO THESE TABLES: The framework (original Census vs. modifications for this study) for expenditure categories is presented in Vol. I Figure 3.1 through Figure 3.4. These additional <u>selected</u> notes are from the most recent "Government Finance and Employment Classification Manual," downloaded May 2016 from https://www.census.gov//govs/local/.

General Terms

- (1) "Total Expenditures:" "...includes all amounts of money paid out by a government during its fiscal year net of recoveries and other correcting transactions other than for retirement of debt, purchase of investment securities, extension of loans, and agency or private trust transactions. Under this definition, expenditure relates to external payments of a government and excludes amounts transferred to funds or agencies of the same government (other than payments to intragovernmental service funds...)"
- (2) "Direct Expenditures:" These include all government expenditures <u>except</u> intergovernmental expenditures (e.g., state grants-in-aid to counties). They would include expenditures for functions that some states perform but not others, such as liquor store operations or some types of insurance trust activities.
- (3) "Direct General Expenditures:" Direct expenditures minus liquor, utility, and social insurance trusts.
- (4) "Salaries and Wages:" "Total expenditure during fiscal year for salaries and wages, covering all functions and activities of the government and its dependent agencies. Includes the general government, liquor stores, and utilities sectors. ... Salaries and wages consist of gross amounts paid for compensation of own officers and employees (prior to deductions for withheld taxes, retirement contributions, charges for subsistence, or other purposes), including both current operations expenditure and capital outlay expenditure. ... This category excludes employer contributions for any type of employee fringe benefit and the value of subsistence, quarters, or other payments-in-kind to military or other public employees."

CONTINUED TECHNICAL/DEFINITIONAL NOTES

(Selected) Categories "by Function"

- (1) "Other Education and Libraries:" Combines data for "Other Education" and "Libraries." Other Education accounted for 80% of the combined national (weighted) total and 75% of the FY 2013 total in Hawai'i (where school libraries would be counted with Education). This includes adult education and vocational rehabilitation not provided by school systems, technical schools awarding certificates equal to less than two years of college; state schools for people with disabilities, etc.
- (2) "<u>Health</u>, Social Insurance Admin., Veterans Pgms.:" Combines three original Census categories. <u>Health</u> accounted for 94% of the FY 2013 combined national total, 99% in Hawai"i. Defined as non-hospital "Provision of services for the conservation and improvement of public health," including public health programs, education, research, health-related inspection and regulation, etc. (Note: The original Census category "Social Insurance Administration" is now generally reported instead as "Employment Security Administration.")
- (3) "Airports, Parking Facilities, Ports:" Combines of three original Census categories. Airports accounted for 74% of the combined national total and 80% of the Hawai'i figure in FY 2013. Airport expenditures include operations, support, construction, etc.
- (4) "Protective Inspection and Regulation:" Inspection of private establishments not classified under another major function e.g., building inspections, professional licensing, workplace hazards, motor vehicle inspections, non-police liquor law enforcement, etc.
- (5) "Natural Resources and Parks & Recreation:" Combines two original Census categories. Parks & Recreation was 57% of the combined FY 2013 national total, 71% in Hawai'i (with capital outlays). This includes both "recreational and cultural-scientific facilities maintained for the benefit of residents and visitors." Natural Resources includes forestry, wildlife, soil conservation, and development of natural resources.
- **(6)** "Financial Administration:" Defined as "Officials and central staff agencies concerned with tax assessment and collection, accounting, auditing, budgeting, purchasing, custody of funds, and other finance activities."
- (7) "Judicial and Legal:" Defined as "Courts (criminal and civil) and activities associated with courts, legal services, and legal counseling of indigent or other needy persons." Would include State Attorney General and county Corporation Counsel offices.
- (8) "Other Govt. Admin. and General Public Buildings:" Combines two original Census categories. General Public Buildings accounts for 32% of the combined national total but 59% of the combined Hawai'i total in FY 2013. This involves construction and operation of multi-purpose buildings "not related to specific functions or agencies." Other Govt. Admin. includes legislative costs, mayors, governors, overall planning & zoning, central personnel administration, other generalized staff service agencies.
- (9) "Other & Unallocable; Misc. Commercial:" Combines two original Census categories. Other & Unallocable accounted for 96% of the combined national total and nearly 100% of the Hawai'i figure. Examples included lump-sum contributions for employee benefits, premiums for government-wide insurances, judgments and compensations for injuries, National Guard activities, economic development, job training and employment programs, central service agencies not otherwise counted (e.g., public works or motor pools), etc.

CONTINUED TECHNICAL/DEFINITIONAL NOTES

Categories "by Character and Object"

- (1) "Current Operations:" Defined as "Direct expenditure for compensation of own officers and employees and for supplies, materials, and contractual services except any amounts for capital outlay ... Includes repair and maintenance services ..."
- (2) "Capital Outlay:" "Direct expenditure for purchase or construction, by contract or force account, of buildings and other improvements; for purchase of land, equipment, and existing structures; and for payments on capital leases." This consists of (a) construction; (b) purchase of land and existing structures; and (c) purchase of equipment.
- (3) "Interest on Debt:" "Amounts paid for the use of borrowed money." Differs from functional category "Interest on *General* Debt" by being more inclusive i.e., General Debt plus debt associated with liquor stores, utilities, or insurance trusts. (Interest on general debt accounted for 87% of FY 2013 interest on total debt nationally [weighted average], 97% in Hawaii.)
- (4) "Insurance Trust Expenditures:" Defined as "Social insurance payments to beneficiaries, employee retirement annuities and other benefits, and withdrawal of insurance or employee retirement contributions. Includes only monies paid to beneficiaries; administrative expenditure for insurance trust systems is classified as current operations." The amount in these tables is the sum of four categories:
- <u>Unemployment Compensation</u> (21% of combined total nationally, 24% in Hawai'i in FY 2013);
- Public Employee Retirement Systems, excluding pay-as-you-go systems (74% of total nationally, 76% in Hawai'i);
- Workers' Compensation Systems, excluding pay-as-you-go or privatized systems such as Hawai'i's (3% nationally, 0% in Hawai'i);
- Other Insurance Trust Systems miscellaneous trusts in a few states for things like life insurance or disability programs (0% in Hawai'i).
- (5) "Assistance and Subsidies:" This small last category is omitted from Appendix C tables for reasons of space; it accounted for only 2% of FY 2013 Direct Expenditures nationally and 1% in Hawai'i. Examples include education grants and public welfare cash assistance programs.

APPENDIX D:

STATE AND LOCAL GOVERNMENT EMPLOYMENT AND PAYROLL DATA, FY 2014

- (1) All 50 States (excluding District of Columbia, including Hawai'i)
- (2) Hawai'i and "Comparable States"

TECHNICAL/DEFINITIONAL NOTES RELEVANT TO THESE TABLES: A complete list of definitions applicable to this survey may be found at https://www.census.gov/govs/apes/definitions.html . A few critical ones would include –

- (1) "Full-Time Employees:" "Persons employed during the pay period to work the number of hours per week that represents regular full-time employment. Included are full-time temporary or seasonal employees who are working the number of hours that represent full-time employment."
- **(2)** "Full-Time Pay:" "Gross payroll amounts for the one-month period of March [October in early 1990s] for full-time employees. Gross payrolls includes all salaries, wages, fees, commissions, and overtime paid to employees **before** withholdings for taxes, insurance, etc. It also includes incentive payments that are paid at regular pay intervals. It excludes employer share of fringe benefits like retirement, Social Security, health and life insurance, lump sum payments, and so forth."
- (3) "Full-Time Equivalent (FTE) Employees:" "... a computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the "part-time hours paid" by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.
- NOTE Caution on Extrapolating from Average March Payrolls to Annual Amounts: These may not convert to accurate annual amounts because of overtime, unusual situations (e.g., special events, natural disasters), and factors such as employees who are paid only during some parts of the year. It is rare to find that the March payroll figure from the Annual Survey of Government Employment and Payroll (shown in this Appendix D) equals or very closely approximates a state's total annual Salaries/Wages figure (shown in the preceding Appendix C). The March payroll does permit calculation of average worker monthly pay, but the Appendix C figure for annual payroll is probably the more reliable figure.

APPENDIX E:

STATE AND LOCAL GOVERNMENT DEBT, FY 2013

- (1) All 50 States (excluding District of Columbia, including Hawai'i)
- (2) Hawai'i and "Comparable States"

TECHNICAL/DEFINITIONAL NOTES RELEVANT TO THESE TABLES (from the most recent "Government Finance and Employment Classification Manual," downloaded May 2016 from https://www.census.gov//govs/local/).

Components of "Total Debt"

- (1) "Short-Term:" Interest-bearing debt payable one year or less from its date of issue. Includes obligations having no fixed maturity date (even where outstanding for more than one year if payable from a tax levied for collection in the same year it was issued)."
- (2) "Long-Term:" Payable more than one year from its date of issue, including those redeemable in less time under a "daily put option."
- (3) "Long-Term Debt for Private Purposes:" Credit obligations of government for funding private-sector activities, "...including debt that is backed solely by the private organization(s) whose activity is being financed. Examples of private sector activities funded [by governments] include industrial and commercial development, pollution control and abatement, housing and mortgage loans, private hospital facilities, student loans, private ventures such as sports stadiums, convention centers, and shopping malls."

APPENDIX F:

STATE AND LOCAL GOVERNMENT CASH AND SECURITY HOLDINGS, FY 2013

- (1) All 50 States (excluding District of Columbia, including Hawai'i)
- (2) Hawai'i and "Comparable States"

TECHNICAL/DEFINITIONAL NOTES RELEVANT TO THESE TABLES (from the most recent "Government Finance and Employment Classification Manual," downloaded May 2016 from https://www.census.gov//govs/local/).

- (1) "Cash and Security Holdings:" Definition "... covers cash on hand, demand or time deposits, savings accounts, government securities (of Federal, state, and local governments), and private securities (bonds, notes, mortgages, corporate stocks, etc.). Also included are loans and other credit paper held by government loan and investment funds." Additionally, "the concept includes cash and security holdings of the general government as well as of the government's utility, liquor stores, and insurance trust sectors." The definition for Census purposes focuses on "the most fluid types of assets governments own," and exclude real property, equipment, supplies, accounts receivable, and assets "held by private trust funds or by funds representing agency transactions (e.g., withholdings of employee Social Security taxes)."
- (2) Sub-Categories within "Insurance Trust Funds" (a) Employee Retirement System: Counted are values of corporate bonds, corporate stocks, all other securities and investments. (b) Unemployment Compensation: Includes Trust Fund Accounts in U.S. Treasury and "Other (Clearing and Benefit Accounts)," which can sometimes be negative during times of high unemployment ("where the state governments "borrow" from the Federal Government to cover extended or special benefit unemployment benefits"). (c) Workers Compensation: "...cash and securities of state-administered Workers' Compensation Systems ... from Workers' Compensation Systems recognized by the Census Bureau as dependent agencies of a parent state government" (does not exist in Hawai'i). (d) Miscellaneous/ Other Insurance Trusts: Must by systems "recognized by the Census Bureau as dependent agencies of a parent state government. Such systems do not exist in all states." (Hawai'i has none of these.)
- (3) Sub-Categories within "Other Than Insurance Trust Funds" (a) "Offsets to Debt:" Defined as "Cash and security holdings held specifically for debt service purposes interest payments and redemption of principal) on long-term debt, including those of utilities, regardless of debt purpose." (b) "Bond Funds:" "Cash and security holdings of accounting funds established specifically to hold proceeds of bond issues (and related revenues) pending their disbursement." (c) "Other:" "Cash and security holdings of funds and other accounts except those cited above, including utilities and liquor stores." Includes very long list of specific types, from cash on hand to stock, commercial paper, federal treasury notes, money market funds, mutual funds, savings accounts, time deposits, venture capital, etc.
